The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmad.
The Hon'ble Mr. Oldham.
The Hon'ble Mr. Baker.

Noes 7.

The Hon'ble Mr. Handley.
The Hon'ble Raja Bahadur Ranajit Sinha of Nashipur.
The Hon'ble Babu Jatra Mohan Sen.
The Hon'ble Babu Surendranath Banerjee.
The Hon'ble Mr. Apcar.
The Hon'ble Mr. Bolton.
The Hon'ble Mr. Slack.

So the amendment was carried.

SECTIONS 230 AND 232.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 220T, clause (*a*) [*now* section 230, clause (*b*)], the words "and enclosing the sum demanded" be omitted.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA also moved that in section 220T, clause (*b*) [*now* section 230, clause (*c*)], after the word "and" be inserted "after depositing the amount demanded."

The Hon'ble Dr. Asutosh Mukohpadhyaya also moved that to section 220T (*now* 230) the following be added :—

"(*c*) or pay the sum demanded, together with any costs incurred under section 220C (*now* 214)."

The Hon'ble Dr. Asutosh Mukhopadhyaya also moved that in section 220V (*now* 232), line 3, for the word "either" the word "any" be substituted, and that the words "and has not paid the whole amount of the demand" be omitted.

He said:—"These amendments, Sir, have been suggested principally because it was not without considerable difficulty that I could make out the object of the section as it stands. It seems to be a new section, and I merely try to give effect to what appears to be the possible intention of its framers. Section 220T (*now* 230) contemplates two alternatives, namely, the defaulter may either elect to be prosecuted or contest the demand; but section 220V (*now* 232) shows by implication that there may be a third alternative, namely, the defaulter may pay up the demand. If so, all the three alternatives ought to appear in proper order in the earlier section. In the next place, it seems to me somewhat anomalous that, if a man elects to be prosecuted, he must, as a condition precedent, enclose the full amount demanded; for, whether he pays or not, he has rendered himself liable to prosecution. On the other hand, it seems desirable to insist on a deposit where the defaulter chooses to contest the demand; this would discourage frivolous objections, and would render a prosecution unnecessary when the objections are over-ruled."

The Hon'ble Mr. Baker said:—"It is rather awkward that these three amendments have been taken together, because the first two, to my mind, stand on an entirely different footing from the third. I will deal with the first two to begin with; and I object to these for this reason: I think that they will encourage people to elect to be prosecuted rather than to appear before the Chairman and contest the demand. We know that in the past, when prosecutions have been the only means of recovering these municipal dues, the whole of the work connected with the license-tax and the horse and carriage tax has got into very great confusion. It has been the law hitherto that these taxes could only be collected through the agency of the Criminal Courts. I must say that the Criminal Courts are a most inappropriate agency for collecting municipal dues, and how that law came into existence I cannot understand. We have endeavoured in this section to make criminal prosecutions as unpopular as possible. Therefore we provide that, if the defaulter elects to go before a Magistrate, he must have in the first instance deposited the amount. That applies to both the first two amendments. We only provide that money must be deposited in the event of a man electing to be prosecuted. The Hon'ble Member wishes to do exactly the reverse, that is, he would not require a deposit if the defaulter elected to be prosecuted, and he would require a deposit if the defaulter elected to go before the Chairman. Then, as regards the third amendment, the Hon'ble Member is quite right in saying that this provides a third alternative, but the intention of the section is that this third alternative shall exist all the time. My own feeling is that the Hon'ble Member is right and that it is desirable expressly to include this third alternative in the section. The three alternatives would therefore be that a man may elect to be prosecuted, or he may appear before the Chairman and contest the demand, or he may pay up the demand. That is what is intended, and that is what the Secretary says is the effect of this section. My opinion is that it would be better to express the third alternative more clearly, but as it is a matter of drafting I do not feel justified in opposing the expert opinion of the Secretary."

The Hon'ble Mr. Bolton said:—"I would point out that the words 'elect to be prosecuted' are very unusual. The law cannot consistently declare a man liable to prosecution and at the same time permit him to 'elect' whether he shall be prosecuted."

The Hon'ble Mr. Baker said:—"We give him the power to elect to be prosecuted. Under the provisions of section 220S (*now* 229) the Chairman has the power to prosecute in any case."

The Hon'ble MR. BOLTON said:—"Yes, but 'intimate that he will await a prosecution' would be an improvement."

The Hon'ble THE PRESIDENT said:—"I have consulted the Secretary; and he says that there will be no objection to place a third alternative in the manner suggested, and I think it is desirable to put that alternative as much in the forefront as possible and to alter the sections accordingly."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"That will, to some extent, meet my views. There is one point which I am bound to say has been completely overlooked. In one respect clause (*a*) [*now* (*b*)] is really inconsistent with section 606 (*now* 578), sub-section (2) of which provides that 'such fine when levied shall be taken in full satisfaction of the demand on account of such license.' Surely it is not intended that a man should pay up the money under this clause, then elect to be prosecuted, get himself fined and pay the fine in satisfaction of the demand. You cannot make him pay twice, once in the shape of a deposit and a second time in the shape of a fine."

The Hon'ble MR. BAKER said:—"The fine must be more than the tax."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"Why do you make him deposit the amount of demand?"

The Hon'ble MR. BAKER said:—"To discourage prosecutions."

The Hon'ble THE PRESIDENT said:—"The deposit will be taken as part of the fine."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"It ought surely to be, only it is not so stated. I cannot believe that it was ever intended that he should be made to pay twice."

The Hon'ble MR. BAKER said:—"I have no objection to that being made clear, that the amount paid in is to be taken as part of the fine."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"The deposit should be set-off against any fine levied under section 606 (*now* 578)."

The Hon'ble THE PRESIDENT said:—"It would be clearer as a clause to section 606 (*now* 578), I think."

The Hon'ble MR. BAKER said:—"I will consult the Hon'ble Member after Council, and we can settle the matter then."

The further consideration of these amendments was then postponed.

NEW SECTION.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the following be inserted after section 225B (*now* 242):—

"It shall be the duty of the Chairman to test the purity of the supply of filtered water once every week and to lay the result before the General Committee."

He said:—"I am perfectly certain my hon'ble friend will sympathise with this amendment. It is a question which affects the purity of the water-supply. The water-supply ought to be tested and the result ought to be laid before the General Committee, and the people of Calcutta ought to know the character of the water they have to drink."

The Hon'ble MR. BAKER said:—"It is already provided for in section 590, clause (5) [*now* section 559, clause (6)], which enacts that the General Committee may make bye-laws for directing and regulating the purity of filtered water."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"I do not think it is provided for. The General Committee may order that the water should be tested once month. It is too important a matter to be left to the discretion of the General Committee. I cannot see what possible objection my hon'ble friend can have to the water being tested once a week. I remember perfectly well, Sir, that there was a time when the water was tested every week by the analyst to the Corporation, and the results were laid before the General Committee. That practice has unfortunately been discontinued, I am sory to say, and it ought to be revived as a matter of statutory obligation. It ought not to be left to rules and bye-laws."

The Hon'ble Mr. Baker said:—"I may remind the Hon'ble Member that bye-laws are submitted to the Corporation for sanction."

The Hon'ble Mr. Buckley said:—"I think it is desirable that the water-supply should be tested once a week."

The Hon'ble Mr. Apcar said:—"Sir, if there is a feeling that it is advisable to have this test once a week, surely we ought to have a provision to that effect."

The Hon'ble Mr. Mackenzie said:—"As regards the testing itself, Sir, I would be prepared to go even further than the amendment and say that the test ought to be made every day. It is, however, in my opinion a matter that ought to be left to the discretion of the General Committee."

The motion being put, the Council divided as follows:—

Ayes 10.

The Hon'ble Mr. Buckley.
The Hon'ble Mr. Handley.
The Hon'ble Raja Bahadur Ranajit Sinha, of Nashipur.
The Hon'ble Babu Jatra Mohan Sen.
The Hon'ble Babu Boikanta Nath Sen.
The Hon'ble Babu Surendranath Banerjee.
The Hon'ble Mr. Apcar.
The Hon'ble Dr. Asutosh Mukhopadhyaya.
The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
The Hon'ble Mr. Slack.

Noes 8.

The Hon'ble Mr. Buckland.
The Hon'ble Rai Durga Gati Banerjee, Bahadur.
The Hon'ble Mr. Mackenzie.
The Hon'ble Mr. Spink.
The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmad.
The Hon'ble Mr. Oldham.
The Hon'ble Mr. Baker.
The Hon'ble Mr. Bolton.

So the amendment was carried.

Section 246.

The Hon'ble Raja Ranajit Sinha Bahadur of Nashipur moved that the words "and watering roads and gardens" be inserted after the word "drains" in line 1 of clause (*ii*) of sub-section (*2*) of section 225E (*now* 246).

He said:—"There are many houses, especially in the southern part of the town, with small compounds attached to them. In the said compounds there are small roads for the entrance and exit of carriages, and small gardens attached to them. I don't think that it is reasonable for us to tax the owners or occupiers for the small quantity of unfiltered water required for watering these roads and gardens, especially where the occupiers or owners do not consume the full quantity of water allowed to them under the law."

The Hon'ble Mr. Baker said:—"The question in regard to this matter is whether people should be allowed to use the unfiltered water for their gardens and compounds without paying for it. The present practice is that they pay for it, and, if the amendment were adopted, the Corporation would lose some revenue. I do not think the Hon'ble Member has made out any case for this change."

The motion was then put and lost.

SECTION 248.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the word "five" be substituted for "four" in line 4 of section 226 (*now* 248).

He said:—"Instead of 4,000 gallons per day, I beg to recommend that every person paying the water-rate should be permitted to have 5,000 gallons of filtered water for every rupee of the water-rate. I may say—and it is my duty to put it on record—that in the original Bill the amount to be supplied was not 4,000 gallons but 3,000 gallons; and, as a result of the discussion we had in Select Committee, the quantity was raised to 4,000 gallons. I thankfully accepted that, but, Sir, it is not enough, and there is no reason why the rate-payers should not get water at the rate of 5,000 gallons per rupee. I have been making enquiries, and I find that the cost price of 1,000 gallons is about 10 pice, so that for a rupee you would get more than 6,000 gallons of water. I do not want to put it so high as that. I wish to give to the rate-payers, whose money has made the water-works, only 5,000 gallons of water, and not 6,000 gallons, to which indeed they are entitled at the cost price. Then, Sir, there is this consideration. You treat the rate-payers, even after the concession you have made, exactly in the same way as you treat outsiders. We supply water to the Barrackpore Cantonment at the rate of 4 annas for 1,000 gallons, that is, 4,000 gallons to the rupee, and you propose to supply the rate-payers of Calcutta at the same rate. I don't think, Sir, the rate-payers of Calcutta ought to be treated in exactly the same way as the people of Barrackpore. I think a larger supply ought to be given to them. If we can sell water to the people of Barrackpore at the rate of 4,000 gallons per rupee, I am not making an exorbitant demand when I ask that the rate-payers of Calcutta should receive 5,000 gallons for the rupee. They would be entitled to 6,000 gallons, but I do not want to put it so high. I would be content with a rate cheaper than the rate at which water is supplied to the Barrackpore Cantonment, but below what the rate-payers would be entitled according to the cost price. I am perfectly certain the Council will be in strong sympathy with my proposal. I may say, Sir, that there is a very strong feeling about this amendment. I think, if my hon'ble friend refers to the numerous representations made to him, he will find that in the opinion of the rate-payers generally the question of water-supply is the most important question raised in this Bill next to that of the constitutional clauses. As Your Honour's Government has not been able to meet the wishes of the people in regard to the constitutional clauses, I ask that, as a small concession, they may be allowed this increased supply of filtered water."

The Hon'ble RAJA RANAJIT SINHA BAHADUR OF NASHIPUR said:—"I have an amendment on the paper, Sir, which is identical with that which has just been moved by my hon'ble friend, and so I beg that they may be considered together. From what has fallen from my hon'ble friend, Babu Surendranath Banerjee, there remains very little for me to add. In one Hindu family there live several distantly related dependents, and the Hindus cannot move an inch in their daily household business without water; so they will feel much if water-supply is so restricted."

The Hon'ble Mr. BAKER said:—"I am in entire sympathy with the Hon'ble Members in their desire to get the largest possible supply of filtered water for the people of Calcutta. The filtered water-supply is one of the greatest boons which have ever been conferred upon the city. But this matter has to be looked at from two points of view. It must be looked at not only from the point of view of the rate-payers who receive the water, but also from the point of view of the Corporation who have to supply it; and I am afraid, Sir, my Hon'ble friend has looked at the matter solely from the point of view of the public, and left the point of view of the Corporation out of sight. I think, Sir, we are all agreed that the object to be aimed at is to fix the statutory supply of water at the highest possible figure consistent with a reasonable margin of safety. Now, Sir, the Hon'ble Member said that the actual cost is

about 6,000 gallons to the rupee. It is, as a matter of fact, about 6,300 gallons to the rupee. These figures we obtain in this way. The daily supply is $20\frac{1}{2}$ million gallons; the total amount of water-rate is about $11\frac{1}{2}$ lakhs. Dividing one figure by the other, you get about 6,300 gallons for every rupee. At first sight then, it looks as if the Hon'ble Member is right, and that it would be possible to give the rate-payers a statutory supply of 6,000 gallons for every rupee; but there are two reasons which make it impossible to do so consistently with safety. When we say that the daily supply is $20\frac{1}{2}$ million gallons, it means that that is the quantity of water registered at the pumping stations. The way in which the water is registered there is this: We know exactly the capacity of the pumps; we know exactly the amount of water raised by each stroke of the engines; and we obtain the total quantity of water raised by multiplying that capacity by the number of strokes. Now, Sir, if our whole system of mains and pipes and fittings were absolutely perfect, then the total quantity of water registered in one day would accurately represent the quantity of water which passes into consumption in the houses of the people. But, unfortunately, our system of mains and reservoirs and pipes and fittings is very far indeed from being perfect; in fact, it is very faulty. What the amount of the leakage is will, I fear, never be known until some system like that which they have in Liverpool, or Deacon's waste-water meter system, or some other system of that description, is introduced into Calcutta. A puncture in a pipe, about the size of a pin's head, will allow 100 gallons of water to run to waste in 24 hours. Mr. Hughes told Mr. Buckley and myself, in one of the numerous conferences we had with him on this subject, that he would not be surprised to hear that one-third of the whole amount of water never reached the houses of the people at all. It runs away to waste at the innumerable leaks all over the system. I don't wish to overstate the case; so I would take the leakage at one-fifth of the whole. I understand Mr. Buckley will bear me out in this. If you therefore take one-fifth from 6,300 gallons, it leaves you only 5,040 gallons. That is a very small margin in excess of what the Hon'ble Member wants, and for this reason alone it would not be safe to allow 5,000 gallons per rupee.

"But there is another reason also. The statutory supply which we propose to make in this section is a general all-round average rate. It represents the quantity of water we can supply throughout the town if everybody were to receive his proper quantity of water, neither more nor less. But there are a number of houses which receive far more than their statutory supply. Taking the average of the town and the suburbs together, I think the average supply is about 31 gallons per head per day. In the town proper it is about 38 gallons and in the suburbs it is between 11 and 12 gallons. In some parts of the northern quarter of the city the consumption in some of the houses rises as high as 70 gallons a day. Now, so long as that is the case, so long as it is impossible to put an end to this state of affairs, it is evident that many of the people in other parts of the town must be content with a smaller quantity than the supply allotted to them under the Act. Therefore, it is impossible for us to stipulate that every person shall receive the full all-round average rate. On account of this we propose to deduct 1,000 gallons per rupee, in order to allow a margin of safety, and this brings us from the 5,040 gallons to 4,000 gallons which we provide for in the Bill.

"I will only add, Sir, that the Hon'ble Members may rest assured that the rate-payers will not receive one single pint of water less under this enactment than they would if the amendments of the Hon'ble Members were accepted. It is the strongest wish of everyone connected with the Corporation to extend and improve the supply of filtered water throughout the town, and we shall gradually work up, I hope, to a continuous and unlimited supply in the future."

The Honble Mr. Buckley said:—"Sir, I should be very glad if I could support the amendment of the Hon'ble Babu Surendranath Banerjee. I entirely sympathise with his wish to give as much water as possible to the people. Mr. Hughes went very fully into this question and made out a case even stronger in some respects than that of my hon'ble friend himself. Mr. Hughes,

by a calculation which he made, came to the conclusion that the water could be delivered in the town at cost price at the rate of about 8,000 gallons to the rupee, provided that the profits made by sale of water were deducted from its cost price. Mr. Hughes thought the really equitable and proper way was to have a sliding scale which he worked out with considerable care and trouble. This sliding scale provided for only 1,500 gallons to each rupee of water-rate in some cases of large houses and for as much as 5,000 gallons for the value in small ones; but this would not be a workable arrangement. The Hon'ble Mr. Baker has put this case so excellently that he leaves me but little to say, but I would support the main reason he put forward why it is impossible to give these 5,000 gallons per rupee. It is in consequence of the great loss of water between the pumps and the houses. I do not suppose that the Municipality of Calcutta have the slightest idea of the amount of waste which goes on. We hear a great deal of the waste of water in Calcutta, and no doubt the waste is gross. When we speak of that waste we generally have in mind the many leaking taps which probably every gentleman in this room has in his own house. I know I have them in mine. But the amount of leakage which goes on between the pumping stations and the houses is also, most probably, enormous. As the Hon'ble Mr. Baker has said, the water-works in Calcutta, are old and in some cases are defective. I have here a report laid before the Institution of Civil Engineers within the last few years. Speaking of the water-works in England, it says that the waste of water in the main and connections before the water is drawn off at the taps amounts in many water-works to one-half of the original supply. Now, I don't think that is true in Calcutta. I don't think the loss here is as great as that; but it is very large. Sir Frederick Bramwell, who made investigations into this matter, arrived at the conclusion that in many cases of large water-works the amount of water actually drawn off at the taps for consumption was not more than one-third of the entire original supply. There is no question whatever that the loss between the pumps and the houses is very great, and it is not possible to deliver water in the houses at the price which it may be proved to cost at the pumping stations. Now, Sir, this Bill introduces a great change in the water-works of Calcutta, and when that change has been fully established, and the enormous improvement which it must undoubtedly effect has been carried out, it may be possible that the Hon'ble Member will get his 5,000 gallons to the rupee. But if Hon'ble Members will study this Bill, they will see that great care has been taken to lay down a stipulation that these alterations are to be introduced gradually during a long series of years—seven years I think it is. I won't detain the Council by stating what the reason for this stipulation is. I will only say that it is a very good reason. I am perfectly certain that if this amendment is carried now, and the 5,000 gallons per rupee is made a statutory allowance which everybody may have a right to demand, there will be some people in the town who will not get half what they are entitled to, and I believe there are many now who will not get 3,000 gallons for each rupee of water-rate paid by them. If the statutory allowance be raised to 5,000, I believe the Municipality would find great difficulties in meeting demands for water. There are other reasons, and one is that this new system of continuous supply will cost more money, and there is also one other reason that there is no question whatever (looking to the experience of the many towns in England which have gone through the change now going to be introduced in Calcutta) that the quantity which may be consumed in Calcutta itself, without detracting in the least from the needs of the people, will, be very largely reduced indeed, and consequently the cost per 1,000 gallons may be increased. I strongly advise the Council to reject the amendment."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"I am grateful to the Hon'ble Member in charge of the Bill and to my hon'ble friend opposite. Mr. Buckley, for the sympathy they have expressed with my amendment, I can assure the Council that there is a very strong body of public sentiment behind the amendment I have laid before the Council. My hon'ble friend has observed that I have approached the question not from the point of view of the Corporation, but from the point of view of the rate-payer. Sir, I do approach the question from that standpoint. I am first a citizen and then a

member of the Corporation. Whatever impulses I may have as a member of the Corporation, they are nothing as compared to my impulses as a citizen of the great Indian community to which I have the honour to belong. And, Sir, while I have listened with the greatest possible respect to the statements made by the two Hon'ble Members who preceded me, those statements have not convinced me that I was wrong and that they are right. The great difficulty, so far as I can gather, is that we lose a great quantity of water by leakage, and that people in some parts of the town use much larger quantities of water than they are entitled to use. Then, Sir, Mr. Hughes comes upon the scene, and he says that at the cost price the people of Calcutta would be entitled to 8,000 gallons of water to the rupee. Can anybody approximately tell us what the leakage is? Can anybody tell us what the amount of water is that is wasted by people in the town? No definite statements are put forward, but vague allegations are made; and upon those vague allegations we are called upon to withhold from the people of Calcutta the great boon for which they cry at the hands of this Council, namely, that they should be supplied with water at the rate of 5,000 gallons a day. I say you have not been able to make accurate calculations; you have not got the data for making accurate calculations; and yet, upon vague calculations, you are prepared to refuse to the people of Calcutta the great boon which they are entitled to receive at your hands, *viz.*, a larger quantity of water than what they now receive. If you had facts and figures which could be scrutinized, I would accept your conclusions, and I would ask my constituents to accept those conclusions. I could tell them that we cannot grant their prayers in this matter; it is perfectly impossible for the Government to grant them. But, Sir, you have not been able to give us any specific facts beyond these general statements. Sir, I desire to carry the point a little further. My hon'ble friend Mr. Buckley has said, and I think he has made the statement more than once at meetings of the Select Committee: 'Give the people of Calcutta a continuous supply of water, and then there will be less waste.' I think I am right in that statement.'"

The Hon'ble Mr. Buckley said:—"Certainly."

The Hon'ble Babu Surendranath Banerjee said:—"My hon'ble friend in charge of the Bill was good enough to lay a statement before the Select Committee, in which he proved that wherever a system of continuous supply has been introduced it has led to a considerable saving of water. That is the statement upon which I take my stand. Therefore, Sir, we have this principle of continuous supply and no waste. I think, Sir, I am right in inferring as a corollary to that principle that, if we have a larger supply, the waste will be less than at present. If a continuous supply means no waste, a larger supply means less waste. Therefore, if instead of 4,000 gallons we give 5,000 gallons, there will be less waste. I think I am entitled to that conclusion. Then, Sir, the people of Calcutta will find that the Government has made an effort to comply with their wishes in this respect. And I am perfectly certain the leaders of the community—if only as a recognition of this concession—would co-operate with the Corporation and the Government to see that there is no waste of water in Indian houses. Therefore, Sir, if it is proved that continuous supply means a saving of water, then I am entitled to hold that, if you give the people 5,000 gallons, there will be a saving in waste. I am bound to say that in my opinion there is considerable exaggeration with regard to the waste of water in Indian houses. That there is waste I do admit, but I am afraid there is a considerable measure of exaggeration with regard to what that waste is; and where you have no definite facts you are liable to be carried away by exaggerated statements. If that be so, we ought not to legislate, so to speak, in a panic upon the basis of exaggerated statements and withhold from the people of Calcutta the boon which I am perfectly sure Your Honour's Government is anxious to grant them. I wish my hon'ble friend would get rid of those apprehensions which he has derived from consultation with the municipal executive. People in their responsible positions are apt to be cautious, and I respect their caution; but we as legislators stand outside the particular grove and the particular sphere in which they are accustomed to move. We ought to take a wider view of the

situation, we ought to be able to sympathise with a public grievance, and not to tender our consciences to their keeping. We should rather exercise an independent judgment in regard to those conclusions which they desire us to accept. I ask the Council not to be led away by the exaggerated fears of the municipal executive. I ask the Council to take note of their apprehensions, but to judge the matter independently, having regard to their wider knowledge and their deeper sympathies. I trust, Sir, that Your Honour's Government will see its way to accept the amendment."

The motions being put, the Council divided as follows:—

Ayes 7.	*Noes 11.*
The Hon'ble Rai Durga Gati Banerjea, Bahadur.	The Hon'ble Mr. Buckley.
The Hon'ble Raja Bahadur Ranajit Sinha, of Nashipur.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Handley.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Mackenzie.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Mr. Spink.
The Hon'ble Mr. Apcar.	The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr. Oldham.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendment was lost.

The Hon'ble Dr. Ashutosh Mukhopadhyaya moved that in section 226, (*now* 248), line 4, the words "not more than" be omitted.

He said:—"I hope, Sir, that the Hon'ble Member in charge of the Bill will be reasonable enough to accept this amendment. I was listening with great attention to the debate on the last two amendments, and they seemed to me to be so absolutely harmless from every point of view, certainly from a practical point of view, that I thought the Hon'ble Member in charge of the Bill would accept them. It would not matter in the least whether instead of 4,000 gallons you put in 5,000, or 10,000, or 20,000 in the section as it stands. Let us read the section:—

'Subject to the provisions of section 26·C (*now* 283), the occupier of every building connected with the water-supply shall be entitled to have, free of further charge, *not more than four* thousand gallons of filtered water for every rupee paid to the Corporation as water-rate on account of such building, together with a sufficient supply of unfiltered water for flushing privies, urinals and drains, and for cleansing stables, cattle-sheds and cow-houses occupied by animals which are not kept for profit or hire.'

"It is clear, therefore, that the Corporation is under a statutory obligation to supply not more than 4,000 gallons of filtered water. What difference would it make to the Corporation if we solemnly declared that their statutory obligation was to supply not more than ten thousand gallons? Manifestly none whatever, so long as a minimum is not fixed. It seems to me, therefore, that the fight so long was about a mere shadow. Now let us look to the existing law, which you will find embodied in section 155 of the Act of 1888. Curiously enough, the words 'not more than' are not to be found there, and the Corporation is under a statutory obligation to supply three thousand gallons, neither more nor less. Under the new law, the Corporation will be under no obligation whatsoever; even if a single gallon is supplied, there will be ample compliance with the letter of the law. I quite agree with the Hon'ble Member in charge of the Bill that there are two sides to this question—the Corporation's point of view and the rate-payers' point of view, and I can very well understand that the words 'not more than' have been inserted from the Corporation's point of view; but at the same time I urge that, from the rate-payers' point of view at least, a minimum ought to have been fixed; it would certainly have been far more satisfactory if the section had provided that 'not more than 4,000 and not less than 3,000 gallons of filtered water is to be supplied.' If it is intended that 4,000 gallons of water should be supplied, and if it is possible to supply

that quantity, the words 'not more than' are superfluous. If it is suggested that even so much as 4,000 gallons cannot practically be supplied, but only 3,000 gallons can be supplied, let us have the law as it now stands. I would without hesitation prefer 3,000 gallons to 'not more than 4,000 gallons,' which, in its beautiful vagueness, may mean anything from one to four thousand gallons.'

The Hon'ble MR. BAKER said:—"I think my reply to this will have been anticipated from what I said just now. These words are put in in order to protect the interests of the Corporation. We cannot undertake under the present defective system to give the full supply to everyone. We should be able to give everyone 4,000 gallons if everyone took what he was entitled to or approximately so; but, as I said just now, that is not the case. The actual supply obtained in different houses in different parts of the town varies very widely. In the suburbs many people get only 10 to 11 gallons per head, and the average in the suburbs is only 11¼ gallons per head per day. If we do not put in these words to safeguard the interests of the Corporation, there will be danger that the Corporation will be made liable for damages by disappointed rate-payers in the suburbs. That is the sole object with which these words were inserted."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said:—"I confess, Sir, that the attitude of my hon'ble friend has completely surprised me. Protect, if you like, the interests of the Corporation, but what possible justification have you for this total, absolute sacrifice of the interests of the rate-payer? Surely, if a maximum is fixed for the protection of the one, a minimum should be fixed for the protection of the other; if the rate-payer is not entitled to ask the Corporation to supply more than a fixed quantity, the Corporation, in its turn, should be bound to supply not less than a minimum quantity. Nothing can be more rational, and I venture to affirm that no sufficient reason has been suggested by the Hon'ble Member in charge of the Bill why the existing law should be changed in this arbitrary and quixotic fashion. My hon'ble friend, Babu Surendranath Banerjee, gratefully acknowledged that this was an advance upon the old law; but it seems to me to be a delusion. The existing law fixes a minimum of 3,000 gallons, and makes it obligatory upon the Corporation to furnish at least that quantity for every rupee of tax paid. The new law will lay the Corporation under no such obligation; the tax-payer continues to be under an obligation to pay the water-rate, but he has no longer any corresponding rights. I affirm without the least hesitation that the new law is distinctly retrograde in this particular, and those that have eyes to see will not be slow to perceive that it is a move in the wrong direction and entirely sacrifices the interests of the rate-payer."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I am not prepared to accept that view of the matter at all. I should be glad if a minimum were fixed, and my hon'ble friend may not remember it, but 'not more than' was fixed as the result of a compromise. The Hon'ble Member would not on any account give us more than 3,000 gallons, and then he gave us 4,000 gallons, subject, however, to the condition referred to. I should welcome a minimum of 3,000 and not more than 4,000, but I am under no delusion with regard to the matter. I am in the full possession of my senses at any rate so far as this particular section of the law is concerned."

"The Hon'ble MR. BAKER said:—"Four thousand gallons is a maximum to be steadily worked up to. That is how the 3,000 gallons has been treated under the existing law. As a matter of fact, many people have not received 3,000 gallons under the present Act."

The motion was then put and lost.

The Hon'ble BABU JATRA MOHAN SEN moved that the following proviso be added to section 226 (*now* 248), namely:—

"Provided that no occupier or occupiers of any building shall be liable to any further charge unless the supply exceeds fifteen gallons *per* head *per diem*."

He said:—"I should like, with Your Honour's permission, to add these words: namely, 'of the inmates of such building,' after the words 'per head' in my proposed amendment, the amendment running as follows:—

'Provided that no occupier or occupiers of any building shall be liable to any further charge unless the supply exceeds fifteen gallons per head of the inmates of such building per diem.'

"The reason why I have proposed this amendment is that it is difficult to sell water at so many gallons per rupee to the people, although, according to the calculation of expenses of supplying water and the taxes, a minimum of 4,000 gallons has been fixed; but it would be difficult to carry this out practically. We are all aware that the middle class of people pay moderate water-rates, but their demand for water-supply is great. They live in small houses with large families, and they require more water. The richer people probably pay larger rates and do not require so much water, because they can afford to live in comfortable houses and pay larger rates, and their families may not be so large as to require the maximum quantity of water that they are entitled to under this section. Therefore, when a further charge is going to be made for larger supply, I think it would be very hard upon the poorer classes, and I think I express the feelings of the richer class if I say that they would not object to their poorer neighbours getting more water than they are entitled to at their cost because they do not require as much water as they pay rates for. The Hon'ble Member in charge of the Bill has said that the least quantity of water consumed by an individual is 11 or 12 gallons. Therefore, when I fix 15 gallons per head, it is, I think, a clearly moderate demand. I am sure this proviso will not in any degree tend to bring any loss upon the Municipality in this matter. It is well known, Sir, that in India, and especially in Calcutta, the demand for water is very great, and the Hindus require a large supply of water, and it is not unknown that there are many members of a family who bathe twice daily. Therefore, 15 gallons of water, which will be a little over three *kulsees* of water per head, is not, I think, very large. With these observations I would recommend this proviso for acceptance by the Council."

The Hon'ble Mr. Baker said:—"The modification which the Hon'ble Member has now made in his amendment makes it a little more definite than it was before. As it originally stood, I was unable to make out what the actual meaning of it was. Now I understand that the occupier is not to be liable for any further charge unless the supply exceeds 15 gallons per head of the inmates of the house. The Hon'ble Member, in the first place, spoke about poor people living with large families in small houses and requiring a great deal of water, and he said it would be a hardship to them if they had to pay more for the excess water which they use. The Hon'ble Member seems to think that water is given to them as a charity, or that it should be so given them. That is not the position at all. People are entitled to the water they pay for, neither more nor less; and no man has any sort of right to expect a larger supply of water merely because he is poor, or, least of all, merely because his family is large. Has the Hon'ble Member really considered what the effect of the amendment would be? I will give an instance. Take the case of a man with his wife and three children living in a house and using exactly their 15 gallons of water per head per day. They would not be bound to pay any additional penal rate. Now suppose one of those children dies and the family goes on using the same quantity of water as before? Does the Hon'ble Member intend that thereupon that family should become liable to pay an additional rate? I can hardly think that that was his intention, but that is the direct effect of his amendment. Take another case. Suppose that this man, his wife and three children are living in a house, and they are using more water than they are entitled to and were being charged for it. Suppose a baby was born in the house, and the addition of that child, which used no water at all, raised the supply to which the occupier was entitled under this clause to more than he was actually using. Would therefore the family cease to be liable to pay that additional rate? I am quite certain no such system could possibly be worked by which the supply of water to which people are entitled shall be made to depend upon accidents of this kind—accidents which happen from day to day,

and of which the municipal authorities can never possibly get information. The whole amendment is absolutely impracticable to my mind, and I cannot imagine any means by which it could be worked."

The Hon'ble MR. BUCKLEY said:— "I quite agree with the remarks which have been made by the Hon'ble Member in charge of the Bill that this amendment is absolutely impracticable. It could not possibly be worked in practice. But I do not think any gentleman need be afraid. I have not the slightest doubt that when the system of continuous supply is established in town, everybody will be able to get easily all the water they want. There is no necessity whatever to include this stipulation in the Bill."

The Hon'ble BABU JATRA MOHAN SEN, in reply, said:— "I beg to offer one observation in answer to the Hon'ble Member in charge of the Bill. The illustration which he gave of a member being born in a family or a member dying does not, I submit, affect my amendment. My amendment says that the water-supply is provided in the section itself, and, if further charge is going to be made, in that case only a calculation will have to be made as to whether a member has not consumed more water than 15 gallons per head. That is all. He will not be deprived of the water that he is entitled to under the section, but a further charge should be made if he has consumed more water than 15 gallons per head."

The motion was then put and lost.

SECTION 251.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 248 (*now* 251), line 7, after the word "owner" the words "but not recover from him otherwise" be inserted.

He said:—"Section 248 (*now* 251) provides as follows:—

'If any owner upon whom a notice has been served under section 247 (*now* 250) does not, within one month from such service, cause such necessary works as aforesaid to be completed, the occupier who gave the notice may cause the works to be provided or completed, and may deduct from the rent payable by him to such owner the expenses incurred by him in respect of such works, except so much of such expenses as may have been incurred under the circumstances mentioned in clause (*b*) of the said section 247 (*now* 250).'

"Section 247 (*now* 250) entitles the occupier of a masonry building to call upon the owner to provide all necessary works for bringing into the premises a supply of filtered water. If such requisition is not complied with, the occupier is himself entitled to have all the necessary works executed under section 248 (*now* 251), which further provides that he is entitled to deduct from the rent payable by him to such owner the expenses so incurred. I venture to suggest that this should be the only mode of recovery left to him; in other words, that he should be in a position to set it off as against the rent payable by him to such owner, but should not recover the amount from him otherwise. The object I have in view is the protection of the landlord. When such an occupier has called upon the owner to provide all necessary works for bringing into the premises a supply of filtered water and upon failure of the owner to carry out such requisition has himself incurred the expense, he should remain on the premises long enough to enable him to set off the expenses incurred against the rent, otherwise it might so happen that to suit his convenience he might leave the house shortly after, and then sue the owner to recover these expenses. I do not think that would be at all fair. Section 248 (*now* 251) gives a distinct advantage to the occupier; it enables him to execute the work himself and to deduct the expenses from the rent payable; it would be only fair to the owner to fence this in by a limitation in his favour, for he is justly entitled to claim that the tenant should remain long enough in the house to enable him to realize the amount he has spent."

The Hon'ble MR. BAKER said:— "I have no strong opinion about this amendment one way or the other, but it seems to me a little doubtful whether we should act rightly in withdrawing the legal power which the occupier

would have to recover this money in the ordinary course of law from the owner. It might happen that his tenancy came to an end not through any bad faith on his part, but owing to a cause over which he had no control, and for which he could not be responsible; and in that case I think it might be really hard upon him if he was not allowed to recover the money which he spent in making the house-connection. In that case it seems to me that the owner would get the benefit of the money spent by the occupier for nothing, and I am not sure that that result would be equitable. Still, as I have said, I have no strong opinion on the subject one way or the other."

The Hon'ble Mr. Bolton said:—"I oppose this amendment, because the presumption is that the occupier will, in his own interest, continue to occupy the house for the period requisite for the full recovery from the rent of the amount chargeable to the landlord for this improvement. If, on the other hand, the occupier is compelled to leave the house by circumstances over which he has no control, the landlord would benefit at his expense through his inability to recover the amount still due to him by recourse to a suit. Any improvement made in consequence of a requisition of the occupier under this section is a permanent improvement of the tenancy, and a permanent addition to its value, which benefits the landlord. The provision is, finally, one of conservancy, and specially desirable on that ground. It is clearly advisable for the general health of the town that house-connections with the filtered water system should be as numerous as possible."

The Hon'ble Mr. Oldham said:—"I agree with the amendment, and I think the only argument against it is that suggested by Mr. Baker, but I also think that the occupant in such a case should take into account the precariousness of his position before he subjects the owner to what may be considerable expense."

The Hon'ble Babu Boikanta Nath Sen said:—"I cannot support the amendment for reasons which I beg to state. In the first place, it would be taking away the general right of a person to recover his money by resort to the ordinary course. This provides simply a summary remedy, as it were, by withholding payment. In the next place, it may be that the work which would have to be done may be for a large amount, and he may have to wait for a long time to get himself recouped by withholding payment of the rent. Why should he be deprived of getting the amount spent as speedily as can be done? No interest can be charged for the amount, and that is another consideration. For these reasons I am sorry I am unable to support the amendment."

The Hon'ble Dr. Asutosh Mukhopadhayaya, in reply, said:—"There seems to be some misapprehension in this matter: section 248 (*now* 251) gives an exceptional right to the tenant which he does not possess under the common law. If a tenant who is in occupation makes any improvement for his own benefit, under the common law, he is not entitled to charge his landlord with the expenses. I was, therefore, very much surprised to hear the Hon'ble Babu Boikanta Nath Sen remark that my amendment puts a restriction upon the common law right. There is absolutely no such common law right; if there had been, section 248 (*now* 251) would have been wholly superfluous. We are not legislating here upon the law of contracts. As the law stands, a tenant is not entitled, simply because he has made improvements, to recover the expenses from the landlord; here an exceptional advantage is given to him; he has a special remedy, to enforce which a special procedure is prescribed. I wish to have it made clear that this is the only procedure which may be followed. I think it is only fair that, if a tenant chooses to incur so much expense, he ought also to take the risk. If he does not intend to stay on the premises long enough, he ought not heedlessly to take action under these special provisions."

The Hon'ble Mr. Baker said:—"May I ask the Hon'ble Dr. Asutosh Mukhopadhyaya a question? If I have understood him correctly as to the state of the law, is not his amendment superfluous?"

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"That is what I thought, and I was surprised to hear the Hon'ble Babu Boikanta Nath Sen say that it is not so, and that there is a common law right which my amendment seeks to take away. The object of my amendment is not to change the law, but to make it absolutely clear."

The Hon'ble Babu Boikania Nath Sen said:—"I would beg to add a word by way of explanation with regard to what has fallen from the Hon'ble Dr. Asutosh Mukhopadhyaya. The amendment is either superfluous or it is taking away the general right under the law. I do not accept his proposition that the tenant has got no such right."

The motion was then put and lost.

Section 253.

The Hon'ble Babu Surendranath Banerjee moved that section 252 (*now* 253) be omitted.

He said:—"I am happy to be able to say that my amendment involves no legal considerations. It is a matter of common sense, and I hope to be able to convince the Council that the amendment is one which ought to be accepted. Section 252 (*now* 253) provides:—

'Whenever it appears to the Chairman that any building is without a proper supply of water, and that such a supply of water can be furnished from a main not more than one hundred feet distant from any part of such building, the Chairman may, by written notice, require the owner to obtain such supply and to execute all such works as may be necessary for that purpose.'

"Sir, we may be perfectly certain that in an oriental country, where a person does not bring the water into his own house by means of a connection, there must be very strong reasons why he does not do so. The main may be only 100 feet from his house, and, if he does not take advantage of that circumstance and establish a connection and bring the water into his own house, there must be very strong reasons for it, and the strongest of all reasons is his poverty. The man is too poor to do it. He has not got the means. His instincts are in favour of it, but he has not got the means, and he cannot bring the water in. He goes every day himself to the hydrant or sends his son or relative to fetch the water. He is put to a lot of trouble to bring the water to his house. Therefore, Sir, there are the strongest motives operating on the mind of that man to bring the water into his own house, only if he had the means. And, Sir, is it not hard if he has not got the means that the Chairman should compel him to bring the water into his house and have a connection? I do not find the counterpart of this section in any Indian law. It is not in the mufassal law, not in the Bombay law, not in the Madras law. But there is a similar section in the English Public Health Act. But here people use much more water than in England. In England people fight shy of water; here people gladly use water. The precedent of England cannot possibly apply. Compulsion has to be used in England to oblige people to bring water into their houses. No such compulsion is necessary here. In a hot country we need no compulsion to bring water into our houses. Therefore, it seems to me to be rather hard, when the natural impulses of a man are so strongly in favour of a connection with his house for the purpose of the water, that the Chairman should have it in his power to compel him to bring water into his house. People may be left to their own impulses in the matter, and you may be perfectly certain that their strongest impulses would be in favour of bringing in the water, and, if they are not able to do so, the only reason that would stand in their way would be their poverty, and I hope the Hon'ble Member in charge of the Bill and the Council will sympathise with my amendment which is put forward distinctly on behalf of the poor."

The Hon'ble Mr. Baker said:—"I hope the Council will adhere to the section as it stands. It is taken from the provisions of the English Public Health Act, and, if such a provision has been found necessary in England, where the appreciation of the benefits of good water is of much older date than in this country, *à fortiori*, it is necessary here."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I strongly protest against that expression of opinion. The appreciation by the people of India of good water is to be traced as far back as 3,000 years before the English were a nation."

The Hon'ble MR. BAKER said:—"It is notorious that when the proposal was first made to introduce the system of filtered water in Calcutta, it was strongly opposed. Raja Degumbur Mitter proposed as an amendment that, instead of introducing filtered water, they should elaborate a scheme for the digging of tanks in Calcutta. I say if this provision is necessary in England, where people have been accustomed to appreciate the advantages of good water for many years, *à fortiori* it is necessary in Calcutta. I admit, Sir, that during the last 30 years since the water-supply has been introduced, the advantages of the system have been appreciated. The people have learnt the great benefits which flow from this system, and I admit much of what the Hon'ble Babu Surendranath Banerjee has said, that every one who can afford it will probably endeavour to have his house connected. But, Sir, I think we must not leave out of sight the fact that a good and efficient system of water-supply is one of the most potent factors making for sanitary improvement. It is one of the most important elements in connection with public health. Why should the Chairman be deprived of the power to extend this system to the house of anybody merely because, as the Hon'ble Member has rightly said, the occasion for the exercise of that power is not likely to happen very often?"

The Hon'ble MR. BOLTON said:—"Speaking on the last amendment, I observed that the provision which enables an occupier to force his landlord to establish water-connection with his house is one of conservancy. The provision which the Council is now discussing is supplementary to that. In the one case the occupier can force his landlord to connect the house with the water-supply; in the present case a similar power of compulsion is given to the Chairman. It would doubtless be hard in some cases that this power should be exercised, but the Chairman may be trusted to use his discretion reasonably. A limitation is, moreover, imposed for the protection of the people from too heavy an expenditure, and it is found in the words: 'that such water supply can be furnished from a main not more than one hundred feet distant.' The distance must then be taken into account, and by limiting it to one hundred feet or less, the expense is kept low. It is not left to the Chairman to require the connection whatever the distance may be between the building and the main."

The Hon'ble MR. APCAR said:—"I think there is a distinction between the two cases. In the former case it is the occupier who wants the water. The owner is not so much concerned with the immediate use of the water, though he may be forced to pay for it. Here it is wholly different, because it is the occupier who may be so poor that he is unable to pay for the extension of the water-supply to his own premises, and I confess, although I listened very attentively to the Hon'ble Member in charge of the Bill, I have wholly failed to ascertain that he has made out a case for the application of this law to Calcutta. Whatever objection there may have been to the manner or method of the supply of water taken by the Hindus in days gone by, we must not forget that it was the way in which the water was to be conveyed to them was the chief ground of objection. There is no doubt that there was the strongest appreciation, and always has been, on the part of the Hindus, for water. They worship water, and if they do not get the water-connection into their houses it is for some real cause, and if for some real serious cause, I should be reluctant to give anyone the power to force them to the expenditure that they would have to incur under this section, which my hon'ble friend Babu Surendranath Banerjee seeks to have omitted from the Bill; and I support the mover in his amendment."

The Hon'ble MR. BUCKLEY said:—"I confess I do not quite understand how the poorness and poverty of the occupier applies here. The occupier has to pay the water-rate when his house is connected or if his house stands within a certain

distance of the water-mains, and the water-rate on his poor house will be a comparatively small amount. To a certain extent the occupier gains if this section is put in force, because, as I understand it,—and the Hon'ble Dr. Asutosh Mukhopadhyaya I have no doubt will be able to put me right if I am wrong,—under section 247 (*now* 251) of the Bill the occupier can compel the owner to make the connection; but in that case the occupier has got to pay 12 *per cent.* on the cost of making that connection. But under this section, if the Chairman orders the owner to make the connection, as I read it, the occupier does not have to pay 12 *per cent.* on the cost of making it, so that the occupier gains to that extent at least that he only pays the water-rate, which he probably pays in any case, and not the 12 *per cent.* on the cost of making the connection. It is my intention to vote against this amendment, because I think that the Chairman will undoubtedly exercise a wise discretion in enforcing it. But I must admit that there is a great deal of force in what the Hon'ble Babu Surendranath Banerjee has said. This section is taken bodily from the Public Health Act, but I think there is this great difference between Calcutta and England—that in England there are hardly any stand-posts and the people cannot, as they can do here, readily get good water by fetching it from a short distance. It is very difficult in an English town to get good water otherwise than by a house-connection; but here in Calcutta a man has not got to go far from his house to get water, and he can get such quantity of water as is reasonably necessary for his requirements. I have no doubt there may be circumstances where a man has got a bad well or some insanitary water where it may be desirable to enforce this section, but my belief is that to a very large extent indeed it would be a dead-letter."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"I should be prepared to support this amendment unless the section is slightly modified in the way suggested in my amendment. My proposition is that in section 252 (*now* 253), line 2, after the word 'building,' the words 'to which the provisions of section 247 (*now* 250) are not applicable' be inserted; in other words, that the provisions of sections 247 and 252 (*now* 250 and 253) be mutually exclusive in their application."

The Hon'ble Babu Surendranath Banerjee said:—"May I rise to a point of order? We are considering amendment No. 161, and my friend the Hon'ble Dr. Asutosh Mukhopadhyaya may vote in favour of or against it. He is now considering another amendment which refers to a totally different matter."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"If it is inconvenient to take my amendment now, it will wait its turn; but I thought it would be more convenient to discuss the two together."

The Hon'ble Babu Surendranath Banerjee said:—"My amendment will take care of itself."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"If my hon'ble friend is so deeply attached to his own amendment that he is unable to listen to any suggestion however reasonable, I must confess with regret that I cannot at this stage support his motion as framed. My hon'ble friend has pleaded on behalf of the poor with his usual earnestness and eloquence. I can assure him that I yield to none, not even to my hon'ble friend, in my anxiety to afford all possible protection to the poor and the helpless. But at the same time I resolutely decline to be guided by sentiment or to be misled by rhetoric; and I prefer to examine the facts, to scrutinise them with care and caution. In the first place, let us not forget that under section 145 (*now* 147) every ratepayer is liable to pay the maximum water rate if his house is situated within 450 feet of the nearest stand post or other supply of filtered water available to the public. Now the present section, to which such vigorous objection has been taken, authorises the Chairman to enforce compulsory supply of water from the main, only if the building is situated at a distance of not more than 100 feet from the nearest water main. It is manifest therefore that, if action is

taken by the Chairman under section 252 (*now* 253), there is no addition to the recurring charge under section 145 (*now* 147); the only expenses we have to take into consideration will be the cost of fitting up, once for all, the pipes and other appliances, for a distance which can in no case exceed 100 feet. This cannot be under any circumstances a considerable sum, but I am free to admit that there may be poor people in the city upon whom it may tell heavily. At the same time, you must remember that if the owner or occupier is unable to carry out the orders of the Chairman under section 252 (*now* 253), the necessary works will be executed at the cost of the Corporation under section 622 (*now* 599), and the actual expenses may under section 629 (*now* 605) be recovered in instalments spread over a period of five years. Let us take one concrete illustration; if the owner is unable by reason of poverty to execute the necessary works under section 252 (*now* 253) and they are carried out at the instance of the Corporation at a cost of Rs. 50, such amount with interest at 6 per cent. may be recovered from him in instalments spread over five years; so that in such a case each annual instalment cannot exceed Rs. 13, which would be at the rate of a little over one rupee a month. It seems to me, Sir, that these safeguards will be found ample for the protection of the poor, and that there is some tendency to exaggerate the possibility of actual oppression. But even if we concede that these are not sufficient to protect the poor from any possible oppression which may result from a desire on the part of the Chairman to annoy all the poor people in the city by the strict enforcement of the provisions of section 252 (*now* 253); even if we make this assumption, it does not follow in the least that the section should altogether be omitted; the only reasonable inference is that the section should be so modified as to make the oppression of the poor impossible. Do this by every means that can be suggested; restrict if necessary the scope of this section; make it inapplicable to people who are absolutely indigent; but do not omit it altogether. I cannot conceal from myself the fact that this salutary provision is taken from the English Public Health Act, section 62, and that the corresponding rule in England which applies exclusively to the poor has worked satisfactorily. I cannot further disguise the fact that many of my countrymen who are by no means poor are, either by reason of ignorance or negligence, somewhat slow to appreciate sanitary measures; they will often lavishly spend their money in unnecessary comforts, but hesitate to take sanitary precautions; some of them at any rate have to be educated in this respect, and gentle pressure from without is sometimes necessary to protect and improve their health, safety and convenience, and may often lead to a substantial reduction of their doctor's bill."

The Hon'ble Mr. Apcar said:—"May I be permitted to explain with reference to what fell from the Hon'ble Mr. Buckley? One of the circumstances I had in my mind was this, that it is possible the Corporation do not carry out the laying of the water-pipes to the extent that they ought to do, and that they have failed in bringing the pipes as near to tenements as they ought to have done; and if in these circumstances the connection would have to be so long as 100 feet, I do not think it is fair to impose on the householder, who desires connection, to make the connection in such circumstances at his expense. I have in mind that the branch sewers, in the drainage scheme that is now being carried out, have been begun by the executive by a considerable length short of the summit in each street, contrary to the scheme actually sanctioned and then it will come to this that those who are living at the summit will have to connect, at their own cost perhaps, with the drainage system. This is one of the circumstances why I have thought that it would be hard on owners to be compelled to connect when they will have to pay for the connection."

The Hon'ble Mr. Oldham said:—"My only observation is that the amendment has been moved on the assumption that Calcutta is exclusively a Hindu city. On the contrary, it is a very colonial and cosmopolitan city, and it is notoriously the fact that some of the occupants and some of the owners belong to races who do fight shy of water, and the provision is wanted for them at all events."

The Hon'ble Babu Boikanta Nath Sen said:—"I support this amendment. This is a provision simply authorizing the Chairman to compel certain classes to have the water-connection. The question is whether this authority should be given to him in this way. As has been observed by the Hon'ble Babu Surendranath Banerjee, people would only be too glad to get the water-connection. The old ideas about the unholiness of pure water have now been abandoned. The question is simply about their capacity to pay for it, and, as has been put forward by the Hon'ble Babu Surendranath Banerjee, that is the only ground which stands in their way, and the question is whether they should be compelled to make the water-connection. There arises a difficulty—the question of the occupier. The section contemplates the case of the owner being required to do the work. In the case in which the owner is the occupier and is poor, the argument of my friend applies in its full vigour and strength; but difficulty may arise, and the force of the argument is considerably taken away when the owner is a rich man and the occupier is not. Questionable then would be the justice of the requisition in that case. The occupier may leave the house, but the connection would improve the value of the house. I submit, Sir, that this provision, which gives an unlimited power to the Chairman to compel a man against his will, should not find a place in our statute."

The Hon'ble Babu Surendranath Banerjee said:—"I cannot but express my surprise—a surprise to which I have already given utterance—at the opinion of the Hon'ble Member in charge of the Bill that we Hindus do not appreciate water."

The Hon'ble Mr. Baker said:—"That is not what I said. I said people in England had appreciated the advantages of good and filtered water for many generations before the people of this country."

The Hon'ble Babu Surendranath Banerjee said:—"I think, Sir, we have learnt to appreciate the advantages of good water for the last 3,000 years. Filtered water we never had. The best water that we can find is the water of the Ganges; and the Ganges an object of reverence and worship with us, because, so to speak, it is an emblem of purity. I think that very fact—the devotion that the Hindus pay to the Ganges—is emblematic of the feeling which they entertain with regard to the importance of good water. I will not, after the explanation which the Hon'ble Member in charge of the Bill has offered, dwell upon that part of his statement.

"But the Hon'ble Member has made an admission, and it is in support of my amendment, that everyone who can afford it will have a house-connection. Therefore it is only the poor who will not have house-connection, and, if so, is it right and proper to force them to make this connection when they adopt the necessary means of taking water from the hydrant? The Hon'ble Mr. Buckley has pointed out that the analogy of the English law is not applicable to this case. But the Hon'ble Member in charge of the Bill professes to base this section upon the English Public Health Act. The circumstances are different, and we have the high authority of the Hon'ble Mr. Buckley in support of this view. So far as this particular matter is concerned, there is absolutely no justification of any kind—not even the apology of a precedent—upon which it can be based. It is not English law—at least the analogy of the English law does not hold good—and yet the Hon'ble Member wants to arm the Chairman with the power of compelling a poor man to have house-connection established.

"Something has been said about the charge not being a recurring charge. I admit that, but, Sir, it will cost the poor man about Rs. 40 or Rs. 50 to have the connection between the main situate at a distance of nearly 100 feet and his house. Am I to understand that Rs. 40 or Rs. 50 is of no consequence to the poor man? Possibly he has never seen Rs. 40 or Rs. 50 in his life. He has never been able to amass that amount. It is a substantial consideration to the poor man, and I must say it is a great hardship to compel him to spend this money when there is no necessity for it. He undergoes the trouble of taking the water from the hydrant. If he had the means, would he undergo this labour and trouble? Here we have considerations based upon the natural impulses of the man which tell against this section. It is because he has not got the means that he has not got the water-connection, and is it right and proper

that he should be forced to have the water-connection when he is able to get water from the hydrant by taking the trouble for it? I do not think that is a right procedure to follow.

"My friend the Hon'ble Dr. Asutosh Mukhopadhyaya was good enough to say that, unless we had a section like this, probably the doctor's bill would swell. The poor of Calcutta for the last 50 years have gone on without a section like this. I do not know that the doctor's bill is at all relevant to the matter, but I will say this that if this section were placed before representatives, say, 50 or 100 or 200, of the Hindu community noted for their habits of cleanliness, intimately conversant with the ways and the feelings of the people, they would say 'no' to this section, and we, as the representatives of the people, echo their sentiments. I desire to record my strong protest against a section of this kind, which is likely to operate with hardship upon a class of people who deserve the special protection of the Government."

The Hon'ble THE PRESIDENT said :—"We will take a vote on this amendment on 22nd instant."

The further consideration of the motion was then postponed.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 252 (*now* 253), line 2, after the word "building" the words "to which the provisions of section 247 (*now* 250) are not applicable" be inserted.

He said :—"My suggestion is that the provisions of section 252 (*now* 253) should not be applicable to buildings to which the provisions of section 247 (*now* 250) are applicable. The provisions of section 247 (*now* 250) apply to a building in the occupation of a tenant. I venture to think that when a tenant is in occupation we may leave him to his remedy under sections 247 and 248 (*now* 250 and 251), and when the owner is in occupation we may apply the provisions of section 252 (*now* 253); otherwise there might be some inconsistency. Section 247 (*now* 250) provides that—

"(1) Any occupier of a masonry building who holds the same direct from the owner may, by written notice signed by him, require the owner to provide all such necessary works as may be required for bringing into the premises a supply of filtered water for domestic purposes and a supply of unfiltered water for the purposes specified in section 225E (*now* 246), sub-section (2).

(2) Every such notice shall contain an undertaking on the part of the occupier—

(*a*) to pay, during the residue of his term of occupation, interest at the rate of one *per cent. per mensem*, calculated from the date of the completion of the works, on the cost of all works so provided by such owner, and,

(*b*) if the premises do not abut upon some street in which there is a supply-main, to pay the cost of connecting the premises with the nearest supply-main."

"It is clear, therefore, that, if the occupier wants to have the benefit of the water-supply, he can have it only on certain terms. Under section 252 (*now* 253), on the other hand, he would be entitled to have the same benefit without the same liabilities. I do not think that is either just or could have been intended. Section 247 (*now* 250) is taken from the present law, whereas section 252 (*now* 253) is taken from the English Public Health Act; and this probably explains the anomaly I have just referred to, because I cannot find in the English Public Health Act any provision corresponding to our section 247 (*now* 250). If the occupier does not think that there is any necessity for water-supply, leave him in that position, for we may be quite sure that, when the occupier absolutely needs water and can get it in at the expense of the owner, he will not lightly miss the opportunity."

The Hon'ble MR. BAKER said :—"I accept this amendment."

The Hon'ble THE PRESIDENT said :—"I should like to ask the Hon'ble Dr. Asutosh Mukhopadhyaya a question. What is to happen in the case in which neither the owner nor occupier proposes to make the house-connection? Under section 247 (*now* 250) the occupier may insist upon the house-connection being made, but if the occupier does not move, and the owner does not move, and it is a house in which the occupier is a person of ample means, and for sanitary reasons the Chairman wishes to insist upon house-connection. What is to be done if we make this addition here?"

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"I am afraid, Sir, I have not made myself clear. My contention is that, if the occupier under section 247 (*now* 250) is in a position to get the benefit of the water-supply at the cost of the owner, he is not likely to lose the benefit. We may take it practically that if he needs the thing and can get it at the expense of the owner he will at once have recourse to section 247 (*now* 250); the difficulty pointed out is not likely to arise in practice. I must admit, however, that, if the case does arise, the section, as I propose to restrict it, will not supply an adequate remedy."

The Hon'ble Mr. Bolton said:—"I am afraid difficulty will arise, because it may frequently not suit the occupier to press the landlord under section 247 (*now* 250). He may hold on such a tenure that the landlord may be able, if he is threatened with a heavy expenditure under this section, to eject him from the house, or to cause him to leave it subsequently. The occupier will not always be free, even when he needs the water, to take recourse to this section. It is advisable, therefore, that the power of the Chairman under section 252 (*now* 253) should not be restricted as proposed by the Hon'ble Member."

The Hon'ble Mr. Baker said:—"As I understood this matter when I discussed it with the Hon'ble Dr. Asutosh Mukhopadhyaya, he was afraid that occupiers would try in some manner or other to get action taken under section 252 (*now* 253) instead of section 247 (*now* 250), because, if they act under section 247 (*now* 250), they have to pay for it, whereas if they take action under section 252 (*now* 253), they then escape payment because the owner has to pay in the first instance."

The Hon'ble Dr. Asutosh Mukhopadhyaya, in reply, said:—"It seems to me inconsistent that it should be open to the occupier to proceed either under section 247 (*now* 250) or under section 252 (*now* 253), and obtain the same relief in either case upon very different terms. If he proceeds under section 247 (*now* 250), he has to pay for the benefit he receives, whereas, if he has recourse to section 252 (*now* 253), he can compel the owner to execute the necessary work without ever paying anything for it. This is so manifestly unjust that, but for what has fallen from one Hon'ble Member, I should have thought the position absolutely unsustainable. If the Council is of opinion that the Chairman should be entitled to proceed under section 252 (*now* 253) whether the building is in the occupation of the owner or of the tenant, then I venture to think that section 252 (*now* 253) will have to be redrafted to make the provision harmonious with section 247 (*now* 250)."

The Hon'ble Babu Surendranath Banerjee said:—"I can suggest a way out of the difficulty, and that is to omit this section altogether."

The Hon'ble Mr. Buckley said:—"If the Hon'ble Member will look at the Public Health Act, he will see that the intention was that this power to have the water-connection is only to be exercised in the case of very poor people: special mention is made of persons who can only pay two pence a week."

The motion being put, the Council divided as follows:—

Ayes 7.	*Noes 11.*
The Hon'ble Mr. Buckley.	The Hon'ble Mr. Handley.
The Hon'ble Mr. Buckland.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Dr. Asutosh Mukhopadhayaya.	The Hon'ble Raja Ranajit Sinha Bahadur, of Nashipur.
The Hon'ble Mr. Mackenzie.	The Hon'ble Babu Jatra Mohan Sen.
The Hon'ble Sahibzada Mahomed Bakhtyar Shah.	The Hon'ble Babu Boikanta Nath Sen.
The Hon'ble Mr. Oldham.	The Hon'ble Babu Surendranath Banerjee.
The Hon'ble Mr. Baker.	The Hon'ble Mr. Apcar.
	The Hon'ble Mr. Spink.
	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendment was lost.

The Hon'ble Dr. Asutosh Mukhopadhyaya, by leave of the Council, withdrew the motion standing in his name, that at the end of section 252 (*now* 253) be added "within a time, not less than thirty days, to be specified in such notice."

The Hon'ble Dr. Asutosh Mukhopadhyaya, by leave of the Council, also withdrew the motion, standing in his name, that to section 252 (*now* 253) the following paragraph be added:—

"If such notice is not complied with within the time to be specified, the Chairman may, if he thinks fit, execute such work and obtain such supply, and any expenses incurred by him in this behalf may be recovered from the owner as if it were an arrear of consolidated rate due from him."

He said:—"Apparently these two amendments are substantially covered by the provisions of section 622 (*now* 597) of the Bill."

The Hon'ble the President said:—"There are a number of amendments of the Hon'ble Member on later sections, all in the same terms."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"They will be withdrawn when we come to them."

The Hon'ble the President said:—"We postponed amendment No. 161* just now, but the Hon'ble Member in charge of the Bill has spoken to me about the matter and he will make a statement."

The Hon'ble Mr. Baker said:—"The Hon'ble the President has suggested that a proviso to the following effect be added to section 252 (*now* 253):—

"Provided that no action shall be taken under this section in any case in which the owner satisfies the Chairman that he is too poor to bear the cost of the said works."

"The object of that proviso is to give effect to what must be the real fact in any case. If the owner of the premises is too poor to bear the cost of making the water-connection, it is quite certain that the Chairman cannot and ought not to enforce the provisions of the section. This amendment merely gives statutory effect to that limitation. Therefore, with Your Honour's permission, I move that this addition be made to the section."

The Hon'ble Babu Surendranath Banerjee said:—"I thankfully accept this, and I withdraw my amendment No. 161* in favour of the proviso to section 252 (*now* 253)."

The Hon'ble Mr. Baker's motion was then put and agreed to.

Section 262.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 253A (*now* 262), for the words from "he may replace them" to the end of the section, the following be substituted:—

"he may, by written notice, require the owner of the premises to replace or improve them, and if the owner fails to make the necessary alterations within seven days."

He said:—"With reference to this motion, I have placed myself in communication with the Hon'ble Member in charge of the Bill; he accepts the principle, but suggests that the wording should be slightly modified; the section as re-drafted will read as follows:—

'If any pipes, taps, works or fittings connected with the supply of unfiltered water for the flushing of privies or urinals in any premises be found, on examination by the Chairman, to be defective, he may, by written notice, require the owner of the premises to replace such fittings or to make such alterations therein as may be specified in the notice.'

"Section 253A (*now* 262) as it stands apparently authorises the Chairman, as soon as he discovers that pipes, taps, works or fittings are defective, to replace them at once without notice to the owner, and without even giving

* The section 252 (*now* 253) be omitted—*vide* page 317, *supra*.

him an opportunity to carry out the necessary works. That could not have been intended. If you look at other parts of the Bill, you will find that in similar cases a written notice is given in the first instance to the owner, requiring him to carry out the necessary alterations, and it is only when he fails to do so that the Chairman takes action; this is reasonable and my amendment in substance is to that effect."

The Hon'ble MR. BAKER said:—"I accept the amendment. It has been considered by Mr. Buckley and myself, and we think that in this form it is open to no exception"

The motion was put and agreed to.

SECTION 269.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 254E (*now* 269), sub-section (*1*), the words "situated in a block in which the continuous system is in force" be omitted.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA also moved that sub-section (*3*) of section 254E (*now* 269) be omitted.

He said:—"Section 254E (*now* 269) is a new section; I confess, Sir, that I was somewhat puzzled as to what the object was, and my only endeavour is to give effect to what seems to me to be the intention of the framers of the law. Section 254E (*now* 269) has for its object the prevention of waste of filtered water only under the continuous system. It says:—

"(*1*) Whenever the Chairman has reason to believe that filtered water supplied to any premises situated in a block in which the continuous system is in force is being wasted, he may, by written notice, require the owner and occupier of the premises, within a period of four days after service of the notice, to repair and make good any defects in the pipes, taps or fittings connected with the water-supply, so as to put a stop to such waste.

(*2*) If any notice issued under sub-section(*1*) is not complied with, and the Chairman has reason to believe that waste still continues, he shall cause to be served on the said owner and occupier a further notice informing them that, if the first notice be not complied with within a further period of three days, the supply of filtered water to the said premises will be cut off.

(*3*) If, after the expiration of the said period of three days, the Chairman has reason to believe that waste still continues, he shall cut off the supply of filtered water to the said premises.

Explanation.—For the purposes of this section, water shall not be deemed to be wasted if it is shown that it has been deliberately and purposely drawn for use for domestic purposes from a tap provided for the purpose."

"The section, therefore, by its very terms applies only to premises situated in a block in which the continuous system is in force. It does not apply to premises situated in a block in which the intermittent system is in force. It may appear at first sight that this latter case is regulated by the preceding section, which provides as follows:—

"(*1*) No occupier of any premises to which water is supplied under this Chapter shall negligently or otherwise suffer such water to be wasted, or shall suffer the pipes, taps, works and fittings for the supply of water, or any of them, to remain out of repair to such an extent as to cause a waste of water.

(*2*) No person shall cause a waste of water by the misuse of public stand-posts, drinking-fountains or hydrants."

"This apparently applies to all buildings whether the system in force is continuous or intermittent. But, unfortunately, the prohibition is not completely effective, inasmuch as the penalty for the infraction of the law is not sufficiently severe. You will remember that section 602 (*now* 574) provides a penalty for the first commission of an offence, while section 603 (*now* 575) provides a recurring penalty for the repetition of the same offence. Unfortunately section 254D (*now* 268) is not mentioned in section 603 (*now* 575); so that, where the intermittent system is in force, if there is wilful waste of water, under section 254D (*now* 268), sub-section (1), and section 602 (*now* 574), the occupier may be fined Rs. 50. But, once he pays the penalty, he is secure; he

can with impunity waste as much water as he pleases. There is, however, another section which has an important bearing on the present question; I mean section 265C (*now* 283), which provides as follows:—

'265C (*now* 283). (*1*) The Chairman may cut off the connection between any water-works of the Corporation and any premises to which water is supplied from such works, or may turn off such supply, in any of the following cases, namely—

(*a*) if the premises are unoccupied;

(*b*) if (in the case of a *bustee*) the owner or (in any other case) the occupier of the premises fails, for fifteen days after the due presentation of a bill or the due service of a notice, to pay any sum due to the Corporation from him or in respect of such premises;

(*c*) if, after receipt of a written notice from the Chairman requiring him to refrain from so doing, the owner or occupier of the premises continues to use the water, or to permit the same to be used, in contravention of this Act or any rule or bye-law made hereunder;

(*d*) if the occupier of the premises contravenes section 225D (*now* 245) or sub-section (*2*) of section 254Q (*now* 279);

(*e*) if the occupier refuses to admit the Chairman into the premises for the purpose of making any examination or inquiry authorised by section 253 (*now* 261), or prevents the Chairman from making such examination or inquiry;

(*ee*) if the owner of the premises fails to comply with any notice issued under section 253B (*now* 263);

(*f*) if the owner or occupier of the premises wilfully or negligently injures or damages his meter or any pipe or tap conveying water from any works of the Corporation; or

(*g*) if any pipes, taps, works or fittings connected with the supply of water to the premises be found, on examination by the Chairman, to be out of repair to such an extent as to cause a waste of water:

Provided as follows:—

(*a*) water supplied for flushing privies or urinals shall not be cut off or turned off;

(*b*) water shall not be cut off or turned off in any case referred to in clause (*b*) or clause (*g*) [now(*h*)] unless written notice of not less than twenty-four hours has been given to the occupier of the premises.

(*2*) The expense of cutting off the connection or of turning off the water in any case referred to in sub-section (*1*) shall be paid, in the case of a *bustee*, by the owner of the premises, and in any other case by the owner or occupier of the premises

(*3*) When all moneys, for the non-payment of which water has been turned off or cut off from any premises under clause (*b*) of sub-section (*1*), have been duly paid to the Corporation, together with the expense of cutting off or turning off the water, the Chairman shall cause water to be supplied to such premises as before.

(*4*) If any money, for the non-payment of which water has been cut off or turned off from any premises under clause (*b*) of sub-section (*1*) was due from the owner of the premises and is paid by the occupier, the occupier may deduct the amount thereof from the rent of the premises, together with the expenses paid by him under sub-section (*2*).

(*5*) No action taken under or in pursuance of this section shall relieve any person from any penalties or liabilities which he may otherwise have incurred.'

"This section, as I understand it, applies to both the continuous and the intermittent system; in other words, the object which is intended to be secured by section 254E (*now* 269), is also secured by section 265C, clause (*g*) [*now* section 283, clause (*h*)]. Unfortunately, however, the two sections, though they partially overlap each other, prescribe different procedures. This is certainly anomalous, and my amendment seeks to remove this defect by a very simple means. I suggest that section 254E (*now* 269), like section 265C (*now* 283), should apply to both systems, and that the same procedure should be followed in both cases to prevent the wilful waste of water. I sympathise entirely with the object of these sections, but I desire to render them harmonious, and thus to make them intelligible and easy of application. I need hardly add that when you have sections so clumsily worded as these, and even contradictory to each other, you do your best to defeat the very object you have in view."

The Hon'ble MR BAKER said:—"This is a very technical matter, Sir, and I think the Hon'ble Mr. Buckley will deal with it more effectively than I can; but I will just explain, as well as I can, what the position is. The

continuous system is not in force now in Calcutta at all. It is going to be introduced, but it will be introduced gradually, and it will take from five to seven years before it is extended fully. We thought it desirable to have a general section relating to waste and to the power of cutting off water in the circumstances which now prevail in Calcutta. These powers are provided in section 254D (*now* 268) and in section 265C (*now* 283). We also thought it desirable to have a separate section dealing comprehensively with the measures for preventing waste under the continuous system only, and those measures are all gathered together in section 254E (*now* 269). I think the Hon'ble Mr. Buckley will probably say, with reference to the proposal to omit the words 'situated in a block in which the continuous system is in force,' that until the continuous system has been introduced it is a matter of great difficulty to know for certain whether waste is being committed or not, and that is one reason why I should demur to leaving out those words and to extending the provisions of section 254E (*now* 269) to the existing state of things in Calcutta, which would probably lead to practical difficulty and possibly to great hardship.

"Then, Sir, I would point out that the operation of section 254E (*now* 269) is limited by the explanation. In the explanation to that section a definition is given of the term 'waste,' and that applies only where the continuous system is in force. The term 'waste,' as understood by water-works engineers in Europe, does not include any water which is deliberately drawn off from the taps by the occupiers of houses. It does not matter what they do with the water which they intentionally draw off from a tap, or whether they let the tap run. That is not to be deemed waste. It means leakage. 'Leakage' is the sense in which the word 'waste' is used for this purpose. It is in the case of leakage that the provisions of section 254E (*now* 269) will be applicable.

"Then, Sir, the Hon'ble Dr. Asutosh Mukhopadhyaya said that under proviso (*b*) of section 265C (*now* 283) a notice of 24 hours has to be given before the water could be cut off under clause (*g*) [now (*h*)], and he thought it was not intended that that proviso should only apply in the case of the intermittent system, and that it was not intended to apply to the continuous system; but, if he looks at section 254E (*now* 269), he will see that much more notice than that is required under the continuous system. This matter was very fully discussed in the Select Committee. I think the Hon'ble Babu Surendranath Banerjee will remember. We wanted at first to have, I think, 48 hours' notice, and that was fully considered, and the two gentlemen who represented the Corporation urged that so short a period would be rather a hardship. We therefore extended the period to seven days, and we split it into two parts, which are provided for in clauses (1) and (2) respectively. Therefore under the continuous system there is notice of seven days, and not of one day. It is quite true, as the Hon'ble Member has pointed out, that this section gives the power to cut off the supply. It does overlap the power given in section 265C (*now* 283). I admit that that is so, but we thought for practical purposes it is desirable, even at the risk of some apparently bad drafting, to have this double provision. The whole of the powers that we take in respect of the continuous system are conveniently gathered together in section 254E (*now* 269). The other section applies to the intermittent or existing system only."

The Hon'ble Mr. Buckley said:—"I think, Sir, it would be a pity, although perhaps from a legal point of view it might not be symmetrical, if the Bill was altered as the Hon'ble Dr. Asutosh Mukhopadhyaya suggests. Section 254E (*now* 269) is intended to apply only and entirely to the continuous system, and perhaps I may briefly describe to the Council why we wish to deal differently with the two systems. The Hon'ble Member wishes to make the two the same. The continuous system affords the most ingenious and simple way of discovering waste, and not the least advantage of that system is that it enables that waste to be detected with almost absolute accuracy, with hardly any inquisitorial enquiry at all in the houses of the people; and I must say it will be of very great advantage in Calcutta. At present, and under the operation of section 254D (*now* 268), it is only possible to find out whether waste is going on by actually going into the house and seeing whether the pipes or the taps are leaking, and that, as we

all know, is a most unpleasant form of investigation. Under the continuous system there will be to each house a small stop-cock, that is, a tap outside the house and outside the premises altogether. That stop-cock will be accessible to the water-works authorities, and they will be able to turn it off or to get to it without going to the householder at all. When water is continuously supplied, as it will be when this Bill is fully in force, the pressure is on all day and all night in every house, and at any moment of the whole 24 hours any person can go and get as much water as they like. That is one great advantage of it. Experience at home has shown that people draw the largest quantity of water from about 8 to 10 o'clock in the morning. There is a certain amount of draught which goes on the whole of the rest of the day: but between certain hours of the night, generally from about 2 o'clock in the morning to 4 o'clock in the morning, as we can all quite understand, nobody draws any water at all, or very few indeed. Consequently, if you go at those hours of the morning and have any means of ascertaining whether water is being drawn into a house, you can ascertain, supposing a person is not drawing it deliberately, whether waste is going on or not. What is actually done in England is this: a man goes to the house between those hours, and he goes to that stop-cock, and he has with him what he calls a stethoscope. It is nothing less than a plain steel rod. He puts one end of it at the top of the tap of the stop-cock and the other end to his ear. If any person does happen between those hours to be drawing off water, he knows it at once, because he hears a considerable sound. If any tap is opened he can distinguish it, but if no water at all is passing he will hear nothing; but if the taps in that house are leaking, even to the smallest extent, he can hear even, I am told, the very smallest quantity. He can distinguish it trickling through, and if he turns the stop-cock off a little, so as to ease the discharge, he can still hear it, and I am told that the Inspectors who go to make these enquiries are able to tell with extreme accuracy how much water a minute is passing in listening with this stethoscope to the flow of water through the stop-cock. Now, Sir, that cannot be done now, because the water in Calcutta is turned on for some hours at a high pressure, some hours at a low pressure, and some hours not at all. When the continuous system is in force it will be easy to do this, and it will be easy for all the municipal Water-works Inspectors to find out when anybody is really wasting water; and I do not hesitate to say that if they could do that to-morrow they would find out that a great quantity of water is wasted in every house in Calcutta. Consequently in section 254D (*now* 268), which applies to the present system, the intermittent supply, we have practically in this Bill made no difference from the existing law. We have left things as they are. We do not think we can improve it, but in section 254E (*now* 269), where with great accuracy we can say whether water is wasted, we apply a rigid system. We first of all, as soon as the Inspector has found that water is being wasted, send the occupier a notice giving him four days to repair his defective fittings: if he does not do that, three days more grace is allowed him; and if he will not put things right, then we then cut the water off entirely; and I think that procedure is the best one that it is possible to follow. I do not think it would be desirable to amalgamate the two systems. Although there is a little overlapping and a little technical superfluity perhaps in the law, I would ask the Hon'ble Dr. Ashutosh Mukhopadhyaya to allow the section to stand. I am quite sure that, if this system is applied, as I think it will be applied, with care and discretion, but with great inflexibility, it will result not only to the great advantage of the people, but to the material diminution of the cost of the water-supply. By the introduction of this system in Liverpool no less than £53,000 in actual hard cash was saved in one year, and I think it would not be very difficult to show that the Municipality by failing to adopt some such system as that contemplated by the Bill—which they have full authority to do under the existing law—have wasted an enormous sum of the rate-payers' money."

The Hon'ble Dr. Asutosh Mukhopadhyaya, in reply, said:—"As my hon'ble friend who spoke last thinks that the object which both of us have in view will be best secured by leaving the section in its present form, which is confessedly inelegant and unsymmetrical, I will not press these amendments."

The motions were then, by leave of the Council, withdrawn.

SECTION 270.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 254F (*now* 270), sub-section (*3*), the words "or sub-section (*2*)" be omitted.

He said:—"This is really a mere matter of drafting. Under section 254F (*now* 270), sub-section (*1*),—

'If the Chairman has reason to believe that the occupier of any premises consumes more filtered water than he is entitled to under section 226 (*now* 248), the Chairman may provide a water-meter, and attach the same to the service-pipe of the said premises.'

"By sub-section (*2*)—

'If the occupier of any premises situated in a block in which the continuous system of supplying filtered water is in force makes a written application to the Chairman to have a water-meter attached to the service-pipe of the premises, the Chairman shall, within fourteen days from the receipt of the application, provide a meter and attach it to the said pipe.'

"And sub-section (*3*) provides that—

'The expense of providing and attaching a meter under sub-section (*1*) or sub-section (*2*) shall be paid out of the municipal funds.'

"Sub-section (*4*) goes on to say that—

'When a meter is to be attached under sub-section (*2*) on the application of the occupier of any premises, he shall, either—

(*a*) before the meter is attached, deposit with the Corporation the sum required for providing and attaching the meter, or

(*b*) pay rent for the meter at such rate as may be fixed by the Chairman with the sanction of the Local Government.'

"This indicates that the applicant is to bear the expenses, which seems to contradict the provisions of sub-section (*3*). The object of my amendment is to make the two sub-sections harmonise with each other."

The Hon'ble MR. BAKER said:—"I do not agree with my hon'ble friend Dr. Asutosh Mukhopadhyaya. This was debated a good deal in Select Committee, and the conclusion we came to was that the cost was to be borne by municipal funds, and I think that is the effect of the section. It is quite true that when an occupier asks to have a meter he is allowed as an alternative to deposit the cost of providing and attaching the meter, but that money is only on deposit, and it is provided in sub-section (*5*) that it is to be returned to him: therefore that cost does not fall upon him, but on the municipal funds, which was the deliberate intention of the Select Committee. I think the words in the section are right."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said:—"After this explanation, I will not press this amendment."

The motion was then, by leave of the Council, withdrawn.

SECTION 271.

The Hon'ble BABU SURENDRANATH BANERJEE's motion that the word "five" be substituted for "four" in line 4 of section 226 (*now* 248) having been lost,* he, by leave of the Council, withdrew the motion, standing in his name, that the word "five" be substituted for the word "three" in line 6 of section 254G (*now* 271).

The Hon'ble BABU SURENDRANATH BANERJEE moved that the word "four" be substituted for the word "three" in line 6 of section 254G (*now* 271).

The Hon'ble RAJA BAHADUR RANAJIT SINHA, OF NASHIPUR, also moved that the word "four" be substituted for the word "three" in line 6 of section 254G (*now* 271).

* *Vide* pp. 308 to 312, *supra*.

The Hon'ble BABU SURENDRANATH BANERJEE said :—"If the water supplied is in excess of the quantity allowed by law, I suggest that the water should be supplied at the rate of 4,000 gallons per rupee. You give the water at present at that rate, and, if it is in excess of the quantity allowed, there is no reason why you should not observe the same rate unless you want to inflict a punishment. So far as the supply of water is concerned, considerations of punishment ought not to come in at all. It is one of the greatest necessaries of life in a town like Calcutta, and I hope, Sir, that, if water is supplied in excess of the 4,000 gallons to the rupee, the same rate would be observed in regard to the excess supply. I think that is fair."

The Hon'ble MR. BAKER said:—"I cannot accept the Hon'ble Member's amendment. If the statutory supply is fixed at 4,000 gallons to the rupee, then a higher rate ought to be charged on any water which is taken in excess of that statutory allowance. The water is not sold to the public at all. The water-rates are the proceeds of a tax. All people are taxed, whether they have house-connections or not, and the statutory supply is fixed on the assumption that each person will receive a certain fixed amount. If any person takes more than that amount, he reduces *pro tanto* the supply of water available for other people, and it is necessary to discourage that by every legitimate means. Therefore, any water which he takes over and above the amount which he is entitled to and which is sufficient for him, he ought to pay for, not at the original prime cost, but at an enhanced rate. I may add that the British Indian Association, who are much interested in the matter, in their representation to the Council have expressly approved of that principle."

The Hon'ble MR. BUCKLEY said :—"I quite agree in the remarks made by the Hon'ble Mr. Baker, and I wish to add this further argument. There is reason to believe that the people who most largely exceed in their consumption of more water than they are entitled to are those who are best off—the men of wealth. Under the section of the Bill which has to-day been approved by the Council, any large houses which are assessed at high rates, and which are presumably occupied by the wealthiest people, will very often be entitled to as much as 60 or 70 gallons per head per day—an utterly preposterously large amount, especially when you consider that in those large houses there are a great many dependents who will not use anything like that quantity. I think it is perfectly right in the interests of everybody, especially in the interests of the Municipality, that the wealthy, if they choose to take more water than they can reasonably be expected to require, should pay a high price, and, so far from reducing the price, I should be disposed to make it even higher."

The Hon'ble RAJA BAHADUR RANAJIT SINHA OF NASHIPUR said :—"My amendment is identical with that of my hon'ble friend Babu Surendranath Banerjee, and I would ask that they be taken together. When the cost price of 1,000 gallons of water is only three annas, Sir, I do not think it is unreasonable for us to ask 4,000 gallons per rupee."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said :—"I should like to say a few words with reference to what has fallen from the Hon'ble Mr. Buckley. The consumption of water will not depend upon the wealth of the person. It will depend upon the number of members of his family. If a man has a large family, he will consume a larger quantity of water than another man who may be much wealthier than himself but has a smaller family. Therefore, you have to look at the matter from this point of view, *viz.*, that the consumption of water is not determined by considerations of wealth, but is largely dependent upon the number of inmates he may have who live in the same house, and we have got a proverb in our language, which perhaps I may be permitted to quote. We say that where the goddess *Lakshmi* is absent, there the number of children is predominant, that is to say, the poorer the people, the more likely are they to have a numerous family. The point which I want to lay before the Council is this: that the consumption of water is not determined by considerations of wealth, but it depends upon the number of people who live in the same family; and if a man happens to be poor and he

has a large number of people in the same house, he would require a much larger quantity of water than the richer man would.

"Then, Sir, I proceed upon the analogy of the present law. The present law lays down that water is to be supplied at the rate of 3,000 gallons to the rupee, and on any excess of the statutory allowance the same rate is to be observed. If any body wants the water, he pays for it at the rate of 3,000 gallons to the rupee. You have already, Sir, legislated that the water which is to be given to a rate-payer to be 4,000 gallons to the rupee, and following that analogy you ought to give 4,000 gallons to the rupee for the excess supply.

"Section 155 of the existing law provides that:—

'The occupier of every house connected with the water-supply shall be entitled to have, free of further charge, three thousand gallons of filtered water for every rupee paid to the Commissioners as water-rate on account of such house, to be supplied from the service pipes of the Commissioners for domestic use, through a ferrule of the size prescribed in the ninth schedule. If the Commissioners have reason to believe that the occupier of any house consumes more filtered water than he is entitled to as aforesaid, it shall be lawful for the Commissioners to provide a water-meter at their own expense and attach the same to the water-pipes of the said house; and any water which may be used over and above the quantity to which the occupier is entitled as aforesaid, shall be paid for by him at the rate of one rupee for every three thousand gallons.'

"You have allowed to the occupier 4,000 gallons per rupee, and therefore I think you ought to follow the analogy of the present law, and say that the water to which he shall be entitled in excess of the statutory allowance shall be at the rate of one rupee per every 4,000 gallons. I follow the analogy of the present law, and I think my hon'ble friend the Member in charge of the Bill ought not to object."

The Hon'ble MR. OLDHAM said:—"I think the Hon'ble Babu Surendranath Banerjee has introduced some new matter in his reply, to which I should like to have permission to reply. He has referred to the provisions of the existing law as regards the meter system. I believe the facts are that that provision has never been applied, and no meter has ever been used in Calcutta except privately, whereas this law will be strictly applied."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"The meter is only a means of ascertaining the quantity of water."

The Hon'ble MR. OLDHAM said:—"It has never been enforced."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"The principle under the present law is that you give 3,000 gallons for the rupee, and when you give anything in excess of the statutory allowance you follow the original principle of 3,000 gallons for the rupee. I ask the Council to endorse the principle which is to be found in the existing law as regards the excess."

The motions being put, the Council divided as follows:—

Ayes 6.

The Hon'ble Raja Bahadur Ranajit Sinha, of Nashipur.
The Hon'ble Babu Jatra Mohan Sen.
The Hon'ble Babu Boikanta Nath Sen.
The Hon'ble Babu Surendranath Banerjee.
The Hon'ble Mr. Apcar.
The Hon'ble Dr. Asutosh Mukhopadhyaya.

Noes 12.

The Hon'ble Mr. Buckley.
The Hon'ble Mr. Buckland.
The Hon'ble Mr. Handley.
The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Mr. Mackenzie.
The Hon'ble Mr. Spink.
The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
The Hon'ble Mr. Oldham.
The Hon'ble Mr. Baker.
The Hon'ble Mr. Bolton.
The Hon'ble Mr. Slack.

So the amendment was lost.

SECTION 276.

The Hon'ble BABU SURENDRANATH BANERJEE moved that after the word "evidence" in line 4 of sub-section (*2*) of section 254M (*now* 276), the following words be inserted :—

"until the contrary has been proved."

He said :—"I understand this is merely a question of drafting, and in order to make the matter quite clear I suggest the insertion of the words 'until the contrary has been proved' or 'until it has been rebutted.'"

The Hon'ble MR. BAKER said :—"I think the section as it stands is quite clear. That is the way in which similar provision is ordinarily made in Acts of the Legislature. We say that it shall be evidence. We do not say that it shall be conclusive proof: therefore, it means that it may be rebutted."

The motion was then, by leave of the Council, withdrawn.

SECTION 278.

The Hon'ble BABU SURENDRANATH BANERJEE moved that for sub-section (*1*) of section 254P (*now* 278) the following be substituted :—

"Whenever the Corporation consider that the supply of filtered water to Calcutta is more than sufficient to provide for the requirements thereof, they may, subject to such terms and conditions as they may think fit, consent to deliver such quantity of filtered water *per diem* as they may think fit into reservoirs or pipes placed in—"

and that sub-section (*2*) be omitted.

He said :—"This is a matter of considerable importance. But may I be permitted, in substitution of the amendment which I have just moved, to move the amendment which has been prepared by the Hon'ble Member in charge of the Bill and which I accept, and which, I think, will be a solution of the difficulty, and I am thankful to him for it. It is that, for section 254P (*now* 278) the following be substituted, namely :—

Supply of filtered water to adjacent Municipalities and Cantonments.

'254P (*now* 278). (1) The Corporation may at any time, on receiving an application from the Municipality or Cantonment concerned, direct, by resolution, that such quantity of filtered water *per diem* as may be specified in the resolution shall be delivered into reservoirs or pipes placed in—

(*a*) any of the following municipalities or cantonments :—

Municipalities.

Barnagore.	North Barrackpore.
Cossipore-Chitpore.	North Dum-Dum.
Garden Reach.	South Barrackpore.
Garulia.	South Dum-Dum.
Kamarhati.	South Suburban.
Maniktola.	Titagar.

Cantonments.

Barrackpore	Dum-Dum; or

(*b*) any municipality which is hereafter formed by subdividing any municipality mentioned in clause (*a*), or by uniting into one municipality any of the municipalities mentioned in that clause;

and that for all water so delivered payment shall be made at such rate, not being less than the actual cost to the Corporation, as may be prescribed in such resolution.

(2) An appeal shall lie to the Local Government from any refusal by the Corporation to pass any such resolution, or from any direction given by the Corporation in any such resolution.

(3) Before deciding any such appeal, the Local Government shall consider any representation made by the Corporation with reference thereto.

(4) No order made on any such appeal shall direct the delivery of water at a lower rate of payment than the actual cost to the Corporation.

(5) Every order made by the Local Government on any such appeal shall be final.'

"This is a great departure from the provision in the Bill, which took away the power entirely from the Corporation. That provision laid down

that, when the Local Government should be of opinion that the town of Calcutta had more than an adequate supply of water, the Local Government might direct the Corporation to extend the supply of water to certain municipalities specified in that section, and then it would be the duty of the Corporation forthwith to carry out that order, and, furthermore, the price at which the water was to be given to these various municipalities was also to be determined by the Local Government. Under the amended section, the power is left in the hands of the Corporation in the initial stage. The Corporation is to determine the question as to whether water is to be given to these municipalities or not. The Corporation is to determine the price at which the water is to be given, and the only power which the Government assumes in this connection is that, if the municipality which has made the application is dissatisfied with the order of the Corporation, then it may make an application to the Local Government, and the Local Government is to pass final orders. The discretion of the Local Government is fettered by the consideration that the Local Government is not to award any cost which shall be below the cost price to the Corporation of the water to be supplied. Having regard to the very considerable concession which has been made by the Hon'ble Member in charge of the Bill in modifying this section of the Bill, I have great pleasure in laying it before the Council, and I hope it will be unanimously accepted."

The Hon'ble Mr. Baker said:—"I accept the amendment. It has been prepared by me and the Secretary after much consideration, and I think it affords a very fair compromise of a matter about which there was a great deal of ill-feeling and contention. In framing this section, I have proceeded on the analogy of the section which enables adjacent municipalities to connect their sewers with the Calcutta municipal drains. In that connection we have provided that in the first instance the matter shall be determined between the Corporation and the local municipality concerned, and, in the event of disagreement, that an appeal shall lie to the Local Government, whose orders are to be final. That is the principle which has been adopted here, and I beg therefore to support this amendment."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"The provisions of section 254P (*now* 278), as it stands in the Bill, are subject to a very important qualification, namely, before filtered water is supplied to adjacent municipalities and cantonments, it must be ascertained that the supply is sufficient to provide for the requirements of Calcutta. In the section which is proposed to be substituted, there is no similar restriction. I presume, however, that it is not intended to alter the law in this respect, and I shall be glad to be assured that the omission is not intentional."

The Hon'ble Mr. Baker said:—"The reason is that in the former case the matter rests with the Corporation."

The Hon'ble Babu Surendranath Banerjee said:—"The discretion is the discretion of the Corporation. The Corporation may determine, and therefore the Corporation will arrive at a determination after the consideration of the facts of the case. If the Corporation is of opinion that it has not an adequate supply of water at its disposal to extend to other municipalities, the Corporation will say 'no' to any application of that kind. I think the point is met by the discretion which is vested in the Corporation."

The Hon'ble Raja Ranajit Sinha Bahadur, of Nashipur, said:—"I support the amendment. If it is accepted, I shall be glad to withdraw my amendment that the words 'on the recommendation of the Corporation' be inserted after the word 'considers' in line 2 of section 254P (*now* 278). When with the money of the rate-payers water-works are constructed and the water-supply is still maintained, I think it but right that their representatives ought to have a voice in the determination whether or not water should be given to a neighbouring municipality, and, if so, at what rate, and I think the Corporation is the best authority to inform the Government if the water-supply in Calcutta is more than sufficient for the wants of the inhabitants of the town itself."

The Hon'ble Mr. Buckley said:—"If there is one fact which is more striking than another in connection with the continuous system of water-supply which it is proposed to introduce into Calcutta, it is that a constant supply in lieu of an intermittent supply actually reduces the demand. This fact will, I think, remove a great deal of the difficulty in accepting this amendment. When you establish a continuous supply in any town, it enables people to get as much water as they want and at whatever time they want it, and, when that is done, there will be less waste and actually less water used. Hon'ble Members may hesitate to believe that this can really be true. I had a statement compiled for the information of the Select Committee, which refers to twenty-five towns in Great Britain, and in every case it was found that the result of introducing the constant supply, with a proper system of check, has been that the reduction in the consumption has been very large. In many cases the quantity of water has been reduced by one-third and one-half without any compulsion, or penal rate, being imposed. The people do it of their own accord. I feel confident that if the constant-supply system is introduced in Calcutta, with a proper system of check, there will be a saving of money, and there will be a saving of water, which can be sold with advantage to neighbouring municipalities."

The motion was then put and agreed to.

The last motion having been agreed to, the Hon'ble Raja Ranajit Sinha, Bahadur, of Nashipur, by leave of the Council, withdrew the motion, standing in his name, that the words "on the recommendation of the Corporation" be inserted after the word "considers" in line 2 of section 254P (*now* 278).

The Hon'ble Babu Surendranath Banerjee also, by leave of the Council, withdrew the motion, standing in his name, that for the last three lines of sub-section (*2*) of section 254P (*now* 278) the following be substituted:—

"as may be determined by the Corporation."

The Hon'ble Dr. Asutosh Mukhopadhyaya also, by leave of the Council, withdrew the motion, standing in his name, that in section 254P (*now* 278), sub-section (*1*), line 3, for "Calcutta," be substituted "the area to which the present Act is applicable."

The Hon'ble Babu Jatra Mohan Sen also, by leave of the Council, withdrew the motion, standing in his name, that in section 254P (*now* 278), sub-section (*2*), line 3, the words "ten *per cent.* over" be inserted after "less than."

Section 279.

The Hon'ble Raja Ranajit Sinha Bahadur, of Nashipur, moved that after sub-section (*2*) of section 254Q (*now* 279) the following be added:—

"Provided that this sub-section shall not apply to water taken by travellers for use on a journey."

He said:—"This is a simple matter. The object of my amendment is to secure a clear provision in the matter which is also in practice now. If a person who resides in Calcutta or visits it on some business at the time of leaving Calcutta carries some water for his use during journey, I do not think it will involve any appreciable loss to the municipality. Practically it is now done, and will be done in future, and no one will be able to check it; so I think it is better to make a clear law in the matter."

The Hon'ble Mr. Baker said:—"It was never intended to prevent a person who is going on a journey from taking a small quantity of drinking-water with him. I think this amendment is hardly necessary; but, if the Hon'ble Member presses it, I will not object."

The Hon'ble Raja Ranajit Sinha Bahadur, of Nashipur, in reply, said:—"I thought a clear provision on the subject was necessary."

The motion was then put and agreed to.

SECTION 283.

The Hon'ble RAJA RANAJIT SINHA BAHADUR, OF NASHIPUR, moved that clause (*b*) of sub-section (*1*) of section 265C (*now* 283) be omitted.

THE Hon'ble BABU SURENDRANATH BANERJEE also moved that clause (*b*) of section 265C (*now* 283) be omitted.

The Hon'ble BABU SURENDRANATH BANERJEE also moved that, if the last amendment be lost, the following should be substituted for clause (*b*) of section 265C (*now* 283):—

"(*b*) if (in the case of a *bustee*) the owner, or (in any other case) the occupier of the premises fails, for fifteen days after due service of a notice, to pay any sum due to the Corporation on account of the consolidated rate from him or in respect of such premises."

The Hon'ble RAJA RANAJIT SINHA BAHADUR, OF NASHIPUR, said:—"This section gives power to the Chairman to cut off the water-supply to any house for non-payment of any sum due to the Corporation. As the law gives ample powers to the Chairman for the prompt recovery of municipal dues, I do not find there is any necessity for the insertion of this clause. If the water-supply of a house be cut off, the health of the residents of the house would suffer. In my opinion, therefore, this provision of the Bill should be omitted."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I have a similar amendment in my name, and I entirely agree with my hon'ble friend that this provision is unnecessary. The powers of distraint and sale with which the Corporation is armed are amply sufficient for all purposes, and this power with which the officers of the Corporation are armed to cut off the water-supply is seldom resorted to, except in extreme cases. If it is found necessary to have some provision of this kind, the existing law supplies us with it. I would call the attention of the Council to section 162 of the present Act, in order to show the difference between the present law and the law which it is proposed to enact under the provisions of this Bill. Under the existing law,—and I have already observed that the existing law is not usually enforced,—all the power which the Executive possess is this, that if default is made only in respect of one rate, namely, the water-rate, then, and then only, are the Executive entitled to cut off the water-connection; but under this Bill the Chairman may cut off the water-connection if the occupier fails for 15 days after due presentation of a bill not only for the water-rate as in the existing law, but for *any* sum due to the Corporation, not in respect of the premises concerned only, but in respect of any other premises belonging to the same person. Therefore in this Bill we have an amplification of the present law. Moreover, that law is not always resorted to. If it could be shown that it was frequently resorted to, and that the powers conferred by it are not sufficient, I could understand the enactment of a provision like the present one. I do not know whether any application has been made by the Executive with regard to the extension of the powers they now possess. I do not think they have. They do not want these powers extended and amplified. Why, then, handicap this measure, already sufficiently unpopular, with a coercive provision which will lie as a dead-letter? This provision, I am almost certain, will never be put into requisition. There is a class of bills to which I desire to call the attention of the Hon'ble Member in charge of the Bill. I think the Hon'ble Member is acquainted with certain bills which are known as miscellaneous in the Municipality for works supposed to be done on requisition made by the municipal authorities. Most scandalous transactions have taken place in connection with these bills. Mr. Lee felt the scandal to be so great that he made it a rule that none of these bills should be paid by the authorities unless and until the bills had been certified by the parties concerned to be correct. The other day a work was supposed to be done in a particular place and a miscellaneous bill was drawn out, and I believe the Warrant Department was required to realise the dues; but, strange to say,

the discovery was subsequently made that no work had been done in respect of those particular premises! Is it right and proper that a further coercive provision for the recovery of municipal dues should be enacted, when the validity of those dues might be questioned? I have no objection to the water-supply being cut off for non-payment of the water-rate, but do not cut off the water-supply as a means of enforcing the payment of other dues. Water is the life of the people; do not cut it off for the non-payment of bills which may be a huge fiction, or which may be so manipulated as to serve the purposes of unscrupulous underlings. I speak with some amount of feeling because I know how unscrupulous municipal underlings can be, and I shall be exceedingly sorry if this section is enacted. What constitutes the due presentation of a bill? The bill is supposed to be presented by a sircar on Rs. 8 a month, who may or may not present it as it suits him, but he will certify all the same that he has presented it. In the investigation which the Vice-Chairman made into the working of the Warrant Department, in case after case it was discovered that the certificate of the sircar was absolutely false, and the bills were never presented. And is it right, is it necessary, that, for the non-payment of any sum due, the water-connection should be cut off? I say 'no.' I hope, having regard to these circumstances, that clause (*b*) will not be passed, and I must earnestly entreat the Council not to go beyond the four corners of the present Act. Cut off the water-rate on failure to pay the water-rate; no further powers are needed or have been asked for. I say that, if you grant further powers, the effect will be disastrous, and therefore I ask the Council to keep the law as it is, because I am certain that they are amply sufficient."

The Hon'ble MR. BAKER said:—"I am strongly opposed to this amendment, and I trust the Council will leave the Bill as it is. The Hon'ble Mover of the amendment began by saying that under the present law the water-supply can only be cut off for non-payment of the water-rate. What is the water-rate? It has no separate existence whatever. It is a mere percentage of the consolidated rate; and the provision to which the Hon'ble Member referred in the present Act is a mere error in drafting.

"Then the Hon'ble Member said that that power is very seldom resorted to under the present law. That is quite true, and that is a somewhat strong point in my case in favour of retaining this section in the Bill. It seldom happens that the water-connection is cut off, but it frequently happens that the Executive have to threaten to cut it off, and these threats are found almost invariably to be at once effective. The Chairman of the Corporation attaches the greatest possible importance to this power, and he says that without it he would scarcely be prepared to take the responsibility of collecting the municipal dues. Wealthy people, he says, habitually refuse to pay municipal dues, although perfectly able to do so; but you have only to issue a notice that, if the sum due is not paid within 24 hours, the water-connection will be cut off: and then the money is paid at once."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"Does the Chairman refer to the provisions of this Bill or to the present Municipal Act when he says he will not be able to collect the municipal dues?"

The Hon'ble MR. BAKER said:—"Of course, under the present Act the Chairman has only the power to cut off water-connection on non-payment of the consolidated rate.

"The Hon'ble Member has told us of grave scandals that occur in connection with the recovery of what are known as miscellaneous bills for works done under requisition by the Corporation, and he mentions one case in which no work was done and yet a bill was made out and payment was enforced. But how will such abuses be affected by this provision of the Bill? Suppose a bill is made out for work which was never done, and that the bill was certified by a responsible officer, and this very power to enforce payment by cutting off the water-connection is exercised, what will happen? How will the amount be recovered? Why, by only threatening to cut off the water-connection. And is it

not a greater scandal that a distress warrant should be issued on a fictitious bill than merely a threat to cut off the water-supply?

"The Hon'ble Member says that a threat of this kind will jeopardise the health of the people. Even if you go to the length of cutting off the connection, is there not a hydrant in the streets at every hundred and fifty yards? Can the residents of that house not get their supply of water from the nearest standpost? It will put them to a little inconvenience,—and it is intended that it should do so,—but their health cannot be affected. It is the inconvenience and the small expense the tenant will have to incur in having to fetch water from the street that will induce him to pay the bill at once. This method of collecting municipal dues is exceedingly effective, and it will be most unwise to refuse it as a means of recovering all dues of the Corporation. It is a simple, easy and effective way to recover what is due, and it is better to recover it in this way than by the tedious and sometimes harsh process of distraint."

The Hon'ble MR. OLDHAM said:—"I have only to add to what the Hon'ble Member in charge of the Bill has said that this time last year, just before the *Puja* holidays, an application was made by the Executive to resort to this means of recovering municipal rates and taxes on a most extensive scale by a gentleman whose name I refrain from mentioning only because I fear to expose him to further unpopularity as an officer of the Corporation, and this gentleman said that, if this mode of recovery were adopted, there would be no necessity to carry out the threat, for in most cases the amount due is at once paid."

The Hon'ble MR BUCKLEY said:—"The Hon'ble Babu Surendranath Banerjee made it a great point that water is a sanitary necessity. In one respect it is so. There are a good many houses in Calcutta where privies and closets are supplied with unfiltered water, and if the water-connection were cut off it might be a serious detriment to the inhabitants of that house and of even the neighbouring locality; but we have made special provision in the Bill that the water which is supplied for these purposes cannot be cut off. We have given a separate stop-cock for these purposes, and to that extent no harm will arise by cutting off the water connection to the house. If a man owes you money, and you have a simple means of making him pay it, why should not you exercise that power?"

The Hon'ble MR. APCAR said:—"The Hon'ble Member in charge of the Bill is not aware of the great amount of oppression there is in connection with the system of making out these miscellaneous bills. I doubt whether he knows in what a large percentage the charges in relation to the work done are excessive. I do not think it right to force a person to admit the correctness of a claim which he is disputing by putting penal clauses into operation. We know that it is entirely in the hands of certain men to insist, and very possibly in their own pecuniary interest, that certain claims shall be regarded as good and fair claims, and the Chairman will be pressed to take action in this way when persons against whom claims are made, it may be, are contesting the validity of the claim. I do not think it right that this should be permitted.

"Furthermore, I submit, that it is an insanitary measure to cut off the water-connection from any house. Under section 252 (*now* 253), it is held to be a sanitary measure to compel persons to connect their premises with the water-supply, and here there is a provision deliberately made to cut off that which is considered a sanitary necessity. I think it is far better that action should be taken under the distraint and warrant process. It may imperil the health of a household if the water-connection is cut off in the way which is contemplated under this section. It may be that the threat will be put into execution. I object to this provision, firstly because it may be employed as a means to compel a person to admit a claim which he is disputing, and also because cutting off the water-connection may affect the health of the household and even part of the neighbourhood. I would omit this section altogether, but if it is retained its application should be restricted to claims of a definite character, in respect of which there is no dispute; but, if you put it into force in

the case of these miscellaneous bills, it will open a door to most iniquitous proceedings in some cases."

The Hon'ble THE PRESIDENT said :—" Suppose the recipient of a miscellaneous bill disputes its correctness, would the Hon'ble Member have the Corporation wait fifteen days before the Chairman can act?"

The Hon'ble MR. APCAR said :—" In legislating in the question we should not forget that persons against whom this drastic measure is proposed may be poor and ignorant, and unaware of the opportunity of the fifteen days that the Bill proposes to secure to them."

The Hon'ble BABU SURENDRANATH BANERJEE said :—" If a bill is presented to a person, and he disputes it, he will make a representation against its correctness. I know of one case where a person knew nothing about the bill or the work until the warrant peon actually went and distrained the man's property."

The Hon'ble MR. APCAR said :—" We are proceeding without proper enquiry; we are only making assertions here. It would have been wiser, and I should have much preferred, if there had been an enquiry, and facts properly ascertained upon which we should be able to proceed. Sircars are supposed to have duly presented these bills, but it often happens that the bills have not been presented. These proceedings are attended with a great deal of hardship."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said :—" I desire to enter my most emphatic protest against the provisions of section 265C (*now* 283), clause (*b*). In spite of the uncompromising attitude of the Hon'ble Member in charge of the Bill, I cannot persuade myself to believe that he himself fully realises the unjust and mischievous consequences which may result from its enforcement. These provisions are of a too sweeping and needlessly stringent character. To enable you to realize accurately the scope of the section, I will take some concrete illustrations. Suppose that the owner of a *bustee* is also the owner of several houses; he pays the *bustee* rates, having collected them from the *bustee* tenants, but he omits to pay the tax due in respect of some other house belonging to him. Would it be open to the Chairman to cut off the water-connection from the *bustee*, and deprive the *bustee* people of the use of the water though they are perfectly innocent?"

The Hon'ble MR. BAKER said :—" The water-connection would be cut off from the premises on account of which the money is due."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA continued :—" The section does not say so. Its scope is wholly unrestricted. The owner may not reside in Calcutta, and thus may be himself beyond the mischief of the section. It would therefore, be quite open to the Chairman to enforce the provisions of this section against any premises belonging to the owner. Take another illustration. The occupier of a house happens to be the owner of other houses; he pays in full the rates in respect of the house he occupies, but not in respect of the other houses. Would it be open to the Chairman to cut off the water connection of the house in respect of which the rates have been paid? Then turn to section 639 (*now* 616), which runs thus:—

'(1) If, when the Chairman demands payment of any expenses under section 627 (*now* 602), his right to demand the same or the amount of the demand is disputed, the Chairman shall refer the case for the determination of the Chief Judge of the Court of Small Cause of Calcutta, or, if the amount involved exceeds two thousand rupees, to the High Court.

(2) The Chairman shall, pending the decision on any such reference, defer further proceedings for the recovery of the sum claimed by him, and shall, after the decision, proceed to recover only such amount, if any, as is thereby declared to be due.'

" But the Chairman may, meanwhile, cut off the water-connection at a time when the whole matter is pending before a Judge. I do not think that even the Hon'ble Member in charge of the Bill, with all his zeal, will be prepared to

accept this as a legitimate consequence, and I submit very respectfully that this matter requires very careful consideration."

The Hon'ble Mr. Baker said:—"I will agree to an exception being made in cases in which a reference has been made to the Small Cause Court or to the High Court under section 639 (*now* 616). That is a point which was not brought to my notice."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"Along with my hon'ble friend who has spoken I certainly regret the uncompromising attitude assumed by the Hon'ble Member in charge of the Bill. This is not a question of principle, but of expediency. Our contention is that the provision is likely to be oppressive. We are bound to consider the executive point of view, but even from that point of view I do not think a case has been made out for such legislation. My hon'ble friend in charge of the Bill said that Mr. Bright expressed the opinion that he would not be able to collect the rates and taxes unless he was armed with such a power. The question is whether Mr. Bright made that observation in connection with this provision of the Bill, or in connection with the following amendment, of which I gave notice, namely, to move that the following be substituted for clause (*b*) of section 265C (*now* 283):—

"(*b*) if (in the case of a *bustee*) the owner, or (in any other case) the occupier, of the premises fails, for fifteen days after due service of a notice, to pay any sum due to the Corporation on account of the consolidated rate from him or in respect of such premises."

"I want to keep the present law intact, and to arm the Chairman with the power of cutting off the water for non-payment of any portion of the water-rate. I am prepared to preserve to the Chairman the power which he possesses at the present moment, but I am against any enlargement of his powers in this respect, because no case has been made out for such enlargement, and the exercise of the powers proposed to be conferred by this section of the Bill may be attended with serious hardship.

"I was sorry to find the Hon'ble Member in charge of the Bill making light of these miscellaneous bills, for he seemed to be surprised that any abuse should occur in connection with them. Miscellaneous bills are made out in many cases which are suspicious and are challenged, and to arm the Chairman with the power of enforcing the payment of these bills by the threat of cutting off the water-supply might give rise to serious oppression and hardship. What are these miscellaneous bills? They are bills for work done by the Corporation at the expense of owners who fail to comply with requisitions made upon them by the Corporation. The Corporation has not got a staff to do this work. It is done by contractors, and these contractors are in alliance with the office, and put up men in the office to make out bills in respect of some of which, at any rate, no work is done. Therefore, it comes to this, that it is these contractors on the lowest rung of the ladder who set the machinery in motion, and unscrupulous underlings will profit by the execution of this summary procedure with which the law proposes to arm the executive. Is it right and proper that such powers should be given?"

The Hon'ble the President said:—"I thought the Hon'ble Member said that the act of cutting off the water was a thing which was absolutely unknown."

The Hon'ble Babu Surendranath Banerjee said:—"The Executive wanted on one occasion to cut off the water-supply in connection with the recovery of the rates, but the General Committee would not allow it."

The Hon'ble Mr. Baker said:—"Even in the cases to which the Hon'ble Babu Surendranath Banerjee referred, it was only a threat that was required."

The motions that clause (*b*) of sub-section (*1*) of section 265C (*now* 283) be omitted were then put together and lost.

The Hon'ble BABU SURENDRANATH BANERJEE's motion for the substitution of a new clause (*b*) being put, the Council divided as follows:—

Ayes 6.	*Noes 12.*
The Hon'ble Raja Ranajit Sinha Bahadur, of Nashipur.	The Hon'ble Mr. Buckley.
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Handley.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Mr. Apcar.	The Hon'ble Mr. Mackenzie.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Mr. Spink.
	The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr. Oldham.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendment was lost.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the words "in the case of a *bustee*, by the owner of the premises, and in any other case," in lines 3, 4 and 5 of sub-section (*2*) of section 265C (*now* 283) be omitted.

He said:—"This sub section makes it obligatory that the expense of cutting off the water-connection or of turning off the water should be paid by the owner of the *bustee*. The owner may absolutely have no sort of knowledge of the matter. It is the occupier who breaks the law, but it is the owner who has to pay the expense of cutting off or turning off the water. The owner may be absolutely ignorant and in no way responsible for what has been done, and yet you make him pay. Take clause (*e*). Suppose the occupier of a hut in a *bustee* and a municipal underling have a fight, is the owner to be made to pay? I think it hard that the owner who knows nothing of these proceedings should be responsible for the expenses incidental to cutting off the water-supply in consequence not of any *laches* on his own part but of one of his tenants. It is the case of visiting the sins of one person on the shoulders of somebody else. I am certain that this provision will not commend itself to the Council."

The Hon'ble MR. BAKER said:—"That person has to pay the expense of cutting off the water who is responsible for the payment of the rates. In the case of a *bustee*, the *bustee* owner is personally liable to pay the consolidated rate, and that is the justification for this clause. I admit that in the special case to which the Hon'ble Member referred it may seem to be a little hard, but when you look into it a little further I do not think it is so. As far as I know, there are no house-connections in *bustees*. There are only *bustee*-connections."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"*Bustees* of the extent of 10 cottahs all have water-connections."

The Hon'ble MR. BAKER said:—"Yes, *bustee*-connections, but not house-connections."

The Hon'ble MR. BUCKLEY said:—"The *bustee*-connection is provided by the Municipality and cannot be cut off."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"My contention is that the people might waste water, and then the water-supply would be cut off. The standpost in the *bustee* is not a public one. It is semi-private or semi-public, and is used by the inhabitants of the *bustee*."

The Hon'ble MR. BUCKLEY said:—"It is not a connection made at the expense of the owner; it is made by the Municipality and cannot be cut off. It is a part of the water-supply of the Municipality."

The Hon'ble MR. BAKER said :— "It is only a house-connection that can be cut off. These *bustee*-connections are not house-connections. I have never heard of any case in which a *bustee*-connection has been cut off."

The Hon'ble BABU SURENDRANATH BANERJEE said :— "I cannot say on the spur of the moment. I believe that, in all cases in which a house-connection is cut off, it is cut off at the expense of the owner."

The Hon'ble MR. OLDHAM said :—"*Bustee*-hydrants stand in the open air in an open space, inside the *bustee*, no doubt, but in a lane or *gully*. The hydrant is not in any house or enclosure or compound, and, so far as I understand, the water-supply from that standpost cannot be cut off."

The Hon'ble MR. APCAR said :— "So far as my information goes, the connection is made at the expense of the owner of the *bustee*, and it can be cut off. Here, again, I desire to point to the disadvantage of legislating without facts having been properly ascertained."

The motion was then put and lost.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 265C (*now* 283), sub-section (*1*), clause (*b*), last line, the word "or" be omitted.

He said :—"This seems to be a very small concession, but I am sure it will meet with opposition from the Hon'ble Member in charge of the Bill, because he has taken up an attitude of uncompromising hostility to whatever has the remotest tendency to soften the rigour of the law. Take the case I was putting before the Council in connection with the last amendment which has been discussed. The owner of a *bustee* owns not only that *bustee*, but also several houses. He collects rates from his *bustee* tenants and pays them in to the Municipality, but he makes default in respect of the rates due upon some of the other houses belonging to him. Is it open to the Chairman to cut off the water-connection of the *bustee*? If it is, I say it is most inequitable. What possible justification is there for making the *bustee* people suffer when they have paid their dues? You allege that by the machinery of this section you put a moral pressure on the owner, but the people who will suffer will be the *bustee* people and not the owner. The operation of the section ought clearly to be restricted to the premises in respect of which the rates are due."

The Hon'ble MR. BAKER said :— "I oppose this amendment, and it is hardly necessary for me to say much regarding it after what has been already said. This constant reference to *bustees* is really dragging a red herring across the track. Take the ordinary case—the case of a man who owns several houses, of which he lives in one, and lets out the others. If he pays the rates due on account of the house he lives in, and fails to pay the rates in respect of other houses which he owns and lets, you would not be able to touch him if this amendment is passed. I maintain strongly that you ought to be able to cut off the water from the house in which he lives if the rates on account of any other bills against him are outstanding."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I must again deplore the uncompromising attitude which the Hon'ble Member has taken with respect to these amendments. It is not a question of touching the owner at all. You have many means of recovering your rates. You can distrain his property; you can sue the person liable to pay in the Small Cause Court; why should you cut off the water-supply from a *bustee* which he owns? The Hon'ble Member assumes a position which is absolutely untenable."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said :—"I am bound to meet the hypothetical case which the Hon'ble Member in charge of the Bill has put. The section authorizes the Chairman to cut off the water-supply if the occupier does not pay the rates. If the owner pays the rates in respect of the house he occupies, and does not pay them on account of some other house which he owns, then you can realize the rates from the occupier of this latter

house, and the occupier in his turn will have his remedy against the owner. It seems to me, therefore, that if you restrict the operation of the section to the house in respect of which the rates have not been paid, there will be ample provision for every possible contingency."

The motion being put, the Council divided as follows:—

Ayes 6.	*Noes 12.*
The Hon'ble Raja Bahadur Ranajit Sinha, of Nashipur.	The Hon'ble Mr. Buckley.
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Handley.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Mr. Apcar.	The Hon'ble Mr. Mackenzie.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Mr. Spink.
	The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr. Oldham
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendment was lost.

The Hon'ble Dr. Asutosh Mukhopadhyaya, by leave of the Council, withdrew the motion, standing in his name, that at the end of section 265C, sub-section (*1*), clause (*g*) [*now* section 283, sub-section (*1*), clause (*h*)], the words "and the owner and occupier of the premises fail to comply with a notice issued under section 254E (*now* 269), sub-section (*2*)," be added.

Section 284.

The Hon'ble Raja Ranajit Sinha Bahadur, of Nashipur, by leave of the Council, withdrew the motion, standing in his name, that the words "General Committee" be substituted for "Chairman" in section 265D (*now* 284).

New section.

The Hon'ble Babu Surendranath Banerjee moved that the following section be inserted after section 265E (*now* 285):—

"265F. The Chairman shall, in the performance and exercise of the duties and powers imposed and conferred on him by this Chapter, be subject to the control of the General Committee."

The Hon'ble Raja Ranajit Sinha Bahadur, of Nashipur, said:—"As a matter of convenience, the General Committee and not the Chairman should have this power."

The Hon'ble Mr. Baker said:—"In the Select Committee Babu Narendra Nath Sen desired to go infinitely further, not merely to give the Chairman power to direct that wells should be filled up, but to make it compulsory that every well in Calcutta should be filled up."

The Hon'ble Babu Surendranath Banerjee said:—"I want to proceed on the analogy of the Bill. A general power of revision is given to the General Committee by section 314A (*now* 327) in respect of the filling up of tanks, wells, &c. I find that there is a similar section in regard to the lighting of streets. The water-supply is a matter of very great importance, and it is a matter which affects the public, and I ask the Council to endorse the decision of the Select Committee in regard to drains and privies and lighting, and apply it to the water-supply. What has been accepted with regard to drains and privies and the lighting of streets I should like to see adopted with respect to the water-supply. The water-supply in one sense is far more important than drains and privies, and certainly far more important than the lighting of

streets. It is expedient that a sort of general supervision should be invested in the General Committee in respect of matters relating to the water-supply."

The Hon'ble Mr. Buckley said:—"During the whole of the sittings of the Select Committee, day after day I raised my feeble voice against the desire of the Hon'ble Mover of the amendment to centralise. I do not see that section 314A (*now* 327) gives the General Committee control over the Chairman. It says that an appeal shall lie, which is not the same thing as the Hon'ble Member proposes to introduce here."

The Hon'ble Babu Surendranath Banerjee said:—"I am prepared to accept an appeal."

The Hon'ble Mr. Baker said:—"I could not possibly accept an appeal."

The Hon'ble Mr. Buckley said:—"I would ask, what are the duties of the Chairman in respect of the water-supply? It almost seems to me that the Hon'ble Membe'-'s motion is directed with the view of clogging the wheels of the Municipality; for it certainly will do so. The powers of the Chairman with regard to wate'-supply are 31 in number, and a great many of these are entirely of a subordinate character, which he will certainly delegate to others. He may require a owner to fix a stop-cock, which would be done in England by an Inspector he may allow alteration in the size of a ferrule; he may make certain orde about repairs to taps and fittings. These are purely technical matters. Ie may require meters to be repaired when out of order. These are most imple duties, which are better left in the hands of the Chairman instead of providing that the order of the Chairman shall be subject to the control o the General Committee, which seems to me to be absolutely puerile. The Hon'ble Member has told us in how many instances fictitious bills are prepared, and believe that that fact is largely due to the endless system of centralisation hich he insists upon. I believe that, if responsibility is vested lower down the scale, these instances of false bills would be unknown. I have never known suh cases where you have a responsible officer who can really be readily aproaced by the people."

The Hon'bl Mr. Oldham said:—"I do not remember any such proposal as this being pt foward before the Select Committee. I remember the other proposal to giv an ppeal to the General Committee with regard to the drainage provisions, ut there is no analogy between those provisions and the provisions relatg to he water-supply. This chapter of the Bill applies to matters relating to ater-supply only. The chapter relating to drainage confers large powers fornaking alterations in buildings and of entry upon premises. In cases of th sort there may be of necessity for an appeal to the General Committee. T only section in the water-supply chapter in which the General Committe vested with any power is that for giving of water to outside municipali. Otherwise certain obligations are imposed on the Corporation and certaities are imposed upon the Chairman, and he is given a discretion in particul cases which are carefully proscribed, and if he deviates from the directions at them he will be amenable to the law of the land."

The Hle Mr. Baker said:—"I will only add one word to what has been already said ith regard to the special provision which has been lately introduced in the pter relating to lighting. That provision was not in the original draft of the . It was put in mainly because it was represented that the Ward Commners liked to be able to help or oblige their constituents in respect of the cation of street-lamps, and the General Committee has been given a gener wer of control in that respect, so that they may be able to meet the wishe their constituents to a great extent."

The Hon' Babu Surendranath Banerjee, in reply, said:—"I think the Hon'ble Mr.By labours under a delusion. He is under the impression that both Babu Na Nath Sen and most of the Hindu Commissioners are in favour of centraion. Whether that charge is well-founded or not I will not

now discuss, but, so far as this matter is concerned, it is not centralisation but decentralisation that we desire. This power is now centralised in the Chairman: we want to take it away and associate others in its exercise.

"The Hon'ble Member in the course of his observations characterised some of my proposals as puerile. They may or may not be puerile, but, as far as one particular matter is concerned, namely, the delegation of powers by the Chairman, it is a matter of considerable importance. It is a matter of considerable importance that there should be some control in regard to the Chairman's power of delegation. When the Chairman divests himself of responsibility and invests subordinate officers with certain powers, might not there be an abuse of those powers? Is it possible for the Chairman to exercise effective supervision so as to prevent abuses occurring? I do not think so. I think it would be impossible for him to exercise effective supervision. It stands to reason that an appeal or right of general control should be invested in the General Committee. My conclusions follow as a matter of course from the premises laid down. I quite admit the correctness of the observation of the Hon'ble Member in charge of the Bill, that in the matter of lighting the Ward Commissioners are concerned, and it is on that ground that that concession was made. I submit that the same observations apply to the matter of the water-supply. Ward Commissioners are constantly consulted with regard to the water-supply in streets, both filtered and unfiltered; and, as the Hon'ble Member has accepted our recommendation with regard to lighting, surely he ought to accept a similar recommendation with regard to the water-supply."

The motion being put, with the substitution of the words "an appeal to" for the words "the control of," the Council divided as follows:—

Ayes 6.	*Noes 12.*
The Hon'ble Raja Ranajit Sinha Bahadur, of Nashipur.	The Hon'ble Mr. Buckley.
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Handley.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Mr. Apcar.	The Hon'ble Mr. Mackenzie.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Mr. Spink.
	The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr. Oldham.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendment was lost.

The Council was then adjourned to Friday, the 22nd September, 1899.

CALCUTTA,
The 16th January, 1900.

F. G. WIGLEY,
Asst. Secy. to the Govt. of Bengal,
Legislative Department.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met in the Council Chamber on Friday, the 22nd September, 1899.

Present:

The Hon'ble SIR JOHN WOODBURN, K.C.S.I., Lieutenant-Governor of Bengal, *presiding.*
The Hon'ble MR. W. B. OLDHAM, C.I.E.
The Hon'ble MR. R. B. BUCKLEY.
The Hon'ble MR. C. W. BOLTON, C.S.I.
The Hon'ble MR. E. N. BAKER.
The Hon'ble RAI DURGA GATI BANERJEA, BAHADUR, C.I.E.
The Hon'ble MR. C. E. BUCKLAND, C.I.E.
The Hon'ble MR. F. F. HANDLEY.
The Hon'ble MR. F. A. SLACK.
The Hon'ble KHAN BAHADUR MAULVI DELAWAR HOSAIN AHMED.
The Hon'ble BABU JATRA MOHAN SEN.
The Hon'ble MR. T. W. SPINK.
The Hon'ble RAJA RANAJIT SINHA BAHADUR, OF NASHIPUR.
The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH, C.I.E.
The Hon'ble MR. D. F. MACKENZIE.
The Hon'ble MR. J. G. APCAR.
The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, M.A., D.L., F.R.A.S., F.R.S.E.
The Hon'ble BABU BOIKANTA NATH SEN.
The Hon'ble BABU SURENDRANATH BANERJEE.

THE CALCUTTA MUNICIPAL BILL.

SECTIONS 299, 300, 307, 320, 328, 339, 340, 341, 343, 349, 368, 369 AND 383.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, by leave of the Council, withdrew the following motions standing in his name:—

(1) that in section 287 (*now* 299)*, before clause (*a*), the words "within a reasonable time, to be specified in such notice," be inserted;

(2) that in section 288 (*now* 300), line 6, after the word "make" be inserted "within a reasonable time to be specified in such notice;"

(3) that in section 292E (*now* 307), at the end of sub-section (*2*), the words "within a reasonable time, to be specified in such notice, and upon failure of the owner to do so, authorise the Chairman to carry out the necessary works," be inserted;

(4) that in section 292E (*now* 307), at the end of sub-section (*3*). be inserted "and such sums shall be recoverable in the same manner as arrears of the consolidated rate;"

(5) that in section 296 (*now* 320), sub-section (*2*), last line, for "paid by" be substituted "recoverable from," and that after "premises" be inserted "in the same manner as an arrear of the consolidated rate;"

(6) that in section 314B (*now* 328), sub-section (*3*), for "paid by" be substituted "recoverable from," and that at the end be added "in the same manner as an arrear of consolidated rate;"

(7) that to section 329 (*now* 339), sub-section (*2*) the following be added:—

"and, if such notice is not complied with within three days from the date of service thereof, the Chairman may cause such hedges and trees to be cut in the manner required, and the expenses thereby incurred shall be recoverable from the owner of the house or land in the same manner as an arrear of consolidated rate;"

(8) that at the end of sub-section (*3*) of section 329B [*now* sub-section (*5*) of section 340] be added "within a reasonable time, not less than fifteen days from the date of service, to be specified in such notice;"

(9) that at the end of sub-section (*1*) of section 329C (*now* 341) be added "within a reasonable time, not less than thirty days from the date of service, to be specified in such notice;"

(10) that at the end of section 329E (*now* 343) be added "within a reasonable time, to be specified in such notice;"

(11) that at the end of sub-section (*3*) of section 330D (*now* 349) be added "and, upon failure on his part to comply with such notice within a reasonable time, the Chairman may replace it and levy from the owner a sum of five rupees;"

(12) that at the end of sub-section (*2*) of section 366 (*now* 368) the words "within a reasonable time, not less than seven days, to be specified in such notice" be added;

(13) that at the end of section 371 (*now* 389) be added "within a reasonable time, not less than thirty days, to be specified in such notice;"

(14) that in section 391D (*now* 383), clause (*ii*), after "him" be inserted "within a reasonable time, to be specified in the notice."

The Hon'ble DR ASUTOSH MUKHOPADHYAYA said:—"These amendments will have to be withdrawn, as the object I have in view is provided for in section 622 (*now* 597)."

SECTION 152.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA drew attention to the amendment, of which he had given notice, that in section 148B (*now* 152), sub-section (*1*), for the words "the period for which they were so made" be substituted "two years from the commencement of this Act."

He said:—"With reference to this amendment, I have placed myself in communication with the Hon'ble Member in charge of the Bill, and, with the leave of the Council, I propose to move in substitution for it the fresh amendment† of which notice has been given."

At the suggestion of the Hon'ble THE PRESIDENT the amendment just referred to was postponed in order to permit of copies being printed and circulated to the Members of the Council for their information.

SECTION 230.

The Hon'ble THE PRESIDENT then said:—"I understand that the amendments which the Hon'ble Dr. Asutosh Mukhopadhyaya proposes to substitute for those he originally moved to section 220T (*now* 230) are also not in possession of Members of the Council, and I, therefore, think that these amendments might also be postponed until to-morrow."

The consideration of the amendments was accordingly postponed.

---

* The sections of the Bill having, under the direction of the Council, been re-numbered, the present number of each section is inserted in brackets, wherever the new numbering differs from the old.

† This amendment was brought forward and agreed to at the meeting held on the 23rd September, 1899.

SECTION 253.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said :—" Before Your Honour takes up the motions on the agenda paper, I would take leave to ask permission to give notice of an amendment to section 252 *now* 253) which has been drafted for me by the Secretary, but which I do not think should be placed before the Council until it has been printed and circulated."

The Hon'ble THE PRESIDENT said:—" I quite agree that these three motions should stand over until to-morrow."

SECTION 300.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 288 (*now* 300), at the beginning of clause (*ii*), the words "if no suitable cesspool already exists" be inserted.

He said:—" This section is taken from the Bombay Act, section 232, and the words I propose to put in find a place there. In the Bombay Act we find in section 232 the words 'and the Commissioner may in like manner require any such drain, and, if no suitable cesspool exists, any such cesspool to be made of such materials, size and description, and to be made at such level and with allowance for such fall as may appear to him to be necessary.' These words appear to me to be necessary, because, if a cesspool already exists, it is not necessary that each individual householder should be obliged to have a cesspool in front of his house."

The Hon'ble MR BAKER said :—" This amendment does not seem to be necessary. In the first place, it seems to me that the whole section is governed by the opening words of it, *viz.*, 'when in cases not provided for in section 287 (*now* 299 any premises are, in the opinion of the Chairman, without sufficient means of effectual drainage, he may," &c. I think that covers all that the Hon'ble Member wishes to add. And I think also that we must take it for granted that the Chairman will exercise his powers with common sense. If there should be a suitable cesspool already in existence, surely he would never require the owner to provide another."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said :—" After this explanation I do not wish to press the amendment."

The amendment was then, by leave of the Council, withdrawn.

SECTION 307.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 292E (*now* 307), sub-section (*3*), line 5, after "funds" be inserted "the owner of the land shall be bound to pay the cost of such construction and."

He said :—" I want to put in these words in order to make it clear that the cost of the construction is to be borne by the owner of the land, and the cost of repair alone by the owner of the hut. I think that is what is intended to be the law."

The Hon'ble MR. BAKER said :—" This is already provided for in section 622 (*1a*) [*now* section 597, sub-section (*2*)]; that section gives a general power to recover the cost of carrying out works from the person on whom the notice has been served. By sub-section (*2*) of section 292E (*now* 307), the General Committee may serve written notices on the owner of the land requiring him to construct the drain."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said :—" Yes, that is so. I accept the explanation and withdraw the amendment "

The amendment was then, by leave of the Council, withdrawn.

SECTION 319.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that at the end of section 295 (*now* 319) the following be added :—

"Provided that the amount recoverable as expenses of such inspection and examination shall not in any case exceed ten rupees."

He said :—" A similar provision will be found in section 265B (*now* 282), proviso."

The Hon'ble Mr. Baker said:—"I accept the amendment."

The motion was put and agreed to.

Section 321.

The Hon'ble Babu Surendranath Banerjee moved that the words "not being dwelling houses" be inserted after the word "premises" in line 5 of section 296A (*now* 321).

He said:—"Sir, ventilating shafts are dangerous to dwelling-houses, and they are being removed throughout the town, I believe. I think, if my hon'ble friend would place himself in communication with the Health Department, he would find that that Department are engaged in removing these ventilating shafts from dwelling houses. They are positively dangerous in that position. I placed myself in communication with the Assistant Health Officer, and he was of opinion that this suggestion should be made. Those shafts are being removed, and it would be as well for us to lay it down as part of the law that they shall not be fixed to dwelling-houses."

The Hon'ble Mr. Baker said:—"I am afraid this amendment is impossible. The section follows the existing law, and, as far as I know, it must usually happen that the buildings to which ventilating shafts will be attached must be dwelling-houses."

The Hon'ble Mr. Oldham said:—"When we sat in Select Committee we had before us a model dwelling-house which was furnished with these ventilating shafts. I had heard something to the effect that they can be dangerous, but no objection was taken at that time."

The Hon'ble Babu Surendranath Banerjee said:—"That was a Bombay model, and I don't think Sir, we ought to pin our faith upon models of dwelling-houses in a city which has for the past two or three years been desolated by the plague. Anyhow, that has been the view put before me, and I think I ought to draw the attention of the Council to it. The Assistant Health Officer assured me that steps are being taken to remove these ventilating shafts. Is the Hon'ble Member in charge of the Bill prepared to challenge this statement?"

The Hon'ble Mr. Baker said:—"I cannot challenge it, as this is the first time I have heard of it."

The Hon'ble Babu Surendranath Banerjee said:—"If my hon'ble friend will place himself in communication with the Health Officer, he will find out all about it and that it is so."

The Hon'ble Mr. Baker said:—"My opinion is that this cannot be done all over the town. It may be possible to remove them in some instances, but not in all."

The Hon'ble Babu Surendranath Banerjee said:—"You recognise the fact that it is not desirable to have these ventilating shafts fixed to houses. I think it is decidedly dangerous to have them."

The Hon'ble the President said:—"Can the Hon'ble Member tell us, when a ventilating shaft, which is required for sanitary purposes, is removed from a dwelling-house, to what building that shaft has subsequently to be fixed?"

The Hon'ble Babu Surendranath Banerjee said:—"No, I cannot tell you that, Sir."

The Hon'ble Mr. Buckley said:—"I had intended to say a few words before my hon'ble friend replied. I apologise for speaking after he has replied, but I should like to point out that not only is it the case that these ventilating shafts must be fixed to dwelling-houses when there is no other building to which to fix them, but dwelling-houses have their own ventilating shafts in many cases, and it is necessary that they should have them. This section is intended to apply to public ventilating shafts, and it would, no doubt, be desirable to place them somewhere else, if it were possible to do so. But it is not possible to do so in all cases, and in the Bill there are stipulations that these shafts shall be carried well above the houses out of danger as far as possible. I am afraid the Hon'ble Member's suggestion is not practicable."

The motion was then put and lost.

Section 324.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that at the end of section 296D (*now* 324) be added:—

"The decision of the Court of Small Causes shall, subject to the provisions of Section 6 of the Presidency Small Cause Courts Act, 1882, or section 25 of the Provincial Small Cause Courts Act, 1887, as the case may be, be final."

He said:—"This amendment is based on precisely the same principle as my amendment to sub-section (*3*) of section 148N (*now* 163). I then explained to the Council the reasons why it is desirable to invest the High Court with power to interfere with the decision of a Small Cause Court Judge, where such decision is erroneous in law, and has by reason of such error caused hardship or injustice. That was accepted by the Council, and I place this proposal on precisely the same ground."

The Hon'ble Mr. Baker said:—"Can the Hon'ble Member say if it is at all likely that any question of law will arise under this section? That is the only doubt which has occurred to me."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"Questions of law may arise on the construction of these sections."

The Hon'ble Mr. Baker said:—"I should hardly have thought that any question of law was likely to arise. The Hon'ble Member has convinced me that it is desirable for the High Court to have the power of revision in matters of law, and the only doubt I felt in this particular section was that no question of law was likely to arise. If any question of law arises, it is better to have these words; and, if none does arise, they will do no harm."

The motion was then put and agreed to.

Section 325.

The Hon'ble Babu Surendranath Banerjee moved that the words "or water-course" be inserted after the word "tank" in line 4 of sub-section (*1*) of section 311A.

He said:—"I had Tolly's Nullah in my mind in proposing this amendment. It is not a tank, nor is it a place for the storage of water, and I think it is as well that steps should be taken to provide against the pollution of Tolly's Nullah. I therefore think it would be advisable to have these words inserted."

The Hon'ble Mr. Baker said:—"These words were in the original Bill, and they were struck out in Select Committee, because we thought that there was no such thing as a water-course in Calcutta. If Tolly's Nullah cannot be described by any other term, then I shall not object to this amendment."

The motion was put and agreed to.

SECTION 327.

The Hon'ble BABU JATRA MOHAN SEN, by leave of the Council, withdrew the motion standing in his name that in section 314A (*now* 327), sub-section (*2*), the words "subject to the control of the Corporation" be inserted after "shall."

He said:—"Sir, having regard to the sense of the Council as to the undesirability of interfering with the decision of the General Committee by the Corporation, I withdraw this amendment."

SECTION 329.

The Hon'ble BABU SURENDRANATH BANERJEE moved that sub-section (*3*) of section 315 [*now* sub-section (*2*) of section 329] be omitted.

He said:—"Sir, we have no such provision as this in the present law, that is as to the license being for a renewable period of one year, although we have provision for the cancellation of licenses in case of misconduct. I desire to call attention to sub-section (*2*) of section 321 (*now* 335), which says: 'if any licensed plumber contravenes sub-section (*1*), his license will be cancelled whether he be prosecuted or not.' So that, if a plumber does anything he ought not to do, there is ample power provided in the Bill for the cancellation of his license. I have an objection to the renewal of licenses every year. Every time a plumber goes to the Municipal Office to pay a license, he has to fee a number of people, and I am anxious that that process should not continue indefinitely. The provision does not exist in the present law, and, as there is ample power in that law, it does not seem necessary to have a provision like this."

The Hon'ble MR. BAKER said:—"I think it is impossible to have a perpetual license; that would be neither desirable nor practicable. I notice also that in section 611 (*now* 586) it is definitely contemplated that licenses shall be for a fixed period. I think one year is a reasonable time, and I ask that this clause be allowed to stand."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"My hon'ble friend's argument is this. You have got something in section 611 (*now* 586), and as you have got something in that section, this section must remain. My reply is, change what is here and also what is in section 611 (*now* 586). I think that will meet that part of my friend's argument. We have got a provision in this section which is in conflict with section 611 (*now* 586). Change this section and adapt 611 (*now* 586) to what we have changed this section to. I think that process is easy and does not involve any difficulty whatever. My hon'ble friend says that it is impossible that those licenses should run for an indefinite period. I venture to say that this is an *obiter dictum* of his, as I do not see why it is impossible at all. If he holds that opinion, why not fix three years as the period? It is not desirable that these people should go to the Municipal Office and fee people all round. Every time any one has to go to the Magistrate for the renewal of an arms license, he fees everybody, beginning with the peon and going up to the peshkar. Such a state of things does not exist in the Corporation now, and I do not see why we should create it there. Therefore, Sir, I hope my hon'ble friend will accept the compromise which I now propose."

"The Hon'ble MR. BAKER said:—"I have no objection to three years. I do not think these licensed plumbers are in any respect like the people who take out arms licenses."

The Hon'ble MR. OLDHAM said:—"I would say that these licenses are more of the character of diplomas, and a diploma may be given for a permanent period. I believe that the objections to yearly renewals are very strong, and that three years may be accepted as a compromise."

The Hon'ble MR. HANDLEY said:—"What remedy has the applicant if the Chairman refuses his application under sub-section (*4*) [*now* (*3*)]?"

The Hon'ble Mr. Baker said:—"He has an appeal to the General Committee."

The Hon'ble Mr. Bolton said:—"I think three years may very well be accepted as a compromise.

The motion was put in the amended form and agreed to.

Section 331.

The Hon'ble Babu Surendranath Banerjee moved that clause (c) of section 317 (*now* 331) be omitted.

He said:—Clause (b) provides that a licensed plumber shall furnish the Engineer with plans of all drainage works carried out under clause (b). If you turn to clause (a), you will see that under it the plumber may, before the work is begun, prepare for the approval of the Engineer plans and estimates for the drainage of premises. So that he has to do this twice; first, before the work is undertaken, and, secondly, after the work has been finished. Is this double safeguard necessary? Is it not quite enough that the plumber should prepare the plans on the first occasion, and might we not trust to these plans and estimates being carried out? I suppose the unfortunate persons, whose drains are being connected, will have to pay for the plans and estimates in the first instance, and again in the second instance. I do not think we have got these elaborate provisions in the present law, and it seems to me it ought to be enough if plans and estimates are submitted before the work is undertaken, and then subsequent plans and estimates may be dispensed with. The position of a plumber with regard to the Corporation has some sort of analogy to the position of an Attorney in the High Court. He is regarded as a sort of *quasi*-officer of the Court. The Court has a hold on him, as the Corporation has a hold on the plumber. If a plumber misbehaves himself, his license is liable to be cancelled; and, if he does things not in accordance with the plans and estimates, he is liable to be punished. Therefore, he has the strongest possible motives for doing all these things in accordance with the plans and estimates. If they are not done in accordance with the plans and estimates, there is the owner whose interest it is that the work should be done properly. And, having regard to this double safeguard, it seems to me unnecessary to have this second series of plans and estimates. I think it is throwing a double burden on the tax-payers, and I am myself a tax-payer; I therefore propose that clause (b) should be omitted."

The Hon'ble Mr. Baker said:—"I think my hon'ble friend is under some misapprehension. There is no intention that two plans and estimates should be prepared. What is intended is that, when the work has been carried out, the original plan and estimate shall be deposited with the Engineer."

The Hon'ble Mr. Buckley said:—"I think my hon'ble friend Mr. Baker is mistaken. It is very desirable, indeed, that, when the work is completed, the Municipality should be in possession of plans showing how the drains are carried. A man may have prepared a plan showing the way he intended to carry the drains, but difficulties may subsequently have arisen, and he may, in consequence, have found it necessary to carry the drains in a different direction. That being so, it is most necessary that drains, as they are exactly constructed, should be recorded for the information of people who have control over them afterwards. As a matter of fact, it will not be such a difficult matter as the Hon'ble Babu Surendranath Banerjee seems to think. In most cases a man would make his plans in the first instance; he would then, if he had to alter the drains, make a few marks on them showing the alterations, and then have a tracing prepared of the revised map. I do not suppose the whole thing would cost more than one or two rupees."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"I think in clause (a) the word 'may' should be replaced by the word 'shall.' I may be under a misapprehension, and if I am, my hon'ble friend will enlighten me on the

point. Is it optional with the plumber to make a plan in the first instance and obligatory upon him to furnish a plan when the building is finished?"

The Hon'ble Mr. Baker said:—"When a plumber is employed in carrying out any work, he must prepare plans for the Engineer's approval before he can do it, and, if the work is carried out without change, he simply deposits those plans in the Engineer's office. If alterations are made, he marks the alterations on the plans and deposits them in the Engineer's office. There is nothing further than that."

The motion was then, by leave of the Council, withdrawn.

The Hon'ble Babu Surendranath Banerjee also moved that the following proviso be added to clause (*e*) of section 317 (*now* 331):—

"Provided that, before any such works are carried out, the plumber shall submit a plan of the work and an estimate of the cost thereof to the owner or occupier of the premises, as the case may be."

He said:—"I think, Sir, that it is only fair that before the works are carried out the plumber should make out plans and estimates and submit them to the Engineer. I think also that it is only right and proper that the person who has to pay shall be furnished with plans and estimates. I think my hon'ble friend ought not to object to a provision of this kind. I may tell you, Sir, that as a matter of fact at the present moment, when a plumber finds that the owner or occupier of the premises is rather a big person, he always brings the plans and shows them to him for his approval. The plumber doubtless thinks that if he does not do so, he may create difficulties later on. I think it ought to be made obligatory that these plans should be submitted to the rate-payers before they are carried out. The person who pays the money has the right to know what the work is for which he pays. I think that is a perfectly fair and reasonable proposal."

The Hon'ble Mr. Baker said:—"I would point out to the Hon'ble Member that this clause comes into operation only in the event of the owner having made default in carrying out the work himself. In the first instance, it is quite open to him to carry out the work through his own plumber. If he fails or neglects to do so, then the Chairman comes in and appoints his plumber, and I do not see that the owner has anything further to say in the matter. I am afraid that, if this amendment is allowed, an obstructive owner will seize upon the opportunity afforded to him and delay the matter further. He will raise frivolous objections if he wants to delay the progress of the work. That is the sole ground of objection. I have no very strong objection to this proposal, but I do think that on the whole it is dangerous. I cannot see that the defaulting owner has any strong claim to have the plan submitted to him."

The Hon'ble Mr. Apcar said:—"I do not think that it will be in the power of any owner to delay. All this provides for is that he will have some information as to what is going to be done. There may be many reasons why the owner has not proceeded to put the drains in order. It may be that he is in default accidentally, and, if any work has to be done for which he is liable, I think information ought to be given to him as to what that work is to be. I am entirely in support of the amendment, and if my hon'ble friend, the Member in charge of the Bill, does not hold a strong opinion in regard to it, I hope that it will be allowed and passed into law."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"Frivolous objections the owner cannot raise. It is not as if his sanction were required. It is only for information. He has to pay for the work, and all that I say is that he should see a statement of the work for which he has to pay. I do not see that he has it in his power to raise frivolous objections or to delay the execution of the work."

The Hon'ble Mr. Spink said:—"I understand there would be no difficulty in his finding out from the Municipal Officer any information he requires."

The Hon'ble MR. MACKENZIE said:—"It occurs to me, Sir, that the plumber would not undertake the work without first submitting the plans. What owner or occupier would have the work done without seeing the plans?"

The Hon'ble MR. BAKER said:—"What would happen is this. In the first instance, the Chairman serves the notice on the owner to carry out certain work, and, if the owner fails or neglects to do so, then the Chairman orders a plumber to do it. I think the section should be allowed to stand as it is."

The Hon'ble MR. BOLTON said:—"If the provision which the Hon'ble Babu Surendranath Banerjee wishes to introduce is accepted, it will encourage owners to delay the carrying out of drainage improvements on the receipt of notice from the Chairman, because, by doing so, they will afterwards have an opportunity of checking the estimates for the work and of raising objections. The absence of the provisions will not prejudice them. The Chairman will not disregard any reasonable representation from them against unnecessary expenditure."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"The owner ought to know what he is paying for, and he would not know that unless this statement is laid before him. My hon'ble friends over there seem to be of opinion that the rate-payers are a body who are anxious to evade all the orders they are required to carry out. There are many causes besides wilful negligence which may have caused the work to be overlooked. For instance, the owner may be living away from Calcutta. Take my own case. I have a house here, but I live away from the city. I might not receive the notice, and I might not know that the work was required to be done. I do not think we ought always to assume that default is made through a wish to evade the law or from sheer negligence. If my hon'ble friends opposite would not regard the rate-payers in the way they do, but would take a broader view, they would probably look at the matter in a more charitable light. It is simply a principle of justice which I think ought to be accepted."

The Hon'ble MR. BOLTON said:—"If any representation is made to the Chairman that the failure to execute the work was due to the owner's absence from town, he will, no doubt, grant time to the owner to carry out the work himself."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"The Chairman knows nothing of all this. He delegates his powers to somebody else, and he delegates his powers to somebody else, and so on. If the Chairman himself attended to all these things, I would for my part be quite willing to trust to him implicitly, and we could do without any municipal law at all. But, as I have said, his powers are delegated to subordinates, he relies upon a great many agents, and those agents neither my hon'ble friends nor myself would trust. The Chairman is, however, obliged to employ them in the discharge of his duties. I really cannot understand what objection there can be to a simple amendment of this kind. It could not possibly do harm; all that is required under it is that the plans should be submitted to the man before he is called upon to pay for the work."

The motion being put, the Council divided as follows:—

Ayes 8.	*Noes 10.*
The Hon'ble Rai Durga Gati Banerjea, Bahadur.	The Hon'ble Mr. Buckley.
The Hon'ble Raja Ranajit Sinha Bahadur, of Nashipur.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Handley.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Mackenzie.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Mr. Spink.
The Hon'ble Mr. Apcar.	The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Mr. Oldham.
The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendment was lost.

SECTION 338.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 328 (*now* 338), sub-section (*2*), line 4, for "may" be substituted "shall."

He said:—"This is a very small matter, which does not admit of much discussion. It seems to me that the intention of the section is to make a reference to the General Committee compulsory; if so, 'shall' is the proper word."

The Hon'ble MR. BAKER said:—"I have no objection, Sir. I think 'may' means 'shall' in this case."

The motion was put and agreed to.

SECTION 339.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA also moved that in section 329 (*now* 339), sub-section (*3*), for the words "cause any hedge or tree referred to in sub-section (*2*) to be trimmed, pruned or cut" be substituted "take action under sub-section (*2*)."

He said:—"This is a purely verbal amendment intended to make the section shorter."

The Hon'ble MR. BAKER said:—"I think we had better follow the wording of the section as it stands, which has been settled by the Secretary of the Council. I am not sure that the effect would be exactly the same."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"If my hon'ble friend has any serious objection, I will not press the amendment."

The motion was then, by leave of the Council, withdrawn.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA also moved that in section 329 (*now* 339), sub-section (*3*), line 8, the words "or occupier" be omitted.

He said:—"This is a matter of substance. Under the law, the trees are the property of the owner, and when the Chairman takes action under sub-section (*3*) of section 329 (*now* 339), I think in common fairness the owner ought to bear the expense, and not the occupier."

The Hon'ble MR. BAKER said:—"This follows the existing law. The intention is that the Chairman may take action in case of emergency, and shall have a double remedy against either the owner or the occupier. This matter was considered in Select Committee, and it was decided to leave in both words."

The Hon'ble MR. APCAR said:—"It may be, Sir, that the fault is that of the occupier; he may have been neglectful."

The Hon'ble MR. HANDLEY said:—"I would also point out that the Hon'ble Member, the mover, has not noticed that it is 'a hedge or a tree'; although trees are reserved to the landlord, I do not know that a hedge is."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I think a free discretion ought to be given to the municipal executive to deal with the owner or the occupier, as the justice of the case may require."

The motion was then put and lost.

SECTION 340.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 329B, sub-section (*4*) [*now* section 340, sub-section (*6*)], for the words "on payment of compensation" be substituted "and the owner or occupier shall be entitled to reasonable compensation out of the municipal funds on account of such removal."

He said :—"If I may say so without impropriety, the language of the sub-section seems to me to be somewhat clumsy. The sub-section says :—

'At any time after permission has been given under sub-section (2) [now (4)] to put up a verandah, balcony, sunshade, weather-frame or the like, to project from a building, the General Committee may, by written notice, require the owner or occupier of the building to remove such projection on *payment* of compensation.'

"Surely the word 'payment' is not appropriate. 'On receipt of compensation' might be tolerated. The person who removes the structure has not to pay the compensation. It has to be paid by the Corporation."

The Hon'ble MR. BAKER said:—"I see no objection to this, Sir, now that the first two lines of the amendment have been struck out."

The motion was put and agreed to.

SECTION 343.

The Hon'ble RAJA RANAJIT SINHA BAHADUR OF NASHIPUR moved that the word "Chairman" be substituted for "General Committee" in section 329E (*now* 343).

He said :—"To my mind, Sir, it appears that, in matters of such urgency as those dealt with in this section, the Chairman should be vested with the power to deal with matters mentioned in the section."

The Hon'ble MR. BAKER said:—"I agree to this amendment. There is no doubt that a matter like this would be a matter of urgency, and there is no necessity to delay action for reference to the General Committee. I notice also that in Bombay this matter rests with the Municipal Commissioner."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I have no objection to offer, and the General Committee is already so overburdened with work that perhaps it would be as well to substitute the 'Chairman' here. At the same time I do not like the principle. I should prefer that the work should be done as far as possible under the supervision of the General Committee, if not by the General Committee itself. But, as I have said, I have no serious objection to the proposal."

The motion was then put and agreed to.

SECTION 344.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 329F (*now* 344), sub-section (*1*), the word "not" be transposed from line 3 to line 4 and placed between the words "as" and "to."

He said :—"This is a small matter. I think the transposition of the word 'not' would make the section more emphatic. I want to have the two 'nots' as near each other as possible."

The Hon'ble MR. BAKER said :—"If that were accepted, Sir, it would be to make a further change. If the word 'not' is transposed, it will be necessary to change the word 'or' between 'constructed' and 'maintained' into 'and.' I do not think the alteration is necessary."

The motion was then, by leave of the Council, withdrawn.

SECTION 356.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the words "with the approval of the Corporation" be inserted after the words "General Committee" in line 1 of sub-section (*1*) of section 347 (*now* 356), and also after the words "General Committee" in lines 1 and 2 of sub-section (*3*) of section 347 (*now* 356).

He said :—"I would ask the Council to turn for a moment to sub-section (*1*) of section 347 (*now* 356). That sub-section says :—

"* * * schemes and plans of proposed public streets."

"That seems to be a very large work affecting the public in which the Corporation ought to be permitted to have a voice. It is because of the character of the work that I should like to move the amendment which stands against my name. Public streets mean very large works, involving a large expenditure, and they are matters of great public convenience or inconvenience, as the case may be. I think, Sir, that it is as well in a matter like this, where the interests of the public are so intimately concerned and where a large outlay has to be incurred, that the Corporation should have a voice. Of course, the executive part of the work may be done by the General Committee. I do not wish to disturb that, but I think the words 'with the approval of the Corporation' should be added. So far as the executive part of the work is concerned, that may be left, as under the section, to the General Committee; but I feel, after having regard to the large expenditure which will be incurred in works of this kind and to the considerations of public convenience which will be involved, it would be as well that the Corporation should have something to say. That is with regard to the first part of my amendment. The second part of the amendment is to insert the words 'with the approval of the Corporation' in lines 1 and 2 of sub-section *(3)* of the section. I can say at once that I do not put it on the same footing with the first part of the amendment. Public streets in bustees are not so important as public streets in the town. Therefore, if the Council would object to the second part of the amendment, I do not wish to press it. But I do think, that with regard to public streets, where a large expenditure is to be incurred, the approval of the Corporation should be obtained."

The Hon'ble Mr. Baker said:—"I think the Hon'ble Member is under some misapprehension. This section only relates to the preparation of projects. The effect of the amendment would be that it would not be open to the General Committee even to prepare a project for a new street without having obtained the previous approval of the Corporation. I am sure the Hon'ble Member does not contemplate that."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"I think the Hon'ble Member is right. I had overlooked that. I am much obliged to the Hon'ble Member. I beg to withdraw both proposals."

The motion was then, by leave of the Council, withdrawn.

Section 357.

The Hon'ble Babu Surendranath Banerjee moved that the following proviso be added to sub-section *(1)* of section 347A (*now* 357):—

"Provided that the Chairman shall acquire such land through a Deputy Collector, who shall not be subordinate to the authority of the Chairman."

He said:—"I understand that it is the intention of the Hon'ble Member in charge of the Bill to offer a strong opposition to this section; therefore I suggest that it be taken up in connection with an amendment which stands against my name respecting the land acquisition section. I think that would be the most convenient course, if Your Honour has no objection and my hon'ble friend has none."

The Hon'ble Mr. Baker said:—"It will be more convenient to take it up later, Sir, as the Hon'ble Member proposes."

The Hon'ble the President said:—"I assent to this course."

The consideration of the amendment was accordingly postponed.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 347A (*now* 357), sub-section *(2)*, proviso, for the words "the capitalised value of" be substituted "twenty-five times."

He said:—"My intention in moving this amendment is to prevent needless litigation as much as possible. If the section is allowed to retain its present

form, who is to decide what is the capitalised value of the annual sum? I can well anticipate that there will be litigation, and if section 640 (*now* 617) does not apply there will be protracted litigation in the Civil Courts."

The Hon'ble MR. BAKER said:—"Section 640 (*now* 617) says 'any municipal authority or person.'"

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said:—"Even if section 640 (*now* 617) does apply, there will be litigation, though, perhaps, not very expensive. The owner will probably say, 'I am not liable to pay more than twenty times,' and the Corporation will say, 'we are entitled to get at least thirty times.' The result, of course, will be litigation. The words I suggest will, I think, make the section workable and practical."

The Hon'ble MR. OLDHAM said:—"As the amendment stood, the proposal was that it should be twenty times the annual value. That was the only objection we found to it. I think the 'twenty-five times' should be accepted."

The Hon'ble MR. BAKER:—"There is no objection. I agree with the Hon'ble Mr. Oldham."

The motion was then put and agreed to.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 347A (*now* 357), sub-section (5), line 3, after the word "of" the words "by public auction" be inserted.

He said:—"With reference to this amendment, I have been in communication with the Hon'ble Member in charge of the Bill, and also with the Chairman of the Corporation, and they are both of opinion that, unless some proviso is added to meet exceptional cases, the whole thing will be impracticable. I, therefore, propose, with your permission to put in these words:—

'by public auction, unless the General Committee, for special reasons, to be recorded in writing, otherwise directs.'

"My suggestion is that the disposal of such property should ordinarily be by public auction, and that only in exceptional cases the sale should be by private arrangement. I think this is in accordance with the present practice, and there can be no possible objection to it. Sometimes a new street is opened out, and it is decided that the lands on both sides are not to be disposed of for some years. But some influential person, perhaps, a friend of some of the Commissioners, lives in the locality, and he manages to secure the land he wants on very favourable terms. I have no special case in view, but I have been informed that such things have occurred. I think that the general rule ought to be the disposal of the lands by public auction, and that a provision to that effect should be embodied in the law."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"The present practice, as my hon'ble friend has just observed, is to sell by auction; but there may be cases where it is not desirable to sell by auction, and in those cases the sale is effected privately. I have no objection to offer to the amendment, but there was one observation made by my hon'ble friend to which I feel bound to take exception. He referred to cases where he said the personal influence of Commissioners had been improperly exercised in connection with these sales. He appeared to rely upon hearsay evidence, and, as I have personal knowledge which will set at rest any evidence of that character, I think I am entitled to make a statement. Some time ago a Commission of Enquiry was appointed by the Corporation to enquire into the conduct of a certain Commissioner. On that Commission were the Chairman, Mr. Nalin Behari Sircar and myself among others. Certain petitions had been presented to the Corporation with reference to the particular Commissioner in question, and it was thought desirable that a Committee should be appointed for the purpose of making an exhaustive enquiry into the whole

matter. The Committee have just finished their labours, and before we resigned we were in a position to send in our report. That report was acquiesced in by Mr. Bright, and the sum total of it was that the Commissioner stands absolutely absolved in our deliberate and unanimous judgment of all the allegations brought against him. As my friend has referred to the exercise of personal influence, I think it is well that I should make an authoritative statement regarding this matter which was publicly enquired into by a competent Committee of Enquiry with the result that the Commissioner has been absolutely absolved of all the charges brought against him."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"I did not intend to insinuate anything against any particular Commissioner, and if what I did say is capable of such construction, I will at once withdraw it."

The Hon'ble Mr. Baker said:—"I think, Sir, there is no objection to accepting this amendment. The present practice is to sell by public auction, and, as the Hon'ble Member says, that practice should be adhered to, except when it is desirable to do otherwise."

The Hon'ble Mr. Bolton said:—"It seems to me, Sir, that a provision for a sale by public auction, would give almost as much opportunity for the exercise of personal influence as the section now stands in the Bill. I do not say that there has been any improper action in the past; but, if there is risk of such action, it will exist in the case of sales by auction also. For instance, it would be possible for interested parties to keep buyers away from the auctions, in order that the lands or buildings may be knocked down at low prices. I think it would be enough to add to 'shall be disposed of by the General Committee' the words 'after public advertisement'."

The Hon'ble Mr. Apcar said:—"I support the Hon'ble Mr. Bolton's proposal. I think it would be a good thing to let these matters be widely known. As for a public auction, it is for the General Committee to conduct the sales as they choose, and I quite agree with the Hon'ble the Chief Secretary in what he has said regarding the abuses which might attend public auctions."

The Hon'ble Mr. Baker said:—"I have no objection to accepting the words proposed by the Hon'ble Mr. Bolton if the Hon'ble Dr. Asutosh Mukhopadhyaya is willing also to accept them."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"Yes, I am quite willing to accept those words, and will substitute them for the terms of my amendment."

The motion was then put in the amended form and agreed to.

Section 364.

The Hon'ble Babu Surendranath Banerjee moved that for the words "the General Committee may, with the consent of the owner, sell the site by public auction," in lines 5 and 6 of sub-section (*1*) of section 363 (*now* 364), the following be substituted:—

"the Corporation shall, upon the requisition of the owner, acquire the said site on payment of a reasonable price,"

and that sub-sections (*2*) and (*3*) be omitted.

He said:—"Sir, the amendment is substantially this. A person being the proprietor of a certain plot of land is unable by the operation of your building regulations to use it as a building site. He wants to use it as a building site, but your rules come in the way, and he is not able to do so. He is not able to use it for building purposes, because considerations of public health and convenience have rendered it necessary on the part of the Corporation to make rules regarding certain sites, and it is in consequence of these rules that

he is unable to erect a building on the land. It seems to me, Sir, to be fair and equitale that, being deprived of the right to use his land as a building site, he should ask the Corporation to purchase it from him at a reasonable price. Sir, he suffers on public grounds; he suffers by reason of the rules which the Corporation for purposes of public health have found it necessary to enact; and it seems to me that it is only right and proper that he should get a fair measure of compensation for not being able to utilise his land in the way he intended, and that the land should be taken over by the Corporation. Of course, I do not overlook the difficulties surrounding the question My hon'ble friend will ask me what is the Corporation to do with the land? It would be so much public expenditure for nothing. Sir, that is a consideration which must not be overlooked But, after thinking over the matter most carefully, it struck me that there may be a *via media* which I should like my hon'ble friend to accept if he could see his way to do so. That *via media* is this: that at any rate for the next year or so the amendment should be given effect to. That is to say, for the next year or so, before the ratepayers have become completely familiarised with the rules we are now about to enact, it would be desirable to have a provision of the kind I suggest. In other words, for the next two or three years, if persons in possession of plots of land are not allowed to build upon those plots in consequence of the operation of the building rules, such persons would be entitled to go up to the Corporation and ask that their sites should be taken over at a reasonable figure. We have, Sir, a section somewhat analagous to the suggestion I make. If any repairs have been done to a privy within the last three years, and if the Corporation calls upon the person to make further repairs, then we have provided that the expenditure shall be met out of Municipal funds. Well, the suggestion I have made follows the lines of that section. Here are your building rules. These rules, which are enacted for the public welfare, preclude a particular party from making use of a site for building purposes which he wanted to use for those purposes. It may be, when this man purchased his site, these rules had not come into operation, but that, while he was waiting for an opportunity to build, they were brought into force. He is, therefore, placed in a difficult position. It seems to me that it is only right and fair that at any rate for the next year or so persons placed in that situation should be entitled to ask the Corporation to take up the site on payment of a reasonable compensation."

The Hon'ble Mr. Baker said:—"I think, Sir, that this proposal, as it stands. is a most unreasonable one. The Hon'ble Member has correctly pointed out that the effect of it would be to saddle the Corporation with a large number of small unserviceable pieces of land dotted about all over the city, which cannot be put to any public use and which would almost certainly be encroached upon by neighbouring owners. The Hon'ble Member then suggests that for the next two years or so the Corporation should be required to buy these pieces of land, but not after that. I do not see, Sir, that the case is any different during the first two years that this Bill would be in force from what it would be afterwards. The fact remains that the Corporation would be inundated with applications from people to buy these pieces of land, and it might in consequence be involved in very considerable financial difficulties. The analogy between this case and that of the privies to which he referred, and in which we undertook to make a contribution from Municipal funds under certain conditions, is by no means a good one. The difference is this, that in the case of the privies we call upon the owner to incur certain expenditure in order to conform to the new rules, and it is only in such a case that we undertake to bear a portion of that expenditure. In this case the owner of the land incurs no expenditure; he is not required to put his hand into his pocket in any way. The idea which underlies the amendment is this, that, if a person has land, he is at liberty to utilise that land in any way he thinks fit. But that idea is totally unsound. No person has any right to use his property in such a manner as to endanger the health of his neighbours, and if a man has purchased a piece of land, which is so small or in such a position that to build upon it would adversely affect the public health, that man deserves, in my opinion, no compensation."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"I did not really expect that a proposal so unreasonable as this would come from my hon'ble friend Babu Surendranath Banerjee. The Hon'ble Member in charge of the Bill has very correctly pointed out what the effect of this amendment would be; and even the most superficial examination of the question will show that the proposition is based upon fallacious grounds. In the first place, there is no authority for the assumption that every member of a civilised community is entitled to use his property just as he pleases; his rights are restricted by the rights of his neighbours. In the second place, it is equally inaccurate to say that when the rights of an owner are so restricted he suffers by reason of the rules which the Corporation for purposes of public health have found it necessary to enact; it is not the Corporation, but this Legislature, which enacts this rule of law; and my hon'ble friend, in order to be logically consistent, ought to propose that we, and not the Corporation, should compensate the unfortunate owner. It will also be noticed that under the section, it will be optional for the General Committee to sell the site by public auction. If the amendment of my hon'ble friend were accepted, it would be obligatory upon the Corporation to acquire the site on the payment of a reasonable price. It seems to me absurd that all the rate-payers in the city should provide the price of a piece of land which belongs to a particular rate-payer, and which he is not allowed to build upon. To my mind, if owners of such pieces of land are allowed to do as is proposed, if I were in possession of a diseased horse which was good enough for work, but which I was not allowed to drive, I might as well go to the Corporation and ask them to take it over from me at a reasonable price!"

The Hon'ble Raja Ranajit Sinha Bahadur of Nashipur said:—"I am sorry I cannot support the amendment, which is unreasonable. I cannot understand what the Corporation would do with these pieces of land after acquiring them. I do not think the money of the rate-payers should be utilised for buying up plots of land which are absolutely useless to the public."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"I do not think the analogy of the diseased horse is quite a correct one. The diseased horse is not diseased from the operation of any law which may have been enacted for the benefit of the community or the Government. The horse is rendered useless by the operation of natural causes. The land is rendered useless by the operation of a new law, of which the person who owns the land is absolutely in ignorance. When he purchased the land no such rules were in existence, and I am surprised that so sound and so able a lawyer as my hon'ble friend should have brought forward an argument so absolutely unreasonable as this. But we live in a land of surprises, and sometimes we find even lawyers tripping in this fashion. I just want to put a concrete case to my hon'ble friend the Member in charge, and ask him what he thinks about the justice of such a case. Suppose a person had purchased a piece of land now, in ignorance of the fact that any new building rules are likely soon to come into operation; he is absolutely in ignorance of the new law, and he purchases a piece of land in the hope of erecting by and by a building upon it. Being a poor man, he is not able to find the means to construct the building until, say, next May. Then he begins to build, but the new rules have in the meantime come into force. The Chairman comes down upon him and says: 'You cannot build there; the rules stand in the way.' Now I should like to know what the Hon'ble Member in charge of the Bill thinks of the justice of a case of that description. Here is this poor man; he purchases a site in the hope of being able, when he has raised sufficient money, to erect a building upon it. He knows the present rules, and he knows that in them there are no difficulties in the way of his building; but in the meantime the new law comes into operation, and it is no longer possible for him to build. Is not that a hard case? If it is a hard case,—and it must be admitted to be so,—is it not right and proper that we should devise a remedy? If you limit the period, say, to one or two years, the justice of the case will be amply met. I cannot admit that it is an unreasonable proposal. Let us not do injury to private individuals in the name of public right. We ought to proceed cautiously, and we ought to see to it, that in the name of public health and of public right we do nothing to injure the rights of private individuals. I am

convinced that there is a tampering with private rights under this section as it stands, and, that being so, I feel it is necessary to move this amendment. If the amendment is unacceptable, I recommend a compromise, which I regret to see my hon'ble friend also seems to think is objectionable upon the lines I have suggested."

The Hon'ble MR. BAKER said:—"May I also give one concrete instance on the other side? Up to the year 1882 there was an import-duty imposed on piece-goods and yarn imported into Calcutta. When the duties were taken off in 1882 there were large stocks of piece-goods and yarn in Calcutta on which the duty had been paid. Does the Hon'ble Member think it would have been reasonable in that case to require the Government to take over those stocks of yarn and piece goods, at cost price?"

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I do not consider that to be a good analogy. It is a totally different case. That is a matter of trade and speculation. The tradesmen are bound to take the consequences of their action, be they good or bad. That is quite a different matter. A man wants to build a house, probably to live in it. He is not speculating, nor is it done in the way of trade, and I am very much surprised that the difference between the two cases should not have struck my hon'ble friend as unquestionably the two matters stand upon a wholly different footing."

The motion was then put and lost.

SECTION 367.

The Hon'ble DR ASUTOSH MUKHOPADHYAYA moved that in section 365 (*now* 367), after sub-section (*4*), the following be inserted:—

"(*4a*) The decision of the Local Government upon such objections shall be final."

He said:—"I take it that this is the intention of the framers of the law. I do not think it desirable that people should be permitted to litigate for purposes of settling these matters. The section relates to the power of regulating the erection of certain classes of buildings in particular streets or localities. It is provided that, if the General Committee have given public notice of their intention to do certain things, objections may be preferred which will be considered, and the whole question will be sent to the Local Government for final orders; sub-section (*4*) then provides that 'the Local Government, after considering the objections, may confirm the declaration, and, before doing so, may modify it, but not so as to extend its effect' My object is to give finality to the decision of the Local Government, and thus prevent either appeals to the Government of India or expensive litigation in the Civil Courts."

The Hon'ble MR. BAKER said:—"I do not see that the addition of these words will make the decision of the Local Government any more final than it was before. There is no higher authority than the Local Government; therefore, in my opinion, the words are quite unnecessary."

The motion was then put and lost.

SECTION 370A.

The Hon'ble BABU SURENDRANATH BANERJEE moved that section 370A be omitted.

The Hon'ble MR. APCAR also moved that section 370A be omitted.

The Hon'ble Babu SURENDRANATH BANERJEE said:—"This is rather an important matter, and I will just read out the chief points in the section. The section says:—

'370A. (*1*) The Local Government may make rules—

(*a*) to confer and impose mutual rights and obligations upon owners of adjacent masonry buildings or lands as regards the erection, re-erection, use, maintenance, alteration and repair of party walls,

(*b*) to regulate the exercise and enforcement of such rights and obligations, respectively,

(*c*) for apportioning between such owners any expenses incurred in the erection, re-erection, maintenance, alteration or repair of such walls, and for requiring security to be given by one owner to another for the payment of his share of such expenses,

(*d*) for determining the amount of compensation (if any) to be paid by any such owner to any other such owner for any damage sustained by the latter in consequence of the erection, re-erection, alteration or repair of such walls, and

(*e*) to facilitate reference to arbitration for the settlement of disputes arising between any such owners in the exercise or enforcement of any rights or obligations conferred or imposed by such rules, and to regulate the appointment, powers and procedure of arbitrators and the payment of the costs of such references.

'(2) Rules made under sub-section (1) may authorise an owner of a building or land to place the footings of a party wall below the surface of adjoining land belonging to another owner.'

"In the original Bill we had no such section as this all. It was introduced and laid before the Select Committee, and we had, I may say, a very animated discussion about this question of party walls. Both my hon'ble friend Babu Norendra Nath Sen and myself were strongly opposed to the introduction of this section or any section of a similar character. The chief ground upon which the section was supported was that, because such rules and regulations existed in English towns, we should have them here. I do not consider that to be a good argument at all. Circumstances here are totally different from the circumstances which obtain in England. Space is not so valuable here as in London, and here the people are anxious to have their own walls, and not to build their walls on the land of other people. We do not want these rules and regulations; and why should we have them? My hon'ble friend suggested that, although a section like this may not be necessary now, it would be very useful hereafter. But to that my reply is 'sufficient unto the day is the evil thereof.' As administrators I do not see the necessity for us to take such large views and to consider such possibilities as these. We ought to be content to deal with the difficulties and dangers which arise from day to day. I think we ought to content ourselves with those difficulties, and not to legislate for possibilities which may arise in the distant future. My contention is this, that difficulties of the kind referred to in this section in regard to party walls are not in the least likely to arise in this country. I am, on the other hand, afraid of a suggestion like this, because there are litigious people about, and they may take advantage of such a section. I do not think the section is necessary, nor do I think it is wise to foster litigation. I think, on the contrary, we should try to discourage litigation as much as possible, and I trust the Council will not consent to empower the Local Government to make rules in regard to a matter which is likely to be prolific of litigation in the future."

The Hon'ble MR APCAR said:—"If I may be pardoned for saying so, those who are responsible for this Bill do not, it is evident, hold landed property in Calcutta, and have no desire to do so. I may say that I think, if they did, they would be a little alarmed at the prospect that the rights of owners should be interfered with on the lines suggested in this section. The rules are made in order to meet the difficulties that may arise hereafter. But under them the existing rights of parties may be interfered with, and in view of this I have myself taken alarm. Inasmuch as there is no necessity for these rules, I understand at the present time, I hope that their enactment will be postponed until there is some prospect of those difficulties arising which are in the minds of the authors of this section. Conditions in Calcutta certainly are widely different from those existing in London, and I think we might wait for a little while in order to be able to see what provisions are required here if the Government are not prepared to formulate them now. If they are wanted then they might be brought forward in proper form, not in the form of delegation of authority to make rules, but as a portion of some enactment. There would then be an opportunity given for those who are interested to represent their views. There ought, I think, to be some deliberation and consideration upon so important a subject before any hard-and-fast rules are introduced."

The Hon'ble MR. BAKER said:—"The Hon'ble Mr. Buckley has been good enough to undertake to reply on this matter for the most part, but there is just

one word I should like to say. To begin with, the Hon'ble Mover of the amendment, the Hon'ble Babu Surendranath Banerjee, and also the Hon'ble Mr. Apcar to a less extent, said that the reason why this section was inserted in the Bill was that we had party walls in England and rules similar to these were in force there; therefore, we ought to have them here. Now, Sir, I think the Hon'ble Member's recollection has somewhat played him false; that was not the reason at all. The reason why it was thought necessary to insert provisions of this kind in the Bill was this. Under the operation of the Bill, continuous building will become much more frequent in Calcutta than it has been in the past, and when you have continuous building you must sooner or later have party walls. Therefore, although party walls have not been common in Calcutta in the past, we fear that it is inevitable that their number will be increased in the future. Now, party walls in England have been a very fruitful source of litigation everywhere, and we thought it would be prudent to make such a provision as we have here in advance, to prevent litigation in Calcutta. The Hon'ble Member said 'sufficient unto the day is the evil thereof.' Sir, that is exactly what we think too. We are not legislating; we are merely taking the power to legislate when the occasion arises. The provisions of the building chapter in this Bill would be incomplete unless we made a provision for a state of things which is inevitable."

The Hon'ble Mr. Handley said:—I should like to make a remark regarding this section. The Local Government professes to be able to make rules to confer and impose rights upon parties. I must say it has given rise to some doubt in my mind how Government can confer rights which do not already exist by law."

The Hon'ble Mr. Baker said:—"Confer rights and impose obligations."

The Hon'ble Mr. Handley said:—"I only wish to draw attention to that. I do not quite see how Government can confer rights unless they make a statutory provision. No doubt this rule of party-walls was derived from the Roman law, but how far it has been applied to Calcutta I do not know. Probably under some ancient statute of George II, the English common law was applied to the city of Calcutta, but how far that would introduce the common law of England relating to party-walls in Calcutta I am not prepared at this moment to say. I only wish to draw attention to the possible legal difficulty that might arise, or how far the Local Government can make rules to confer rights which do not already exist."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"I agree with the Hon'ble Mr. Handley. The difficulty to which he alludes is a serious one, and we cannot be too cautious about the matter."

The Hon'ble Mr. Buckley said:—"This section of the Bill was introduced with the intention of giving assistance and help to owners of property in Calcutta. Under the existing law any one can build a house a small distance away from his neighbour's, but under the rules in Schedule *XIV-a* (*now XVII*) of this Bill he is not allowed to do so. He can do one of two things: he must either build his house at a certain minimum distance—I think it is six feet—away from the neighbouring house, or he must build it actually in contact with the next one. If he builds in actual contact with the next one, to a certain extent it puts him at a disadvantage, and also from a purely constructional point of view rather of difficulty in the building of the house. First of all, it is obviously a great waste of space to build a house close up to another one so that there are two walls in actual contact. The Building Regulations of America actually go so far as to say that it is a constructional advantage to both houses if there is one wall rather than two, and the action of this Bill will certainly be to compel people in future to stick their houses against one another. If they do that, there is a practical difficulty in the matter of laying a foundation. A man who has to build a house right up against his neighbours' house is more or less compelled to lay his foundation under the walls of his neighbour's house, and there are various difficulties in doing that. In the English law there is a very elaborate series of rules, extending over twenty sections of the London Building Act,

which prescribe all sorts of regulations entirely framed with the idea of assisting the owners. It seems to me that it is very desirable that the Local Government should have power of making rules which will be of assistance to the people. No doubt here in Calcutta the building hitherto has been very different to what it is in London. It certainly will not be so in future; indeed it cannot be so if the Bill is carried out."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"That would be an interference with the rights of owners. There is no intention whatever of doing that. The only intention is to assist and help the owner, so that he may get the full benefit of his property. If you were to take all the streets in Calcutta which are now built with houses away from one another and houses close to one another and were to assess the value of the double walls either existing now or which will exist in future, you would find the value of property wasted in those walls is enormous, and it is evident to everybody that there should be rules for helping them to utilise their property as far as possible."

The Hon'ble MR. OLDHAM said:—"I was one of the advocates for the introduction of these measures in Select Committee, and when my hon'ble friends were speaking against them I do not think they realized how greatly the provisions of this Bill will contract the amount of space which may be occupied by the walls of houses and solid masonry in Calcutta. That contraction will be great, because we have provided in the case of continuous building that one-third of the space occupied by the premises must be open to the air. The Hon'ble Mr. Apcar, looking towards us, has said that we had not the experience which he possessed of being house-owners in Calcutta; but some of us are in the position of managers of house-property in Calcutta, and, speaking of some of the premises under my own control, if I may be permitted to quote Virgil in this connection, I would say *jam proximus ardet Ucalegon*. For there are some premises on which we are pressing Government to spend from three to six lakhs of rupees in additions, and, unless some provisions like these can be resorted to, I do not know how the necessary space can be obtained."

The Hon'ble BABU BOIKANTA NATH SEN said:—"I think I ought to offer a few remarks on this amendment. Our Courts are Courts of law, equity and good conscience. The existence of these party walls will, no doubt, give rise to nice questions of equity, and Your Honour knows, and everybody else in this Council knows, how difficult it is to lay down stereotyped hard-and-fast rules for equitable principles when they have to be applied in concrete cases. It would be difficult, as a good many contingent circumstances will have to be contemplated by Your Honour. Rules will have to be framed, and it would be fettering the hands of the Courts with regard to the discharge of their duties. The questions for decision would be found nice and delicate, and at times, when rules are omitted, the Courts would have to exercise their discretion in applying equitable principles. It is much better, therefore, to leave any enactment in the shape of rules for the decision of questions which will arise between the parties. Let the Courts have their full freedom and full discretion in deciding upon questions which would involve some equitable principles.

"Then it has to be assumed that new rights will not be created. I believe it to be the very essence of the thing that these rights must imply obligations; they cannot be created by these rules; they exist. Interpretations will have to be put, constructions will have to be put, and the Courts will have to decide upon the questions which may arise. I venture to think, therefore, that this wording 'to confer and impose mutual rights' is rather against the principles I am attempting to enunciate. It would be better, if the provisions in the Bill be intended to be retained, to define 'mutual rights.' Instead of 'conferring and imposing mutual rights and obligations' it would be in consonance with axiomatic principles to substitute 'define' for 'confer and impose.' With this observation I beg to support the motion."

The Hon'ble BABU JATRA MOHAN SEN said:—"I am strongly in favour of this motion. No case seems to have been made out for a provision like this

to be introduced here in Calcutta. If a provision of this kind is introduced here, I think the best way would be to introduce it by a separate Bill altogether, and that provisions be made in the shape of a law, and this may be done irrespective of this Bill, and a separate law may be passed hereafter if necessity arises."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I quite respect the motives which have led my hon'ble friends to insert this provision in the Bill. I quite believe that the object is to give owners the assistance which owners stand in need of to build their houses when the new provisions of the Bill will come into operation; but I desire to point out that we have got continuous houses in Chitpur and other parts of the town, and the want of such a provision has not been felt. Any one visiting Chitpur will see the houses there run like English houses along the street. They have got continuous houses. they have got no party walls; there are double walls on both sides of Chitpur; the land is valuable there, but they have not felt the necessity of a provision like this.

"The other difficulty to which my hon'ble friend Mr. Buckley has referred is the difficulty about foundations. They have found no difficulty in that respect either at Chitpur. We do not need such a law; the necessity for it has not been felt; then why legislate in advance? I could understand it if you were legislating in advance, if the legislation adopted involved a distinct reform or a distinct convenience. I am not aware that any great convenience will follow; at any rate the want of that convenience has not been felt, and, when there is a strong body of opposition to this legislation on altogether new and distinct lines on the part of those who represent land-owning and occupiers' interests, I think the Legislature ought to defer to expression of opinion and abandon this section. I do not think there is any necessity for it. On the other hand, a section like this is likely to create alarm. People will come to the conclusion that a section has been inserted which fosters litigation and contention. It seems to me on the whole it is best to give up the section. I think all these circumstances ought to be taken into consideration before the Legislature enacts a provision like this."

The Hon'ble MR. APCAR, in reply, said:—"If those who are conversant with the subject think that legislation on the subject is necessary, I would not oppose the enactment of a definite law; but what I feel about this particular section is this: that rules are to be made which are to 'confer and impose mutual rights and obligations.' I think we ought not to give power and authority to make rules for such a very extreme purpose. I think it would be advisable for us to know what is meant by this provision. What are the mutual rights and obligations which the Government intend to confer and impose? If it is advisable to have a law on the subject, I think proposals for it should be submitted for proper consideration and deliberation in Council. I am not prepared to say that there shall be no regulations at all under the authority of the Legislature, but I think that we ought not to give this extreme power, at this juncture, to the Local Government when we do not know what the rules will be or what shape they will take in order to confer and impose these rights and obligations."

The Hon'ble THE PRESIDENT said:—"I propose that the further consideration of this section stands over till to-morrow.

The further consideration of these motions was then postponed till the next sitting of the Council.

SECTION 373.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 383 (*now* 373), line 5, for "thirty" be substituted "fifteen."

The Hon'ble Babu SURENDRANATH BANERJEE moved that in section 383 (*now* 373), line 5, for "thirty" be substituted "seven."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"Section 383 (*now* 373) says:—

"Within thirty days after the receipt of any application made under section 371A (*now* 370) for approval of a site, or of any information or further information required under

Schedule XIVA (*now XVII*) or within thirty days after the Chairman has been satisfied that there are no objections which may lawfully be taken to the approval of the site, the Chairman shall, by written order, either approve the site or refuse, on one or more of the grounds mentioned in section 387 (*now* 377), to approve the site."

"It will be observed that 30 days is the time fixed for the first alternative' that is to say, 30 days must elapse from the time of the receipt of any information or further information required under Schedule XIVA (*now XVII*). I venture to think that the same period is not required after the Chairman has been satisfied that there are no objections which may be taken to the approval of the site. It seems to me that such a long time as a month is not necessary, and it would be better to put in 15 days, because the Chairman will necessarily have the previous 30 days to consider the matter."

The Hon'ble MR. BAKER said :—"I have been in communication with Mr. Bright about this matter, and I am prepared to accept the present amendment, but not the subsequent one of the Hon'ble Babu Surendranath Banerjee, to reduce the period to 7 days. We agree that 15 days ought to be sufficient, but 7 days will certainly not be enough, having regard to the size of the Municipal Office and the number of these applications."

The Hon'ble MR. APCAR said :—"I did not send in a notice of any amendment in this respect, but I myself thought, independent of my hon'ble friend Babu Surendranath Banerjee's opinion in the matter, that 15 days was the proper time, and I think that would be sufficient."

The Hon'ble BABU SURENDRANATH BANERJEE said :—"My amendment is 7 days as regards that particular matter, but then it is 15 days as regards another matter."

The Hon'ble the PRESIDENT said :—"At the present moment we are discussing line 5 of section 383 (*now* 373), the motion of the Hon'ble Dr. Asutosh Mukhopadhyaya. Will the Hon'ble Babu Surendranath Banerjee speak on his motion No 231, that 'seven' be substituted for 'thirty' in line 5 of section 383 (*now* 373)?"

The Hon'ble BABU SURENDRANATH BANERJEE said :—"Yes, Sir, I will speak to that.

"What I wanted to say with reference to this motion was this: Under the present law you give 60 days practically for the approval of the site and of the building. The present law is this: if an application is made for the approval of the site, that application must be sanctioned or refused within 30 days of the submission of that application. Then, if an application is made after the approval of the site for the approval of the building, the application must either be approved or refused within 30 days. Therefore it comes to this, that under the present law the application for a building, including the application for a site, must be refused or approved within 60 days, assuming that the application for the construction of the building follows immediately after the disposal of the application for the approval of the site. Within 60 days the application must be refused or granted. That is the present law. Under the proposed law an indefinite amount of time is taken up, and that is the point which I want the Hon'ble Member in charge of the Bill to consider. The Chairman may take 60 days to be satisfied about a matter. Suppose I make an application for the approval of a site to-day, the Chairman must be satisfied that there are no objections. No definite length of time is suggested within which he must be satisfied. He may be satisfied, or he may not be satisfied even within two months' time. There is no time fixed there at all, and after he has been satisfied, then within 30 days he may approve or refuse. Therefore it come to this, that an application being made for the approval of a site, the Chairman, in order to be satisfied, may take an indefinite length of time—60, 90 or 100 days; there is no limitation of time, and after being satisfied he may take one month to communicate satisfaction. The Council have accepted the amendment of the Hon'ble Dr. Asutosh Mukhopadhyaya that 15 days be substituted for 30 days after the Chairman has been satisfied. But the point is this: what

safeguard have you that a particular rate-payer will not be indefinitely postponed or postponed for a very long time until the Chairman has been satisfied that the site is to be approved or refused? Therefore, I think there ought to be a limitation as to the time within which the Chairman must be satisfied. That is not laid down in the section. And the same remarks apply to the approval or rejection of the plan for a building. An application for the construction of a building is made, and then within 30 days after the Chairman has been satisfied, the approval or refusal is to be communicated to the party. The Chairman may take two months to be satisfied as to whether a plan should be approved or not. Therefore, there is no limitation as to the time within which the Chairman is to be satisfied with regard to the building. That is my first difficulty with regard to the matter.

"Then I desire to point out—and I think the Hon'ble Member in charge of the Bill will at once see the justice and cogency of my argument —the Chairman takes a month for signifying his approval to the plan of the building. He takes a month also for signifying his approval to the site. The two things stand on altogether a different footing. The site may be approved by simply looking at it. The approval of the building is a much more complicated matter. Therefore, Sir, if you take a month for the approval of a building, why should you take a month for the approval of the site? I think you ought to take less. Why should a rate-payer be put to unnecessary delay? I am quite aware that that is the present law. It is a month for the site and a month for the building; but under the present law there are not these difficulties. The Chairman is not given an indefinite length of time within which he has to be satisfied as to the site or as to the plan. If within that time the Chairman is not satisfied, the law empowers the man to proceed without the sanction of the Corporation. Therefore that is my difficulty, and I suggest that, instead of thirty, fifteen days should be given for the approval of the site. I am prepared to accept my friend the Hon'ble Dr. Ashutosh Mukhopadhyaya's amendment, that, after the Chairman has been satisfied, within 15 days he must communicate his order; but I also suggest a limitation of the time within which the Chairman must communicate his satisfaction or disapproval. He must not be permitted to take an indefinite length of time. Therefore my first contention is this: that if you need 30 days for approving the plan of a building you do not need 30 days for the approval of the site. The two things stand upon a totally different footing altogether. If you need 30 days for approving the plan of the building, you need only half that time for approving the site. That is my first contention.

"Secondly, the Chairman ought not to be permitted an indefinite length of time within which he is to be satisfied as to the eligibility of the site or the goodness of the plan. There must be a limitation of time imposed within which he must communicate his satisfaction or the reverse. And then, Sir, I am perfectly willing to accept my hon'ble friend Dr. Asutosh Mukhopadhyaya's suggestion that instead of seven days which I have recommended the time should be 15 days within which the communication of the order of the Chairman should be made to the party.

"Those are the suggestions which I venture to make. I should like the Hon'ble Member in charge of the Bill to consider the matter from the point of view I have suggested. There would be of course acceleration fees. I do not refer to that, but an underling would keep a thing back on the excuse that the Chairman is not satisfied, and the person must pay something. My friend, the Hon'ble Mr. Apcar, suggests that this is perfectly true and we ought not to hold out a premium to practices of this kind. I strongly insist upon a limitation of time within which the Chairman must communicate to the rate-payer his approval or disapproval."

The Hon'ble Mr. BAKER said:—"I have accepted the amendment of the Hon'ble Dr. Asutosh Mukhopadhyaya. The greater part of what the Hon'ble Babu Surendranath Banerjee has said would have come in appropriately on amendment which stands in the name of Dr. Asutosh Mukhopadhyaya."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"My friend's amendment proceeds upon proving a negative, because he cannot satisfy that there are no objections."

The Hon'ble THE PRESIDENT said:—"Will the Hon'ble Member in charge of the Bill reply now to the remarks of the Hon'ble Babu Surendranath Banerjee?"

The Hon'ble MR. BAKER said:—"I should like to hear what Hon'ble Members have got to say before I reply to these amendments."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA's motion was then put and agreed to.

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I withdraw the following motion in favour of the one just carried:—

that the words 'or within thirty days after the Chairman has been satisfied that there are no objections which may lawfully be taken to the approval of the site' in lines 4, 5, 6 and 7 of section 383, be omitted."

The Hon'ble Babu SURENDRANATH BANERJEE's motion was then, by leave of the Council, withdrawn.

The Hon'ble THE PRESIDENT said:—"Amendment No. 228 corrects apparently a misprint which does not exist in my copy of the Bill:—

that in section 383 (*now* 373), line 7, for 'wilfully' be substituted 'lawfully'."

The Hon'ble DR ASUTOSH MUKHOPADHYAYA said:—"In my copy the words are 'no objections which may *wilfully* be taken'."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA and the Hon'ble Babu JATRA MOHAN SEN, by leave of the Council, withdrew the motions standing in their names that in section 383 *now* 373), line 7. for "wilfully" be substituted "lawfully," it being explained that the former word was a misprint, which would be duly corrected.

The Hon'ble Babu SURENDRANATH BANERJEE moved –

(*No. 229*) that for the word "thirty" in line 1 of section 383 (*now* 373), the word "fifteen" be substituted;

(*No. 230* that the words "or within thirty days after the Chairman has been satisfied that there are no objections which may lawfully be taken to the approval of the site," in lines 4, 5, 6 and 7 of section 383 (*now* 373) be omitted.

He said:—"I have already spoken on this amendment: that for the word 'thirty' in line 1 of section 383 (*now* 373) the word 'fifteen' be substituted; but the Hon'ble Member in charge of the Bill has said nothing whatever about this. I am sorry I have not been able to make myself understood. I generally can make myself understood.

"Section 383 provides as follows:—

"'Within thirty days after the receipt of any application made under section 371A (*now* 370) for approval of a site, or of any information or further information required under Schedule XIVA (*now* XVII), or within thirty days after the Chairman has been satisfied that there are no objections which may lawfully be taken to the approval of the site, the Chairman shall, by written order, either approve the site or refuse, on one or more of the grounds mentioned in section 387 (*now* 377), to approve the site.'

"What I said was this: that the approval of the site and the approval of the building stand upon a totally different footing altogether. The approval of a building under section 384 (*now* 374) has to be communicated within a month, and the approval of the site has also to be communicated within a month. I do not think Sir, that is logical. If the approval of a building can be communicated within a month, the approval of a site ought to be communicated in less than a month. That is all I have got to say. I am perfectly free to admit that the present law places the two things on the same footing; but, Sir, as I have already observed, there are intermediate matters introduced in the Bill which do not find a place in the present law. The present law does not provide that the Chairman may take as long as he likes in order to be satisfied. The Bill does make a provision to that effect. The Bill says that within 30 days after the Chairman has been satisfied he is to communicate his order; but it does not lay down the limit of time within which the

Chairman must be satisfied. He may take a month or two to be satisfied. Therefore, there is considerable difference between the Bill and the present law. I say once again that if you take a month to approve the plan of a building you surely do not want a month for the approval of the site upon which the building is to stand. Therefore, if it is a month in the one case, I venture to suggest that it should be a fortnight in the other."

The Hon'ble Mr. Baker said:—"There are not two months, but one month. If a person desires to build a masonry building on any site, he puts in both the applications for the approval of the site and for the approval of the building simultaneously, and there is an express provision to that effect in the Bill, that is to say, these two periods of one month run concurrently. If a man chooses to put in the two applications together, the two periods run concurrently. Then he only has one month altogether, and it is impossible to reduce this period. The procedure is this. The application goes in first into the Municipal Office. It has to be sent to the Engineer's Department; the Engineer makes it over to one of his subordinates; the subordinate goes to the spot to make local enquiries. It goes back, is noted on, the Assistant Engineer initials it, and then it goes back to the Chairman. The number of building applications, as I mentioned the other day, is nearly 4,500 in a year, that is to say, there are 20 of these applications for every single working day; so it is impossible for them to be taken up the moment they are presented. The whole Municipal Office is a big machine, and it takes a certain amount of time for the various processes to be gone through. Any period less than 30 days would lead to difficulties of the same kind which have arisen under the present Act. The Hon'ble Babu Surendranath Banerjee says there is a difference between the Bill and the present Act, and he wishes to reduce the time allowed by the Bill to the time allowed by the present Act."

The Hon'ble Babu Surendranath Banerjee said:—"I do not want to reduce it to that point, but I want to reduce it as provided in the Bill. I want to make the time shorter."

The Hon'ble Mr. Baker said:—"I hope the Council will not agree to reduce any of these periods or to modify these sections in any way. They were all framed by the Calcutta Building Commission. The Building Commission went most carefully into this matter. They were aware—and every one in Calcutta is aware—that the Building Regulations under the present Act have been absolutely a dead-letter, and the Building Commission gave the greatest possible attention to this matter in order to remove what is admitted on all hands to have been a serious evil. This was the section which they drew up and which commended itself, as far as I remember, unanimously to the Select Committee. I do not remember any discussion being raised upon this point in the Select Committee, and I think we shall make a serious error if we reduce any of these periods or modify the sections in any way."

The Hon'ble Mr. Buckley said:—"I entirely agree with what the Hon'ble Mr. Baker has said. It seems to me, if I correctly understood the Hon'ble Babu Surendranath Banerjee, that he is under some misapprehension. I understood him to say that the Chairman can take a month or two months or 90 days in giving a final sanction. I do not think that is so. The procedure is this: the person who wishes to erect or re-erect a building applies for the approval of the site under section 371A (*now* 370). He also applies for permission to erect a building under section 371A (*now* 370). He may do that at the same time if he likes. Rule 32 of Schedule XIVA (*now* XVII) distinctly says he may submit them at the same time. That rule provides that—

"An application for approval of a site for, and an application for permission to erect or re-erect, a masonry building, may, if the applicant so desires, be sent together."

"These applications must be in a certain form and supported by certain documents, which are defined in rules 30 and 33 with reference to buildings. Then the Chairman can, within 30 days, call for further information. He

must call for that information within 30 days. That is rule 34, clause (*2*), with reference to the site and rule 34, clause (*3*), with reference to the building. Having received this information, he may still say it is not ample. In that case he may again under rule 34, clause (*4*), demand further information. If this further information is not received within three months, it is held that the application has entirely lapsed and the man must begin all over again and send in another application; but if this information is received, and approval is given, the Chairman signs the site plan and the building plan too under rule 35, Schedule XIVA (*now* XVII), and sections 383 and 384 (*now* 373 and 374). This matter, so far, is finished, but if he does not give the necessary permission, he can only refuse under section 387 (*now* 377) on certain defined grounds. These are, roughly speaking, that the proposals are not in accordance with the Act. Should the Chairman refuse, an appeal lies under section 385 (*now* 375) to the General Committee. Supposing the Chairman does not do this—if the Chairman neither gives nor withholds the permission within the time named. In that case the applicant can apply to the General Committee, who must reply within 15 days. If the man, therefore, does not get his information within the period of the second month, all he has to do is to apply to the General Committee, who must reply within 15 days. If they do not do that, then the man may assume that the permission is given and can go on with his building. I do not think there is any hardship at all. The rules are very carefully thought out, and I think they entirely meet the Hon'ble Babu Surendranath Banerjee's objections."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"I just want to point out, with reference to what has fallen from the Hon'ble Mr. Buckley, that I quite recognise the fact that the two applications must be sent in concurrently. But if the two applications are not sent in concurrently, then the rules operate in the way I have suggested. Then, Sir, my hon'ble friend in the course of his observations referred to the Chairman calling for information, and he may or may not be satisfied on receipt of the information. But suppose, Sir, the Chairman, having received the information, and there being no further information to call for, does not communicate his satisfaction or the reverse to the party. The party must wait two months and then he must apply to the General Committee, and then there is another waiting for more than a fortnight. Therefore, having regard to all these inconveneces, why should we not definitely say that the Chairman must be satisfied within a certain limit of time? I think that ought to be laid down. Why should that matter be left in doubt? That is the point I am contending for in the present amendment, now that I have accepted Dr. Asutosh Mukhopadhyaya's suggestion that the time within which orders are to be passed should be fifteen instead of thirty days."

The Hon'ble MR. BAKER said:—"I submit, Sir, there is no amendment to that effect before the Council."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I think the Hon'ble Member is taking a somewhat technical ground. If in the course of a discussion an important point is raised, I think I can crave Your Honour's indulgence to bring it forward for the consideration of the Council. It is a very serious matter and ought not to be shut out on a technical ground. I would modify that amendment with Your Honour's permission, and, if the sense of the Council is agreeable, I might modify my amendment with the view to suggest a limitation of time within which the Chairman must communicate his satisfaction or the reverse to the party."

The Hon'ble the PRESIDENT said:—"What would be the amendment which the Hon'ble Member would wish to substitute for amendment 230?"*

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I would suggest the following proviso:—

'Provided the Chairman shall communicate his orders within fifteen days after the receipt of all the necessary information.'

* Printed *supra*, p. 368.

"If Your Honour will postpone this amendment, we might take it up again later on."

The Hon'ble Mr. Baker said:—Any change that is made in these sections will require the most careful consideration, because many of them, some 20 or 30, hang together. We shall not know where we are if any amendment is made without the most careful scrutiny."

The Hon'ble Mr. Buckley said:—"I submit the Hon'ble Babu Surendranath Banerjee has made out no case at all for any change."

The Hon'ble the President said:—"I think that is possibly the view which the Council will take, but the Hon'ble Babu Surendranath Banerjee wishes to substitute something else for amendment No. 230."*

The first motion (No. 229)* was then put and lost.

The further consideration of the second motion (No. 230)* was postponed.

Section 374.

The Hon'ble Babu Surendranath Banerjee moved that the words "or within thirty days after the Chairman has been satisfied that there are no objections which may lawfully be taken to the grant of permission to execute the work," in lines 5, 6, 7, 8 and 9 of section 384 (*now* 374), be omitted.

The Hon'ble the President said:—"The motion of the Hon'ble Babu Surendranath Banerjee, that the words 'or within thirty days after the Chairman has been satisfied that there are no objections which may lawfully be taken to the grant of permission to execute the work,' in lines 5, 6, 7, 8 and 9 in section 384 (*now* 374), be omitted, is the same as the motion just lost."

The Hon'ble Babu Surendranath Banerjee said:—"It is practically the same as motion No. 230."*

The consideration of this amendment was postponed.

The Hon'ble Babu Surendranath Banerjee moved that the word "seven" be substituted for the word "thirty" in line 6 of section 384 (*now* 374).

He said:—"I suggest that, as the Hon'ble Dr. Asutosh Mukhopadhyaya's amendment has been accepted with reference to the site, this one may also be accepted with reference to the building, and the word 'fifteen' substituted for the word 'seven.' It follows the same principle. The order is to be communicated within fifteen days as regards the site, and then as regards the building the order may also be communicated within fifteen days."

The Hon'ble Mr. Baker said:—"I have no objection."

The motion was then put in the amended form and agreed to.

Sections 375 and 387.

The Hon'ble Mr. Baker moved—

that the following sub-section be inserted in section 385 (*now* 375), namely:—

"(*1a*) [*now* (2)] The decision of the General Committee shall be final, and"

that the following sub-section be inserted in section 401, namely:—

"(*1a*) The decision of the General Committee shall be final."

He said:—"With Your Honour's permission I will take these two amendments together. They are purely formal amendments. In various cases an appeal has been allowed from the decision of the Chairman to the General Committee; and, in all cases except two, it has been provided that the decision of the General

* Printed *supra*, p. 368.

Committee shall be final; but in these two sections, sections 385 and 401 (*now* 375 and 387), by an oversight that was not done. I propose now to remedy that defect. One of these relates to the case of an appeal to the General Committee against the order of the Chairman disapproving of a building site or refusing permission to erect a masonry building; and the other relates to a similar appeal in the case of a hut. No further appeal is provided for in the Bill, so that, even if those words were not inserted, no appeal would lie; but it is desirable to be consistent. As in other cases we have expressly provided that the decision of the General Committee shall be final, it seems expedient to insert the same words here also in these two sections."

The motions were put and agreed to.

Section 377.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that clause (*5*) of section 387 (*now* 377) be omitted.

He said:—"I confess, Sir, that this clause has puzzled me very much. Section 385 (*now* 375) in the first place states:—

'(*1*) Whenever the Chairman refuses to approve a building-site for a masonry building or to grant permission to erect or re-erect a masonry building, he shall state specifically the grounds for such refusal, and the applicant may appeal to the General Committee against such refusal.

'(*2*) If the General Committee reject any such appeal, they shall, by written order, specifically state the grounds for such rejection.'

"This is followed by section 387 (*now* 377), which specifies the grounds upon which such refusal may be made. The section says:—

'The only grounds on which approval of a site for the erection or re-erection of a masonry building, or permission to erect or re-erect a masonry building, may be refused are the following, namely:—

(*1*) that the work, or any of the particulars comprised in the site-plan, building plan, elevations, sections or specification would contravene some specified provision of this Act or some specified order, rule or bye-law made hereunder;

(*2*) that the application for such permission does not contain the particulars or is not prepared in the manner prescribed in Schedule XIVA (*now XVII*):

(*3*) that any of the documents referred to in section 371A (*now* 370) have not been signed as prescribed by the said Schedule;

(*4*) that any information or documents required by the Chairman under the said Schedule has or have not been duly furnished.'

"These four grounds are perfectly specific and, if I may say so without impropriety, are thoroughly business-like. Then comes the fifth ground, which is of the vaguest possible description. It provides that approval of a site may be refused on the ground—

'that the applicant has not satisfied the Chairman that there are no objections which may lawfully be taken, on any of the grounds hereinbefore in this section mentioned to the grant of the said approval or permission.'

"What the object of this is I cannot make out. Nothing similar to it finds a place either in section 238 of the existing law or in section 346 of the Bombay Act. In section 385 (*now* 375) you distinctly say that the grounds of refusal are to be specifically stated; you further provide that the applicant will be entitled to appeal to the General Committee against such refusal, so that, when the appeal comes to be heard, the validity of the ground of refusal by the Chairman may be challenged and its propriety tested. If, however, one of the grounds for the refusal is to be that the applicant has not satisfied the Chairman that there are no objections which may lawfully be taken, the provisions of the previous clauses, so specific in their terms, become absolutely infructuous. How is the poor, unfortunate applicant to prove a negative? If there are any objections which may validly be taken under the first four clauses, by all means reject the application; but do not neutralise their effect by the insertion of a clause which is repugnant to the first principles of jurisprudence."

The Hon'ble MR. BAKER said:—"The objection taken by the Hon'ble Dr. Asutosh Mukhopadhyaya is purely theoretical. This clause is an eminently practical one, and I would venture to remind the Council that it is taken from the Bill prepared by the Calcutta Building Commission, which was presided over by Mr. Justice Trevelyan. If all applications for buildings were always drawn up in a perfectly clear and regular manner, then there would be no necessity for this particular clause; but in practice that is not the case. It may be that through ignorance a man may send up his application in such a confused and inconvenient way that it is very difficult for the Chairman to ascertain whether the application really contravenes any provisions of the law or the rules or not: and in cases which are near the border line, cases which the applicant knows are more or less doubtful, you may be certain that he will use all his ingenuity to conceal the matters which would tell against him. In cases like that it is necessary, if we are to ensure that buildings shall not contravene the law, that the Chairman shall have power to say to the applicant 'you must convince me that such and such a rule or provision of the Act or rules has not been contravened,' and you must give the Chairman power to refuse to sanction the application until the applicant has satisfied him in that manner. As I said just now on another amendment, the Building Regulations in the past have been absolutely a dead letter. They have been set at defiance in every direction, the reason being that the Chairman and the Corporation had not sufficient legal power to enforce them. We ought not to fritter away the powers that are conferred by these provisions on the Chairman. If we do, we shall not effect the improvement which it was the object of the Building Commission to bring about."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I entirely support this amendment. This view also occurred to me, but as it was more or less a legal matter I did not send in an amendment. Really the unfortunate individual, who has to build a house, has to perform a logical impossibility: he has to prove a negative. I should like the Hon'ble Member in charge of the Bill to be placed in that position, and I should like to see him perform the impossible feat of proving a negative. My hon'ble friend, the Member in charge of the Bill, has appealed to the argument that the Building Commission was presided over by Mr. Justice Trevelyan, and that, therefore, we ought to accept the drafting of that Commission. With all the respect that I feel for Her Majesty's Judges, I am bound to say that they are not always masters in the art of drafting. They sometimes make the most deplorable mistakes. The greatest difficulties in regard to will cases have occurred in connection with wills drawn up by Lord Chancellors in England. One would have expected that they were great masters in the art of drafting, and when Lord Lyndhurst drew up his will he bungled in such a hopeless manner that the case had to be fought out in a Court of law. The question is whether by this provision, which ought to be interpreted in a commonsense way, you do or do not place individuals in an altogether impossible position They are called upon to prove a negative. Can anyone do so? I do hope, Sir, the Hon'ble Member in charge of the Bill will relent from the uncompromising attitude which he has assumed with regard to this matter; and I find, Sir, that when it approaches tiffin time my hon'ble friend gets more and more uncompromising. I, therefore, beg to move for an adjournment."

The Hon'ble BABU JATRA MOHAN SEN said:—"I am in strong sympathy with this motion. It is difficult for any man to prove that there are no objections to a certain thing, and he cannot be expected to know what may be in the mind of the Chairm n or any municipal authority. It is utterly impossible for any man to prove any such thing and to establish that his application is without any fault. If there is a fault, it is for the municipal authority to find out where the fault lies. I think this section is altogether unnecessary."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said:—"I admire the fertility of invention of the Hon'ble Member in charge of the Bill; but, with all deference to his opinion, I still think that, if there is any amendment of mine which is of an eminently practical nature, it is this one. I am very glad to hear that this section was drafted by the Building Commission, which was

presided over by Mr. Justice Trevelyan. This, at any rate, absolves my hon'ble friend from all responsibility in the matter. But, although the members of the profession to which I belong are invariably loyal and respectful to Her Majesty's Judges, they themselves will be the last people to claim infallibility or to expect an unreasoning adherence to their views. Let, us, therefore, scrutinise the matter cautiously. Contrast clause (1) of section 387 (*now* 377) with clause (5) of the same section. How can they possibly harmonise? In the very first clause of section 387 (*now* 387), you say that one ground of refusal is—

'that the work, or any of the particulars comprised in the site-plan, building plan, elevations, sections or specification would contravene some specified provision of this Act or some specified order, rule or bye-law made hereunder.'

"You follow this up by the provision that the Chairman may refuse sanction upon what must practically amount to nothing more than mere suspicion. You first introduce a very salutary rule, and, then most inconsistently and, I shall add, needlessly, proceed to destroy it by a vague and impracticable alternative."

The motion was put and lost.

SECTION 378.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the words "with the sanction of the General Committee" be inserted after the word "Chairman" in line 1 of clause (*b*) of section 388 (*now* 378), and that the words "for special reasons" in lines 1 and 2 of the same clause be omitted.

He said:—"I would ask the Council to look at section 388 (*now* 378), clause (*b*). This section gives a sort of dispensing power to the Chairman to allow a masonry building to be erected without reference to the Building Regulations. In a matter like this, where the power of dispensing is to be exercised, there should be some sort of supervising authority; and I would suggest the desirability of the Council adopting this amendment. A special power of exemption ought to be exercised with the approval of the General Committee. A power of dispensation ought not to be freely exercised, and it ought not to be left to the discretion of one individual, but the order of the Chairman should be subject to the approval of the General Committee. There ought to be a safeguard provided in the Act."

The Hon'ble MR. BAKER said:—"This is a small matter and one which may fairly be left to the discretion of the Chairman."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"If this is a small matter, my hon'ble friend might accept my view."

The motion was then put and lost.

SECTION 383.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, by leave of the Council, withdrew the motion standing in his name that in section 391D (*now* 383), subsection (*2*), after "aforesaid" be inserted "either personally or by duly authorised agent."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA also moved that to section 391D (*now* 383) the following be added:—

"(*5*) Such appeal shall be preferred within thirty days from the date when any requisition under sub-section (*1*) or any order under sub-section (*3*) may be communicated to the owner.

"(*6*) No action shall be taken under section 602 (*now* 574) before the period for appealing has expired or during the pendency of an appeal which has been preferred."

He said:—"This amendment is absolutely necessary, inasmuch as no period of limitation is prescribed in the section. The Hon'ble Member in charge of the Bill has apparently realized this, and given notice of an amendment in similar terms. If that amendment commends itself to the Council, we

shall have a general section prescribing a limitation of thirty day for all appeals. In that case, it would not be necessary to press my amendment."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I would like to substitute sixty for thirty days."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"I have no objection to a period of 60 days in the particular case to which my amendment refers, but I would not give 60 days in all cases."

The Hon'ble MR. BAKER said:—"I strongly object to 60 days in this particular case. There might be something to be said in favour of making it 15 days, but I certainly object to 60 days."

The motion was then, by leave of the Council, withdrawn.

The Hon'ble BABU JATRA MOHAN SEN, by leave of the Council, withdrew the motion standing in his name that in section 391D (*now* 383), sub-section (*4*), the words "subject to the control of the Corporation" be inserted after "shall."

SECTION 389.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA's motion that clause (*5*) of section 387 (*now* 377) be omitted having been lost, the Hon'ble Member, by leave of the Council, withdrew the motion, standing in his name, that clause (*4*) of section 403 (*now* 389) be omitted.

SECTION 393.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the words "or private cow-house" be inserted after the word "aviary" in line 6 of clause (*a*) of section 415 (*now* 393).

He said:—"This is a small matter. You exempt poultry-houses in which the members of the Christian community are interested. The members of the Hindu community keep cows, and they ought to be allowed the same exemption: they keep a cow or two in order to have pure milk for their families. I do not think the exemption I ask for is a very great one."

The Hon'ble MR. BAKER said:—"A cow-house of any sort is a building of an entirely different class from other buildings mentioned in this section; plant and summer houses are flimsy temporary buildings built of very light materials, and cannot cause any nuisance."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"My hon'ble friend has discreetly refrained from referring to poultry-houses, which are a distinct nuisance."

The motion was then, by leave of the Council, withdrawn.

SECTION 395.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, by leave of the Council, withdrew the motion, standing in his name, that in section 416B (*now* 395), sub-section (*6*), be added:—

"The decision of the Local Government shall be final."

inasmuch as a similar amendment upon section 365 (*now* 367) had been lost.

SECTION 397.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved—

(1) that in section 416D (*now* 397), sub-section (*1*), lines 3 and 4, the words "sell" and "or otherwise transfer" be omitted,

(2) that sub-section (*3*) of section 416D (*now* 397) be omitted.

He said:—"These, Sir, are matters of vital importance, and, if the section in question had not been drafted by the Calcutta Building Commission, the recommendations of which are regarded with something akin to superstitious reverence, I should have been sanguine that my amendments would prove acceptable to the Council. Chapter XXIIA (*now* XXV) of the Bill contains four sections—416A, 416B, 416C and 416D (*now* 394, 395, 396 and 397)—which deal with questions of general improvement, and authorise the Corporation to acquire land and buildings for purposes of making improvements. Section 416B (*now* 395) authorises the Corporation to frame a scheme for carrying out improvements; and section 416D (*now* 397) provides that, when a scheme for carrying out such work by the General Committee has been confirmed by the Local Government, the General Committee may either proceed to carry out the work in accordance with the scheme or transfer the land absolutely to some competent person for the purpose and under the condition that he will carry out such scheme of improvement. The intention, therefore, clearly is that, when the Corporation has acquired land for the purposes of improvement, they may not only empower an outsider to carry out such work, not only lease the land for effecting such improvement, but they may also sell the land, completely sever their connection with it, and leave the purchaser to carry out the improvement. The difficulty I feel is that, as soon as a sale has been effected, the Corporation will have no further hold on the owner. There are two things to be provided for—first, the improvements must be actually carried out, and, secondly, after they have been effected, we must take care that the land is not allowed to lapse again into its original condition. If you restrict yourself only to transfers by way of lease, you can secure these two conditions at once; for you may have a covenant in the lease that if these improvements are not effected the lease shall come to an end; and you may further covenant that, if, after the improvements have been once effected, the land is again used for purposes inconsistent with the object of the lease, there will be a forfeiture of the tenancy, and the Corporation will be entitled to re-enter. But suppose that instead of granting a lease you sell the land. There is a provision in section 416D (*now* 397) that security is to be given by the purchaser for the due carrying out of the work in accordance with the scheme. You may enforce the security in the case of default. But suppose the land is reclaimed, and subsequently allowed to lapse into its original condition, what control will the Corporation possesss over the transferee? None whatever, and in extreme cases the only remedy will be a fresh acquisition of the land for purposes of sanitary improvement. You can grant leases for long periods, if you like. The Bombay University, for instance, has a lease from the Government for 999 years at a rent of one rupee a year. Practically, they may be regarded as the owners of the land, but the relation of lessor and lessee, nevertheless, exists, and if you do the same thing here you will not lose all control over the transferee."

The Hon'ble MR. BAKER said:—"This section was recommended by the Calcutta Building Commission. It is referred to in paragraph 136 of their report, and this section was drafted by them. That is the chief reason for making no alteration in the section. And, as regards the particular case of the Bombay University, the Hon'ble Member says that, though they have a lease for 999 years, the Government still has the power of control. How can that be? In what respect does a lease for 999 years differ from a sale outright? And by clause (*3*) of section 416D (*now* 397) power is taken to obtain security for the carrying out of the purposes for which the sale or lease was made, and the Hon'ble Member has not observed the force of the words 'in accordance with such scheme.' I don't think we ought to tie the hands of the Corporation and prevent them from selling the land outright if they find it expedient to do so. They may wish, for instance, to transfer the land to the Port Commissioners, who are just as likely to carry out the work in the way intended as the Corporation itself; and the Corporation should, therefore, be allowed to sell the land outright to the Port Commissioners. Again, the Eastern Bengal Railway may desire to carry out a work of this kind in the neighbourhood of its property at Sealdah, and there is no reason why the land should not be sold to them. I merely mention

these as possible cases, though, as a rule, I think the Hon'ble Member is right that a lease will be preferable; but we should not prevent the Corporation from selling the land if they think it expedient in any case to do."

The Hon'ble Mr. Apcar said:—"I don't think we should prevent the Corporation from selling if they think fit. If they desire to give a lease, they may do so; but I don't think it would be wise to entirely preclude them from the power to sell."

The Hon'ble Mr. Oldham said:—"I would ask if, in the case of the lease held by the Bombay University for 999 years, the University has power to transfer? If so, I see little difference between the grant of such a lease and a sale."

The Hon'ble Dr. Asutosh Mukhopadhyaya, in reply, said:—"I regret I have not been able to make my position clear. If you sell the land, you have no hold on the purchaser. If you lease it out, you retain some control over the lessee. The reason for this difference is obvious, for, in the case of a lease, the law authorises the lessor to place restrictions upon the use of the land; in the case of a sale, the transferor completely severs his connection with the land and cannot enforce a restrictive covenant inconsistent with the rights of an absolute owner. The amendment which the Hon'ble Member in charge of the Bill is prepared to accept will answer one of my purposes. But I cannot admit that this, by any means, will settle the whole difficulty."

The Hon'ble Member's first motion was then put and lost.

The last motion having been lost, the Hon'ble Member, by leave of the Council, withdrew his second amendment.

The Hon'ble Dr. Asutosh Mukhopadhyaya also moved that at the end of sub-section (*2*) of section 416D (*now* 397) be added:—

"or in the event of the lessee, after carrying out the work, using the land or buildings leased to him, or any part thereof, or allowing the same to be used, for any purpose which is inconsistent with the said scheme."

He said:—"I understand that the Hon'ble Member in charge of the Bill is prepared to accept this amendment subject to a mere verbal alteration. The form suggested by the Hon'ble Member is this:

'or in the event of the lessee, after carrying out the work, uses the land or building leased to him, or any part thereof, or allows the same to be used for any purpose which is inconsistent with the general scheme.'

"I have already explained the object of this amendment in the course of the debate upon the last motion. When action is taken by the Corporation under this chapter for the purposes of sanitary improvement, they ought to assure themselves, not only that the improvements will be duly effected, but also that, once they have been effected, they will be scrupulously maintained. I venture to think, therefore, that a right of re-entry ought to be reserved as well in the case of failure to maintain as in the case of failure to effect improvements."

The Hon'ble Mr. Baker said:—"This is quite a reasonable amendment, and I shall be glad to accept it."

The motion was put and agreed to.

The Hon'ble Dr. Asutosh Mukhopadhyaya also moved that in section 416D (*now* 397), sub-section (*3*), line 5, after the word "out" be inserted "and maintenance."

He said:—"This amendment is based on the same principle as the la[illegible] one."

The motion was put and agreed to.

The Hon'ble Dr. Asutosh Mukhopadhyaya also moved that to section 416D (*now* 397) the following be added:—

"(4) The covenant referred to in sub-section (2) shall be binding on all transferees from the original grantee; and such transferees shall be bound to give security under sub-section (3)."

He said:—"This amendment is of a somewhat technical character, and with reference to it I have been in communication with the Hon'ble the Legal Remembrancer, who has also discussed this question with the Secretary. I shall try to explain the position to Hon'ble Members as briefly as possible. There are certain covenants embodied in a lease which are said to run with the land: if so, they are binding on all transferees. Other covenants do not run with the land and are not binding on transferees without notice. Now, the question whether a particular covenant belongs to the one class or the other may, and often does, lead to ingenious legal discussions of extreme nicety and difficulty. Indeed, it would be easy to refer to cases reported in the books, not a few of which show how eminent Judges may be hopelessly divided upon a matter which appears to be very simple to lay minds. If my amendment is accepted, it will become unnecessary to discuss this difficult subject in at least one instance."

The Hon'ble Mr. Handley said:—"I have much pleasure in corroborating and confirming all that the Hon'ble Member has said. This is no doubt a most difficult point of law and leads to as much trouble and expense in drawing up leases as any other point of law. If these words are not put in and these lands are transferred, the transferee may say 'I know nothing of this', and the Corporation will have constant trouble to compel the transferee to comply with the terms embodied in the lease. By adding these words we settle the terms upon which transfers may be made, and there can be no more litigation than might take place in the case of the lessee himself."

The Hon'ble Mr. Baker said:—"I accept the amendment with the omission of the words after the semi-colon."

The motion was then put, with the omission of the words after the semi-colon, and agreed to.

Section 400.

The Hon'ble Mr. Baker moved that in sub-section (2) of section 419 (*now* 400), the words "not more than two hundred feet" be substituted for the words "not less than two hundred feet."

He said:—"This is a clerical error in the Bill which occurred originally in the Bill drafted by the Calcutta Building Commission. The word should be 'more' and not 'less.' The Hon'ble Dr. Asutosh Mukhopadhyaya has proposed an amendment to the same effect. I regret that the Select Committee did not detect the error."

The motion was put and agreed to.

The last amendment having been agreed to the Hon'ble Dr. Asutosh Mukhopadhyaya, by leave of the Council, withdrew the similar motion standing in his name.

The Hon'ble Babu Surendranath Banerjee moved that the word "sixteen" be substituted for the word "twenty" in line 2, and the word "ten" for the word "fifteen" in line 5, of sub-section (2) of section 419 (*now* 400).

He said:—"This section deals with improvements in bustees. For streets of 20 feet width I propose to substitute 16 feet, and for passages of 15 feet I propose 10 feet. These are the minima fixed; but no maxima have been fixed, and the minima may be raised to any point which the General Committee and the Executive may think fit. In favour of my amendment is the fact that it is the present practice. When I joined the Corporation bustee roads used to be 9 feet wide; we have been steadily adding to the width, and it is now 16 feet. This amendment will not fetter the hands of the Corporation in any way; they may raise the minimum to any figure they like."

The Hon'ble Mr. Baker said:—"I will remind the Hon'ble Member that, when this matter was discussed in the Bill Committee of the Corporation, some one proposed to reduce the width of bustee roads from 20 feet to 16 feet, and a member of the Bill Committee pointed out that the Bustee Committee had gone beyond 16 feet and had worked up to 20 feet, and upon that the Bill Committee decided not to propose any modification. I fully recognise that the Corporation has realized its duty in this respect, and has been steadily increasing the width of roads in bustees. The present bye-law provides a minimum of 16 feet; but the Bustee Committee have gone beyond that; they have worked up to 20 feet. I think we should take advantage of what the Bustee Committees have done and start from the minimum which they have practically established."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"There may be cases in which it may be expedient to permit the opening of a bustee road of 16 feet; but if you fix a minimum of 20 feet and stereotype it into law, the Corporation will be unable to exercise any discretion in the matter. And when the Corporation has of its own accord resolved to have streets 20 feet in width, though the bye-law provides a minimum of 16 feet, I think the Corporation may be trusted not to adopt a lower minimum except in special cases where it may for some reason or other be necessary."

The motion was then put and lost.

Section 406.

The Hon'ble Babu Surendranath Banerjee moved that the word "Corporation" be substituted for "General Committee" in line 1 of sub-section (1) of section 425 (*now* 406 .

He said:—"The procedure to be followed in connection with unhealthy bustees where the urgency of the case is such that action must be taken at once is that the General Committee has to take action in the first instance. I have to call attention to section 430 (*now* 411), which says that the Corporation may at any time after the receipt of a report under section 425 (*now* 406) pass final orders. The Corporation has to deal with the report."

The Hon'ble Mr. Baker said:—"That is an entire mistake. The Corporation has only to deal with the purchase or acquisition of land which is not bustee land. Section 425 (*now* 406) provides for a report by a Medical Officer and an Engineer, the next section provides for the approval of that report, and section 427 '*now* 408) gives the General Committee power to require owners or occupiers to carry out the requisite improvements. Section 430 *now* 411) is merely an incidental section which gives the Corporation power to acquire land which is not bustee land."

The Hon'ble Babu Surendranath Banerjee said:—"I would ask what was meant by land which is within the bustee and yet is not bustee land."

The Hon'ble Mr. Baker said:—"Bustee land is defined. It is possible you may have a masonry building within a bustee."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"But under the existing law such action is proposed to be taken by the General Committee. The inspecting officers have to submit a report; the report may propose to interfere with the rights of private persons. That is not a power vested in the Chairman, but in the Commissioners in meeting. To deal with the rights of property is a very important matter, and it is right and proper that, if the initiative is taken by the General Committee, the Corporation should have some power of supervision. The present procedure is for two medical officers to report; that report comes before the Chairman. There is a Bustee Committee which is a Committee of the Corporation; the report then goes before the Bustee Committee and is considered by them, and recommendations are made by them; the proprietors are invited to be present and make their objections, and all the objections are heard and disposed of and recommendations are made

which go before the Corporation for confirmation. The members of the General Committee who represent the rate-payers will not be in the same proportion as they are now; they will be in a minority. The representatives of the rate-payers in the Corporation will not be in the same minority; they will be in a minority, but, as I read the law, they will not be in the same minority as in the General Committee. If this matter involving the consideration of private rights is subject to the control of a body in which the rate-payers have a larger number of representatives, they will have greater confidence in the decisions of that body. That is the view of which I ask the Council to consider. The point is that the procedure under this section involves the consideration of private rights. The report may say that a road has to be run through the bustee, that certain huts are to be removed, that a tank must be filled up All these are invasions on private rights. They may be perfectly justified, but in dealing with private rights an appeal ought to lie to a body in which the representatives of the people are to be found in larger numbers and in whose decision they will have confidence. As the Court of Directors once said, it is not necessary that we should administer justice in India, but we should inspire the people with the confidence that justice is done. Therefore, I say with confidence that some right of supervision, some sort of control, ought to be invested in the Corporation in which the representatives of the rate payers would be found in greater proportion."

The Hon'ble MR. BAKER said:—"The Hon'ble Member has urged that this power of taking action under section 425 (*now* 406) should be taken away from the General Committee and transferred to the Corporation, because the powers conferred under that section affect private rights. I will point out that this section primarily and directly affects the question of public health, because it applies to cases which in the opinion of the Chairman are a matter of urgency, and therefore it is a matter for the General Committee to deal with. If we bring in the Corporation, we shall have canvassing, and there is a likelihood of the matter not being decided on the merits. In reference to the later clauses of the Bill, I find that a number of amendments have been proposed which would have the effect of transferring to the Corporation powers which are exercised by the Chairman or the General Committee. I strongly object to such amendments, and shall oppose every amendment which will have that effect, and I shall do so even though I may be told that my attitude is uncompromising. All these matters have been carefully considered by the Select Committee; they assigned to each municipal authority the powers and functions which they thought might most appropriately be assigned to it, and I strongly deprecate any interference with, or modification of, those powers. I think indeed that the Select Committee went too far in transferring powers from the General Committee or the Chairman to the Corporation. The position which the framers of some of the amendments seem to take up is that no power should be made over to the Chairman or to the General Committee if it can possibly be exercised by the Corporation. That is exactly the opposite and antithesis of what I hold to be the true principle. I maintain that no power should be reserved for the Corporation if it can with due propriety be exercised by the Chairman alone or by the General Committee. It is because these amendments contravene that principle that I resolutely object to them."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"I am in full sympathy with the principles laid down by the Hon'ble Mover of the amendment, and my only regret is that this amendment does not give effect to those principles. The substance of the amendment is that in section 425, (*now* 406) clause (*1*), for the words 'General Committee' the word 'Corporation' should be substituted. That section deals only with the preliminary inspection, which appears to me to be executive work, and it does not seem to me to be very material whether at this stage action is taken by the General Committee or by the Corporation. The important sections are 426, 427 and 428 (*now* 407, 408 and 409). It would be much better if the Corporation were substituted for the General Committee in those sections. The preliminary inspection may be made by the order of the Chairman, but the invasion of the rights of private property should take place only by order of the General Committee subject to an appeal to the Corporation."

The Hon'ble Mr. Buckley said:—"The hon'ble gentleman has referred a good deal to the rights of private property, and in defence of his amendment he again asserts a principle, which he has asserted so often, that jurisdiction should be given the highest authority in comparatively unimportant matters; he wants to give authority to the Corporation in this case in which the Bill gives it to the General Committee. The matter relates to bustees and to buildings. I would ask what the Corporation has done in this town with reference to buildings? They have excellent bye-laws in many ways, but the Corporation has rarely carried them out, and has produced a state of affairs in this town which is undoubtedly very bad. I have lately had some measurements made in a portion of this town, and, in spite of the bye-laws in existence, there are parts of Calcutta where 85 to 86 per cent. of the entire area is densely covered with buildings, and that is mainly, I think, due to the fact that the administration of the bye-laws rests with the Corporation. I doubt whether we realize fully the condition of affairs in Calcutta. There are many reports on the subject. I have one here which was made to the Building Commission. It refers to different specific areas, and speaks of the space in which natives live. I doubt whether there is any gentleman in this room who does not live or sleep in a room containing from 1,500 to 2,000 cubic feet of space, and possibly in many cases from 6,000 to 7,000 feet. On the other hand, there are people who live in as little as 120 or 130 cubic feet of space, and in one or two cases in this report as little as 60 feet. In England 800 feet is taken to be a reasonable amount of space for each person. In India, 600 feet is the minimum in barracks, I believe, and in no case is there less than 400 feet in any jail. And yet here there are people living in 60 or 100 feet, 60 feet being equivalent to 6 feet in length, 2 feet in breadth and 5 feet in height. This would have been largely prevented if the bye-laws were carried out. The Hon'ble Member again wishes to enforce the principle of centralisation which he so strongly advocates. If he does so, he will, in my judgment, do wrong."

The Hon'ble Mr. Apcar said:—"When there has been so marked a change in the constitution of the Corporation as has been brought about by the letter of the Government of India, and when a large number of Hindu members are taken away from the Corporation altogether from whom only, according to the statement by the Government, there is danger of insanitary conditions being permitted, the prospect has been changed to such a degree that there ought to be no difficulty of any kind in adopting this amendment; and, with reference to what fell from the Hon'ble Mr. Buckley with regard to the excellent bye-laws which now exist, that was not the opinion of the late Health Officer of the Corporation; and it has been our prayer, which was unheeded by the Local Government, to have further legislation to enable us to deal more effectively with questions relating to buildings. If there are existing bye-laws which are sufficient for all purposes, how is it that they were allowed to be overridden? Surely the Chairman should have prevented the infringement of those bye-laws? It has been said that the carrying out of the bye-laws was subject to the confirmation of the Corporation. The bye-laws ought not to have been allowed to be infringed in Committee, and if there had been any breach of them permitted in Committees the Chairman ought to have ruled out any such attempts when the matter came before the Corporation for confirmation. I conclude that under this Bill there will be a reference also to one of the Standing Committees; there will be some procedure and some method of dealing with such cases, and the Corporation cannot rightly be charged with having disregarded the sanitary provisions of the bye-laws in the past. When there is to be such a change, the predominance of the Hindus taken away, and the balance of power shifted in such a degree, surely the Corporation of the future may be trusted!"

The Hon'ble Mr. Oldham said:—"I wish to vindicate the Corporation and what my hon'ble friend Babu Surendranath Banerjee has said on one point. As far as my information goes, the Corporation has done exceedingly well as regards bustee improvement, and the stoppage of bustee improvement work has been due to the policy of one of the Chairmen who believed the funds could be

better spent otherwise. I have heard the imperative need for bustee improvement urged over and over again in the General Committee."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"It has been said that the Corporation has done badly in respect of buildings. If for argument's sake I admit the whole of that indictment, how does it affect this question of bustees? The question of bustees is not a question of buildings, and the Hon'ble Mr. Buckley knows what our action has been with regard to bustees. But I am prepared to accept the challenge with regard to buildings. This matter was carefully gone into by the Corporation. This particular indictment was made by the Calcutta Building Commission against the Building Committee of the Corporation. A statement was drawn up by the Corporation, from which it appeared that in no more than a dozen cases did infractions of the bye-laws take place under the orders of the Building Committee. Your regulations and bye-laws were defective; they bristled with inconsistencies; shrewd lawyers were always able to drive a coach and four through them. Therefore, if it has been impossible to give effect to the building regulations or bye-laws, the Corporation is not the only party to blame. The bye-laws were the bye-laws of the Corporation, confirmed however by the authority of the Government of Bengal, and, if there has been failure, the responsibility does not attach simply to the Corporation; a portion of that responsibility must be borne by the Government of this Province. But I am not concerned in defending the action of the Corporation in the matter of buildings. These observations are irrelevant to the present question. The question is—how has the Corporation been acting with regard to bustees? We have spent more than thirteen lakhs of rupees in improving bustees within the last few years; we have contracted loans; we were inspired, I might say, with something like apostolic zeal in this matter. It is on the shoulders of the Chairman appointed by the Government that the blame, if any, should be thrown. It was the deliberate policy of Mr. Ritchie that caused the works to be stopped, for he held that it is no part of the business of the Corporation to spend large sums of money on bustee reclamation. We have done our best, and, if we have not been able to do more, it is not our fault. We have been restrained by the Executive. If it is true that the Corporation has done all that it could possibly do, why does the Hon'ble Member in charge of the Bill propose to take away this power from the Corporation? The Corporation has done well; it has done admirably; it has received the acknowledgments of the Government for what it has done. If that is the verdict of competent authority, I ask with what show of reason and justice can you withdraw the power which the Corporation at present possess of taking the initiative? There is not even the shadow or semblance of reason for withdrawing those powers, except in the statement to which I listened with amazement that no power should be left to the Corporation which could be exercised by any other authority."

The Hon'ble MR. BAKER said:—"With due propriety."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"There is hardly a power which cannot be exercised with due propriety by some lower authority. If that statement is accepted, why not do away with the principle of local self-government? If this principle is to find acceptance with this Council, it will be far simpler to do away with the semblance and show of local self-government, which is attempted to be preserved under this Bill, and make the Municipality a department of the Government. I think this a wholly unjustified statement to make, and I am perfectly certain that a system like that is a system with which the Local Government can sympathise. My hon'ble friend himself says that the Bill does not do away with the principle of local self-government, but involves only a re-adjustment of the principle. If he holds that no power should be reserved to the Corporation which can be exercised by any other municipal authority, if that principle is accepted, then local self-government is at an end. The Hon'ble Member, moreover, has remarked that it is undesirable to give this power to the Corporation because there will be canvassing. Is it not much easier to canvass 12 persons than 50? If you admit that there is canvassing, and admitting it to be true

that there has been canvassing in the past, the fact remains that in spite of such canvassing the Corporation did their duty; therefore, despite whatever canvassing there was, the Corporation did their duty in the past, and the Corporation may be trusted to do their duty in the future. Therefore. I submit that no case has been made out for withdrawing this power. It is a matter of the first importance that when you deal with private rights you should have a tribunal which should command the confidence of those whose rights are invaded. The matter will be dealt with in the first instance by the Chairman and the General Committee, and then an appeal should lie to the Corporation. I think such a procedure is consistent with sound sense and reason. I hope that in consideration of all these circumstances, namely, that the Corporation has done its duty well, that it is a body which commands the confidence of the public, and that it is necessary that that confidence should be maintained, this amendment will be accepted by the Council."

The motion being put, the Council divided as follows:—

Ayes 6.	*Noes 12.*
The Hon'ble Raja Ranajit Sinha Bahadur, of Nashipur	The Hon'ble Mr. Buckley.
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Handley.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Mr. Apcar.	The Hon'ble Mr. Mackenzie.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Mr Spink.
	The Hon'ble Sahibzada Mahomed Bakhytar Shah.
	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr. Oldham.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendment was lost.

The Council was then adjourned to Saturday, the 23rd September, 1899.

CALCUTTA;
The 16th January, 1900.

F. G WIGLEY,
Assistant Secretary to the Govt. of Bengal, Legislative Department.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met in the Council Chamber on Saturday, the 23rd September, 1899.

Present:

The Hon'ble SIR JOHN WOODBURN, K.C.S.I., Lieutenant-Governor of Bengal, *presiding.*
The Hon'ble MR. W. B. OLDHAM, C.I.E.
The Hon'ble MR. R. B. BUCKLEY.
The Hon'ble MR. C. W. BOLTON, C.S.I.
The Hon'ble MR. E. N. BAKER.
The Hon'ble RAI DURGA GATI BANERJEA, BAHADUR, C.I.E.
The Hon'ble MR. C. E. BUCKLAND, C.I.E.
The Hon'ble MR. F. F. HANDLEY.
The Hon'ble MR. F. A. SLACK.
The Hon'ble KHAN BAHADUR MAULVI DELAWAR HOSAIN AHMED.
The Hon'ble BABU JATRA MOHAN SEN.
The Hon'ble MR. T. W. SPINK.
The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH, C.I.E.
The Hon'ble MR. D. F. MACKENZIE.
The Hon'ble MR. J. G. APCAR.
The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, M.A., D.L., F.R.A.S., F.R.S.E.
The Hon'ble BABU BOIKANTA NATH SEN.
The Hon'ble BABU SURENDRANATH BANERJEE.

QUESTION AND ANSWER.

Gun Licenses in Dacca District.

The Hon'ble Babu Surendranath Banerjee said:—

"Will the Government be pleased to state the number of gun licenses issued in the Dacca District in 1898, the number of such licenses issued in 1899, the number of applications for gun licenses refused in 1899, and the reasons for such refusal?

"Is the Government aware that river dacoities have taken place within the last six months at Souka Bazar, Ghiar Bazar, Bhadra and other places within the subdivision of Manikganj? Will the Government be pleased to state the cash and other property stolen from the boats of traders and purchasers of jute in connection with these dacoities? What step does the Government intend to take to remedy this state of things?"

The Hon'ble Mr. Bolton replied:—

"The number of gun licenses issued in the Dacca District in 1898 was 2,735; and up to date in 1899 1,685 have been issued. There is thus a decrease of 1,050. The Commissioner has explained that the reduction is due to the applications for renewal of licenses having been closely scrutinised in the present year, in order to prevent fire-arms being held by those who have no need for them for the protection of person or property, or by persons who use them for the indiscriminate slaughter of birds for their plumage. He mentions that the destruction of birds has been carried on to such an extent that even paddy birds have been almost exterminated. The opinion of the Government in regard to this reduction is not asked in the Hon'ble Member's question; but I may take the opportunity of informing him that the suddenness of the reduction has not the approval of the Government, and that this opinion is being communicated to the local officers.

"There have been two river dacoities in the Manikganj Subdivision during the present year, the property stolen being valued at Rs. 190, including Rs. 155 in cash, in one case, and at Rs. 517, including Rs. 507 in cash, in the other. These dacoities occurred in August and were the work of a local gang. A clue has been obtained, which will, it is expected, ensure the conviction of the dacoits and the breaking up of the gang."

CALCUTTA MUNICIPAL BILL.

Section 62.

The Hon'ble Mr. Baker moved that in section 55 (*now* 62*), line 1, after the word "resignation" the word "removal" be inserted.

He said:—"This is a consequential amendment. It will be remembered that, on the motion of the Hon'ble Babu Surendranath Banerjee, a section was inserted in the Bill authorising the Local Government, at the instance of the Corporation, to remove any Commissioner who had been found guilty of disgraceful conduct or misconduct in the discharge of his duties. In consequence of that new section, it is necessary to insert the word "removal" in section 55 (*now* 62) which provides for the filling up of vacancies by nominations in the event of elections failing."

The Hon'ble Babu Surendranath Banerjee said:—"I have great pleasure in supporting the amendment."

The motion was put and agreed to.

Section 116.

The Hon'ble Mr. Baker moved that in section 108 (*now* 116), line 2, for the words "any member of the General Committee" the words "any other person" be substituted.

* The sections of the Bill having, under the direction of the Council, been re-numbered, the present number of each section is inserted in brackets wherever the new numbering differs from the old.

He said:—"It will be remembered that on the motion, I think, of the Hon'ble Babu Surendranath Banerjee, an amendment was carried to the effect that cheques are to be signed, in the absence of the Chairman or Vice-Chairman, by some person appointed by the Chairman with the approval of the General Committee. In consequence of that, it becomes necessary to insert the words 'any other person' in section 108 (*now* 116), line 2."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I beg to support the amendment."

The motion was put and agreed to.

SECTION 152 AND NEW SCHEDULE.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved—

(*1*) that for sub-section (1) of section 148B (*now* 152), the following be substituted, namely:—

> "(*1*) All valuations of buildings and lands situated in the districts mentioned in column 1 of Schedule IVC (*now* VII), which have been made by competent authority and are in force at the commencement of this Act, shall remain in force for the periods terminating on the dates respectively prescribed in that behalf in column 2 of that Schedule; and the annual value at which buildings and lands in each such district are to be assessed after the date so prescribed shall be fixed by the Chairman for a period of six years, and thereafter for successive periods of six years."

(*2*) that the following schedule be added to the Bill, namely:—

SCHEDULE IVC (*now* VII).

Dates up to which valuations made before the commencement of this Act are to remain in force.

1	2
District.	Date up to which valuations made before the commencement of this Act are to remain in force.
Ward No. 1 ...	The 31st March, 1902.
" " 2 ...	The 31st March, 1903.
" " 3 ...	The 30th September, 1902.
" " 4 ...	The 30th September, 1903.
" " 5 ...	The 31st March, 1904.
" " 6 ...	The 30th September, 1901.
" " 7 ...	The 30th September, 1904.
" " 8 ...	The 31st March, 1905.
" " 9 ...	The 30th September, 1905.
" " 10 ...	The 31st March, 1906.
" " 11 ...	The 30th September, 1900.
" " 12 ...	The 31st March, 1901.
" " 13 ...	The 31st March, 1901.
" " 14 ...	The 30th September, 1900.
" " 15 ...	The 31st March, 1906.
" " 16 ...	The 30th September, 1905.
" " 17 ...	The 31st March, 1905.
" " 18 ...	The 31st March, 1905.
" " 19 ...	The 30th September, 1904.
" " 20 ...	The 31st March, 1904.
" " 21 ...	The 30th September, 1903.
" " 22 ...	The 31st March, 1903.
" " 23 ...	The 30th September, 1902.
" " 24 ...	The 31st March, 1902.
" " 25 ...	The 30th September, 1901.

He said:—"This amendment, Sir, is of some practical importance, and I would take the liberty of explaining to the Council its meaning and effect. Under the existing law, that is, the law of 1888, the whole of Calcutta is divided into districts for purposes of assessment. As a matter of fact, the number of districts corresponds with the number of wards in the city. It was intended by the Act that the valuation of all houses situated within any district should take effect from one day and should also terminate on one day; that is to say, although it is practically impossible to value all the houses in the ward on the same day, yet for purposes of administrative convenience it was to be taken that the valuation took effect in each of the wards from a certain date and terminated on a specified date. That is the way in which the business of the Corporation was carried on, and everybody thought that to be the law, until last year. But by a decision of the Small Cause Court (which the High Court could not set aside or revise) the matter was explained to be just the other way. The facts of that particular case were these. In 1891 the premises of a rate-payer were valued. He preferred an objection, and, by reason of the very large number of such objections preferred by other rate-payers all over the city, his objection could not be disposed of till 1895. Then in 1897, that is to say, six years from the date when the original assessment was made, the Corporation again made a fresh assessment. The rate-payer took an objection that he was entitled to have the six years counted from the date that his objection was disposed of, that is to say, six years from 1895. His objection was overruled by the Corporation. Then he preferred an appeal to the Small Cause Court, and the Judge of the Small Cause Court held that there was no cycle for each ward, but that there was a cycle for each separate holding in the city. The matter was taken up before the High Court, and that Court held that, whatever the merits or the demerits of the decision of the Small Cause Court might be, it had no jurisdiction to interfere in the matter at all. Therefore, in order to prevent the recurrence of such a case in future, section 148SS (*now* 169) was put into this Bill. That section provides that 'when the valuation of any building or land is revised in consequence of an objection made under section 148K (*now* 160) or an appeal preferred under section 148M (*now* 162), the revised valuation shall continue in force for the unexpired portion of the period for which the first-mentioned valuation was made, and no longer.' This would be sufficient to meet all future cases, but unfortunately this section has no retrospective effect; and the consequence is that if we start with a different cycle for each different holding in the city, in spite of section 148SS (*now* 169), the difficulty will continue. So far, however, as that section applies, when the Corporation has to assess a holding which has never been assessed before, the difficulty will not arise. Take for instance the rate-payer whose case was decided by the Small Cause Court. He has got a decision in his favour that the assessment in his case is to run for six years from 1895, so that in his case there will be a cycle beginning with 1895. Now, it is quite manifest that, if instead of there being a cycle for each ward there be a separate cycle for each holding, it will be absolutely impossible to carry on the business of the Corporation. To-day you may find that there are five houses in a particular ward the assessment of which has come to an end; to-morrow you will find 25 houses in five different wards the assessment of which has come to an end, and so on. The amendment of which I have given notice will bring that state of things to an end. My original suggestion was that an arbitrary period should be fixed, that is to say, after two years from the date on which this Act comes into operation, the assessment of all the holdings in the city should terminate. It was, however, pointed out to me by the Hon'ble Member in charge of the Bill that that would be highly inconvenient. He was good enough to place details at my disposal showing the precise dates on which the valuations in each ward were intended to take effect, and would have taken effect but for the decision of the Small Cause Court. We have practically devised an amendment which would nullify the effect of the decision of the Small Cause Court Judge, which is certainly against the spirit, if not also against the letter, of the existing law."

The Hon'ble Mr. Baker said:—"I support this amendment, Sir, and I think the Corporation and the Council are indebted to the Hon'ble Mover of the

amendment for having brought this matter to our notice. But for his amendment we should have perpetuated the extreme inconvenience which has been caused by the decision of the Small Cause Court in the case to which he has alluded. The amendment in its present form simply gives effect to what the original intention of the law was, and also to the practice of the Corporation in the past; and I think it may safely be commended to the acceptance of the Council."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I want to say one word in support of it. The Corporation think, and many others think, that the Small Cause Court made a mistake, and, probably, if the High Court had jurisdiction in the matter, the decision would have been reversed. It is an exceedingly difficult matter, and it is as well that it should be settled finally in the way it is proposed to be settled. The Hon'ble Mr. Baker suggested that the best thing to be done would be to fix the dates in respect of each ward. I think that the Hon'ble Mr. Baker obtained his details from the office of the Corporation, and it seems to me that the amendment, including the details, is a satisfactory settlement of a difficult and intricate problem."

The motions were then put and agreed to.

The last motions having been carried, the Hon'ble DR. ASUTOSH MUKHOPADHYAYA, by leave of the Council, withdrew the motion standing in his name that in section 148B (*now* 152), sub-section (*1*), for the words "the period for which they were so made" be substituted "two years for the commencement of this Act."

SECTIONS 230, 231 AND 232.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved—

(*1*) that for clause (*a*) of section 220T (*now* 230), the following clauses be substituted, namely:—

"(*a*) pay the sum demanded, together with any fee imposed under section 220C (*now* 214), sub-section (*2*), or

(*b*) send a letter to the Chairman, enclosing the sum demanded, and electing to be prosecuted under section 606 (*now* 578), or";

(*2*) that the present clause (*b*) of section 220T (*now* 230) be lettered "(*c*):"

(*3*) that in sub-section (*1*) of section 220U (*now* 231), "clause (*b*)" be substituted for "clause (*a*)," and that the following be inserted after "mentioned," namely:—

"and the sum deposited under that clause shall be deducted from the amount of any fine imposed under section 606."

(*4*) that in sub-section (*2*) of section 220U (*now* 231) "clause (*c*)" be substituted for "clause (*b*);"

(*5*) that in section 220V (*now* 232), line 3, for the word "either" the word "any" be substituted, and that the words "and has not paid the whole amount of the demand" be omitted.

He said:—"It is unnecessary to trouble the Council at any length on this matter. It was very fully discussed on a previous occasion, and my object in placing these amendments before the Council is simply to give effect to what I take to be the law on the subject. It is quite clear from section 220V (*now* 232) that there is a third alternative to the two mentioned in section 220T (*now* 230), and my first amendment gives effect to that view. Then the next amendment gives effect to my contention that, if under clause (*a*) any defaulter has deposited the sum required and is then prosecuted, the sum deposited is to be set off against any fine which may be imposed under section 606 (*now* 578). I further propose that in sub-section (*1*) of section 220U (*now* 231) 'clause (*b*)' be substituted for 'clause (*a*),' and that the following words be inserted after 'mentioned,' namely, 'and the sum deposited under that clause shall be deducted from the amount of

any fine imposed under section 606 (*now* 578).' It will also be noticed on reference to section 606 (*now* 578) that the second sub-section of that section says that 'such fine when levied shall be taken in full satisfaction of the demand on account of such license.' I pointed out to the Council on the last occasion that it cannot possibly have been intended that the man should be fined, and that in addition the sum which he had deposited should be confiscated. The other amendments are simply consequential, and do not require any explanation."

The Hon'ble MR. BAKER said:—"I support the amendments, Sir. They are merely intended to give effect to what the law is as it stands in the Bill, and they express that intention more clearly than the original draft."

The motions were then put severally and agreed to.

The last motions having been carried, the Hon'ble DR. ASUTOSH MUKHOPADHYAYA, by leave of the Council, withdrew the following motions standing in his name:—

(1) that in section 220T (*now* 230), clause (*a*), the words "and enclosing the sum demanded" be omitted;

(2) that in section 220T (*now* 230), clause (*b*), after the word "and" be inserted "after depositing the amount demanded;"

(3) that to section 220T (*now* 230) the following be added, namely:—

"(*c*) or pay the sum demanded, together with any costs incurred under section 220C (*now* 214)."

SECTION 253.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that the following further proviso be added to section 252 (*now* 253), namely:—

"Provided also that, if any building in respect of which any notice is issued under this section is occupied by a person other than the owner, the occupier shall be bound to make to the owner, in respect of all works executed in pursuance of such notice, the payments prescribed by clause (*a*) or clauses (*a*) and (*b*), as the case may be, of section 247 (*now* 250); and such payments may be enforced in the manner prescribed by section 249 (*now* 252)."

He said:—"The object of this proviso is to bring section 252 (*now* 253) into harmony with section 247 (*now* 250). It will be noticed that section 247 (*now* 250) authorises the occupier of any masonry building who holds the same direct from the owner to call upon the owner to provide for the supply of water. But it also provides that he can get the water supply only on certain terms. These terms are defined in sub-section (*2*) of the section; the first of them is that the occupier shall pay during the residue of his term of occupation interest at the rate of one *per cent. per mensem*, calculated from the date of the completion of the works, on the cost of all works so provided by such owner. The second is that, if the premises do not abut upon some street in which there is a supply main, the occupier shall pay the cost of connecting the premises with the nearest supply main. It seems to me that these conditions are based upon a very just and equitable principle. Suppose a tenant takes the lease of a house on Rs. 20 a month at a time when there is no water-connection. He wants to have the benefit of the supply of filtered water. The law says that he is entitled to call upon the owner to incur the necessary expenditure, but at the same time the law says that he must pay for the benefit, and that is only reasonable, because this supply of water was not one of the terms of the original contract; what he has to pay, therefore, is interest at the rate of one *per cent. per mensem* upon the expense incurred by the owner. Now section 252 (*now* 253) deals with cases in which not the occupier but the Chairman compels the owner to have the necessary connection made. My contention on the last occasion was that sections 247 and 252 (*now* 250 and 253) ought to be mutually exclusive, that is to say, that the provisions of section 252 (*now* 253) need not be made applicable to the cases in which there is a tenant who might proceed under section 247 (*now* 250). I then relied mainly upon the ground that it would not be necessary in such a case for the Chairman to interfere, in order to enable the tenant to get the benefit at the expense of the owner. But the Council decided otherwise, and I loyally accept that decision. I accept that decision with regard to section 252 (*now* 253) in the case where the building is not in the occupation of

the owner himself; but it follows logically that, if the premises are in the occupation of a tenant, he ought not to get an unfair advantage which he is not entitled to get under section 247 (*now* 250): that is to say, if the tenant is in occupation, whether the connection with the water-works is made at his instance or at the instance of the Chairman, the tenant ought to pay for it; and I submit that that is both good sense and good law."

The Hon'ble MR. BAKER said:—"I think there is some practical advantage in this amendment. If section 252 (*now* 253) were to be left as it stands, and if, in a case where the Chairman causes the connection to be made on his own motion, no pecuniary liability devolved upon the tenant, I think it is probable that acute tenants would succeed in inducing the municipal officers to suggest to the Chairman that a connection ought to be made; and, by doing that, they would ensure the connection being made, and at the same time they would avoid paying their fair share of the expense to which they should have been liable had they themselves taken action under section 247 (*now* 250). Therefore, I think, whether action is taken under section 247 (*now* 250) or under section 252 (*now* 253), it is desirable that the tenants in either case should be liable for the same payment. That is the effect of this amendment."

The Hon'ble MR. BOLTON said:—"I am afraid I cannot support this amendment, because it might lead in many cases to no action being taken by the Chairman where he would otherwise have taken action. It seems to me that, with such a proviso, the occupier, who may be less able to meet the cost of the connection than the owner, will not press for it, however deniable it may be on sanitary grounds. This objection would be met if we added after the words 'the occupier shall be bound' the words 'if the Chairman so directs.' The Chairman could then discriminate between cases in which the occupier or the owner should pay."

The Hon'ble MR. BUCKLEY said:—"I do not believe, Sir, that this section will be used once in five years, and I do not think it at all an important matter."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said:—"I would just point out that the difficulty to which the Hon'ble the Chief Secretary alludes can hardly arise, because we have already added a proviso to the effect that the Chairman cannot take action until he is satisfied that the person who is called upon to carry out the necessary works has the means to do so."

The Hon'ble MR. BAKER said:—"I think the Hon'ble the Chief Secretary's recommendation is a good one, and that it would meet cases in which it it is desirable on sanitary grounds to have recourse to this section. Such cases may possibly arise, and I think we would do well to accept that slight modification."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"My contention is that the occupier ought to be ordinarily liable, and that only in exceptional cases he ought to be let off."

The Hon'ble MR. OLDHAM said:—"I confess that I am unable to give an intelligent vote on this subject, which is an extremely intricate one, if this amendment is to be made now. I think it would be well to postpone the matter until we know the wording upon which we are to vote."

The motion was then put in the amended form and agreed to.

SECTION 283.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that, after proviso (*b*) to sub-section (*1*) of section 265C [now proviso (*ii*) to sub-section (*1*) of section 283], the following be inserted, namely:—

"(*c*) if, when the Chairman demands payment of any expenses under section 627 (*now* 602), his right to demand the same, or the amount of the demand, is disputed, the power to cut off or turn off water to secure payment of such expenses shall not be exercised unless and until the demand or part thereof is upheld on a reference made to a Court under section 689 (*now* 616)."

He said:—"It will be in the recollection of the Council that in section 265C (*now* 283), sub-section (*1*), clause (*c*), is incorporated a provision of a very stringent character. It empowers the Chairman to cut off the connection between any water-works of the Corporation and any premises if in the case of a *bustee* the owner, or in any other case the occupier, of the premises fails for fifteen days after the due presentation of a bill or the due service of a notice to pay any sum due to the Corporation from him or in respect of such premises. I pointed out to the Council on the last occasion that under section 639 (*now* 616) there might be a dispute as to whether the sum was due at all or not. That section provides that 'if, when the Chairman demands payment of any expenses under section 627 (*now* 602), his right to demand the same or the amount of the demand is disputed, the Chairman shall refer the case for the determination of the Court of Small Causes, or, if the amount involved exceeds Rs. 2,000, to the High Court.' I pointed out that it could not have been intended that, pending the hearing of a case either in the Small Cause Court or the High Court, the Chairman should proceed under this section. The Hon'ble Member in charge of the Bill agreed in this view of the matter, and I trust that there will be no opposition to this extremely moderate measure of relief."

The Hon'ble Mr. Baker said:—"I agree with the amendment."

The Hon'ble Babu Surendranath Banerjee said:—"I thankfully recognise the small instalment of a much larger concession which ought to have been granted in connection with this matter. On the last occasion when I called the attention of the Council to this proviso, I tried to impress upon the Council that the enactment of a provision like this was likely to entail upon the poorer classes of the ratepayers very great hardship. Unfortunately my hon'ble friend in charge of the Bill was unable to accede to my wishes, but I am now thankful that he has accepted the amendment proposed by the Hon'ble Dr. Asutosh Mukhopadhyaya."

The motion was then put and agreed to.

Sections 325, 574 and 575.

The Hon'ble Mr. Baker moved—

(*1*) that the word "water-course" be inserted after the word "tank" in line 8 of sub-section (*1*) of section 311A (*now* 325), and that the words "or water-course" be inserted after the word "tank" in line 4 of sub-section (*2*) of the same section;

(*2*) that the word "water-course" be inserted after the word "tank" in column 2 of the entries relating to section 311A (*now* 325) in the tables annexed to sections 602 and 603 (*now* 574 and 575).

He said:—"With your permission, Sir, I will take these two amendments together. They both relate to the same matter, and are really consequential. It will be remembered that yesterday, at the instance of the Hon'ble Babu Surendranath Banerjee, the word 'water-course' was inserted in section 311A (*now* 325) in order to meet the case of Tolly's Nala. That being so, we must also insert the word 'water-course' in the eighth line of sub-section (*1*) of section 311A (*now* 325), and also in the penalty clauses of sections 602 and 603 (*now* 574 and 575)."

The Hon'ble Babu Surendranath Banerjee said:—"I beg to support the amendments."

The motions were put together and agreed to.

Section 370A.

The debate on the motion by the Hon'ble Babu Surendranath Banerjee and the Hon'ble Mr. Apcar that section 370A be omitted was resumed.

The Hon'ble Mr. Baker said:—"Yesterday the learned Legal Remembrancer made the suggestion that in clause (*a*) of this section (370A), in place of the first words of that section which are as follows, 'to confer and impose mutual rights and obligations upon owners,' &c., the following words should be substituted: 'to define and determine the mutual rights and obligations of owners,' &c. The effect of that is considerably to restrict the power of the Local Government in making rules to deal with this vexed question of party walls. Instead of conferring and imposing rights, the Local Government will have only to define and determine the mutual rights and obligations of owners, by which I understand rights that already exist either by some statute or by custom, or by the operation of any law. Well, Sir, I have thought over this matter, and I had the advantage of receiving the detailed opinion of the Hon'ble Mr. Handley, and I have also consulted the Chairman of the Corporation. I think there is a certain amount of risk in accepting this modification, because if we limit the power of the Local Government to merely defining and determining what the existing rights are, then, as this matter is one of real difficulty and intricacy in this country, it will probably be open to the Courts and to acute lawyers to argue that the rules which the Local Government make are *ultra vires*, because they may possibly go slightly beyond the defining and determining of rights, and might also do something in the way of creating new rights. Therefore, I think there is a certain risk. But, after carefully considering the matter with Mr. Bright, we both came to the conclusion that it was better to take that risk, because all this is a matter of novelty in this country, at all events in Calcutta; and it looks rather an extreme power to confer upon the Local Government (not by legislation, but by mere power of making rules) to authorise them to confer or create new rights. Therefore, in deference to the views put forward yesterday by the Hon'ble Babu Surendranath Banerjee and the Hon'ble Mr. Apcar, the Council will, I think, do well to accept the amendment proposed by the learned Legal Remembrancer."

The Hon'ble Babu Surendranath Banerjee said:—"My difficulty in connection with this matter is not over even after the explanation given by the Hon'ble Member in charge of the Bill. I am afraid this difficulty is somewhat aggravated by the explanation. If the Local Government 'define and determine,' it seems to me that that is a matter of supererogation on the part of the Local Government. It is the function of the Courts to define and determine. I did not know it was the function of the Government to define and determine. Then, Sir, I have a further difficulty. If you empower the Local Government to define and determine, if you leave it open to acute lawyers to argue that you have been defining and determining beyond the rights and obligations accorded to you by statute, it seems to me, Sir, that, in trying to get over our present difficulties, we are likely to be landed in further difficulties. I suggest that the simplest and the safest course is to omit the section altogether, and keep things as they are. We shall, I am afraid, be placing ourselves in a difficult, and it may be in a false, position. Then, Sir, I do not consider this section is wanted; nobody wants it so far as I know, except perhaps my hon'ble friend Mr. Buckley, who I believe is very anxious that it should be inserted in the Bill. I have, Sir, great sympathy with the Hon'ble Mr. Buckley's motives, but sometimes even legislators with the best of motives make mistakes, and it does seem to me, with all the respect I feel for the Hon'ble Member, that it would be a mistake to have this section in the Bill in any shape or form, and it would be the greatest mistake of all to have it in the form now proposed by the Hon'ble the Legal Remembrancer."

The Hon'ble Mr. Buckley said:—"I am not quite certain, Sir, whether I have fully understood the exact meaning of the words the Hon'ble Mr. Baker suggests should be now put into this section. It seems to me that, if I do understand them, they entirely destroy the whole benefit which would otherwise be derived from the establishment of these rules. It seems to me that the effect of the wording which is now proposed would be to prevent the beneficial effect which these rules are intended to have in connection with the construction of party walls. The main thing in connection with the proposal is that a man should have a right to build a party wall partly on his own and partly on his

neighbour's land. That is the essence of the whole business, and the arrangements we have to make must be such as will give either party a right, with a view to the mutual advantage of both, to utilize a portion of his neighbour's and give up a portion of his own land. Now, if you are only going to define and determine the existing rights, you define and determine a line, a line upon which neither party can build. I really do not understand what benefit will be derived from that. I do not of course pretend to be a lawyer, but to my mind the proposal takes away the gist of the whole matter."

The Hon'ble Mr. Oldham said :—"I am exactly in the same position as my hon'ble friend who has just sat down, and I am in full agreement with the first part of the remarks of the Hon'ble Babu Surendranath Banerjee. Now I will give you a concrete instance. We are going to extend the Stamps and Stationery Office. It is a very large office now, and we going to extend it still further. We want to use a party wall between the office and Messrs. Ahmuty and Company's building. I do not see how the power of the Government to define and determine the rights of the parties in this connection will help us in any way. What we want to have is a wall of our own and to be able to utilise a part of their land for the purpose."

The Hon'ble Mr. Baker, in reply, said :—"I will just add one word. Of course it is understood that under section 596 (*now* 568) all rules framed under the section can only be made subject to their previous publication, so that everyone whose rights are in the least likely to be affected under these rules will have ample opportunity of considering them, and giving his opinion upon them before they come into force."

The Hon'ble Mr. Apcar said :—"The Hon'ble Mr. Buckley's intention I understand to be to have rules which shall come into operation in connection with buildings to be erected in future. My view about this particular section is this, that it gives power to the Executive Government to create rights with reference to buildings that are now in existence, with regard to which rights and obligations already exist, and by rules to interfere with the rights and obligations of parties. If there are to be rules to be made at the discretion of the Executive Government, let them be made to affect only buildings that are to come into existence in the future. But what I object to is, that power should be given to the Local Government to make rules which shall interfere with the rights of private individuals. If you create rights on one side, you may take away rights from another, so that there would be a serious interference regarding the rights of individuals."

The Hon'ble Mr. Handley said :—"Sir, I should like to say a few words upon this amendment, because I do not think my hon'ble friend Mr. Buckley has quite understood the legal difficulty that I pointed out. First, I understood the Hon'ble Member to say that in the case of a party wall the man can build on the land of his neighbour without his permission. Well, I do not know that there is any law under which you can do that at present. I am not aware of any. If the two neighbours mutually agree, the general rule is that the party wall is built up to the boundary land on either side. The only thing is that by mutual agreement *A* might pay half the share and *B* the other half, but I do not understand that if *A* chooses forcibly to build the party wall that he could encroach upon *B's* land without his permission, and I do not know that any rules that would be passed under this Act could authorise such a proceeding. Take the case which the Hon'ble Mr. Oldham referred to in which the Government want to extend the Stamps and Stationery Office. Does the Hon'ble Member mean to say that the Government would take hold violently of the land of their next door neighbour and build a party wall?"

The Hon'ble Mr. Oldham said :—"We could build a thinner wall without encroaching upon their land."

The Hon'ble Mr. Handley said :—"Of course, so long as you choose to keep it within your own boundary, you can do what you like."

The Hon'ble MR. BUCKLEY said:—"If you do that, you must have two walls."

The Hon'ble MR. HANDLEY said:—"The only thing is that it seems to me to make it less difficult than it was before these words were inserted. The words before were 'confer rights and impose obligations'. These words might interfere with the rights of private individuals, whereas if you define and determine you will have to proceed to a certain extent on case law, statute, custom, or whatever law exists, and you will endeavour to keep as far as you can within the law until you have a decision. After all, this matter will chiefly depend on the decision of the Courts. I venture to submit that the wording I have suggested is less likely to get you into trouble than the other one. Conferring of rights and obligations is a power which may be questioned at any time as being *ultra vires*."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"It seems to me that if we accept the section as amended we shall land ourselves in a hopeless difficulty. Let us examine the section closely. The section says that 'the Local Government may make rules to define and determine mutual rights and obligations of owners,' &c. To be defined and determined by whom? To be defined and determined by the Courts in accordance with the common law? Does it mean that these rules will create new rights or that they will simply declare rights which are already in existence? If you have rules to define and determine rights, you may even be understood to refer to rules of procedure by which the process of definition and determination is to be carried out by the Courts of Justice."

The Hon'ble MR. OLDHAM said:—"May I ask my hon'ble friend the Legal Remembrancer if it would be *ultra vires* for the Government to take the power to lay down the conditions upon which party walls could be built? That would partly meet the Hon'ble Mr. Apcar's objection."

The Hon'ble MR. HANDLEY said:—"That is what this amendment is intended to convey."

The Hon'ble BABU BOIKANTA NATH SEN said:—"I understand that these rules are to be enacted for the guidance of the parties interested and for the guidance of Courts of Justice in cases where the matter or subject in dispute is brought up for legal adjudication. I believe that is the object. Now, in accepting this section with the modifications proposed, I believe the Legislature will be encroaching upon the rights of the Judicature. It is impossible to conceive the equitable considerations on which these questions will have to be decided. Regard will have to be paid to the circumstances of each case, circumstances attending every particular building and things of that sort, which cannot be conceived beforehand. The elasticity of the Judicature in applying the principles of equity will be restricted if certain fixed rules be enacted by the Local Government, and I venture to submit that it will be very unwise to permit any such rules to be enacted, and it would be judicious to abandon this section altogether."

The Hon'ble BABU JATRA MOHAN SEN said:—"Even after the amendment proposed by the Hon'ble the Legal Remembrancer, I stick to my opinion expressed the other day. The object of this section will not only be to frame rules to define and determine the rights and obligations of parties, but I understand, from the explanation given, that they will have to be sought for from decided cases and from decisions of English Courts. These rights can only be defined by case law, I understand. If that be so, I do not see why we should define these rights (which are very complicated matters, and which have to be decided with regard to the circumstances of each case) by rules framed by the Executive Government. If it is desirable that any law is passed on this subject, I think the best means would be to gather the case law together and formulate these rules in the form of a Bill, which could then be properly discussed and passed into law hereafter. That cannot be done now, and this section, I am afraid,

will have to be abandoned. In fact, an enactment of this kind is not rightly introduced into a Municipal Bill. It is a separate matter altogether, and therefore I think it is much better to abandon this section and to legislate hereafter in case of need."

The Hon'ble MR. BUCKLEY said:—"May I be allowed to explain to the Hon'ble Member who has just sat down that he is under a misapprehension. The rules in England are not a matter of case law, but they are clearly defined in the London Building Act, sections 87 to 101. That Act deals with all questions of party walls, and I may say that the chief of the regulations is that power is given to certain people to appoint arbitrators whose duty it is to deal justly with the rights of the various people. One of the rules has reference to what is called 'under-pinning,' that is to say, a man has got a house and the man next to him wishes to build another house, as I understand the Hon'ble Mr. Oldham wishes to do in the case of the Stamps and Stationery Office. Now, the law we are going to pass here says that if you build a house you must do one of two things—you must either build it in actual contact with the next house, or six feet or eight feet away from it. Now, if you are going to build it in direct contact with the next house, you must put your foundation under the other house, or you cannot get the walls together."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"If you had plenty of space it would not be necessary."

The Hon'ble Mr. BUCKLEY said:—"I said, if you are going to build in direct contact, you must support your wall by putting your foundation under the other wall. The object of this section is to enable Government to make rules to grant certain rights to the parties, so that a party wall may be built to suit them both. If it is not possible legally to do what is proposed by the section as it now stands,—and I do not pretend to have a legal opinion,—then it will be impossible to carry out the theory underlying the question of the party wall."

The Hon'ble BABU JATRA MOHAN SEN said:—"May I ask if the rules are framed under the Act itself? If these rules are defined by the Act, I desire that they should be so defined by an Act here also."

The Hon'ble MR. BAKER said:—"I would suggest, Sir, that this matter be allowed to stand over till Monday, and in the meantime I will endeavour to consider it further with my hon'ble friends Mr. Buckley, Mr. Oldham, the Legal Remembrancer, and one or two of the other gentlemen, if they are willing to assist us. My own feeling is that the wording of the section as it stands in the draft is best, and I accordingly prefer that to the wording proposed by the Hon'ble the Legal Remembrancer, because I feel with Mr. Buckley that the words 'define and determine' will not really help us."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I entirely agree with my hon'ble friend in his last remark, that is to say, I certainly think that the words 'define and determine' will not help us at all. As there appears to be such difficulty in framing a section which will meet the case, it will be far better to abandon the proposal altogether."

The Hon'ble MR. BAKER said:—"I cannot agree with the Hon'ble Member's last remark, and I may mention with reference to what has fallen from the Hon'ble Mr. Apcar that we are not going to deal with existing buildings. The section merely gives power to lay down rules with reference to the erection, maintenance, &c., of party walls in future. Now, there are hardly any party walls in Calcutta at the present time in the strict sense of the word; the only case likely to arise in respect of existing buildings is where there are two adjacent houses which the owners want to bring close together with one party wall between them. Now, in a case like that, the party wall would be new and the building would be old, and the rules would apply to the party wall only. That is probably the only kind of case that would come under the operation of the rules in connection with old buildings. If Your Honour is willing, I think.

under all the circumstances, it would be well to let the matter stand over until the 25th instant."

The further consideration of the motions was postponed till the next meeting of the Council.

SECTIONS 373, 374 AND 383.

The Hon'ble BABU SURENDRANATH BANERJEE, by leave of the President, moved —

(1) that the following proviso be added to section 383 (*now* 373), namely :—

"Provided that the making of such order shall not in any case be delayed for more than thirty days after the Chairman has received all the information which he considers necessary to enable him to deal finally with the said application ;"

(2) that the following further proviso be added to section 384 (*now* 374), namely:—

"Provided also that the making of such order shall not in any case be delayed for more than thirty days after the Chairman has received all the information which he considers necessary to enable him to deal finally with the said application ;" and

(3) that the following proviso be added to section 400 (*now* 386), namely :—

"Provided that the making of such order shall not in any case be delayed for more than fourteen days after the Chairman has received all the information which he considers necessary to enable him to deal finally with the said application."

He said:—"Sir, I explained at length yesterday the grounds on which I wanted to fix a limit of time after the Chairman has received all the necessary information with regard to applications for a site for a building and the plan of the building. I wanted that there should be a definite limit of time within which the Chairman should communicate his approval or disapproval, and I ventured to suggest thirty days as the limit of time within which after he has received all the information he has to communicate his approval or disapproval. My hon'ble friend in charge of the Bill was good enough to accept the recommendation, and I hope the Council will accept it. The first part has reference to the site. The second amendment to section 384 (*now* 374) is consequential."

The Hon'ble MR. BAKER said:—"I have consulted the Chairman of the Corporation in this matter, and we consider that these amendments are reasonable and should be accepted."

The motions were put together and agreed to.

The last motions having been carried, the Hon'ble Babu Surendranath Banerjee, by leave of the Council, withdrew the following motions standing in his name:—

(1) that the words "or within thirty days after the Chairman has been satisfied that there are no objections which may lawfully be taken to the approval of the site" in lines 4, 5, 6 and 7 of section 383 (*now* 373), be omitted; and

(2) that the words "or within thirty days after the Chairman has been satisfied that there are no objections which may lawfully be taken to the grant of permission to execute the work," in lines 5, 6, 7, 8 and 9 of section 384 (*now* 374), be omitted.

SECTION 407.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 426 (*now* 407), line 3, after "thereto" be inserted "after hearing the objections of the owner (if any) and," and that the word "therein" in line 4 be omitted.

He said:—"This amendment, Sir, is a very small matter, so small as not to deserve the opposition of the Hon'ble Member in charge of the Bill. Section 425 (*now* 406) refers to the inspection of bustees by medical officers and the submission of reports and plans for improvement. Section 426 (*now* 407) lays down that 'the General Committee shall, within six months after the

receipt of such report, approve the standard plan annexed thereto, after making such modifications (if any) therein as they may deem proper.' My suggestion is that before the General Committee make any order under section 426 (*now* 407), they should give the owner an opportunity of being heard. The section, if amended according to my suggestion, would read as follows:—

'The General Committee shall, within six months after the receipt of such report, approve the standard plan annexed thereto after hearing the objections of the owner (if any) and after making such modifications (if any) as they may deem proper.' "

The Hon'ble BABU SURENDRANATH BANERJEE said:—" I just want to point out that this is the existing practice, although I do not suppose such a provision is to be found in the existing law. The Bustee Committee always make it a point, when orders of this kind are issued, to send notices to the parties whose properties are concerned, and they appear sometimes by counsel. Elaborate objections are sometimes urged, and the whole matter is enquired into. It is the practice at present, and I hope my hon'ble friend will embody it."

The Hon'ble MR. BAKER said:—" I have not the slightest objection."

The motion was then put and agreed to.

NEW SECTION.

The Hon'ble BABU SURENDRANATH BANERJEE, by leave of the Council, withdrew the motion standing in his name that the following section be inserted after section 428 (*now* 409):—

'428A. An appeal shall lie to the Corporation against any orders passed by the General Committee under section 426 (*now* 407), section 427 (*now* 408) or section 428 (*now* 409).'

The Hon'ble BABU SURENDRANATH BANERJEE moved that the following section be inserted:—

'428A. An appeal shall lie to the Corporation against any orders passed by the General Committee under section 420 (*now* 401) or section 428 (*now* 409).'

He said:—" The General Committee in the first instance causes the bustee to be inspected by two officers; then these officers submit a report and a standard plan; then under section 426 (*now* 406) the standard plan has to be approved by the General Committee; then according to section 427 (*now* 408) the General Committee may cause a written notice to be served upon the owner or occupier of the huts to carry out the improvements proposed in the report. Then further the General Committee are empowered under section 428 (*now* 409) to carry out the improvement in default of the owners or occupiers. Sir, I do not want to interfere with the work while the General Committee are engaged upon it. I want to give the General Committee full powers to carry on the work without any sort of interference on the part of anybody, and then provide an appeal to the Corporation. Sir, the discretion of the General Committee or the executive vigour and energy of the General Committee are not in any way to be interfered with by my amendment as now modified. The General Committee have to appoint the inspecting officers; they are to issue orders; they are to call upon parties to execute orders; if the parties fail to execute the orders the General Committee have to do the work themselves. In this inspection and all other matters they are entirely independent, and I do not in the slightest degree seek to interfere with their discretion or with the execution of the work which the General Committee want to carry out. But, Sir, as I said yesterday, as this is a matter which means some little interference with private parties and with private rights, it is as well to provide an appeal to the Corporation. There may be cases in which individuals may have grievances, and it is right and proper that an opportunity should be given to individuals to appeal to a higher authority. Therefore, I venture to suggest the amendment which I have somewhat modified

from what I originally proposed. I trust my hon'ble friend will see his way to accept the amendment. It does not interfere with the work of the General Committee; it does not interfere with the execution of the orders of the General Committee. After those orders have been carried out either by the parties or by the General Committee, then it shall be open to the individual to prefer an appeal to the Corporation if he thinks fit."

The Hon'ble MR. BAKER said:—"The modification which the Hon'ble Member has made in the terms of his amendment makes practically no difference in the effect of it. The effect will be that an appeal will lie to the Corporation against the action or proceedings of the General Committee in carrying out orders under this section. Now, the whole object of this procedure is to effect improvements in unhealthy *bustees*. The appeal will lie at the very moment the General Committee step in to carry out the work. Sir, the modifications which the Hon'ble Member has made in his amendment make no difference whatever. The effect is just the same as if sections 425, 426 and 427 (*now* 406, 407 and 408) had been left in the amendment. I strongly object to any appeal being allowed to the Corporation under any circumstances. The Corporation is entirely unfitted for hearing appeals. Appeals that come to the Corporation are very seldom decided with exclusive reference to their own merits. This difficulty is not peculiar to the Calcutta Corporation, but is inherent in all large public bodies all over the world. Responsibility is so sub-divided that no ordinary member of a large body can be expected to feel the same interest, or to take the same pains in deciding the matter, as if he had to decide it alone or as if it had to be decided by a small tribunal of which he was an important part. When an appeal goes to the Corporation, I do not believe that three-fourths of the Commissioners take the trouble to make themselves acquainted with the facts beforehand. They regard the matter as if they were spectators rather than participators. The only Commissioners who do make themselves acquainted with the facts in advance are those with whom the appellant or his opponents have made some interest, and they approach the question as advocates, and not as independent judges. Consequently an appeal to the Corporation becomes a matter of advocacy, not of judgment, and, though I should be very far from saying that appeals in the past have been always decided wrongly, I do say that the merits of the appeals have not been the primary and exclusive grounds on which decisions have been arrived at. Therefore, I think that the Council should not consent to give the power of an appeal to the Corporation against the orders of the General Committee."

The Hon'ble MR. BUCKLEY said:—"My hon'ble friend Mr. Baker has said the Corporation is not a body to which appeals should be referred. I should like to explain to the Council what the procedure would be in London with reference to such appeals as far as the circumstances are parallel. What I shall say has reference to the wish of the Hon'ble Babu Surendranath Banerjee that appeals in the matter of *bustees* shall lie to the Corporation. Under the London Building Act there is an officer appointed under section 136 called Superintending Architect, who is a servant of the London County Council and has various duties to perform. One of these duties is the fixing of a line called the general building line. This matter is very much akin to this question of the improvement of roads and *bustees*. That officer lays down this line, and determines, in the first instance, any practical questions or difficulties which may arise. His orders are subject to appeal, and the appeal lies to what is called the Tribunal of Appeal. It does not lie to the General Committee as it lies here, nor does it lie to the County Council which corresponds to the Corporation, but it lies to what is called the Tribunal of Appeal. The constitution of the Tribunal of Appeal is interesting. It is as follows in section 175 of the London Building Act:—

'For the purposes of this Act a Tribunal of Appeal shall be constituted as follows:—

one member shall be appointed by the Secretary of State;

one member shall be appointed by the Council of the Royal Institute of British Architects;

one member shall be appointed by the Council of the Surveyor's Institute

No member or officer of the Council shall be a member of the Tribunal of Appeal.'

That is to say, in London they have actually decided that such questions shall be referred to a tribunal on which no member of the County Council has a seat at all. These questions are regarded as questions to be decided by practical men, and not as questions which are fit subjects for appeals to large representative bodies."

The Hon'ble MR. OLDHAM said:—"This is a matter of *bustee* improvement, and yesterday I had occasion to refer to the question of *bustee* reclamation. I ought to have explained that, so far as my information goes, it appears that the *bustee* reclamations and improvements which have been carried out in the past have been effected by a small Committee of the Corporation. I do not know that they have ever been interfered with by the Corporation, and I think the place of that *Bustee* Committee will best be taken by the General Committee, as is provided for under this Bill. I do not think that any appeal to the Corporation is necessary or desirable."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"Sir, I desire to address myself chiefly to the observations of my hon'ble friend Mr. Buckley, who has cited the precedent of the London County Council, and who has read an extract which says that in matters like these the appeals lie to a completely independent tribunal, and that on that tribunal not a single member of the London County Council has a seat. Sir, I am glad that that extract has been read, because it supports my case in a most unexpected manner. The London County Council and the London Building Act recognise that, in cases of this kind, an appeal is desirable, and that is all I am endeavouring to press upon the attention of the Council. Here the General Committee have to pass orders in connection with matters seriously interfering with the rights of property, and no appeal is provided for. I suggest that an appeal be provided for; and to whom it should be preferred? I say it should be preferred to the Corporation. Therefore my friend's argument is directly in support of my contention. The extract states that on the Committee which has to hear appeals against the orders of this architect not a single member of the County Council has a seat. Now what is the General Committee? It is a Committee of the Corporation. Therefore, if the analogy holds good, the General Committee ought to have nothing to do with this matter. The General Committee are all members of the Corporation, and if my hon'ble friend maintains that the precedent of the London County Council is to be applicable to the case of the Calcutta Municipality, then I am entitled to hold that the General Committee ought to have nothing whatever to do with applications of this kind. But my hon'ble friend does not mean that at all. He wants to point out that in cases of this kind it is necessary to have an independent tribunal. Even in London, with the strong force of public opinion actively at work, a provision is made for appeals in cases of this description. Here, Sir, under an impotent public opinion, no provision is made for appeals in cases of this kind.

"I must express my surprise at the remarks that my hon'ble friend the member in charge of the Bill has made. My hon'ble friend says 'on no consideration can I consent to the Corporation being allowed the right of being appealed to in regard to these matters.' Well, Sir, my hon'ble friend's attitude in this connection reminds me of a celebrated chapter in Roman history, with which I am perfectly sure he is well acquainted. My hon'ble friend knows the words which Cato used frequently to recite to the Senate '*Carthago delenda est*,'—'Carthage must be destroyed,'—and my hon'ble friend never rises from his seat without exclaiming 'the Corporation must be humiliated; the authority of the Chairman must in everything be supreme.' I really do not think that the hon'ble gentleman who is in charge of a measure of local self-government should be animated by such feelings towards the Corporation. The Corporation is the embodiment of local self-government, and my hon'ble friend gave us the other day an assurance that there was no wish on the part of anybody to do anything

to destroy or curtail the principle of local self-government in this city. He said he was only seeking a judicious re-arrangement of the principle of representation. A judicious re arrangement of the principle of representation according to my hon'ble friend means the absolute extinction of local self-government. I think, Sir, I am entitled to hold that opinion from the remarks which so frequently escape from the lips of my hon'ble friend. My hon'ble friend thinks this amendment deals with an immaterial point. Well then, why not please me if it is perfectly immaterial?"

The Hon'ble Mr. Baker said:—"I did not say it was immaterial. What I said was that the change you made in your amendment made no difference in the effect of it."

The Hon'ble Babu Surendranath Banerjee said:—"I misunderstood you. I think it will make a very great difference. Under amendment as it is now modified there is no interference with the work of the General Committee in the earlier stages; but, when the General Committee has finished its work, there may be an appeal to the Corporation. Originally, there would be power of appeal when the General Committee have issued an order; there would be power of appeal when the General Committee propose to carry out the improvements. There would in fact be an appeal against every action of the General Committee at every stage. Now, I have modified my amendment to this extent that the power of appeal is confined to one point, *viz.*, that when the work is finished, if the person feels himself aggrieved, he may go to the Corporation and endeavour to obtain redress. Then, Sir, my friend has made a remark that the Corporation would be an extremely unsuitable body to deal with appeals. My hon'ble friend knows how the business is done in the Corporation. I think my hon'ble friend Mr. Oldham has reiterated the same sentiment to my surprise. I am astonished that Hon'ble Members display such ignorance of the work of the Corporation. The appeal would probably be dealt with by a Committee appointed by the Corporation, possibly the whole matter would be disposed of by the Committee. I think that having regard to the issues involved, having regard to the fact that these sections contemplate interference with private property, and having regard to the precedent quoted by my hon'ble friend Mr. Buckley, there should unquestionably be a power of appeal. If there is to be an appeal against the orders of the General Committee, I cannot think of any tribunal better fitted to be the appellate tribunal than the Corporation. As for the argument that the Corporation is unsuited to deal with appeals, my reply is that the Corporation will not deal with these appeals, but that they will generally appoint a Committee to hear them and to come to a decision upon the points raised. Therefore, it seems to me that it is only reasonable and just that this amendment should be accepted."

The Hon'ble the President said:—"I should like to ask one question of the Hon'ble Mr. Buckley. Is the appeal to the Tribunal of Appeal in London from the orders of one man or from the orders of a Committee?"

The Hon'ble Mr. Buckley said:—"The particular case I quoted, Sir, deals with building line. The appeal is from the orders of one man. Section 25 of the Act says that any person deeming himself aggrieved by a certificate of the Superintending Architect may appeal to the Tribunal of Appeal."

The Hon'ble Babu Surendranath Banerjee said:—It is only in regard to the building line. Is there any analogy between the practice followed in England as regards this matter and the practice we are now introducing here. Is there any section similar to that we are now discussing?"

The Hon'ble Mr. Buckley said:—"I can hardly say there is anything similar to *bustees*, but the building line comes into the question. There are of course very many and very large insanitary areas in London."

The motion being put, the Council divided as follows:—

Ayes 5.	*Noes 12.*
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckley.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Mr. Handley.
The Hon'ble Mr. Apcar.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Mr. Mackenzie.
	The Hon'ble Mr. Spink.
	The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr. Oldham.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendment was lost.

SECTION 413.

The Hon'ble BABU SURENDRANATH BANERJEE also moved that for the word "four" in line 3 of sub-section (5) of section 432 (*now* 413) the word "two" be substituted.

He said:—"If you will be good enough, Sir, to turn to section 425 (*now* 406), you will find that that section provides a procedure in cases where there has been 'dilatoriness,' that is to say, in order to expedite matters, the procedure laid down in section 425 (*now* 406) is followed."

The Hon'ble MR. BAKER said:—"I think I can shorten the matter by saying that I propose to accept this amendment."

The motion was put and agreed to.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that to section 432 (*now* 413) the following be added:—

"(6) Whenever action is taken under sub-section (4), clause (*a*), the provisions of sub-sections (2) and (4), or sub-section (3), as the case may be, of section 416D (*now* 397), shall be applicable."

He said:—"The object of this amendment is to make section 432 (*now* 413) harmonious with section 416D (*now* 397). Section 416D, which deals with the case of general improvements, authorises the Corporation to acquire land for the purposes of such improvements, and subsequently to sell, lease or otherwise transfer to a competent person the land and buildings which have been thus acquired for the purpose and under the condition that he will carry out such work in accordance with an approved scheme.

"Section 432 (*now* 413) deals with bustee improvement and provides as follows:—

'(1) Notwithstanding anything contained in sections 426 to 431 (*now* 407 to 412), the General Committee may, after receipt of a report made under section 425 (*now* 406) with respect to any bustee, pass a resolution to the effect that the bustee is an unhealthy area, and that in their opinion the purchase or acquisition of the bustee, or of any portion thereof, is necessary for the purpose of making the requisite improvements therein.

(2) When any such resolution has been passed, the General Committee shall proceed to make a standard plan for the improvement of the said bustee or portion, and shall lay such plan before the Corporation, together with such estimates as may be necessary for a due understanding of the same and a copy of the said resolution.

(3) If the plan be approved by the Corporation, they shall submit it to the Local Government, together with the said estimates and a copy of the said resolution; and, if the plan be approved by the Local Government, the General Committee may purchase or acquire the said bustee or portion.

(4) When the said bustee or portion has been so purchased or acquired, the General Committee shall either—

(a) sell or let the same or part thereof to some person for the purpose and under the condition that he will, as respects the land so sold or leased to him, carry out the improvements shown in such standard plan, or

(b) themselves bring the said bustee or portion, together with any part thereof which has not been sold or leased under clause (a), into conformity with such standard plan.

(5) The General Committee shall be bound to proceed as directed by sub-section (4) within a period of four years from the date of their purchasing or acquiring the said bustee or portion in pursuance of sub-section (3), or within such further period (if any) as the Local Government may prescribe.'

"It will be observed that the two sections are very similar in scope, and I suggest that they should be placed on the same footing in the matter of the acceptance of security from the transferee who undertakes to carry out the improvement."

The Hon'ble Mr. Baker said:—"I accept the amendment."

The motion was put and agreed to.

Section 420.

The Hon'ble Babu Surendranath Banerjee moved that the words "with the appoval of the Corporation" be inserted after the word "may" in line 1 of sub-section (1) of section 449 (*now* 420), and that the words "the Corporation" be inserted before the words "may impose" in line 4 of the same sub-section.

He said:—"I will read the section with the words inserted according to the terms of my amendment:—

'(1) The General Committee may, with the sanction of the Corporation, sanction the employment of a special establishment for the cleansing of any bustee, and, when any such establishment has been sanctioned, the Corporation may impose on the owners of the bustee a rate to defray the cost of the establishment.

(2) Any rate so imposed shall be recoverable in the manner provided by this Act for the recovery of the consolidated rate.'

"I may say, Sir, that my amendment is conceived in the terms of the existing law. If my hon'ble friend the Member in charge of the Bill would refer to section 269 of the present law, he will find that my amendment is in entire conformity with the terms of that section. Here is the question of imposing rates upon bustee-owners, and I think, Sir, in the matter of the imposition of rates, the Corporation ought to be the authority. The Corporation has the power of the purse. That has been definitely conceded. The Corporation fixes the rates and it deals with financial considerations. Therefore, Sir, it is desirable that, so far at any rate as the imposition of the rate upon bustee-owners is concerned, the Corporation shall have the authority. If my hon'ble friend the Member in charge of the Bill agrees to that, I will withdraw the first part of my amendment. As far as the employment of the establishment is

concerned, that is an executive matter, and the General Committee may have permission to do it; but I attach the utmost importance to the imposition of the rate. The rate is a thing which is imposed by the Corporation, and it would be in accordance with the principle, which is the principle of the Bill, that, so far as the imposition of the rate upon bustee-owners is concerned, the Corporation should have that power. And in this connection I may say that my views are supported by the high authority of the Corporation. My recommendation is upon the lines of the recommendation of the Bill Committee of the Corporation.

"Sir, throughout this debate I have been guided by the principle of compromise, whatever may be the attitude of the Hon'ble Member in charge of the Bill. I am prepared to allow the General Committee to make arrangements for the establishments. I do not want to interfere with that part of the Bill; but I do earnestly hope, Sir, that this Council will consent to accept that which I consider to be the most important part of the amendment, *viz.*, that the Corporation should have the power of imposing the rate upon the bustee-owners."

The Hon'ble MR. BAKER said:—"The Hon'ble Babu Surendranath Banerjee says that he is dominated by the principle of compromise. If I may venture to say so without offence, his notion of compromise seems to be that eight annas of his total demand should be conceded in the Select Committee and the remaining eight annas in this Council. With reference to the specific amendment which he now proposes, if he is willing to withdraw the first part of it, I shall be willing to concede the second part. It is rather unfortunate that was not expressly stated in the amendment, as it would have saved a certain amount of discussion."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"If I ask for a whole loaf, I will probably get half. I withdraw the first portion of my amendment 'with the sanction of the Corporation.'"

The second part of the amendment, namely, that the words "the Corporation" be inserted before the words "may impose" in line 4, was then put and agreed to.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that to section 449 (*now* 420), sub-section (*1*), the following be added:—

"Provided that, without the consent of the owners, no such rate shall be imposed in respect of any remodelled bustee."

He said:—"It seems to me that this proviso, which is in the existing law, is very reasonable. If a bustee-owner has incurred expense under the foregoing sections of this Chapter and his bustee has been re-modelled, it is not fair that he should incur additional expense."

The Hon'ble MR. BAKER said:—"I accept the amendment."

The motion was put and agreed to.

SECTION 422.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the words "with the sanction of the Corporation" be inserted after the word "Chairman" in line 1 of sub-section (*1*) of section 458 (*now* 422).

He said:—"The section as amended will run as follows:—

'(1) The Chairman, with the sanction of the Corporation, shall—

(a) take measures for lighting in a suitable manner the public streets and municipal markets and all buildings vested in the Corporation;

(b) procure, erect and maintain such number of lamps, lamp-posts and other appurtenances as may be necessary for such lighting; and

(c) cause such lamps to be lighted by means of oil. gas and electricity or such other light as the Corporation may from time to time determine.'

"The Hon'ble Member the other day observed, and observed with much justice, that in the matter of lighting the Ward Commissioners are accustomed to take a great deal of interest, and that it is desirable to make some concession to the interest which they evince in this matter. Well, in this amendment I carry out the suggestion of my hon'ble friend. Whenever, Sir,—and I speak from personal experience,—a street is to be lighted, an application is made by the rate-payers; that application is sent on to the office; the office sends it back to the Ward Commissioner for his opinion; and the opinion of the Ward Commissioner generally is given effect to. I think, Sir, in a small matter like this the approval of the Corporation would not in the smallest degree weaken the hands of the Chairman, but on the other hand will enable him to discharge his duty in this respect in a satisfactory manner, and I will tell you my reasons. We have got at the present moment one Lighting Inspector. That gentleman is supposed to inspect the lighting of the whole town. You can easily understand how efficiently this gentleman, havng the whole of the town under his charge, is able to perform his duties. As a matter of fact he is merely an ornamental figure-head. I do not think he is able to perform his duties satisfactorily, and the Ward Commissioners render him valuable help. The Ward Commissioners in this matter represent an important adjunct to the municipal administration of the town, and, that being so, I am anxious to associate them with the Chairman in the discharge of his duties in this matter. I admit, Sir, that, so far as the sections relating to lighting are concerned, the power of supervision is given to the General Committee; but, Sir, in the new General Committee the representatives of the rate-payers will be in a minority, certainly not in a majority; and it is desirable therefore that the Corporation should have something to say with regard to this matter of the lighting, and that the Ward Commissioners should be allowed to be associated with the Chairman in the discharge of his duties."

The Hon'ble Mr. Baker said:—"In the Select Committee, section 458A (*now* 428), which places the Chairman under the control of the General Committee in matters connected with lighting, was inserted expressly in order to enable the Ward Commissioners to have some voice in lighting matters. There is not the slightest necessity to place the Chairman also under the general control of the Corporation."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"This is an exceedingly small matter, and I thought my friend would see his way to give way. Section 458A (*now* 428) says:—

"The Chairman shall, in the performance and exercise of the duties and powers imposed and conferred on him by this Chapter, be subject to the control of the General Committee."

"The Ward Commissioners would not be under the General Committee, and then we have now got a very salutary provision which enables Ward Commissioners to move resolutions in the General Committee. Suppose a Ward Commissioner is not a member of the General Committee, and, if he has any good scheme, he is empowered according to the present practice to come before the General Committee, give notice of motion and move his Resolution

whatever it may be. He has not got the right to vote. Therefore, under the present practice, which finds no place in this Bill, the Ward Commissioners can associate themselves with the General Committee; but under the Bill they have no place in the General Committee. The object of my amendment is to associate the Ward Commissioners with the Chairman."

The Hon'ble MR. OLDHAM said:—"My hon'ble friend Babu Surendranath Banerjee has adduced some fresh facts in his reply. There is nothing in the present law which provides for Ward Commissioners making motions before the General Committee. There is nothing in the Bill to prevent them doing so, and nothing has been done to alter the practice."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I certainly quite admit all that. The spirit of the present law is popular, but that of the Bill is official, if I may be permitted to say so; and I am certain a practice such as now prevails would be discarded. If the Ward Commissioners are allowed to be associated with the General Committee, good and well; but I am bound to say, having regard to the spirit of the Bill, that the Ward Commissioners probably will not be associated with the General Committee. If they are associated with the General Committee, we at any rate are not expressly providing for it in the law. Will the Hon'ble Member in charge of the Bill consent to make a provision to that effect? He will not consent, and therefore it seems to me that it is not likely, so far as I can judge, that the Ward Commissioners will be associated with the Chairman."

The motion was then put and lost.

SECTION 429.

The Hon'ble BABU SURENDRANATH BANERJEE, by leave of the Council, withdrew the motion, standing in his name, that sub-section (*2*) of section 459A (*now* 429) be omitted, and moved instead that the following be substituted for sub-section (*2*) of section 459A (*now* 429), namely:—

"(*2*) Any land that may be required in a bustee for the temporary deposit or final disposal of rubbish, offensive matter, sewage or carcasses taken from buildings or lands in such bustee shall be provided by the owners of the bustee."

He said:—"With Your Honour's permission I would substitute a new motion in place of the one I have just withdrawn. Sub-section (*2*) of section 459A (*now* 429) reads:—

'(*2*) Any land that may be required in a bustee for the purposes of sub-section (*1*) shall be provided by the owners of the bustee.'

"I have placed myself in communication with the Hon'ble Member in charge of the Bill, and he has suggested a modification of my amendment, and I accept that modification. I will read the new section:—

'Any land that may be required in a bustee for the temporary deposit or final disposal of rubbish, offensive matter, sewage or carcasses taken from buildings or lands in such bustee shall be provided by the owners of the bustee.'

"The difference between the sub-section as it stands and the proposed amendment is this. The section is of a general character. Almost any refuse could be deposited on land belonging to the bustee-owner, but here the amendment proposes that refuse, carcasses and things of that kind taken from land or

buildings in the bustee shall alone be deposited on land to be provided by the bustee-owner. This seems to me to be reasonable, and I have pleasure in accepting the modified amendment."

The Hon'ble Mr. Baker said:—"I accept this amendment."

The motion was put and agreed to.

Section 430.

The Hon'ble Babu Surendranath Banerjee also moved that for section 459B (*now* 430) the following be substituted:—

"The General Committee may cause any number of moveable or fixed dust-boxes or other convenient receptacles (wherein rubbish and offensive matter arising from the ordinary domestic use of houses may be temporarily deposited, until removed and carried away) to be provided and placed in proper and convenient situations, and may require the occupiers of houses in public streets to cause all such matter as aforesaid to be deposited in such receptacles and between such hours as they may from time to time direct:

Provided that no occupier shall be required to deposit refuse in a dust-box at a greater distance than fifty yards from the entrance of his premises."

He said:—"This is practically a reproduction of section 298 of the existing law. The difference between the existing law and what is proposed in the Bill is this: the existing law makes provision for public dust-bins to be placed on public streets to which people may resort and in which they may put their refuse and other things. The Bill provides not only for public dust-bins but for private dust-bins to be placed at or near the entrance of houses. Sub-section (*1*) of section 459B provides—

'The Chairman may, by public notice, direct that all rubbish and offensive matter accumulating in any premises in any street or quarter of Calcutta specified in the notice shall be collected by the occupier of such premises and deposited in a box or basket, of a kind prescribed by the Chairman, to be provided by such occupier and kept at or near the entrance to the premises.'

"Therefore, Sir, here provision is made for occupiers providing themselves at their own expense with private dust-bins and dust-boxes. We considered this matter more than once at meetings of the General Committee. I do not know whether my hon'ble friend the Member in charge of the Bill remembers those occasions, but we considered this matter as to whether it would not be desirable to have private dust-bins for the use of occupiers of houses, and we thought that on the whole it would be as well not to make any provision to that effect. In this matter we are bound to respect Hindu feeling and sentiment. If you place a dust-bin at the entrance to the house of a Hindu or near the entrance to his house, and refuse is deposited there and the dust-bin is used by mehters and other low class people, it becomes a polluted thing. The inmates of the house will not approach it. They will not touch it, and it would be perfectly useless. Of course, I am free to admit that in Calcutta there are other communities besides the Hindu community; but, Sir, the Hindu community bulks very largely on the view; the Hindu community preponderate in numbers, if they do not preponderate in wealth or intelligence. Any municipal measure of this kind must be looked at from the point of view of the Hindu community; and I am bound to say, Sir, that if you insist upon providing private dust-bins to be placed at or near the entrance of houses inhabited by Hindus, they will become objects of pollution, which will be abhorred by the Hindus. I am well aware of the fact that there is such a provision in the Bombay Act. I do not know how it has worked there, but that is the feeling in regard to this section in the mind of the Hindu community; and I think, Sir, it is desirable, when we are legislating in a matter like this, to respect that feeling. The dust-bin would be useless; the people would abhor and shun a thing of that kind; and it is for the Hon'ble Member in charge of the Bill to say whether, having regard to this state of feeling, it is desirable to legislate upon these lines so far as private dust-bins are concerned."

The Hon'ble Mr. Baker said:—"I have listened to the Hon'ble Member with the greatest surprise. This matter was most fully considered in the Select Committee. The provisions in the original Bill were entirely different from those in section 459B (*now* 430). The Select Committee invited Mr. Hughes and Dr. Cook, the Engineer and Health Officer of the Corporation, to attend their sittings and favour them with their views. Mr. Hughes recommended that the private dust-bin system should be introduced in Calcutta universally. He told us that in Paris, where many of the streets are very narrow, it was found possible to work that system; and he undertook to explain how it was carried into effect there. Dr. Cook on the other hand, who had had experience of this kind of work in Madras and elsewhere, said there were parts of Calcutta in which the private dust-bin system would be impossible; and then I remember telling the Select Committee that my own view was entirely in favour of what Dr. Cook had said, and that they would act unwisely in accepting Mr. Hughes' much more drastic proposals. I then brought forward the scheme which is embodied in this section, and this scheme, Sir, was accepted unanimously by the Select Committee, including the Hon'ble Babu Surendranath Banerjee himself and Babu Narendra Nath Sen. The only explanation I can imagine for the Hon'ble Member's opposition now is that he has not really understood what the effect of the system will be. What this section provides for is this. It provides for all three systems. In the first place, it provides for the private dust-bin system; secondly, it provides for the public dust-bin system; and, thirdly, it provides for the existing system under which rubbish is deposited on the road outside the doorway of each person's house; and it lays down that the Chairman may direct that each one of these three systems shall be applied in such streets or quarters as may be found desirable. I remember expressly explaining to the Select Committee that the private dust-bin system was suitable for, and would be applied in, the European quarters, such as Chowringhee, Theatre Road, Park Street, and places like that. The public dust-bin system, which is the system authorised by the existing Act, would be suitable for the more open part of the native quarter—the northern part; while the extremely insanitary third system, by which rubbish is deposited on the road, would be continued in those quarters of the town which were too crowded and in which the streets were too narrow to allow even of the public dust-bin system There is not the remotest danger that the religious feelings of any Hindu will be affected in the smallest degree if this system is properly and judiciously worked."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"I must say that my memory fails me with regard to what the Hon'ble Member in charge of the Bill says transpired in the Select Committee, and, in fact, Sir, I once suggested that it would be a good thing if the proceedings of Select Committees were published in the same way as the proceedings of the various Committees of the Corporation are published. Then we could rely upon regularly authenticated notes as to what transpired. I must say I do not remember anything at all about the matter to which my hon'ble friend has referred. I do not wish to challenge his statement, but I have no recollection of the matter. Apart, however, from what transpired in the Select Committee, I should like my hon'ble friend to make a reference and to abide by this reference as to whether what I have said is not consistent with the facts of the case. I will not say that Hindu feeling would be hurt, but Hindus would not have anything to do with the dust-bins at the entrance to their houses if they have been used by dhangars and others, and I think that is the correct view of the matter. When a Hindu finds that dhangars and mehters go and touch the dust-bins, they will fight shy of them. It may be a prejudice, but there it is, the prejudice exists, and, if there is that prejudice, the law would be unworkable. If I did not take up that position in the Select Committee, I failed to do my duty, and because I failed to do my duty at the Select Committee, that is no reason why I should fail to do my duty here, having regard to what I know about Hindu feeling in this matter."

The Hon'ble Mr Spink said:—"I perfectly remember the explanation which the Hon'ble Member in charge of the Bill gave in the Select Committee, and he has explained it here again exactly as he did in the Select Committee."

The Hon'ble MR. BAKER said:—"As the Hon'ble Babu Surendranath Banerjee has hinted that there may possibly be some question of religious feeling, I am quite willing to allow the General Committee a voice in this matter. I have not the smallest objection to provide that 'the Chairman in the discharge of his duty under this section shall be subject to the control of the General Committee.'"

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I accept that."

The motion was then put and lost

The Hon'ble MR. BAKER, with the permission of the President, then moved that the following clause be added to section 459B (*now* 430):—

"(5) In the exercise of his powers under this section, the Chairman shall be subject to the control of the General Committee."

The motion was put and agreed to.

SECTION 431.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 459C (*now* 431), clause (*a*), for the word "or" at the end, be substituted "and if the occupier fails to carry out such direction."

He said:—"Section 459C (*now* 431) deals with the collection and removal of rubbish and offensive matter accumulating on business premises. The two clauses as they stand seem to be alternatives. I am not sure that this is really intended. The section first provides that—

'When any premises are used for carrying on any manufacture, trade or business in the course of which rubbish or offensive matter is accumulated in quantities which are, in the opinion of the Chairman, too considerable to be deposited in any of the methods prescribed by notice issued under section 459B (*now* 430), the Chairman may,—

(*a*) by written notice, direct the occupier of such premises to collect all rubbish and offensive matter accumulating on such premises, and to remove the same at such times, in such carts or receptacles, and by such routes as may be specified in the notice, to a public receptacle, depôt or place provided or appointed under section 459A (*now* 429).'

"This is followed by an alternative in clause (*b*):

'or, after giving such occupier written notice of his intention so to do, himself cause all rubbish and offensive matter accumulating in such premises to be removed, and charge such occupier for such removal such periodical fee as may, with the sanction of the General Committee, be specified in such notice.'

"I venture to think that it would be reasonable to bring clause (*b*) into operation only after a notice has been issued under clause (*a*) and the occupier has failed to take the necessary steps. It does not seem to be just or necessary that there should be any interference by the Corporation even if the occupier is able and willing to carry out the work."

The Hon'ble MR. BAKER said:—"I am pretty certain that the members for the Corporation will not agree to this amendment. That is not the intention at all. The intention is that the Chairman shall have the option, in the case of business premises of that kind, either to require the occupier to remove this refuse, or, if the Chairman thinks fit, he may himself make the necessary arrangements. It is easy to conceive that occasions might arise in which it would not be right that the occupier should have any option in the matter, and in which the requirements of public health would necessitate the Chairman's

making arrangements to remove the trade refuse through the ordinary municipal staff. The section, I think, is right as it stands."

The Hon'ble Babu Surendranath Banerjee said:—"I beg to support the remarks made by the Hon'ble Member in charge of the Bill. I think the option ought to be left to the Corporation. These are considerations of public health, and the authority ought to be vested in the Municipality."

The motion was then put and lost.

The Hon'ble Dr. Asutosh Mukhopadhyaya's motion that in section 459C (*now* 431), clause (*b*), line 5, for "change" be substituted "charge," was not put, it being understood that the word "change" was a typographical error which would be duly corrected in reprinting the Bill.

Section 434.

The Hon'ble Babu Surendranath Banerjee moved that for the words "General Committee," in line 4 of section 463 (*now* 434), the word "Corporation" be substituted.

He said:—"Section 463 (*now* 434) provides—

'In cases not provided for by any notice issued under section 459C (*now* 431), the Chairman shall from time to time, with the sanction of the General Committee, prescribe—

(*a*) the hours within which sewage and offensive matter may be removed,
(*b*) the kind of cart or other receptacle in which sewage or offensive matter may be removed, and
(*c*) the route by which such carts or other receptacles shall be taken.'

"This is a question which concerns large sections of the people, and routes may be appointed which may be highly inconvenient, and in a matter like this the Corporation ought to have the authority. I think it is always desirable in matters like these, where the interests of a large class of people are concerned, that the Corporation should have power, and that is all that I have got to say."

The Hon'ble Mr. Baker said:—"This is essentially an executive matter, Sir, and such degree of public control as is necessary is provided for by giving the power of control to the General Committee. I think it is quite wrong and improper that this should be given to the Corporation."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"I should like to point out a nuisance which existed, namely, the removal of night-soil from the Fort. That used to cause a great nuisance to the northern part of the town, and I remember this matter came up before the Corporation, and we fixed the hours within which the night-soil was to be removed. A case of that kind might occur, and, having regard to that fact, it seems to me that it would be as well to leave the power to the Corporation. The Chairman does it in the first instance. You do not interfere with the Chairman. He does it, but it ought to be done subject to the control of a larger body than the Chairman, because considerations of public convenience are concerned."

The motion was then put and lost.

Sections 444 and 445.

The Hon'ble Dr. Asutosh Mukhopadhyaya, by leave of the Council, withdrew the following motions standing in his name:—

(*1*) that in section 473 (*now* 444), sub-section (*1*), line 4, before the word "Magistrate" be inserted "Presidency," and
(*2*) that in section 474 (*now* 445), sub-section (*1*), line 6, before the word "Magistrate" be inserted "Presidency."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved (No. 269) that in section 473 (*now* 444), sub-section (*1*), for the words "such inquiry as he thinks fit to make" be substituted "taking such evidence as may be adduced before him, and after hearing the owner and the occupier."

He said:—"This amendment depends on the same principle as my amendment to section 33 (*now* 41), which was accepted by the Council with a slight modification. The section as it stands now provides that—

'(*1*) If, for any reason, any building intended for or used as a dwelling-place appears to the Chairman to be unfit for human habitation, he may apply to a Magistrate to prohibit the further use of such building for such purpose; and the Magistrate, after such enquiry as he thinks fit to make, may, by written order, make a prohibition as aforesaid or may pass such other order as he may deem just and proper.

'(*2*) When any such prohibition has been made, no owner or occupier of such building shall use or suffer the same to be used for human habitation until the Chairman certifies in writing that the causes rendering it unfit for human habitation have been removed to his satisfaction, or a Magistrate, by written order, withdraws the prohibition aforesaid.'

"I desire to make it quite clear that the enquiry which the Magistrate is to hold will be a judicial enquiry, and, therefore, instead of omitting the words 'such enquiry as he thinks fit to make' as in the other case, I add these words: 'taking such evidence as may be adduced before him, and after hearing the owner and the occupier.'"

The Hon'ble MR. BAKER said:—"I do not agree to this amendment. The Magistrate's procedure is governed by the Criminal Procedure Code. Why should we in a Municipal Act go out of our way to prescribe it for him unless we have some intention of modifying the ordinary procedure? There is no intention of modifying the procedure laid down for magisterial enquiries under the Criminal Procedure Code. Why not leave it to the operation of the ordinary law?"

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said:—"I am surprised, Sir, at this opposition, because the Hon'ble Member in charge of the Bill cannot possibly be right. The Magistrate, when he takes action under this section, does not act under the Criminal Procedure Code. Let us look at the other sections of the Bill, for instance at section 644 (*now* 623); if the Hon'ble Member's contention is right, that section is absolutely superfluous. Sub-section (*1*) of section 644 (*now* 623) provides:—

'(*1*) For the purposes of any enquiry or proceeding under this Act, a Court of Small Causes may summon and enforce the attendance of witnesses and compel them to give evidence and compel the production of documents, by the same means, and as far as is possible in the same manner, as is provided by the Presidency Small Cause Courts Act, 1882, or the Provincial Small Causes Courts Act, 1887, as the case may be; and, in all matters relating to any such enquiry or proceeding, the said Court shall be guided generally by the provisions of the said Presidency Small Cause Courts Act, or the said Provincial Small Causes Courts Act, as the case may be, so far as the same are applicable.'

"What is the use of this section, if the Small Cause Court Judge, when he hears a case under the present Act, exercises all the powers which he possesses under the general law? I think that the amendment is necessary and I must press it."

The Hon'ble THE PRESIDENT said:—"Will the Hon'ble the Legal Remembrancer advise us on this point?

The Hon'ble MR. HANDLEY said:—"I should say that this might cause harm in one particular case. For instance, under section 133 of the Criminal Procedure Code, a Magistrate can pass an *ex parte* order in cases. He is not bound to record evidence at all, and that would be perhaps inconvenient in a case like this, where a building was in bad order or liable to tumble down. As the Secretary has pointed out, Chapter I, section 5, sub-section (*2*), of the Criminal Procedure Code provides for that offences under local laws shall be tried according to the provisions of the Code.

"So that it seems to me that any proceedings under this special Act would be under the Criminal Procedure Code. I do not quite follow the Hon'ble Member for the University how he would make out that there is a special proceeding provided by this Act."

The Hon'ble BABU BOIKANTO NATH SEN said:—"I venture to think that this special power ought to be given to the Magistrate under this Municipal Act. The Criminal Procedure Code makes an exception in favour of local Acts or special Acts, and the provision in section 644 (*now* 623), as has been pointed out by the Hon'ble Dr. Asutosh Mukhopadhyaya, makes it necessary that there should be a special provision as regards powers to be exercised by the Magistrate. The Magistrate to exercise such power must have special powers."

The motion was then put and lost.

The Hon'ble THE PRESIDENT said:—"The motion just lost covers the Hon'ble Dr. Asutosh Mukhopadhyaya's motion No. 272."

The last motion having been lost, the Hon'ble Dr. Asutosh Mukhopadhyaya, by leave of the Council, withdrew the motion (No. 272) standing in his name that in section 474 (*now* 445), sub-section (*1*), for the words "such enquiry as he thinks fit to make" be substituted "taking such evidence as may be adduced before him, and after hearing the owner and the occupier."

The Hon'ble BABU SURENDRANATH BANERJEE moved that the words "with the sanction of the Corporation" be inserted after the word "may" in line 1 of sub-section (*2*) of section 474(*now* 445).

He said:—"Section 474 (*now* 445) provides:—

'(*1*) If it appears to the Chairman that any dwelling-house, or any public building or hut which is used as a dwelling-place, or any room in any such house, public building or hut, is so overcrowded as to endanger the health of the inmates thereof, he may apply to a Magistrate to abate such overcrowding; and the Magistrate, after such enquiry as he thinks fit to make, may, by written order, require the owner of the building or room, within a reasonable time, not exceeding four weeks, to be prescribed in the said order, to abate such overcrowding by reducing the number of lodgers, tenants or other inmates of the building or room, or may pass such other order as he may deem just and proper.

(*2*) The General Committee may, by written order, declare what amount of superficial and cubic space shall be deemed, for the purposes of sub-section (*1*), to be necessary for each occupant of a building or room.

(*3*) If the owner of any building or room referred to in sub-section (*1*) has sublet the same, the landlord of the lodgers, tenants or other actual inmates of the same shall, for the purposes of this section, be deemed to be the owner of the building or room.

(*4*) It shall be incumbent on every tenant, lodger or other inmate of building or room to vacate on being required by the owner so to do in pursuance of any requisition made under sub-section (*1*).'

"The object is to prevent overcrowding, and the order has to be passed only once, and a general rule is to be laid down. It seems to me that in an important question like this, where the interests of the Indian rate-payers are so largely concerned, it is necessary that the Corporation should control the sanitary laws that have to be enforced; but the sanitary laws have to be enforced with a due regard to the conveniences, wants and capabilities of the people. I think the Corporation would be in a better position to judge of these capabilities than the General Committee, and the thing has to be done only once. Once a rule has to be laid down, and it seems the General Committee may do so with the sanction of the Corporation. You are going to introduce new sanitary rules to which the people are absolute strangers, and, in order to adapt those rules to local requirements, local knowledge is necessary, and local knowledge is not to be found in the General Committee to the same extent as it would be found in the Corporation consisting of the representatives of the rate-payers."

The Hon'ble MR. BAKER said:—"This is purely a matter of executive detail, and I really cannot conceive on what sort of principle it is proposed to transfer a matter like that to the jurisdiction of the Corporation."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"I do not see that there is any question of transfer It is not a transfer of authority from the General Committee to the Corporation. Suppose, for instance, a rule is laid down by the General Committee which operates with great hardship upon a particular class of the native inhabitants; surely it would be a good thing to allow the Corporation to say something about it."

The motion being put, the Council divided as follows:—

Ayes. 5.	*Noes* 12
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckley.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Mr. Handley
The Hon'ble Mr. Apcar.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Dr. Asutosh Mukhopadhyaya	The Hon'ble Mr Mackenzie
	The Hon'ble Mr. Spink.
	The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
	The Hon'ble Khan Bahadur Maulvi Delawar Hossain Ahmed.
	The Hon'ble Mr Oldham.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendment was lost.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that at the end of section 474 (*now* 445), sub-section (*4*), be added "and no such tenant, lodger or other inmate shall be entitled to claim damages from the owner on account of such eviction."

He said:—"Section 474 (*now* 445) deals with the subject of abatement of overcrowding in dwelling-houses, and sub-section (*4*) provides that 'it shall be incumbent on every tenant, lodger or other inmate of a building or room to vacate on being required by the owner so to do, in pursuance of any requisition made under sub-section (*1*).' It seems to me to be a necessary corollary that the landlord should be protected, if there is any eviction of his tenant by the Corporation; in such a case, the landlord ought not to be held liable for damages to the tenant."

The Hon'ble Mr. Baker said:—"I think this amendment is unnecessary. I am advised that, if a tenant is evicted under a statutory provision of the law, he is not ordinarily entitled to any compensation or damages from his landlord; but, if for any special reason and in any special case he had such a legal claim, why should we take it away?"

The Hon'ble Dr. Asutosh Mukhopadhyaya, in reply, said:—"I anticipated, Sir, this objection: either it is a very easy question of law, which it is not necessary to deal with, or, if the tenant has a legal right, why take it away? However, I press my amendment on the Council."

The motion was then put and lost.

Section 447.

The Hon'ble Dr. Asutosh Mukhopadhyaya also moved that in section 476 (*now* 447), clause (*ii*), after the word "land" be inserted "or tank or the site of such tank."

He said:—"These words are to be found in the existing Act, and I have not been able to make out any valid reason why they should be omitted. Section 476 (*now* 447) says:—

'(*1*) When any well, tank or marshy ground, or any waste or stagnant water, whether within any private enclosure or not, appears to the Chairman to be injurious to health or offensive to the neighbourhood, he may, by written notice, require—

(*a*) the occupier of the building or land to which such well pertains, or

(*b*) the owner of such tank, ground or water,

to cleanse or fill up such well, tank or ground with suitable material, or to de-water the same, or to drain off or remove such water.

(*2*) If the Chairman, in exercise of the powers conferred by section 622, (*now* 679) executes any work referred to in a notice issued under sub-section (*1*) of this section, and if the person liable to pay the expenses of such work fails to pay the same, the Chairman may—

(*i*) lease any part of the land used in connection with the said well, tank or water, or any part of the said ground, as the case may be, or

(*ii*) retain possession of such land or ground and utilise the same for public purposes.

(*3*) If the said expenses be paid by an occupier of land, he may deduct the same from any rent due to the owner of the land.

(*4*) An appeal shall lie to the General Committee from any notice issued or other action taken by the Chairman under this section, and their decision shall be final.'

"In the present Bill I find the words 'retain possession of such land.' I do not think there is any intention to limit the law as it now stands. There is no reason why it should be so restricted, and the Corporation ought to have power not only to retain possession of such land or adjoining land, but also of the tank itself or the site of the tank."

The Hon'ble MR. BAKER said:—"The words 'such land' in clause (*ii*) refer back to the words 'land used in connection with the said well,' etc, which occur in clause (*i*). I do not think it is necessary or that it would make sense to insert these words in clause (*ii*) only. I cannot understand the reason for it."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said:—"If you look back to clause (*a*), you will observe that the word 'land' does not cover a tank; the words are 'the occupier of the building or land to which such well appertains,' whereas in clause (*b*) the words are 'the owner of such tank, ground or water.'

"There is no intention, I understand, that the Corporation should not have the power to take possession of the tank or the site of the tank."

The Hon'ble MR. BAKER said:—"I will accept this amendment."

The motion was then put and agreed to.

Section 448.

In the absence of the Hon'ble Raja Ranajit Sinha Bahadur, of Nashipur, the Hon'ble BABU BOIKANTA NATH SEN moved, on behalf of the former, that the words "or otherwise" be inserted after the words "General Committee" in line 2 of sub-section (*1*) of section 477 (*now* 448).

He said:—"I have been requested by the Hon'ble Raja Ranajit Sinha, Bahadur, of Nashipur, to move this amendment, and I have pleasure in doing so. Section 477 (*now* 448) as proposed to be amended will read:—

'The Corporation, at the instance of the General Committee or otherwise, may by a general order,' etc.

"The object is very clear: that the Corporation may have its discretion in moving under this section not simply at the instance of the General Committee, but it may also take action on any other information."

The Hon'ble MR BAKER said:—"In the original Bill this power was vested in the General Committee only, and in the Select Committee this modification was made. I was opposed to the modification, and regret it because it seems to me that this is a power with which the Corporation have really nothing material to do. I do not wish to go behind the decision of the Select

Committee in any way, but taking that decision, I think on the other hand we ought not to exclude the General Committee, because the General Committee is the working body of the Corporation, and will probably be better informed as to the necessity of passing an order for prohibiting excavations than the Corporation at large will be."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"The object is not to exclude."

The Hon'ble MR. BAKER said:—"That excludes the General Committee. It means that the Corporation may act otherwise than at the instance of the General Committee."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"The General Committee will have the power of suggesting to the Corporation any course of action it proposes, but the Corporation independently may also act. It does not exclude the General Committee from suggesting to the Corporation that a particular course of action should be followed. I do not think it excludes. It only widens the sphere of discretion which the section gives to the Corporation. I do not think there ought to be any serious objection to it."

The motion was then put and lost.

Sections 449 and 450.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that at the end of section 477A (*now* 449) and section 477B (*now* 450) the following be added:—

"Provided that the Magistrate shall not make any such order without giving the owner and occupier full opportunity of adducing evidence and of being heard in defence."

He said:—"Sections 477A and 477B (*now* 449 and 450) deal with the demolition or alteration of building and work which have been unlawfully commenced, carried on, or executed. Section 477A (*now* 449) provides as follows:—

'If the General Committee are satisfied—

(*1*) that the erection or re-erection of any building—

(*a*) has been commenced without obtaining the permission of the Chairman, or (where an appeal or reference has been made to the General Committee) in contravention of any orders passed by the General Committee, or

(*b*) is being carried on or has been completed otherwise than in accordance with the particulars on which such permission or orders was or were based, or

(*c*) is being carried on or has been completed in breach of any provision contained in this Act or in any rules or bye-laws made hereunder, or of any direction or requisition lawfully given or made under this Act or such rules or bye-laws, or

(*2*) that any alterations required by any notice issued under section 391D (*now* 383) have not been duly made, or

(*3*) that any alteration of, or addition to, any building, or any other work made or done for any purpose in, to or upon any building, has been commenced or is being carried on or has been completed in breach of section 405A (*now* 391), section 421 (*now* 402) or section 422 (*now* 403),

the General Committee may apply to a Magistrate, and such Magistrate may make an order—

(*i*) directing that the work done, or so much of the same as has been unlawfully executed, be demolished by the owner of the building or altered by him to the satisfaction of the Committee, as the case may require, or

(*ii*) directing that the work done, or so much of the same as has been unlawfully executed, be demolished or altered by the Chairman at the expense of the owner of the building.'

"Similarly, section 477B (*now* 450) provides:—

"In any of the following cases, namely:—

(*1*) if, within the period prescribed in any notice issued under section 329B, sub-section (*3*) [now section 340, sub-section (*5*)], requiring the owner or occupier of a building to comply with any condition on which the putting up of any verandah or other projection was permitted, such condition is not complied with, or

(2) within the period prescribed in any notice issued under section 329B, sub-section (4) [*now* section 340, sub-section (6)], requiring the owner or occupier of a building to remove a verandah or other projection, the same be not duly removed, or

(3) if, within the period prescribed in any notice issued under section 329C (*now* 341), sub-section (1), requiring the removal or alteration of a fixture, the fixture be not duly removed or altered, or,

(4) if the General Committee decide that any additions made to a building or wall in pursuance of an agreement executed under the proviso to section 335 (*now* 351) ought to be removed, or

(5) if, within the period prescribed in any notice issued under section 336 (*now* 352), sub-section (2), requiring the owner of a building to remove or alter an external roof or wall made of inflammable material, the same be not duly removed or altered, or

(6) if any owners or occupiers neglect to execute any works or take any measures required by any notice affixed under section 475 (*now* 446), sub-section (1), or

(7) if any privy be placed in contravention of rule 1 or sub-rule (1) of rule 2 of Schedule XIIB (*now* XVI), or

(8) if any person, after erecting a service privy authorised under the proviso to sub-rule (1) of rule 2 of Schedule XIIB (*now* XVI), fails to pay any sum required under that proviso,

the General Committee may apply to a Magistrate, and such Magistrate may make an order directing that the projection, fixture, additions, roof, wall, buildings or privy, as the case may be,—

(a) be demolished by the owner or altered by him to the satisfaction of the Committee, or

(b) be demolished or altered by the Chairman at the expense of the owner.'

"My suggestion is that no *ex parte* order should be made under either of these sections; there can be no possible question that the order should be made after the owner and occupier have been given a full opportunity of being heard in defence."

The Hon'ble MR. BAKER said:—"I can only say, what I said with reference to amendment No. 269* that this is a matter in which the Magistrate ought to follow—and as I imagine will be bound to follow—the terms of the Criminal Procedure Code as to his procedure in conducting an enquiry. I imagine that, if any Magistrate did not follow that procedure, he would be immediately called to order by the High Court."

The Hon'ble MR. HANDLEY said:—"I wish to point out, with reference to what the Hon'ble Member in charge of the Bill has said, that there is a specific provision in section 474 (*now* 445) of the Bill that the Magistrate shall make such enquiry, whereas there is none in these two sections. So it is possible they might be interpreted in the sense that the Hon'ble Member for the University has pointed out. Section 474 (*now* 445) provides:—

'If it appears to the Chairman that any dwelling-house or any public building or hut which is used as a dwelling-place, or any room in any such house, public building or hut, is so overcrowded as to endanger the health of the inmates thereof, he may apply to a Magistrate to abate such overcrowding; and the Magistrate, after such enquiry as he thinks fit to make, may, by written order, require the owner of the building or room, within a reasonable time, not exceeding four weeks, to be prescribed in the said order, to abate such overcrowding by reducing the number of lodgers, tenants or other inmates of the building or room, or may pass such other order as he may deem just and proper.'

"There is a specific provision there that he shall make an enquiry; so that it is possible, if there is no such provision in these two sections, he can pass an *ex parte* order under section 133 of the Criminal Procedure Code without taking any evidence whatever. It is possible that that mistake might occur."

The Hon'ble MR. BAKER said:—"In view of what the Hon'ble the Legal Remembrancer has said, I accept the amendment. It never was intended for a moment that he should pass an *ex parte* order. The only doubt was whether this particular amendment was necessary or not."

The motion was then put and agreed to.

---

* Printed *supra*, p. 410.

SECTION 455.

The Hon'ble BABU SURENDRANATH BANERJEE moved that for the word "and" in line 4 of clause (*a*) of sub-section (*1*) of section 482A (*now* 455), the following words be substituted:—

"or bullocks for registered carts or horses for hackney carriages, and."

He said:—"Section 482A (*now* 455), clause (*1*), provides—

"The Corporation, at the instance of the General Committee, may give public notice of their intention to declare—

(*a*) that in any area specified in the notice no person shall keep milch-cattle for the purpose of supplying milk by sale."

'This is a sanitary provision. The object is to exclude the keeping of milch-cows in certain areas by a general order on the part of the Corporation. I suggest that bullocks for registered carts and horses for hackney carriages may also be included, and it shall be open to the Corporation to declare that in certain parts of the town no milch-cow, no bullocks for registered carts and no horses for hackney carriages shall be kept. This is only an extension of a principle which has been already conceded in the first part of the sub-section. The object is entirely sanitary."

The Hon'ble MR. BAKER said:—"The provisions of section 482A (*now* 455) are extremely drastic. They give the Corporation power to declare that within an area to be specified no animals of a particular kind may be kept at all. Now the section as it stands at present is limited to the case of milch-cattle, and the justification for that provision in the case of milch-cattle is that they produce milk, and milk is an article of human food which is peculiarly liable to contamination. That argument does not apply in the case of bullocks for registered carts or horses for hackney carriages, and it seems to me that we ought to be very careful before we extend the provision of this drastic section to any further cases. If the Hon'ble Member will look at the two succeeding sections 482B and 482C (*now* 456 and 457), I think he will find that really everything which is esentially necessary in the case of bullocks and hackney carriage horses is already provided for and includes everything that is reasonable."

The Hon'ble MR. APCAR said:—"I support the amendment. If power is given to the Corporation to make a declaration, it would give power to prevent bullocks for registered carts and horses for carriages from becoming a nuisance in a neighbourhood, and in this view I support the amendment."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"All that is wanted is a declaratory power—not that the moment you pass the section all the bullocks and all the hackney carriages will be transferred from one part of the town to the other. The section will be enforced only at the instance of the General Committee and upon evidence and information which the Corporation shall consider to be necessary. In the existing law there is no such provision, and I will give you my reason why this provision suggested itself to my mind. I had a case in my ward. There was an Eurasian gentleman in a humble position who lived in ward No. 14, and he had a number of milch-cows kept close to his house. The owners of the cows were fined, but there was no power to order their transfer from that particular place, and he and his family suffered from illness for months together. The case struck me as a real grievance which the Legislature ought to remove, and I think it was at my suggestion that this provision was inserted. A similar nuisance might arise from the near presence of hackney carriage horses and bullocks belonging to bullock carts, and it strikes me that, if a provision of this kind is made applicable to milch-cows, it ought to be extended also to bullocks and hackney carriage horses. It is not that, immediately the power is given, the Corporation will take action, but the power is conferred upon the Corporation, and when there are occasions the power will be used. I do not see that there ought to be any objection to this."

The motion was then put and lost.

[illegible]

The Hon'ble Babu Surendranath Banerjee moved that the word "Corporation" be substituted for the word "Chairman" in line 1 of section 484 (*now* 459).

He said:—"Section 484 (*now* 459) provides—

'The Chairman may from time to time set apart suitable places vesting in the Corporation for use by the public for bathing, for washing animals or for drying clothes, and may from time to time, by public notice, prohibit the use by the public for any of the said purposes of any place not vesting in the Corporation.'

"And the next section 485 (*now* 460) provides:—

'(*1*) The Chairman may, by public notice, regulate the use by he public of—

(*a*) any place vesting in the Corporation which is set apart by him for any purpose under section 484 (*now* 459), and

(*b*) any place not vesting in the Corporation which is used with his acquiescence for any purpose mentioned in that section.

(*2*) In the case of any place set apart or assigned for bathing, the Chairman may, in the said notice, prescribe the places of bathing for persons of each sex.'

"I suggest that the power of setting apart the places under this section should be vested in the Corporation. If my hon'ble friend will not consent to vest this power in the Corporation, I would suggest that the General Committee should set apart suitable places. I do not wish to interfere with an executive matter, namely, that the Chairman may regulate the use by the public of any place vesting in the Corporation, &c. It is an order passed once for all. It is an order which concerns public convenience, and it strikes me that the representatives of the public ought to have something to say about it. I am prepared to modify my amendment by putting in 'the General Committee' instead of 'the Corporation.'

The Hon'ble Mr. Baker said:—"I think it best to leave it to the Chairman. Plainly, it is not a matter in which we can entertain the motion of substituting 'the Corporation' for 'the General Committee.' There is less objection to that, but I think it is better on the whole to leave it as it is."

The motion was then put and lost.

New section.

The Hon'ble Babu Surendranath Banerjee, by leave of the Council, withdrew the motion, standing in his name, that the following section be inserted after section 491 (*now* 466):—

"491A. The Corporation, at the instance of the General Committee, may set apart any area specified in any notice issued in that behalf in which no business referred to in section 491 (*now* 466) shall be carried on;"

and, in substitution therefor, moved the following:—

(*1*) that the following section be inserted after section 492A (*now* 468):—

"492B. (*1*) The Corporation, at the instance of the General Committee, may give public notice of their intention to declare that in any area specified in the notice no person shall use any premises for any of the purposes referred to or mentioned in section 491 (*now* 466).

(*2*) No objections to any such declaration shall be received after a period of one month from the publication of such notice.

(*3*) The General Committee shall consider all objections received within the said period, and shall then report to the Corporation, who may thereupon make a declaration in accordance with the notice published under sub-section (*1*).

(*4*) Every such declaration shall be published in the Calcutta Gazette, and shall take effect from the date of such publication.

(*5*) No person shall in any area specified in any such declaration use any premises for any of the purposes referred to or mentioned in section 491.";

(*2*) that in the tabular statement annexed to section 602 (*now* 574) the following be inserted:—

"Section 492B (*now* 469), sub-section (*5*).	Using premises in declared area for any purpose referred to or mentioned in section 491 (*now* 466).	Fifty rupees."

(3) that in the tabular statement annexed to section 598 (now 575) the following be inserted:—

"Section 492B (*now* 469), sub-section (*5*).	Using premises in declared area for any purpose referred to or mentioned in section 491 (*now* 466).	Five rupees."

He said:—"The last two amendments are consequential to the first one, and I understand the Hon'ble Member in charge of the Bill accepts them."

The Hon'ble MR. BAKER said:—"I accept these three amendments."

The motions were severally put and agreed to.

SECTION 468.

The Hon'ble BABU JATRA MOHAN SEN, by leave of the Council, withdrew the motion, standing in his name, that in section 492A (*now* 468), sub-section (*2*), the words subject to the control of the Corporation" be inserted after "shall."

SECTION 470.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the words "with the sanction of the Corporation" be inserted after the words "the General Committee may" in line 20 of sub-section (*1*) of section 493 (*now* 470).

He said:—"The sub-section gives power to the General Committee to direct discontinuance of the use of premises for certain trades near dwelling-houses. That is the power which is given to the General Committee; and then, Sir, if the General Committee is satisfied of the existence of the nuisance, it may, by written notice, require the occupier of such premises to discontinue such nuisance within a month after service of the notice. Then, Sir, we have this provision in sub-section (*2*):—

'When the use of any premises for any of the purposes aforesaid has been discontinued in pursuance of such a notice, no compensation shall be payable for loss arising from such discontinuance, but the Corporation shall be bound to purchase both the land and the buildings from the owner; and, if the Corporation are unable to agree with the owner as to the price to be paid, the land and buildings may be acquired under the Land Acquisition Act, 1894."

"That is a very serious matter. 'The Corporation shall be bound to purchase both the land and the building'; and I think, Sir, it is right that, when the Corporation has to incur a large expenditure, the proceedings which lead to that large expenditure should be proceedings subject to the supervision of the Corporation, and the approval of the Corporation should be taken. The Corporation has to incur the expenditure; that expenditure may be very considerable, if the expenditure is expenditure to be paid as compensation for land and buildings. That being so, the proceedings which lead up to that expenditure ought to be taken subject to the control of that authority which incurs the expenditure."

The Hon'ble MR. BAKER said:—"Yesterday, Sir, I explained that I should oppose every amendment which seeks to transfer authority from the General Committee or the Chairman. This is one of those provisions, and I do not propose to enter into my reasons for opposing it over again. I explained yesterday that it was a matter of principle that the assignment and distribution of powers which was made by the Select Committee should be adhered to, and I see no reason whatever for making an exception in this case. On the contrary, in this case there is not only the authority of the Select Committee, but there is also the greater authority of the Calcutta Building Commission, by which this section was originally drafted and which assigned this power to the General Committee and not to the Corporation.'

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"I understand that in politics—and I have for my authority the greatest political philosopher that ever lievd, namely, Edmund Burke—when a general principle is laid down, that principle has to be modified by reference to the circumstances under

which it is sought to be applied. [illegible] goes so far as to say that there is no such thing as a general principle in politics. The great question is the question of expediency which dominates all political considerations. Therefore, Sir, my hon'ble friend is entitled to his principles, and when he has formed them we are bound to respect his principles; but may I not ask him to judge his principles in each particular case by the circumstances of that particular case? I think, Sir, it is rather a dangerous thing to lay down a principle of universal application. I think, Sir, we are entitled to ask my hon'ble friend in the responsible position which he occupies as the Member in charge of this Bill to consider his principle, however inexorably wodded he may be to that principle, in each case by a reference to the actual circumstances of that case. I think, Sir, we are entitled to make that appeal to him, and, if we make that appeal to him, we are entitled also to ask that he will respond in a manner becoming his position. I say here the circumstances are such as to call for a modification of my hon'ble friend's principle. As I said just now, the expenses have to be borne by the Corporation; and the expenses may be very large. Is the Corporation simply to be a sort of mechanical instrument for the purpose of payment of certain expenditure without being able to control that expenditure? I am perfectly certain we do not want to place the Corporation in that position, and, if the Corporation has to pay, it ought to control the expenditure it has to incur."

The Hon'ble THE PRESIDENT said:—"The General Committee cannot move in this matter without funds. I assume it is bound by some budget provision."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I do not think there will be a provision of this kind. There may be contingencies, but this is somewhat of an extraordinary expenditure."

The Hon'ble THE PRESIDENT said:—"The funds will have to come from somewhere"

The Hon'ble BABU SURENDRANATH BANERJEE said:—"They will have to take the consent of the Corporation."

The Hon'ble THE PRESIDENT said:—"In that way they must move within the limits of the sums that are placed at their disposal by the Corporation. You can incur no expenditure without funds."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"There may be no such head in the budget as framed."

The Hon'ble MR. BAKER said:—"Then they will have to get special sanction from the Corporation before they can acquire the land."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"If there is sanction; but you do not allow them to do that."

The Hon'ble MR. BAKER said:—"They cannot incur any expenditure in excess of the budget grant without the express sanction of the Corporation. That is provided in section 120 (*now* 126)."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"You probably may not want a budget grant in respect of a matter like this. We have not got a budget head of that kind, and it is not a thing which is likely to be covered by contingencies. The expenditure may be Rs. 30,000, and it would not be covered by contingencies."

The Hon'ble MR. BAKER said:—"There is no intention that it should. If the General Committee wish to take action under this section, and if they find it necessary to acquire any land or building, they will have to get the sanction

of the Corporation to the expenditure involved. That is provided for by section 120 (*now* 126) of the Bill."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"The sanction of the Corporation will have to be obtained to the expenditure. If the sanction has to be obtained to the expenditure, I think the Corporation should be entitled to ask whether this is fair expenditure or not, and therefore the Corporation should be entitled to ask whether the expenditure cannot be reduced. I think these are legitimate questions to ask on the part of the authority which controls expenditure. I think, Sir, if a Bill came before Your Honour as Lieutenant-Governor in respect of any matter of administration, I am perfectly certain Your Honour would be entitled to know all about it, and Your Honour would be entitled to reduce the Bill if you thought it excessive. Therefore, that being so, and the Corporation being the controlling authority as regards expenditure, it ought to have something to say with regard to the circumstances which led up to the expenditure. My hon'ble friend forgets the fact that financial control involves all other kinds of control. Give the financial control to a particular body, and you do not know how many other kinds of control are involved in it. The House of Commons does not exercise anything more than financial control, and it is a sovereign body."

The Hon'ble MR. BAKER said:—"The Hon'ble Member appears to be riding his hobby of financial control to death. He seems to argue that everything which involves any expenditure shall have the sanction of the Corporation, not only to the incurring of the expenditure, but also in all its administrative aspects. That is just the difference here. Before the General Committee can incur any expenditure under this section, they will have to get the funds from the Corporation, either by a budget provision or otherwise. There is no reason whatever for requiring the sanction of the Corporation to the administrative action of the General Committee in issuing an order under this section."

The Hon'ble THE PRESIDENT said:—"I should like to give an illustration. Suppose the Secretary wants to buy certain books for the official library; I do not ask him any questions as to the particular books he buys, so long as he keeps within his allowances, and that is what will happen in this case."

The motion being put, the Council divided as follows:—

Ayes 5.	*Noes 12.*
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckley.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Mr. Handley.
The Hon'ble Mr. Apcar.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Dr. Asutosh Mukhopadhyaya	The Hon'ble Mr. Mackenzie
	The Hon'ble Mr. Spink
	The Hon'ble Sahibzada Mahomed Bakhtyar Shah
	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr. Oldham.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendment was lost.

SECTION 472.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the words "with the sanction of the Corporation" be inserted after the word "Chairman" in line 5 of sub-section (*4*) of section 494 (*now* 472).

He said: "The principle is the same as in the previous case, and I suppose the Hon'ble Member will object. My friend has enunciated one principle. I have got another to enunciate, and of course I am not prepared to give up my

principle. I am prepared to hold by my principle with quite the same degree of tenacity with which my friend adheres to his, with this difference that, I am prepared to modify it according to circumstances, which my friend is not prepared to do. This is an amendment which covers very much the same ground. Sub-section (4) of section 494 (*now* 472) provides:—

'But if it appears that there has been no contravention of the said sub-section, the said expenses and compensation for any damage occasioned by the said laying open and examination shall be paid by the Chairman.'

"I suggest that it should be paid with the sanction of the Corporation."

The Hon'ble MR. BAKER said:—"I do not think it necessary to say very much on this motion. In the circumstances mentioned in this section, the payment of compensation is compulsory. Therefore, it makes not the slightest difference whether the words 'with the sanction of the Corporation' are inserted or not. The action of the Chairman is really ministerial."

The motion was then put and lost.

SECTION 478.

In the absence of the Hon'ble Raja Ranajit Sinha Bahadur, of Nashipur, the Hon'ble BABU BOIKANTA NATH SEN moved, on behalf of the former, that the words "and the Local Government" in section 502 (*now* 478) be omitted.

He said:—"I have much pleasure in moving this amendment on behalf of Raja Ranajit Sinha Bahadur, of Nashipur. This refers to the closing of municipal markets and municipal slaughter-houses, and the amendment has a tendency to strengthen the executive; and I think the Hon'ble Member in charge of the Bill will have no hesitation in accepting it, because it will authorize the Chairman, with the sanction of the Corporation, only to take action, and it will relieve the Chairman from getting a further sanction from the Local Government."

The Hon'ble MR. BAKER said:—"I accept the amendment."

The motion was put and agreed to.

SECTIONS 485, 486, 487 AND 488.

The Hon'ble BABU SURENDRANATH BANERJEE moved that wherever the word "market" or the word "market-place" occurs in sections 507, 507A, 507B and 508 (*now* 485, 486, 487 and 488), the words "or bazar" be added after such word.

He said:—"I find that this amendment, which stands against my name, partly covers the amendments about which the Hon'ble Member in charge of the Bill has given notice. The only difference is that he has not given any notice in respect of section 507 (*now* 485)."

The Hon'ble MR. BAKER said:—"Item No. 4 in the seventh supplementary list covers that section."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"The object of this amendment is this. You provide for market-places, slaughter-houses, etc., and you give the Chairman power to pass orders regarding the paving, cleansing, etc., so far as the market-places are concerned. But take China Bazar; that is not a market-place; it is not a slaughter-house, and, if the word 'bazar' was not inserted in the sections in which I propose it should be inserted, the result would be that the Chairman and the Municipality would have no control over the cleansing and paving and other sanitary arrangements of such places as China Bazar. There may be other bazars, and, therefore, it is necessary that the word 'bazar' should be inserted after the word 'market' or 'market-place' in sections 507, 507A, 507B and 508 (*now* 485, 486, 487 and 488)."

The Hon'ble MR. BAKER said:—"I have four amendments which follow on the same lines as the one moved by the Hon'ble Babu Surendranath Banerjee. My amendments have been drafted by the Secretary, and perhaps the Hon'ble Member will not mind waiving his amendment."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I withdraw my amendment in favour of the Hon'ble Mr. Baker's."

The Hon'ble MR. BAKER moved—

(1) that in section 507 (*now* 485) the word "bazar" be inserted after the word "market" and after the words "market-place" wherever they occur;

(2) that in clauses (*a*) and (*b*) of section 507A (*now* 486), the words "or any bazar" be inserted after the words "any private market;" that in clause (*b*) of the same section the words "or bazar" be inserted after the words "such market;" and that in clause (*b*) and sub-section (*2*) of the same section the words "or bazar" be inserted after the words "the market;"

(3) that in the opening clause of section 507B (*now* 487), the words "or any bazar" be inserted after the words "any private market;" and that in clauses (*a*) and (*b*) of the same section the words "or bazar" be inserted after the words "such market;"

(4) that in clauses (*a*), (*c*) and (*d*) of section 508 (*now* 488), the word "bazar" be inserted after the words "market-place;" that in the said clause (*a*) the words "or bazar" be inserted after the words "any market;" that in clause (*b*) of the same section the word "bazar" be inserted after the word "market;" and that in clause (*c*) of the same section the words "market-places and bazars" be substituted for the words "and market-places."

The Hon'ble MR. BAKER's motions were put together and agreed to.

The Hon'ble BABU SURENDRANATH BANERJEE then, by leave of the Council, withdrew his amendment.

SECTION 497.

The Hon'ble BABU JATRA MOHAN SEN, by leave of the Council, withdrew the motion, standing in his name, that in section 517B, sub-section (*1b*), [*now* section 497, sub-section (*3*)], the words "subject to the control of the Corporation" be inserted after "shall." He explained that he withdrew the motion because similar amendments had been lost.

In the absence of the Hon'ble Raja Ranajit Sinha Bahadur, of Nashipur, the Hon'ble BABU BOIKANTA NATH SEN moved, on behalf of the former, that the word "Corporation" be substituted for "General Committee" in sub-section (*1b*) of section 517B [*now* sub-section (*3*) of section 497].

He said: "This section refers to the registration of shops and places for retail sale of drugs. If there is a refusal to register an appeal is provided. The clause reads:—

'If any person is dissatisfied with such refusal, he may appeal to the General Committee, whose decision shall be final.'

"The amendment proposes that the appeal shall be to the Corporation. The Corporation being supposed to be the largest representative as it were of the Municipality, the appeal ought to be made there."

The Hon'ble MR. BAKER said:—"I can add nothing to what I said this morning about appeals lying and not lying to the Corporation. This certainly is a case in which the appeal must lie to the General Committee."

The motion was then put and lost.

SECTION 502.

In the absence of the Hon'ble Raja Ranajit Sinha Bahadur, of Nashipur, the Hon'ble BABU BOIKANTA NATH SEN moved, on behalf of the former, that the word "oil" be inserted after the word "butter" in line 5 of section 519 (*now* 502).

He said:—"Sir, Section 519 (*now* 502) provides:—

'It shall be the duty of the Chairman to make provision for the constant and vigilant inspection of animals, carcasses, meat, poultry, game, flesh, fish, fruit, vegetables, corn, bread, flour, milk, ghee, butter and any other article exposed or hawked about for sale or deposited in or brought to any place for the purpose of sale or of preparation for sale and intended for human food or for medicine, the proof that the same was not exposed or hawked about or deposited or brought for any such purpose or was not intended for human food or for medicine resting with the party charged.'

"Several articles are mentioned, but oil is not mentioned, and I think this amendment ought to be accepted."

The Hon'ble MR. BAKER said:—"I accept the amendment."

The Hon'ble THE PRESIDENT said:—"It is only oil that is fit for food. It does not, I presume, apply to kerosine oil?"

The Hon'ble Mr. BAKER said:—"That is provided for by the words 'and intended for human food,' further on in the section."

The motion was put and agreed to.

SECTION 513.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the words "other than a public hospital" in line 4 of sub-section (*1*) of section 533 (*now* 513) be omitted.

He said:—"The section imposes an obligation upon private medical practitioners to report cases of dangerous disease to the Corporation, but public hospitals are eliminated from this obligation. The section says:—

'(1) Every medical practitioner who treats or becomes cognizant of the existence of any dangerous disease in any private or public dwelling, other than a public hospital, shall give information of the same with the least practicable delay to the Health Officer.

'(2) The said information shall be communicated in such form and with such details as the Health Officer, with the consent of the Chairman, may from time to time require.'

"I do not see why a public hospital should be exempted from the obligation of giving information. I know that that is the present law; but, Sir, as the law is about to be revolutionised, it might be changed also in this matter. I do not see why public hospitals should be exempted from this obligation. I know they send information, but still it ought to be a statutory obligation, and they ought to be called upon to send the same information which every private medical practitioner and other persons have to supply."

The Hon'ble MR. BAKER said:—"Public hospitals are in charge of Government officers, and Government requires them to furnish whatever information is necessary to the Health Officer under its own orders. It is not necessary to impose a statutory obligation upon them. As the Hon'ble Member has said, there is no such statutory obligation under the present Act, and no case has been made out for making any change."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"Am I to understand that it is disrespectful for Government to submit its servants to a statutory obligation? I do not think so at all. Government servants ought not to be exempted. I think Government ought to consent to a statutory obligation being imposed upon its officers to report these cases to the Health Officer."

The motion was then put and lost.

SECTION 515.

The Hon'ble BABU SURENDRANATH BANERJEE moved that after the word "clothes" in line 4 of sub-section (*1*) of section 535 (*now* 515) the following words be inserted:—

"or for any other purpose."

He said:—"I shall read the section with the words inserted.

'535 (*now* 515). (*1*) If it appears to the Chairman that the water in any well, tank or other place is likely, if used for drinking or for the washing of clothes, or for any other purpose, to engender or cause the spread of any dangerous disease, he may, by public notice, prohibit the removal or use of the said water for the purpose of drinking or of washing clothes.

'(*2*) No person shall remove or use, for the purpose of drinking or of washing clothes, any water in respect of which any such public notice has been issued.'

"I think there is a practical difficulty in the way of this section. A tank is considered to be dangerous, the water is considered to be polluted, and you prohibit the removal of the water for purposes of drinking and washing. What is the guarantee that the water, being removed for some other purpose, would not be drunk as good water? A person takes water from the tank and says:—'I am not going to use that water for drinking or washing, but for other purposes,' and you allow him to remove the water. He takes the water home and drinks it. What is there to prevent his doing that? It seems to me that, if you have a section like this, in actual working it is capable of being evaded in the simplest way; and it strikes me if you rule that the water shall not be removed under any circumstances, whether for purposes of drinking, washing or for any other purpose, you introduce an effective safeguard against the spread of infection; and I desire to remind the Council of the presence of plague in the town, and, having regard to that fact, it is necessary to render the section stringent in the interests of sanitation. I want to render it stringent in order that it may not be evaded. The section, as it stands, affords the amplest facilities for evasion. Water may be removed ostensibly, not for drinking or washing purposes, but, being removed, it may be drunk, and it may be used for washing purposes. The lowest class of the people do not understand the danger that lurks in water of this kind for drinking purposes, and they are prepared to tell a falsehood in order to get over an inconvenience. It strikes me, therefore, that the mandate of the law should be that under no circumstances should water, which is pronounced dangerous or infectious, be permitted to be removed."

The Hon'ble MR. BAKER said:—"The amendment, as it stands, will not have the effect that the Hon'ble Member intends. It will be necessary also to omit the last line of sub-section (*1*), and the words 'for the purpose of drinking or of washing clothes,' both in sub-section (*1*) and in sub-section (*2*)."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I am prepared to do that."

The Hon'ble MR. BAKER said:—"The Chief Secretary points out that there is another objection also to this amendment, which is that it would prevent you from using the water for watering gardens and matters like that. So far as I am concerned, if the words 'for the purpose of drinking or of washing clothes' are left out where they occur in sub-section (*1*) and sub-section (*2*), then I have no particular objection to the section."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I accept that. A garden is a luxury, and persons who have gardens can afford to get water from elsewhere."

The Hon'ble MR. BOLTON said:—"If the water is not to be touched at all, there would surely be more danger than if it could be taken out for the purpose of watering roads or streets, fresh water being allowed to come in from rainfall

or drainage. By not removing the water you really perpetuate your source of disease."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"If we have got a tank, and this tank is declared to be dangerous and full of bacilli, I think it is dangerous to take it to a garden or to public streets for the purpose of watering. And then, further, what difference would it make in the volume of water of a tank, if it was used for garden purposes? I do not think the quantity of water would be sensibly diminished by such a proceeding. The point of view from which I look at it is that ignorant people would be coming in contact with the water and spread the disease by doing something which is harmful to themselves, and I think we ought to protect them against that."

The Hon'ble MR. BAKER said:—"I think the balance of advantage on the whole is in favour of leaving the section as it stands."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I press the amendment, subject to the alteration which the Hon'ble Member in charge of the Bill has suggested."

The motions being put, the Council divided as follows:—

Ayes 7.	*Noes 10.*
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckley.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Mr. Handley.
The Hon'ble Mr Apcar.	The Hon'ble Rai Durga Gati Banerjea, Bahadur
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
The Hon'ble Mr. Mackenzie.	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
The Hon'ble Mr. Spink.	The Hon'ble Mr. Oldham.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendments were lost.

SECTION 518.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the word "shall" be substituted for the word "may" in line 1 of sub section (*2*) of section 538 (*now* 518); that the words "in any case in which he thinks fit" in line 2 of the same sub-section be omitted; and that the word "any" be substituted for the word "substantial" in line 3 of the same sub-section.

The Hon'ble MR. BAKER said:—"If the Hon'ble Member is willing to omit the last part of his amendment, I will accept the first part. The last part is that the word 'any' be substituted for the word 'substantial' in line 3 of the same sub-section."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I accept it, because that is all that I can get."

In the course of the debate the Hon'ble Mover withdrew the amendment that the word "any" be substituted for the word "substantial" in line 3 of the sub-section.

The motion in the amended form was then put and agreed to.

The above motion having been carried, the Hon'ble BABU BOIKANTA NATH SEN, in the absence of the Hon'ble Raja Ranajit Sinha, Bahadur, of Nashipur,

by leave of the Council, withdrew the motion, standing in the name of the latter, that the following be substituted for sub-section (2) of section 538 (*now* 518(:—

"The Chairman shall pay compensation for any hut or shed destroyed under sub-section (1)."

The Hon'ble MR. BAKER said :—"This is covered by the amendment which has just been accepted."

In the absence of the Hon'ble Raja Ranajit Sinha, Bahadur, of Nashipur, the Hon'ble BABU BOIKANTA NATH SEN, on behalf of the former, moved that the words "with any order of the Chairman refusing to pay compensation or" be omitted from the proviso to sub-section (2) of section 538 (*now* 518).

The Hon'ble MR. BAKER said:—"I accept the amendment. It follows necessarily the amendment of the Hon'ble Babu Surendranath Banerjee."

The motion was put and agreed to.

SECTION 520.

The Hon'ble BABU SURENDRANATH BANERJEE moved that for the words "he thinks fit," in line 1 in clause (*b*) of section 540 (*now* 520), the words "the parties are too poor to pay" be substituted.

He said :—"I have a substituted motion for this one. The amendment will run as follows:—

'That for the words "he thinks fit" in line 1 in clause (*b*) of section 540 (*now* 520), the words "he is satisfied that the parties are too poor to pay" be substituted.'

"The Hon'ble Member in charge of the Bill is willing to accept the motion if I modify it in the way in which I have just suggested. I have no objection to this amendment, and I beg to move that it be substituted in place of the original one."

The Hon'ble MR. BAKER said:—"I accept this amendment."

The motion was put and agreed to.

SECTION 524.

The Hon'ble MR. BAKER moved that in sub-section (2) of section 544 (*now* 524) the words "without the sanction of the Chairman" be inserted after the word "lawful."

He said:—"This section provides for special conveyances for patients suffering from dangerous diseases. It was pointed out that in the plague scare last year the employment of ambulances for the removal of patients suffering from plague gave rise to a good deal of public excitement. A similar difficulty might occur at some future time, and it is intended to provide that it shall not always be necessary to use the special conveyances if for any particular reason it is inexpedient to do so."

The motion was put and agreed to.

SECTION 526.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the words "Corporation, with the sanction of the" be inserted after the word "the" in line 3 of sub-section (1) of section 546 (*now* 526).

He said :—"There is no reference to the Local Government in the existing law. There is mention of the Local Government in the corresponding section of the Bombay Act. All that the Local Government ought to do is to exercise the power of supervision, and I provide for that in my amendment. I quite

admit that, this being a matter of Provincial concern, there ought to be uniformity in the forms used; but the necessary safeguard will be provided when the form is settled under the supervision of the Local Government. The authority of the Local Government is not discarded, but the authority of the Corporation is introduced. These forms ought to be settled by the Corporation, subject to the supervision of the Local Government. The direct intervention of the Local Government is not required in a matter of this kind: all that is necessary is that the forms should be provided subject to the approval of the Local Government."

The Hon'ble MR. BAKER said:—"The Hon'ble Member has himself given the answer to his amendment. This is a matter of vital statistics. It is not a matter of local concern, but of Imperial concern. The forms must be more or less uniform over the whole of India, and must be therefore prescribed by the superior authorities. There is no sort of reason other than a sentimental one for bringing in the authority of the Corporation at all in a matter of this sort."

The Hon'ble BABU SURENDRANATH BANERJEE in, reply, said:—"My reasons are practical. Under the present Act the Local Government exercises no supervision over these forms. The forms of the registers are settled by the Corporation. How is it that the work has gone on in this way during the last 20 or 30 years without any difficulty? Admitting that it is a matter of Provincial concern, the Corporation would submit the forms to the Local Government, and the Local Government may prescribe the forms. Uniformity is thus provided; the traditions of the Corporation are preserved; and I do not see that there is any real reason for altering the existing procedure."

The motion was then put and lost.

The Hon'ble BABU SURENDRANATH BANERJEE also moved that the words "Corporation, with the sanction of the" be inserted after the word "the" in line 3 of sub-section (*2*) of section 546 (*now* 526).

He said:—"This is practically the same amendment. These are questions of principle, and I feel it to be my duty to press the amendment on the consideration of the Council. The reasons for this amendment are the same as for the last one."

The Hon'ble MR. BAKER said:—"I have nothing to add to what I said just now."

The motion was put and lost.

SECTION 529.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the words "Corporation with the sanction of the" be inserted after the word "the" in line 4 of sub-section (*1*) of section 549 (*now* 529).

He said:—"There is no mention of the Local Government in the existing Act. These are merely forms, and the reason for my amendment is the same."

The motion was put and lost.

SECTION 557.

The Hon'ble BABU SURENDRANATH BANERJEE moved that for clause (*a*) of section 585 (*now* 557) the following be substituted:—

"The expression 'Collector' shall include any officer specially appointed by the Local Government to perform any of the functions of a Collector under the said Land Acquisition Act."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 585 (*now* 557), clause (*a*), the words "and any officer specially appointed by him, with the approval of the Local Government, to perform all or any of the functions of a Collector under the said Land Acquisition Act" be omitted. He said that his motion that clause (*a*) of section 585 (*now* 557) be omitted logically came first.

This proposal having been objected to by the Hon'ble Babu Surendranath Banerjee, his motion given above was proceeded with.

The Hon'ble BABU SURENDRANATH BANERJEE said :—"This and the other amendments relate to a question which the Hon'ble Member in charge of the Bill will bear out have excited a large measure of public attention. If my hon'ble friend consults the various petitions addressed to the Government, he will find that almost every one of them has reference to this particular section. Rightly or wrongly, the Indian public regard these provisions relating to land acquisition as involving grave injustice and serious danger to the rate-payers, and it is my duty to press the arguments which occur to me in regard to this matter with as much emphasis as I can command. I hope my hon'ble friend will consider the question free from any preconceived ideas. The arguments in favour of my amendment are so convincing that I feel I have only to state them in order to carry home conviction. Under Act X of 1871, section 7 read with the explanation given of the expression 'Collector,' it would appear that the Local Government has the power at present of appointing anybody it pleases as a Collector under that Act."

The Hon'ble MR. OLDHAM :—"That law is obsolete. The present law is Act I of 1894."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said :—"The same. It says:—

'The expression "Collector" means Collector of the district and includes a Deputy Collector or any officer specially appointed by the Local Government to carry out the functions of a Collector under this Act.' "

The Hon'ble BABU SURENDRANATH BANERJEE continued:—"Thus the Local Government may appoint the Chairman of the Corporation or anybody nominated by the Chairman as a Collector under the Act. Therefore, in the first place, clause (*a*) of section 585 (*now* 527) of the Bill is unnecessary, and not only unnecessary, but positively dangerous. The Local Government is never likely to appoint the Chairman to be a Collector for the purposes of land acquisition in Calcutta. It is inconceivable that the Local Government will lend itself to any proceeding the effect of which would be to make the Chairman a judge in his own case. It is inconceivable, for instance, that the Local Government would appoint the Manager of a Railway Company or anybody connected with the management of a railway to have anything to do with the acquisition of land for that railway. The thing would be precisely the same as the appointment of the Chairman for the purpose of acquiring any land for the Corporation. The Chairman is the executive officer of the Corporation; and he is to be made a judge in his own case. It seems to me impossible that the Local Government would do any thing of the kind; but here there is a section the effect of which would be to make the Chairman a Collector under the Land Acquisition Act for purpose of acquiring land for the Corporation, or to empower him to appoint somebody to perform these duties on his behalf. My hon'ble friend may say that the Chairman will never be the Collector, that he will never acquire any land himself. That may be the intention of my hon'ble friend, but every law must be interpreted according to the wording of the law. If my hon'ble friend says it is not intended that the Chairman is to be Collector in any case in which land is to be acquired in Calcutta, I ask him to point out the specific words which make that intention clear. If that is the intention, it ought to be clearly expressed in so many words. My hon'ble friend will probably say that the object is to expedite matters, and all that the Chairman will probably do will be to appoint some Deputy Collector to do the work under his direction; but what guarantee is there that the Chairman will not appoint one of his own officers to act for him—the Assessor, for instance, or one of his assistants? My hon'ble friend may say that it is not intended that the Chairman should appoint any one subordinate to him; but I venture to traverse even the last position taken up by my hon'ble friend. This matter was discussed in one of the Select Committee's meetings, and it was said that the Chairman would make the appointment instead of asking the Collector of the 24-Parganas to do so. But the person appointed by the Chairman will be subordinate to him; he will owe his appointment to the Chairman and feel himself under special obligations

to him and will do his best to please the Chairman. I ask, is it right and proper in a matter involving proprietary rights that a person should be appointed to deal with such cases and be a judge in regard to them who would be subordinate to the Chairman? I say that he should be absolutely independent. He ought not to owe his appointment to the Chairman; he should be perfectly free from any sense of obligation to the Chairman. The section is a dangerous one, one which is likely to be attended with abuse, and it has therefore excited the deepest apprehension, and we are bound to take note of such a feeling. The Bill has struck terror into the hearts of the people, and the land acquisition sections especially have excited the fears of the people—fears which may or may not be justified. But I have no hesitation in saying that it will be disastrous if this measure is thus heavily handicapped with the weight of adverse opinion and adverse sentiment. I hope my hon'ble friend will relieve the anxiety which at present fills the public mind in connection with these sections of the Bill. This is no exaggerated statement. It is no exaggeration of speech to say that this section and other sections to which reference will be made later on have filled the public mind with anxiety and alarm. Those fears may be groundless; but there they are. My hon'ble friend may say that these sections are recommended by the Building Commission. I have not the smallest desire to belittle the work of the Building Commission; but these provisions were steadily opposed by the Indian representatives on that Commission. I have talked the matter over with one of the members of the Commission, and he gave me the assurance that these sections were opposed by the Indian members of the Commission. These recommendations are the recommendations of a majority of the Commission which was composed of European officials. I wish to speak of the officials of the land over whom Your Honour presides in terms of the highest respect; but they labour under a great disadvantage. They do not possess an acre of land in Calcutta, and I am afraid they are not in sympathy with the owners of property in Calcutta. But the representatives of property on that Commission strongly resisted the change made in the Land Acquisition Act. The dissentients represented the proprietary interests of the town, and further Your Honour has not accepted all the recommendations of the Building Commission. You have omitted part of their recommendations. I will read to the Council an important recommendation which they made and which has not been embodied in the Bill, but was rejected by the Government. It is to be found in page 40 of their Report. They there say:—

'We think power should be given to acquire a portion only of a house or manufactory or other building.'

"That forms, and I think very properly, no part of this Bill. My first point is that the section now under consideration does not represent the unanimous opinion of the Building Commission; secondly, that it was opposed by the representatives of the landed interest on the Commission; and, lastly, my contention is that the opinion is of the nature of a very halting recommendation. The Building Commission made this recommendation in a hesitating and indecisive way; it is merely a suggestion, and I submit it should not be accepted by the Council, especially when it has filled the public mind with alarm; and further it should not be accepted when it makes the Chairman of the Corporation a judge in his own case. The Commission say:—

'In order to avoid a portion of the delay which inevitably takes place, we think the Chairman of the Corporation should be declared to be the Collector in all land acquisition cases within the Municipality; and, as it is unlikely that he would have time to perform the functions of the Collector, he ought to have power to delegate them.'

"Those are the terms in which the opinion of the Building Commission is expressed. In this connection I desire to point out that this is not the law in Bombay; it is not the law in Madras; it is not the law in vogue in any Municipality in the Province over which Your Honour presides; it is not the law in the North-Western Provinces; it is not the law in the Punjab, which in the opinion of Mr. Risley is the most advanced law relating to municipalities, but which in my opinion is the most retrograde. Therefore, we have the fact that this provision does not find a place in any municipal system in India. Nor is this all. It does not find a place in the English Public Health Act, to which my hon'ble

friend in charge of the Bill is so fond of referring. Therefore, the position is this—that we are enacting into law provisions which are unique, unprecedented and unlike those of any legislative enactment in force anywhere. Where is the justification for such a provision? Where are those great delays which are said to have taken place in consequence of which it has become necessary to make the Chairman a judge in his own case? It will not do for my hon'ble friend to shelter himself behind the halting recommendation of the Building Commission. He is going to enact a law which is revolutionary in its character, which has no place in any corresponding legislation in any part of India or of the world; therefore, he must bring facts and figures to justify the passing of such a law. I am not aware of those facts and figures, and I am not prepared to rely on the recommendations of the Building Commission. That may be a factor in the consideration, but it is no justification for the law. The strongest case is necessary to justify such a provision of the law, and I say no case has been made out. It is opposed to all the fundamental principles of justice. If my hon'ble friend says that the Chairman will not act himself, but will delegate his power to some one else, then I object, because the person to whom such powers are to be delegated will be subordinate to the Chairman, will be responsible to the Chairman, and whose strongest motive it will be to please the Chairman. This is a serious matter, and I ask the Council to pause before they pass a provision of such a revolutionary character. I will be content to leave the power with implicit confidence in the hands of the Government, because I know the Government will not do anything wrong, and will not lend themselves to any principle involving the violation of the principles of justice and equity; but the subordinate whom the Chairman might appoint to act for him may be so carried away by gratitude that he may act in a manner which may be opposed to justice. What is the safeguard? He may act from good motives, but in the exuberance of his zeal to support the Chairman he may not conform to the principles of justice. And where is the guarantee that the Chairman will restrain the excesses of his zeal? Therefore, I beg the Council to ponder carefully over the situation. This is a matter of great importance to the people of Calcutta. In the first place, you are going to enact a law which is not part and parcel of any municipal law; secondly, this provision is opposed to our sense of elementary justice; thirdly, no case has been made out for a provision of such a revolutionary character. All that you can appeal to is the Report of the Building Commission. This portion of the Report, however, was objected to by the representatives of the landed interest. The recommendations of the Commission in this respect are of an indecisive, halting nature. The Government itself has been obliged to disregard one of their recommendations of a somewhat important character. I submit that the recommendation to which my amendment refers deserves a similar treatment at the hands of the Council and of the Government."

The Hon'ble Mr. Oldham said:—"As the Hon'ble Mover of the amendment has said, the section to which he objects was inserted on the recommendation of the Building Commission. There were two Indian members on that Commission—Babu Kally Nath Mitter and Babu Nalin Bihari Sircar. Babu Nalin Bihari Sircar wrote a dissent which was published with the Commission's report. In that dissent he has not said a word about this proposal of the Commission. Babu Kally Nath Mitter did not at all object. He preferred 20 years' purchase to 25 years; otherwise he has not dissented from this proposal. I am perfectly certain that so sound a lawyer as Babu Kally Nath Mitter cannot have shared the misapprehension to which my hon'ble friend has just given expression in the language of unmistakeable panic. And that misapprehension is so wild a one that there is no course but to begin at the very beginning, and explain how the matter stands—what the scope and object of the Land Acquisition Act are. So far from the Chairman being a judge in his own cause, there are express provisions provided which will control anything an executive officer may do; and, so far from it being an objection that he is interested, it is recognised that he is an interested agent who has to make the best bargain he can. Under the Land Acquisition law there are three bodies —the Government, the District Collector, and the Civil Courts. In the place of the District Collector, another officer may be appointed. When he is appointed,

the District Collector is completely ousted; so that there are only the Government, the Land Acquisition Collector and the Civil Courts. There is no provision for any controlling authority. The work is entrusted to the Land Acquisition Collector, who is always a selected officer, and his proceedings are departmentally controlled at every step; and as a matter of fact the Government Land Acquisition *bureau* is a very extensive one. It begins with the Collector of the district, who controls the proceedings and examines the records. Then there is the Divisional Commissioner, who examines the statements and the final awards. And there is the final control of the Board of Revenue, and under the standing rules the proceedings are not confirmed until the sanction of the Board of Revenue is given, and these rules are prescribed, not by the Land Acquisition Law, but under the authority of different Bengal Regulations. Here in Calcutta the other authorities are the Chairman of the Corporation, and in the case of railways the Railway Agents or Managers and the Consulting Engineers, all of them interested in land acquisition proceedings. They are not judicial authorities. As a matter of fact, as I read the law, this particular provision which has so much alarmed my hon'ble friend may be pronounced to be supererogatory, because it is fully within the authority of the Government to pass orders to the effect of this provision. The only reason why this provision is necessary is in order that the Corporation may know how it stands and to prevent the possibility of conflict with the District Collector. The Land Acquisition Department has no objection to this section as it has been drafted.

"There is a further provision, which is a little peculiar, giving the Chairman power to appoint an officer; but, as this power has to be exercised subject to the approval of the Government, it would be outside the Land Acquisition Department's functions to say anything against it. They keep a register of officers who are fit for these appointments. The effect of passing this provision will be to oust the Collector of the 24-Parganas, who is the District Collector, and the only practical effect will be to prevent any dispute as to action, subordination, and the channel of correspondence, and to shorten the chain. It will not give any land acquisition jurisdiction to the Chairman, because the Chairman could not possibly carry on the duties of land acquisition himself, and a Land Acquisition Deputy Collector must be appointed. Then, according to the rules of the Land Acquisition Department, instead of corresponding with the District Collector at Alipore, he will correspond with the Chairman; then the matter will go to the Commissioner of the Division, and from him to the Board of Revenue. The appointment of an officer by the Chairman I put no stress on, because the Government takes the responsibility. The present rule is for the Department to keep a list of qualified officers and to send three of those names to the Government for selection."

The Hon'ble Babu Surendranath Banerjee said:—"Will the Government make the appointment?"

The Hon'ble Mr. Oldham said:—"I do not think it necessary to answer, because the Hon'ble Member in charge of the Bill has just told me that he does not care to retain this provision, and I confess it is one which appears rather anomalous to the Land Acquisition Department. I am not defending this particular provision. I do not care if the officer to be appointed in that way drops out."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"That is precisely my amendment which awaits discussion."

The Hon'ble Mr. Oldham continued:—"The only part which will be omitted will be the provision giving the Chairman power to appoint. The law reads in the very words of my hon'ble friend's amendment. As the law stands, it will be fully in the power of the Government to make this appointment without any special provision in the Municipal Bill, and the only object there could be for inserting such a provision is to clear up any doubt as to what power the officer may exercise under the old Regulations constituting the offices of Collector and Deputy Collector. The effect of this sub-section will be otherwise simply to affirm the existing law. In all cases from the Corporation which come before me—and they have to come before me—I find that the

Chairman has always been the person really interested in the actual proceedings; and the duty of the Collector of the 24-Parganas has been solely the routine duty of looking over the figures. It is quite impossible for the Government in operations involving so much cost to leave them to a single officer. Government has sometimes suffered severe loss owing to the want of discretion in the officer concerned. The Land Acquisition Officer's duty and power of conferring with the superior authorities all along the line is frequently exercised. It is not exercised within the area of Calcutta, because the Collector of the 24-Parganas knows nothing about the conditions of Calcutta, nor is it used in the case of the Commissioner of the Division except in special cases; so the work really comes straight from the Deputy Collector, guided by the advice of the Chairman, direct to the Board of Revenue, and great delay will be saved by appointing the Chairman a Collector under the Land Acquisition Act. For instance, in the case of excess over estimates which frequently occurs, the excess amount must receive the sanction of the Government, and in the case of land required to be taken up by the Corporation, it must receive the sanction of the Corporation. The case first goes to the General Committee, and then to the Corporation, who may take two months over it; it then goes to the Collector of Alipore, and so through a long chain it goes up to the Government till sanction is obtained. I think the Hon'ble Dr. Asutosh Mukhopadhyaya will be able altogether to allay the apprehensions of my hon'ble friend as regards the Chairman being appointed a judge in his own case. He can no more be a judge in his own case than he is at present. He is at present considered an authority whom the Deputy Collector must consult, and it is with his advice that the proceedings are carried on."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"I regret to confess that I find myself in a hopeless maze, and I trust that some Hon'ble Member, who is more acute and more learned, will come to my help. I agree with the observations of the hon'ble mover of the amendment; but for the last half an hour I have been endeavouring in vain to discover the meaning of his amendment; I am wholly unable to understand it. What is the object of section 585 (*now* 557)? The object is to amend the Land Acquisition Act of 1894 so far as may be necessary for the purposes of the Corporation; it says distinctly that any land or building which any municipal authority is authorised under the provisions of this Act to acquire shall be acquired under the provisions of that Act. Then comes clause (*a*), for which the Hon'ble Babu Surendranath Banerjee wants to substitute the following:—

'The expression "Collector" shall include any officer specially appointed by the Local Government to perform any of the functions of a Collector under the said Land Acquisition Act.'

"Now, let us look at section 3 of the Land Acquisition Act, which says:—

'The expression "Collector" means the Collector of the district, and includes a Deputy Collector and any officer specially appointed by the Local Government to perform the duties of Collector under this Act.'

"Therefore, the definition proposed by the Hon'ble Babu Surendranath Banerjee is identical with the definition given in the Land Acquisition Act; he professes to amend that Act, but simply repeats the language to be found there. His amendment, therefore, as it stands, is obviously tautologous and absolutely unnecessary. Suppose that the amendment is carried; it will not help my hon'ble friend. He protests that the Chairman ought not to be the Judge in his own case; but under the Land Acquisition Act the Local Government may appoint the Chairman to perform the duties of a Collector under that Act. I venture to think, therefore, that the amendment as it stands is meaningless and cannot be accepted, and I would ask the Council to accept instead my amendment that clause (*a*) of section 585 (*now* 557) be omitted."

The Hon'ble Babu Boikanta Nath Sen said:—"The wording of the amendment before the Council may not be satisfactory, but it cannot be said that it has no meaning. It has this effect—that it will exclude the Chairman from being appointed a Collector under the Land Acquisition Act. With regard to the second provision of sub-section (*a*) of section 585 (*now* 557), when the approval of the Local Government will have to be taken, when there is so

much apprehension and sentiment, I do not see what will be gained by retaining it. I put the matter in this light. Is it sound to legislate when nothing particular is to be gained by it, and when on the other hand there is a strong feeling or sentiment on the other side? The decision of the Collector who will be appointed will not be final. The Municipality will not gain anything by it. Other officers may be appointed directly by the Government. Why give power to the Chairman who will be at liberty to delegate his authority and whose appointment will have to be approved by the Government? I submit, therefore, on grounds of expediency, that it is desirable that this amendment should be accepted; but I think it will be much better if the Hon'ble Dr. Asutosh Mukhopadhyaya's amendment that clause (*a*) of section 585 (*now* 557) be omitted altogether be put first."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"I desire to make a personal explanation. I cannot admit that there is any tautology at all. My position is this, that in place of this provision the general law of the land be inserted. If my hon'ble friend calls it tautology, I can only say that my notion of tautology is very different. Mine is a constructive amendment; my hon'ble friend's amendment is a destructive amendment."

The Hon'ble Mr. Baker said:—"I suggest the adoption of the following for clause (*a*) of section 585 (*now* 557):—"The expression "Collector" means also the Chairman of the Corporation of Calcutta.' That will get us out of all the difficulty, and will provide for the Chairman of the Corporation being ordinarily the Collector for the purposes of land acquisition in Calcutta, in the same way as the District Officer is the Collector ordinarily in a district. The effect will be to oust the Collector of the 24-Parganas. I had something to do with the taking up of land for the construction of the Harrison Road. I was absolutely ignorant of the subject, but it had to go up to me as Collector of the 24-Parganas and also to the Commissioner of the Division. We want to eliminate the Collector of the 24-Parganas and substitute a special officer under the Chairman, as it stood in the original draft of the Bill. Such officer will act generally under the guidance and control of the Chairman, who will be the 'Collector' in the manner and for the reasons explained by the Hon'ble Mr. Oldham.

"With reference to one remark of the hon'ble mover of the amendment that the Local Government will never think of appointing the Chairman to be a judge in his own cause, or the Manager of a railway for taking up land required for the railway, I may mention that the District Officer in Bengal is always Chairman of the District Board, and he is constantly employed for taking up land for roads and other purposes, and there has never been any complaint."

The proposal of the Hon'ble Mr. Baker that clause (*a*) of section 585 (*now* 557) should run thus:—

"(*a*) The expression 'Collector' means also the Chairman of the Corporation of Calcutta."

was accepted by the Hon'ble Dr. Asutosh Mukhopadhyaya as being practically identical with the amendment moved by him, and was put and agreed to.

The Hon'ble Babu Surendranath Banerjee then, by leave of the Council, withdrew his amendment.

The Hon'ble Babu Surendranath Banerjee then moved that the following proviso be added to clause (*a*) of section 585 (*now* 557):—

"Provided that the Chairman shall acquire such land through a Deputy Collector who shall not be subordinate to the authority of the Chairman."

He said:—"I think it superfluous to make any observations in favour of this amendment, as I believe the principle has been agreed to, that a Deputy Collector is to be appointed by the Government, and is to be subordinate to the Collector. That principle being agreed to, I hope the Hon'ble Member in charge of the Bill will accept this amendment having regard to the public feeling which prevails with regard to this matter."

The Hon'ble Mr. Oldham said:—"This amendment cannot be accepted. In the first place, the Chairman does not acquire land. The expectation is that the Deputy Collector will act under the guidance of the Chairman. Practically he

is subordinate to the Chairman and will report to him. The effect of the provision just passed is that the Chairman will be appointed Collector, not under the Land Acquisition Act, but under the Regulations which create the offices of Collector and Deputy Collector and govern the relations between the officers so called."

The Hon'ble Babu Surendranath Banerjee, in reply, said :—"He may act under the Chairman, but he will not be subordinate to the Chairman in the sense we understand it."

The motion being put, the Council divided as follows :—

Ayes 4.	*Noes 13*
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckley.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Mr. Handley.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
	The Hon'ble Mr. Apcar.
	The Hon'ble Mr. Mackenzie.
	The Hon'ble Mr. Spink.
	The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr. Oldham.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendment was lost.

The Hon'ble Dr. Asutosh Mukhopadhaya, by leave of the Council, withdrew the motion, standing in his name, that in section 585 (*now* 557), line 3, for "may" be substituted "shall"

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that clause (*a*) of section 585 (*now* 557) be omitted.

He said :—"I am afraid, Sir, that it may be regarded as somewhat ungenerous on my part that I should press this amendment for the total omission of a clause which has just been amended at my instance; but I believe that, if I had been permitted to move this amendment first, it would have saved us all this waste of time. I wish to point out that clause (*a*) is absolutely unnecessary. As it stands amended, it is to the effect that 'the expression "Collector" shall include also the Chairman of the Corporation of Calcutta.' Now, under the Land Acquisition Act, it is open to the Local Government (even without this provision) to declare that the Chairman is the Collector. This clause, therefore, is clearly superfluous, and my amendment, I hope, will commend itself to the Hon'ble Member in charge of the Bill who objected to several of my amendments on the ground that they were unnecessary. If what is now intended to be enacted is included in Act I of 1894, surely it is needless to encumber the present law."

The Hon'ble Mr. Oldham said :—"I said in my reply on the previous discussion that the enactment of this provision is not strictly necessary. It was inserted because it was recommended by Mr. Justice Trevelyan's Commission, and it will let people who are concerned know how they stand. And we defend it because of the possibility that without it a conflict may arise between the District Officer governed by the ordinary Revenue rules and the Chairman. I do not defend it on any other ground."

The Hon'ble Mr. Baker said :—"I think it can be defended on another ground. According to the Land Acquisition Act, the expression 'Collector' means the Collector of the district, and the definition goes on to say that it includes any officer specially appointed to exercise the powers of a Collector

under the Act. Here we have it 'the expression "Collector" means also the Chairman of the Corporation of Calcutta,' and his position is defined by the same words as we used to define the position of the Collector of a district under the Land Acquisition Act."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, in reply, said:—"If that is intended, I am afraid the object in view has not been attained by the amended clause. The insertion of the words 'Chairman of the Corporation of Calcutta' in section 3 of the Land Acquisition Act does not make the Chairman occupy the same position as the District Collector."

The motion was then put and lost.

The Council was then adjourned to Monday, the 25th September, 1899.

CALCUTTA;
The 16th January, 1900.

F. G. WIGLEY,
Assistant Secretary to the Govt. of Bengal,
Legislative Department.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Act, 1861 and 1892.

The Council met in the Council Chamber on Monday, the 25th September, 1899.

Present:

The Hon'ble Sir John Woodburn, K.C.S.I., Lieutenant-Governor of Bengal, *presiding.*

The Hon'ble Mr. W. B. Oldham, C.I.E.
The Hon'ble Mr. R. B. Buckley.
The Hon'ble Mr. C. W. Bolton, C.S.I.
The Hon'ble Mr. E. N. Baker.
The Hon'ble Rai Durga Gati Banerjea, Bahadur, C.I.E.
The Hon'ble Mr. C. E. Buckland, C.I.E.
The Hon'ble Mr. F. F. Handley.
The Hon'ble Mr. F. A. Slack.
The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
The Hon'ble Babu Jatra Mohan Sen.
The Hon'ble Mr. T. W. Spink.
The Hon'ble Raja Ranjit Sinha, Bahadur, of Nashipur.
The Hon'ble Sahibzada Mahomed Bakhtyar Shah, C.I.E.
The Hon'ble Mr. D. F. Mackenzie.
The Hon'ble Mr. J. G. Apcar.

The Hon'ble Babu Boikanta Nath Sen.
The Hon'ble Babu Surendranath Banerjee.

THE CALCUTTA MUNICIPAL BILL.

SECTION 370A.*

The consideration of the Hon'ble Babu Surendranath Banerjee's and the Hon'ble Mr. Apcar's motion that section 370A be omitted was resumed.

The Hon'ble MR. BAKER read a motion which the Hon'ble Dr. Asutosh Mukhopadhyaya proposed to bring forward, that the following sub-section be added to section 370A, namely:—

"(3) Rules made under this section shall as far as possible follow the provisions of the London Building Act, 1894, relating to party walls, with such modifications (if any) as the Local Government may consider necessary to adapt the said provisions to the circumstances of Calcutta."

The Hon'ble MR. BAKER said:—"I beg to refer to the amendments moved on Friday, the 22nd September, to section 370A, and to the discussion on the following day. This question, Sir, was adjourned on Saturday, 23rd September, in order to enable those of us who had taken particular interest in it to have an opportunity of considering it. We met yesterday—Mr. Oldham, Mr. Buckley, Mr. Handley, Mr. Apcar, Dr. Asutosh Mukhopadhyaya, the Secretary and myself; and we came to the conclusion that the amendment I suggested on Saturday had better not be accepted. That amendment was to the effect that in the place of the words 'confer and impose mutual rights and obligations' there should be substituted the words 'define and determine the mutual rights,' &c. We came to the conclusion that these words 'define and determine' would neutralise, or go some way towards neutralising, the effect of the section, because what is intended is not merely to define what the existing actual rights are, but to confer such new rights as may be necessary. In order to allay any public apprehension which may have arisen on the subject, I propose, at the suggestion of the Hon'ble Dr. Asutosh Mukhopadhyaya, to insert the following sub-section in the section, namely:—

"(3) Rules made under this section shall as far as possible follow the provisions of the London Building Act, 1894, relating to party walls, with such modifications (if any) as the Local Government may consider necessary to adapt the said provisions to the circumstances of Calcutta."

"We consider, Sir, that that is as far as we can reasonably go in the direction of meeting the views expressed by the Hon'ble Mr. Apcar. I am afraid it will not altogether meet his views, but at all events it gives a clear indication of the nature of the rules which it is proposed to frame. The amendment has been drafted in the name of the Hon'ble Dr. Asutosh Mukhopadhyaya."

The Hon'ble THE PRESIDENT said:—"The first motion in regard to this section is a motion of the Hon'ble Babu Surendranath Banerjee that the section be omitted. The Hon'ble Mr. Apcar has a motion to the same effect, and I think the best plan will be to ask the Hon'ble Babu Surendranath Banerjee whether, after hearing this statement, he presses his motion, or whether he would like to hear any further statement from the Hon'ble Dr. Asutosh Mukhopadhyaya."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I will just say in connection with this matter that I deeply regret I am not able to accept the amendment, and will briefly indicate my reasons. The amendment, Sir, is to the effect that the rules under this section shall, as far as possible, follow the provisions relating to party walls in the London Building Act. Now, Sir, I am unacquainted with the London Building Act, and I think most Hon'ble Members here are in the same position. We have had no opportunity of considering the London Building Act, and to legislate upon the lines of that Act without knowing its contents is a proceeding which does not recommend itself to my mind. Standing here as a Member of this Council, I cannot allow myself to be associated with any law which is to be on the lines of an Act of which I know nothing. That is my first objection. In the next place, I object to the section because we are taking a leap in

* The sections of the Bill having, under the direction of the Council, been re-numbered, the present number of each section is inserted in brackets, wherever the new numbering is altered.
S. 370A is referred to by that number, as it was omitted—*vide* discussions, *infra*.

the dark. We do not know the London Building Act, and we leave to the Local Government the power, the entire discretion, of adapting the rules in force under the London Building Act to the circumstances and the conditions of this city. Sir, with all the respect which I feel for the Local Government, and especially for the Government presided over by Your Honour, I am not prepared to give a *carte blanche* to the Local Government in a matter like this, so intimately affecting the habits and conditions of life of the people of Calcutta. I am not prepared to give a *carte blanche* to the Local Government in regard to a matter which might hereafter prove a fruitful and prolific source of litigation. This is a difficult matter; it is a new law, and, that being so, we ought to tread on firm ground. We ought to know what we are doing, and we ought to know exactly what we are legislating about. But we do not know what we are legislating about. We do not know the London Building Act; we do not know how the Local Government will exercise the discretion which will be vested in it. I feel the greatest possible doubt and hesitation in accepting a proposal of this kind. My hon'ble friend says my anticipations cannot be realized. I can only express a pious hope that they will not be realized; but they are there, Sir, all the same. In these matters I am intensely conservative. I want to understand things before I proceed to act upon new suggestions. Therefore, Sir, I cannot allow myself to be identified with a piece of legislation which is really a leap in the dark and about which I know nothing; about which I am afraid my hon'ble friends know nothing (what do they know about the London Building Act?); and I am unable to give the Local Government a *carte blanche* in an important matter like this. I cannot record my vote in favour of this amendment."

The Hon'ble Mr. Apcar said:—"Sir, I regret that I am unable to withdraw my opposition to this proposal. I am entirely opposed to this system of legislation; it is legislation by delegation, which to my mind is one of the most objectionable forms of legislation. So far as the London Building Act is concerned, I saw it in the hands of my hon'ble friend Mr. Buckley, but with its provisions and details I am entirely unacquainted. I press this on Your Honour that we should not legislate in the fashion that is proposed, but that this section should be withdrawn, and that, on such an early date as may be found convenient to the Council, there should be a short Bill introduced embodying such provisions as those who are experts in the matter think it is desirable should be passed into law. The building law of London is in the form of a statute, and, after a conversation with my hon'ble friend Mr. Buckley, I am not prepared to accept that. There is not sufficient material for legislation on the subject by this Council. I see no good reason why the present proposal should be adopted, and I certainly cannot withdraw the opposition I have offered to this section, which I think ought to be omitted from the Bill. If a law on the subject is considered to be necessary, the provisions should, I think, be submitted to the Council in the form I have suggested."

The Hon'ble Babu Jatra Mohan Sen said:—"I also maintain the opposition I raised the other day. By this section we are going to introduce the provisions of the London Building Act, not by enactment, but by certain rules to be made by the executive of the Government. To this I take exception, and I agree with the Hon'ble Mr. Apcar that, if it is necessary to introduce these provisions in Calcutta, it is advisable that it should be done in the shape of an Act after proper discussion by this Council."

The Hon'ble Babu Boikanta Nath Sen said:—"Sir, I fully realize the anxious care that this Council has bestowed on the consideration of this section, but I regret to say I cannot support this amendment, simply because I am ignorant of the London Building Act of 1894. It would be stultifying myself if I were to say that the legislation should be on the lines of the London Building Act of which I know nothing. It is on this ground that I object to this amendment being passed."

The Hon'ble Mr. Handley said:—"I confess I do not quite understand the fears and apprehensions of Hon'ble Members. The section as it stood before simply gave the power to the Local Government to make rules at any time. They

might make them now, they might make them six months hence, twelve months hence, or two years hence, or at any other time. It was decided after the consultation yesterday that the rules to be framed by the Local Government should follow generally the rules contained in the London Building Act."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"May I enquire if my hon'ble friend knows all about the London Building Act?

The Hon'ble MR. HANDLEY said:—No, I simply read these rules; but I take it this is a power which, as you and all the Members of this Council know, is reserved in almost every Act passed by the Local Government or by the Government of India. This procedure has been adopted in the Imperial Legislative Council for so many years that one can hardly remember when it was not the practice. No doubt Your Honour's Government will give these Hon'ble Members an opportunity of criticising the rules before they are enacted. What more can they wish to have? How can the Council object to rules which are not framed, but which will be in the future? These rules are to be framed, and when they are framed then surely there will be time enough to take objection to them on any particular ground which may be found. As it is now, all the section does is to give the Local Government power to make rules at some time or other. As I understand it, my hon'ble friends would deprive the Government of that power."

The Hon'ble RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR, said:—"I cannot support this amendment on the simple ground that we are not in possession of the provisions of the rules of the London Building Act. I agree with the views of the Hon'ble Babu Surendranath Banerjee and the other Hon'ble Members who have spoken against the introduction of the section."

The Hon'ble MR. OLDHAM said:—"I put the matter in this light: a measure of relief is wanted; it will be still more wanted when the provisions of this Bill have become law. Government must be provided with that measure of relief. It does not know exactly what form it will take; it must be adapted to local circumstances, and meanwhile it pledges itself to follow the best and safest model in the world. That is all the reference to the London Building Act means, and in that view there is no necessity to be acquainted with details."

The Hon'ble MR. BAKER said:—"I am authorized to state that His Honour the President has been impressed by what has fallen from the Hon'ble Mr. Apcar and the Hon'ble Babu Surendranath Banerjee as to their fears regarding the effect of legislating upon this matter by means of rules only. His Honour thinks that the suggestion which has fallen from the Hon'ble Mr. Apcar that there should be a special Act to deal with this matter is one which may well be accepted by Government. His Honour has, therefore, directed me to state that the Government are willing to omit this section from the Bill on the understanding that during the cold weather an Act will be introduced to deal with the subject of party walls.'

The Hon'ble BABU SURENDRANATH BANERJEE said:—"We thank Your Honour for consenting to this."

The Hon'ble MR. APCAR said:—"I hope you will allow me to express my obligations to you."

The motion that section 370A should be omitted was then put and agreed to.

The last motion having been carried, the Hon'ble DR. ASUTOSH MUKHOPADHYAYA, by leave of the Council, withdrew the following motions standing in his name:—

(1) that at the end of section 370A, clause (*a*), after the word "party" the word "walls" be inserted;

(2) that to section 370A the following be added:—

"(3) Rules made under sub-section (1) shall have the force of law and shall be binding upon all persons from the date when they may be published in the Calcutta Gazette;"

and the Hon'ble BABU JATRA MOHAN SEN, by leave of the Council, withdrew the motion, standing in his name, that at the end of section 370A, clause (*a*) after the word "party" the word "walls" be inserted.

SECTION 557.

The Hon'ble BABU SURENDRANATH BANERJEE moved that clause (*b*) of section 585 (*now* 557) be omitted.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA also moved that clause (*b*) of section 585 (*now* 557) be omitted.

The Hon'ble BABU SURENDRANATH BANERJEE said:—"Section 17 of the Land Acquisition Act is the urgency section of that Act, and I will read it. It is as follows:—

'In cases of urgency, whenever the Local Government so directs, the Collector, though no such award has been made, may, on the expiration of fifteen days from the publication of the notice, take possession of any waste or arable land needed for public purposes.'

"It is now proposed to extend the operation of this section to unhealthy areas, subject to the reservation that the question as to whether it is an unhealthy area or not will have to be determined by a Magistrate. It comes, therefore, to this: that it is now proposed to extend the application of this urgency section to unhealthy areas, and they will be taken possession of under its provisions. Sir, I desire to point out a distinction between unhealthy areas and waste and arable lands. Upon waste and arable lands there can be no buildings or bustees. Upon unhealthy areas there will be bustees certainly, and buildings probably. No great hardship would be entailed upon anybody by giving effect to the provisions of section 17 in respect of arable and waste lands. But, Sir, it is very hard for the inmates of a bustee to be compelled to leave their homes within fifteen days after notice has been given of the intention of Government to take possession of the bustee or building. And, Sir, you provide for no further compensation so far as this particular matter is concerned. The inmates of the bustee or the inmates of the *pucka* house are obliged to leave within fifteen days after notice has been given. They are put to serious inconvenience, and probably to a good deal of trouble and additional expense. You give them no compensation over and above the 15 *per cent.* which is the regular compensation under the law. Thus the two things stand upon a completely different footing. No hardship is involved in the case of arable and waste lands, but hardship may be involved in the application of this section to bustees and buildings which may be declared by a Magistrate to be located within an unhealthy area.

"And, Sir, I may say that I could understand the reasonableness of a proposal like this if it had been made 50 years ago. Calcutta at that time was a seething swamp—the nursing ground of malarious and other fevers. But within the last 50 years the great sanitary works which have been carried out have changed the sanitary condition of Calcutta altogether. Under the Act of 1876 and the Act of 1888, the Corporation was empowered to spend 1½ lakhs every year upon drainage works. The Corporation has spent a good deal more than 1½ lakhs a year. This has been going on from 1876 to 1899. The drainage works of the town have been completed, and the drainage works of the suburbs are being pushed on with vigour. Therefore, Sir, the justification for a drastic provision like this does not exist at the present moment, whatever might have been the justification for such a provision 50 years ago. I wish to put it to my hon'ble friend whether, when the Building Commission made the recommendation upon which this section of the law is based, they had in view any unhealthy area to which they intended that this section should be applied. I am prepared to go still further and ask whether they had in their minds any unhealthy area in the acquisition of which a section like this would be useful. Sir, we have got the opinion of the Building Commission,

and I will presently read that opinion; but here in this Council, as I have said, I am not willing to trust to individuals. The opinion I value most is my own opinion, and that opinion formed after a careful consideration of facts connected with any particular issue. What are the facts, independently of the recommendation of the Building Commission, which justify a section like this? Has that Commission given us the facts? Have we got any facts at all? Is the Hon'ble Member in charge of the Bill prepared to give us the facts? Is the executive of the Corporation ready to give us the facts? Have the executive of the Corporation suggested that anything of this sort should be done? If they have not done so, what is the *raison d'être* for a section like this? It would not do, Sir, to enact a drastic provision like this merely upon the recommendation of two or three experts. Those experts are entitled to respect, but we want testimony more solid—more substantial—than their opinion, and I should like to be placed in possession of any facts which would support the position taken up by the Building Commission. I will now read the recommendation of the Commission. At page 39 of their report they say:—

'As it is important that delay should be avoided in the acquisition of unhealthy areas, power to acquire them at once should be given to the Commissioners. These powers should only be given where the areas are declared to be unhealthy on the certificate of a Magistrate, granted after hearing any objections raised by persons interested. Provision should be made for the speedy service of notices to such persons and for an early hearing of their objections.'

"Well, Sir, this is the opinion of the Building Commission. The Building Commission seemed to imagine that all that has to be done for the purpose of the acquisition of land is to shorten the process by which land is to be acquired. But, Sir, a great deal more than that is required; funds are needed for the opening out of the congested areas. A large sum of money is needed, but where is that money to come from? Something like five crores of rupees would be required at a moderate estimate for opening out all the congested areas.

"And here, with all the respect which I feel for the Government of this country, I have a complaint to make against the Government. The Building Commission recommend certain financial and certain legal measures. The financial measures ought to precede the legal measures. We ought to have the funds before we change the law for the acquisition of land. Among the financial measures are these: that a tax should be imposed on jute; that the imposition of an *octroi*-duty should be seriously considered. Well, Sir, the tax on jute has not been imposed, and no proposal to that effect has been made by Government. I am afraid that even, if that proposal were made by the Government of this Province, most probably the Government of India would like that the tax on jute should be reserved to itself. Then, Sir, with reference to the *octroi*-duties, I had the honour to give notice of a motion; but Your Honour thought it your duty—and I have no complaint to make against your decision—to rule it out of order. Therefore, Sir, it comes to this, that the financial recommendation which the Building Commission has made has not yet been given effect to. The other recommendations of a legal character depend upon these financial proposals. If we have money, of course then we can acquire the land, and if, having the money, we meet with difficulties in acquiring the land, then the recommendations of the Building Commission may be given effect to and the process shortened. But we have not got the money, and the financial recommendations have not been given effect to. It seems to me, Sir, to be something like placing the cart before the horse to give effect to the legal recommendations before devising measures for obtaining the necessary funds. Let us have the money first, and then if we find that there is any difficulty in the way of the acquisition of land, if the process is found to be dilatory and inconvenient, the law might be changed. But, Sir, we have not got the money, and yet a drastic provision like this is sought to be enacted as the law of the land. I desire to point out further that there is no such provision in any municipal law with which I am acquainted. There is no such provision in the Bombay Act, or in the Madras Act, or in the English Public Health Act.

You may ransack the municipal literature of the world, and I doubt very much if you will find any provision like this. Having regard to all these considerations, I think this provision is unnecessary, that it is drastic and inconvenient, and that no good and sufficient grounds have been made out for its introduction."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"The amendment which stands in my name is identical with that just moved by my hon'ble friend, and it is desirable that I should say a few words in support of it. I entirely agree with everything that has fallen from my hon'ble friend Babu Surendranath Banerjee, and I believe that this provision will not only prove a source of irritation, but also that it will be practically useless. I have not the smallest doubt that the very first time this provision of the law is sought to be enforced, the Magistrate will have to go through a lengthy enquiry. People will resist to the utmost any attempt made to eject them summarily from their houses. Evidence will have to be taken, and I can assure the Council that, if the decision of the Magistrate happens to be adverse to the owners, it will be challenged in appeal, and the case will be dragged to the High Court; and the very object in view, namely, to shorten the process by which land may be acquired, will be completely frustrated. A clause of this description, therefore, will not only lead to oppression, but will also promote expensive and needlessly vexatious litigation."

The Hon'ble Mr. Oldham said:—"The Hon'ble Babu Surendranath Banerjee has quite rightly described the law on this subject and the manner in which the proposal originated. This section is for the purpose of enacting that in the case of unhealthy areas the provisions of section 17 of the Land Acquisition Act shall apply. The clause has been framed in accordance with the recommendations of the Building Commission, and the Building Commission's proposal was:—

'As it is important that delay should be avoided in the acquisition of unhealthy areas, power to acquire them at once should be given to the Commissioners. These powers should only be given where the areas are declared to be unhealthy on the certificate of a Magistrate, granted after hearing any objections raised by persons interested. Provision should be made for the speedy service of notices to such persons and for an early hearing of their objections.'

"In connection with what the Building Commission said on the subject, it is only necessary to add that this part of the report was concurred in by the two Indian members—Babu Kally Nath Mitter and Babu Nalin Behari Sircar; that is to say, Babu Nalin Behari Sircar did not mention it in his Note of Dissent, nor did Babu Kally Nath Mitter refer to it at all. My hon'ble friend, however, went on to say he doubted if any instance was present in the minds of the members of the Building Commission which could justify this provision, and he challenged the Hon'ble Member in charge of the Bill to bring forward such an instance. I do not think his hon'ble colleague the representative of the Corporation will bear him out in offering that challenge. In two areas which I could mention, according to the quarterly health reports which we receive, in the two wards represented by Entally and Kidderpore, the death-rate for the quarter is reported to be at the rate of about 50 to 60, and in one instance 70, per thousand instead of 20, or at most 25, as it should be. I would particularly remind my hon'ble friend of the moving speech made by Babu Bhupendranath Bose less than a month ago on the last occasion on which he sat on the Corporation. As it was the last occasion on which he would have the opportunity of speaking, he drew the particular attention of the Commissioners to the perfectly deplorable state of affairs which prevailed in the area added to his own Ward No. 1. He quoted figures showing a most appalling rate of mortality due to fever and other diseases, and he called for the very earliest measures of reclamation and improvement to do away with this state of affairs. As regards the Hon'ble Dr. Asutosh Mukhopadhyaya's objection, it is one which I have not considered, but the proposal was made by Mr. Justice Trevelyan and by a Commission on which lawyers sat. My hon'ble friend opposite, the learned Legal Remembrancer, will be able to give the answer to that objection."

The Hon'ble MR. BAKER said:—"I should just like to add one or two words to what has fallen from the Hon'ble Mr. Oldham, who has kindly undertaken to deal with this matter. The Hon'ble Babu Surendranath Banerjee said that the operation of this section would be a cause of hardship to the people who were dispossessed. Well, Sir, in the first place, I would point out that these are the people whose unhealthy surroundings and unhealthy modes of living are the cause of danger to the people around them. Therefore I do not think they are entitled to much consideration. He also said we give no additional compensation. I am not prepared to admit that they are entitled to additional compensation, but in clause (3 of section 17 of the Land Acquisition Act, it is stated that the Collector shall at the time of taking possession offer to the persons interested compensation for the standing crops and trees, if any, on such land, and for any other damage sustained by them and caused by such sudden dispossession; so that, in so far as they suffer injury or damage in consequence of the suddenness of their dispossession, they will be entitled to additional compensation. Then the Hon'ble Member said that during the last 50 years great sanitary improvements have been effected in Calcutta, and that the public health is much better now than it was then, and that, therefore, there was no justification for this, as he called it, drastic provision. But I would point out that there are still patches of Calcutta which are insanitary and unhealthy. The Hon'ble Mr. Oldham has mentioned two cases in point, and it will be noticed that the section only provides that urgency shall be declared in areas which are actually found to be insanitary and unhealthy. With reference to what fell from the Hon'ble Dr. Asutosh Mukhopadhyaya, I would observe that the procedure before the Magistrate would no doubt be a slow matter; but while that procedure is going on the Collector will be able to go on with the work of taking up the land in the ordinary course, so that in no case can there be any time lost beyond what would have been lost under the regular procedure."

The Hon'ble MR. APCAR said:—"There has been a direct reference made to me, and, although I did not intend to take part in this discussion, I now feel bound to speak to this amendment. What presses upon me is this; that these proceedings depend after all on financial considerations, and if any authority outside the Corporation is to have the whole subject under their control, then it may happen that the finances of the Corporation will be placed in a difficult position if action is taken in consequence of outside interference. I do not altogether go with my hon'ble friend on my left as to the chronological order in which the proceedings are to be taken. I frankly admit the necessity of provisions being laid down to improve the sanitary conditions of Calcutta, and I am sorry that the Government have not yet undertaken any sort of reformation with reference to the opening out of these congested areas. But I hope that that may yet be done after all that has been said.

"I cannot altogether agree with the Hon'ble Mr. Oldham in what he has mentioned to the Council in regard to the two areas he spoke of. The Hon'ble Member in charge of the Bill has spoken of patches of Calcutta that are in an insanitary condition. It must be remembered that the patches which have been referred to are outside of the old boundaries of Calcutta. These areas have been under the control of other authorities than the Corporation: as a matter of fact, they have been under the control of Government itself until a late period. All that can be done has already been done by the Corporation as at present constituted, and they have not by any means been blind to their duty in improving insanitary quarters. So that I do not think any justification has really been shown for imposing this particular section upon Calcutta. Now I do not think, Sir, that the Corporation will be in the future (at least I hope not) any more wanting in their duty than they have been in the past, so that, if matters are left to take their own course, I have a confident anticipation that everything which may be required to be done will be done.

"Then my hon'ble friend referred to the speech of my industrious and able friend Babu Bhupendranath Bose, who has been one of the most useful Commissioners we have had. I think my hon'ble friend is not quite intimately acquainted with all the facts. What Babu Bhupendranath Bose complained of cannot possibly be made good under this section. The insanitary condition of what is called the canal area, to which Babu Bhupendranath Bose referred, is due

to flooding during the rains. The European citizens complain because, occasionally, for an hour or so in the rainy season, the quarters in which they carry on business are flooded. In the canal area some of the lower floors of the houses are under water for five, six, or seven days in the rainy weather. That is what they have got to suffer, and that, Sir, is, as our late Engineer told us, in consequence of the canalisation by Government when Sir Ashley Eden was Lieutenant-Governor of Bengal. Now, Sir, with reference to this particular matter the Commissioners have pressed upon Chairman after Chairman the necessity of having some scheme prepared in order to relieve these poor inhabitants who are being killed off by reason of the insanitary conditions under which they live. I know the Chairmen have given directions with regard to it, but up to this date I have not seen any scheme brought forward. So that with regard to such conditions as those to which my hon'ble friend Mr. Oldham has referred, this section, which will authorise the acquisition of land which is supposed to be insanitary, cannot have any effect whatever. We would not take up the whole canal area, and if we did so, it would still continue to be in an insanitary condition, because it is not by reason of the tenantry of the area that it is insanitary, but it is by reason of certain operations which have been undertaken by Government, and which cause great floods throughout the district. So far as that is concerned, I do not think my hon'ble friend's argument really holds good. With regard to other places, there is Ward No. 22, which my hon'ble friend has omitted to mention. It was a most insanitary area, which the Corporation improved without any compulsion from outside. These are matters, Sir, with which I am so familiar that I cannot help referring to them, and I think it is a little dangerous on the part of those who are less acquainted with them to bring forward such instances"

The Hon'ble Mr. Baker said:—"I rise to order, Sir; the only point before the Council is the question of urgency. We are not concerned with the question whether any particular area is to be taken up or not, but only whether, when it has been decided to take it up, we should apply urgency or not."

The Hon'ble Mr. Apcar said:—"I am ready to bow to any ruling."

The Hon'ble the President said:—"I think the Hon'ble Member was in order to give instances in reply to the Hon'ble Mr. Oldham, but whether it is necessary to give any further instances is of course another question."

The Hon'ble Mr. Apcar said:—"I was going on to show, Sir, that the provision of the Bill in this connection is uncalled for; since, if there are insanitary areas, they are not to be improved in a general way by proceedings under this sub-section; and further, the Commissioners in the past have, so far as their funds have permitted, been anxious to improve insanitary areas But, in view of Your Honour's observations, I shall not pursue the subject further. Before I leave this question, I must warn my hon'ble friend that it is dangerous to touch upon subjects unless you are very intimately acquainted with them. All through, Sir, I am entirely in support of measures which will secure sanitary improvements. But in this particular matter I think there should be powers given to those who have the control of the finances. They have got to shape their policy according to the money that they have got in hand. If that is done, I will support up to the hilt urgent measures in order to acquire land which are insanitary; but my whole objection is that the question should be left to the decision of those who have got the control of the finances, who are concerned in administering these matters, and, in a question such as is covered by the section of the Bill under consideration, not by outside authority."

The Hon'ble Babu Boikanta Nath Sen said:—"I venture to submit, Sir, that the acquisition of land without delay is not likely to be secured in a better way by these provisions than by those which exist under the Land Acquisition Act. The potentiality of this provision is deteriorated or weakened by the section itself. Is it to be a judicial enquiry or executive enquiry? Then there will be the usual procrastination or delay, whereas under the existing law the Chairman can at once move the Local Government; and I do not think there would be that amount of delay which will be involved if this section is incorporated in the law. The object therefore which the executive wish to secure by this section will be

frustrated by the provision which has already been laid down under the Act. I think, if the executive would carefully consider it, they would find that the existing provision is much better, and would enable them to acquire land in a quicker way than that provided for under this section."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—" I desire shortly to reply to the observations which have been made by the Hon'ble Member opposite. My hon'ble friend Mr. Oldham has remarked that this part of the Report of the Building Commission has been concurred in by the Indian representatives on the Commission. They do not concur in it now whatever they might have done at that time. One of the members is now distinctly opposed to this particular part of the Report and to other parts of it to which I shall call attention later on. Then, Sir, it is very apparent that my hon'ble friend the Member in charge of the Bill is in favour of granting additional compensation to persons being dispossessed of their holdings in bustees or buildings under the operation of this urgency clause, and my hon'ble friend seems to be of opinion that sub-section (3) of section 17 would cover cases of this kind. Sir, I am not a lawyer, but sub-section (3) requires that further compensation be given to the dispossessed parties in respect of arable and waste land, because the sub-section refers to arable and waste lands. Therefore, if you wish for further compensation to be given to persons in unhealthy areas which are not waste or arable land you must make sub-section (3) by special legislation applicable to this class of cases. That is the view which has occurred to me. It would be something for these poor people to get some compensation for their hurried dispossession, and that would be in accordance with the spirit of sub-section (3) of the Land Acquisition Act. Then, Sir, there was one observation made by the Hon'ble Mr. Oldham to which I desire to call attention. It was in regard to the speech made by the Hon'ble Babu Bhupendranath Bose on the last occasion on which he sat as a member of the Corporation. Babu Bhupendranath Bose, feeling that that was the last time he was to occupy a seat in the Corporation, made one of the most eloquent speeches ever heard at the meeting of the Corporation. He referred to the canal area in Entally, and in a most moving way called attention to the urgent necessity which existed for improving that area. But, Sir, what would be the remedy for the grievance he brought to notice? What would ensure the reclamation of the canal area. Not this section of the Bill. You want money. The financial consideration is the paramount consideration in the matter; the other is merely a subsidiary consideration. In this section you are anticipating a thing which ought to come later on. 'Finances first, drastic measures afterwards,' should be the motto of this Council. You have not got the money, and public opinion is alarmed. Public opinion would like to see the sinews of war provided before these drastic provisions are enforced. That is my view; and however that may be, Sir, I hope my hon'ble friend will accept his own principle that additional compensation should be given for hurried dispossession; and if he accepts it I hope he will accede to the extension of sub-section (3) to cases of this kind."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—" Sir, I regret to find that the objection to which I alluded has not been answered, probably because it has not been sufficiently appreciated. My hon'ble friend Mr. Oldham left my objection to be dealt with by the Hon'ble the Legal Remembrancer, and so it still awaits an answer. The Hon'ble Member in charge of the Bill said that, during the time the proceedings will go on before the Magistrate, the Collector will also proceed in the usual way; and, if the enquiry before the Magistrate be delayed, there will be no difficulty, as the land will be acquired in the usual way. This use of a double-edged weapon may sometimes expedite matters, but it furnishes no answer whatever to my objection that the system will lead to needlessly expensive litigation. It will be expensive not only to the people you want to dispossess, but also to the Corporation. You can take it as an unquestionable fact that every single attempt made by the Corporation to render people homeless under this section will be resisted to the utmost. The proceedings before the Magistrate will be contested to the best of the ability of the parties concerned, and after that the case will be dragged and fought out before the High Court. That was my objection, and no attempt has been made

to answer it. I take it that the greatest misery you can inflict upon a people by the introduction of new laws is an increase of ruinous litigation. I must add that what has been pointed out by my hon'ble friend Babu Surendranath Banerjee about the payment of compensation is absolutely correct. Sub-section (*3*) of section 17 of the Land Acquisition Act applies only to waste and arable lands and lands acquired for purposes of a railway under an unforeseen emergency. This is manifest from the language of the sub-section read along with the two preceding sub-sections. It is clear, therefore, that, although the special powers conferred by section 17 of the Land Acquisition Act may be exercised in the case of unhealthy areas under section 585 (*now* 557) of the Bill, the persons who become homeless are not entitled to claim any additional compensation for sudden dispossession as is contemplated by section 17, sub-section (*3*). The unfairness of this needs no comment."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I earnestly appeal to the Hon'ble Member in charge of the Bill to consider this matter."

The Hon'ble MR. BAKER said:—"I am not in order in speaking, Sir, but I think I may mention that sub-section (*3*) applies to both the previous sub-sections, and it lays down not only that compensation shall be given for damage to standing crops and trees on arable and waste lands, but that it shall also be given for damage sustained by reason of sudden dispossession."

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA said:—"Sub-section (*3*), as I read it, refers only to waste and arable lands, and lands taken up for railways under certain specified exceptional circumstances."

The Hon'ble MR. BAKER said:—"I read it as bringing in the whole of section 17."

The Hon'ble THE PRESIDENT said:—"Will the Hon'ble Legal Remembrancer give us his views upon this matter?"

The Hon'ble MR. HANDLEY said:—"I am inclined to agree with the Hon'ble Member for the University. I think it must be read to apply only to arable and waste lands, judging from the wording of the sub-section, which runs:—

'In every case under either of the preceding sub-sections the Collector shall at the time of taking possession offer to the persons interested compensation for the standing crops and trees (if any) on such land and for any other damage sustained by them caused by such sudden dispossession and not excepted in section 24; and in case such offer is not accepted, the value of such crops and trees and the amount of such other damage shall be allowed for in awarding compensation for the land under the provisions here contained.'"

The Hon'ble MR. BAKER said:—"The words 'any other damage' applies to both sub-sections. It says expressly 'under either of the preceding sub-sections.'"

The Hon'ble MR. HANDLEY said:—"Sub-section (*2*) refers only to land taken up for railways."

The Hon'ble MR. BAKER said:—"Yes, but the operation of that is made to apply by the clause in the present Bill to all buildings on land taken up by the Corporation."

The Hon'ble MR. OLDHAM said:—"I may say that it is an absolute surprise to me to hear any doubt on the construction of this section."

The Hon'ble MR. BAKER said:—"If, Sir, there is any doubt, I am quite willing to add to this sub-section a clause to the effect that compensation should be paid for any damage sustained by persons by reason of their sudden dispossession. It certainly never occurred to me for one moment that this clause did not apply."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"As there is a difference of opinion it will be better to add the clause."

The Hon'ble THE PRESIDENT said:—"Yes, I quite agree, and I think the Secretary had better consult the Hon'ble Member in charge of the Bill as to the terms of the clause."

The motions being put, the Council divided as follows:—

Ayes 6.	Noes 12.
The Hon'ble Raja Ranajit Sinha Bahadur, of Nashipur.	The Hon'ble Mr. Buckley.
The Hon'ble Babu Jatra Mohan Sen.	The Hon'ble Mr. Buckland.
The Hon'ble Babu Boikanta Nath Sen.	The Hon'ble Mr. Handley.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Mr. Apcar.	The Hon'ble Mr. Mackenzie.
The Hon'ble Dr. Asutosh Mukhopadhyaya.	The Hon'ble Mr. Spink.
	The Hon'ble Sahibzada Mahomed Bakhytar Shah.
	The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
	The Hon'ble Mr. Oldham.
	The Hon'ble Mr. Baker.
	The Hon'ble Mr. Bolton.
	The Hon'ble Mr. Slack.

So the amendments were lost.

The Hon'ble Babu Surendranath Banerjee also moved that the following proviso be added to clause (*b*) of section 585 (*now* 557):

"Provided that no action shall be taken under this clause without the sanction of the Corporation."

He said:—"If my hon'ble friend has any objection to the word 'Corporation'—and I am afraid he has—I will modify that and put in the words 'General Committee' instead of 'Corporation' to suit him if he can see his way to accept it. It strikes me that it will be as well to provide an additional safeguard by obtaining the sanction of the General Committee. You bundle a man out of his house with all his belongings—his *lares* and *penates*—and I think in a matter of that kind the discretion of the individual should be controlled by the wider discretion of a competent body like the General Committee."

The Hon'ble Mr. Baker said:—"My hon'ble friend has overlooked the fact that the discretion is not in the hands of the Chairman, nor in the hands of the General Committee. It is with the Magistrate, and all that the Chairman has to do is to take the initial proceedings and put the application before the Magistrate. Surely it is not necessary to take anybody's sanction to do that."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"I think I have been misunderstood. I am well aware that it is the initiation of these which is in the hands of the Chairman, but what I contend for is that no action should be taken without the sanction of the General Committee. The General Committee meet once a week, and then the sanction can be taken. No time will be lost. I think I have been somewhat misunderstood, and probably my hon'ble friend will now see his way to withdraw his objection."

The motion was then put and lost.

The Hon'ble Dr. Asutosh Mukhopadhyaya, by leave of the Council, withdrew the motion, standing in his name, that in section 585 (*now* 557), clause (*b*), line 4, before the word "Magistrate" be inserted "Presidency."

The Hon'ble Babu Surendranath Banerjee moved that clause (*d*) of section 585 (*now* 557) be omitted.

The Hon'ble Dr. Asutosh Mukhopadhyaya also moved that clause (*d*) of section 585 (*now* 557) be omitted.

The Hon'ble Dr. Asutosh Mukhopadhyaya also moved that clause (*c*) of section 585 (*now* 557) be omitted.

The Hon'ble BABU SURENDRANATH BANERJEE said:—"If Your Honour has no objection, the Hon'ble Dr. Asutosh Mukhopadhyaya and I will move these two amendments. With Your Honour's permission I will begin. These two amendments have reference to section 23 of the Land Acquisition Act. That section is as follows:—

'23. (1) In determining the amount of compensation to be awarded for land acquired under this Act, the Court shall take into consideration—

first, the market value of the land at the date of the publication of the declaration relating thereto under section 6;

secondly, the damage sustained by the person interested by reason of the taking of any standing crops or trees which may be on the land at the time of the Collector's taking possession thereof;

thirdly, the damage (if any) sustained by the person interested, at the time of the Collector's taking possession of the land, by reason of severing such land from his other land;

fourthly, the damage (if any) sustained by the person interested, at the time of the Collector's taking possession of the land, by reason of the acquisition injuriously affecting his other property, moveable or immoveable, in any other manner, or his earnings;

fifthly, if, in consequence of the acquisition of the land by the Collector, the person interested is compelled to change his residence or place of business, the reasonable expenses (if any) incidental to such change; and

sixthly, the damage (if any) *bonâ fide* resulting from diminution of the profits of the land between the time of the publication of the declaration under section 6 and the time of the Collector's taking possession of the land.

'(2) In addition to the market value of the land as above provided, the Court shall in every case award a sum of 15 *per centum* on such market value in consideration of the compulsory nature of the acquisition.'

"I read these various clauses in order to point out how scrupulously solicitous the law is in a matter of this kind in safeguarding private rights. This section deals with encroachments on private rights in the name of public rights. The spirit of the Legislature is that no harm whatever is to be done to private rights in the name of public rights. In this connection I may read to you a decision of Lord Truro's which is given in Mr. Beverley's edition of the Land Acquisition Act. Lord Truro says:—

'These acts are to be deliberately expounded in favour of the public and strictly expounded as against the Government or the Company taking the land'

"Therefore, Sir, the interpretation you are bound to give to the Land Acquisition provisions is to be liberal so far as the individual is concerned, but strict so far as the public are concerned. But, Sir, I have no hesitation in saying that clauses (*c*) and (*d*) of section 585 (*now* 557) represent a sort of flank movement by which the present law is to be superseded. Clause (*c*) of the section says:—

'(*c*) The market-value of the land or building shall be deemed, for the purposes of clause *first* of sub-section (1) of section 23 of the said Land Acquisition Act, to be the market value according to the disposition of the land or building at the date of the publication of the declaration relating thereto under section 6 of the said Land Acquisition Act.'

"Then, Sir, supplementary to this we have in clause (*d*) the market value settled and fixed as being twenty-five times the annual value of the property. Well, Sir, clause (*c*) is in direct contravention of an important ruling on the subject. That ruling was given in the case of *Prem Chand Barral*, and was laid down by Sir Richard Garth, Chief Justice of Bengal, and by so eminent a Judge as Mr. Justice Macpherson. That ruling was as follows:—

'The fairest and most favourable principle of compensation to the owners was to enquire what is the market value of the property, not according to its present disposition, but laid out in the most lucrative and advantageous way in which the owners could dispose of it.'

"The Chief Justice and Mr. Justice Macpherson held in that case that to capitalise the present rental of the property at so many years' purchase was not always a fair way of arriving at the market value.'

"Then, Sir, this is not a chance ruling, but the principle embodied in it has again and again been confirmed in a number of cases. Therefore, Sir, it comes to this: that we have got a ruling, concurred in by the highest Court in this land and confirmed by various other Courts; associated with it are some of the most illustrious names in the annals of British jurisprudence; and that ruling it is now proposed deliberately to set aside. And on what ground? I am only surprised that the Judge of the High Court who was President of the Building Commission should have lent his name to a proceeding of this kind. Because in one or two cases the valuations were exorbitant—they certainly were exorbitant—is that any reason why you should enact a law the effect of which would be to bring about a general undervaluation of property in this way? The best of laws, enacted with the most beneficent intentions, often miscarry. You cannot point to a single human institution which is not liable to be tainted with abuse in its practical application. Because in the case of *Premchand Bural* there was gross overvaluation, is that a reason why the Bengal Council should enact a law which will grossly undervalue the property of people in Calcutta? I hope Your Honour will set your face against legislation of this kind. It is opposed to the decisions and opinions given by some of the highest authorities to be found in the history of English law, and I trust Your Honour's Council will set its face against a piece of legislation of this kind. What is the justification for this legislation? The justification is the opinion given by the Building Commission, and I think here my hon'ble friend will not be able to say that there was absolute unanimity. I think my hon'ble friend will admit that so far as this opinion is concerned the two gentlemen who represented the landed property of Calcutta strenuously opposed this provision. I will read an extract from page 40 of the Building Commission's Report:—

'The extravagant prices which the Corporation has been made to pay for property acquired by it have arisen from the interpretation put by the Courts upon the decision of the High Court of Calcutta in the case of *Premchand Bural and another* v. *The Collector of Calcutta*, I. L. R. 2 Cal. 103. The word "market-value" occasionally leads to difficulties. It is the price which a willing vendor might be expected to obtain in the open market from a willing purchaser. In the case to which we have referred, it was held that the fairest and most favourable principle of compensation to the owners was to inquire "what is the market-value of the property, not according to its present disposition, but laid out in the most lucrative and advantageous way in which the owners could dispose of it." This expression of opinion has induced the Courts to assess lands at a price in excess of what owners would ordinarily have obtained for them in the market. We think it not unfair that for the purposes of land acquisition land should be valued according to its disposition at the time the declaration is made. In the opinion of the majority of us, if it be shown that, before the declaration is made, the owner had taken active steps towards a more favourable disposition of the land, and had spent money for that purpose, further compensation might be given to him, such compensation being based on his actual loss. The value which ought to be paid is the value of the land to the owner, and nothing more. It should, however, also be provided that, where the market-value is specially high in consequence of the property being put to a use which is unlawful or is contrary to public policy, *e.g.*, public gaming, the special circumstance shall be disregarded, and compensation shall be calculated on the sum which would be the market-value if the property were put to ordinary uses.

'In the opinion of the majority of us it should be provided that twenty-five times the annual value at which the property is assessed for the purpose of municipal taxation shall be presumed to be the market-value until the contrary is shown. This provision, however, should not take effect until the particular land has been re-assessed after the passing of the amending Act. Power should be given to re-assess for this purpose.'

"Well, Sir, I have not the smallest hesitation in saying that in some cases the market value if assessed according to this principle would mean loss to the Corporation, and in some cases—perhaps in many cases—it would mean serious loss to the parties concerned. Now take the case of Ballygunge. The day before yesterday, after the meeting of the Council was over, I went over to Ballygunge, and saw a friend of mine who has extensive landed property there. He is a lawyer of some eminence. I consulted him about these provisions, and he told me that there were properties in Ballygunge—gardens and so forth—which yielded only a nominal rent. He mentioned to me a garden of 5 bighas let at a rent of about Rs. 5 per month, or Rs. 60 for the year. The valuation would be 25 times 60; or Rs. 1,500. Now would that be a fair valuation for 5 bighas of land—would it not be a gross undervaluation? That is as

regards gardens. As regards vacant houses there would be an undervaluation—and an undervaluation which would involve the grossest injustice to the parties concerned. I am inclined to make the same remark with regard to bustees. The value of bustees depends not so much upon the rent they yield as upon their eligibility for building sites. The people pay a great deal in excess of the annual income derived from bustees in order that they may use those bustees for building purposes. Therefore, by fixing the market value at twenty-five times the annual rental you do a positive injustice to a large number of people by undervaluing their properties, and on the other hand you will be putting the Corporation to serious loss. Therefore, Sir, taking into consideration all these circumstances, *viz.*, the gross injustice which a revision like this would entail in a large class of cases; the inequitableness of such a provision; the fact that this section of the Bill is opposed to the traditions of British jurisprudence and to the interpretation put upon the law by Judges both in England and this country; the fact that this section has created the greatest possible alarm based upon good grounds;—taking all these facts into consideration, I hope and trust that the existing law will be allowed to remain. No justification has been made out for any modification of the law. There might have been one or two cases in which there might have been undervaluations, but that is no reason why the law should be changed."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"Sir, the two amendments which stand against my name are practically identical with those moved by the Hon'ble Babu Surendranath Banerjee, and I think it will be convenient if I speak to them now. My hon'ble friend has, to some extent, anticipated me in the observations I had intended to offer, and I have no desire to weaken their effect by mere repetition. At the same time I do not wish to conceal the fact that when I first read section 585 (*now* 587) it seemed to me to be the weakest section in the whole Bill; I was, therefore, not a little surprised to find that the recommendations embodied in it were taken from the report of the Building Commission which was presided over by an eminent Judge of the High Court, and I am still consoling myself with the hope that the learned Judge is not really responsible for them, and that he was not one of the majority who signed the report which has just been read by my hon'ble friend. With all deference to the judgment of the majority of the Commission, they seem to me to be very weak and very halting recommendations. Let me read one statement; it is as follows:—

'The extravagant prices which the Corporation has been made to pay for property acquired by it have arisen from the interpretation put by the Courts upon the decision of the High Court of Calcutta in the case of *Premchand Burul v. Collector of Calcutta* (I. L. R. 2 Cal. 103). The words "market value" *occasionally* lead to difficulties. In the case to which we have referred, it was held that the fairest and most favourable principle of compensation to the owners was to enquire "what is the market value of the property, not according to its present disposition, but laid out in the most lucrative and advantageous way in which the owners could dispose of it." This *expression of opinion* has induced the Courts to assess lands at a price in excess of what owners would ordinarily have obtained for them in the market. We think it *not unfair* that for the purposes of land acquisition land should be valued according to its disposition at the time the declaration is made. *In the opinion of the majority of us* if it be shown that, before the declaration is made, the owner had taken active steps towards a more favourable disposition of the land, and had spent money for that purpose, further compensation might be given to him, such compensation being based on his actual loss."

"When I read this, the first question I am tempted to ask is, have the gentle men who sign this report any notion that this so-called expression of opinion i not an *obiter dictum*, that the same view has commended itself to the Judicia Committee, that this is the law administered by all the High Courts throughou India, and that in an appeal from the Madras High Court the Privy Council hav laid it down as the most equitable and fair view to be taken in these Lan Acquisition cases. (L. R. 20 I. A. 80.) But the report is careful to add that onl a majority of the Commission is responsible for this recommendation, and I sti console myself with the hope that the learned Judge who presided over the del berations of that body was in the minority. My hon'ble friend has pointed ou that the effect of this section will be to introduce a provision which will nullif what has been the recognised law since 1876, for that was the time when th

decision by Sir Richard Garth and Mr. Justice Macpherson was pronounced. But let us not forget that, if this introduces a sweeping change, its operation will also be extremely anomalous; for, remember, it will not nullify the law outside Calcutta; it will not even nullify the law entirely in Calcutta; it will only nullify the law in Calcutta when a property is to be taken up by the Corporation. Suppose the East Indian Railway or the Eastern Bengal State Railway, or the Bengal-Nagpur Railway, or the Calcutta Port Trust, or the Government of Bengal want to acquire land for public purposes—these provisions will not be applicable; the law laid down by Sir Richard Garth will still be the law. Now is that a reasonable state of affairs? I affirm, without hesitation, that, if these changes are to be introduced, the most prudent course to follow will be to get the Imperial Legislative Council to amend the Land Acquisition Act.

"But, apart from these anomalies, let us examine the matter critically for a moment and see what it is that is intended to be done. Clause (*b*) provides that the market value of the land or building is to be taken according to the disposition of the land or of the building on the day of the publication of the declaration relating thereto under section 6 of the Land Acquisition Act. Let us illustrate the position by a concrete case. I have five bighas of land, four of which are let out and one bigha is lying waste. The Corporation of Calcutta is pleased to take up that plot of land. Am I to be told that because this one bigha is lying waste they are to pay me nothing for it? That was precisely the contention of the Government of Madras in the case I have just referred to. The Government of Madras wanted to take up a hill side on which there were some ancient monuments of considerable historical and antiquarian interest. The question arose how was the hill side to be valued? There were no data for ascertaining the market value, for, admittedly, the hill or anything like it had never been sold. The only way that ingenuity could devise was to base the calculation on the actual profit derived from the hill side. It was found that as a matter of fact a portion of the hill side was let out, and the rental derivable from that portion was Rs. 120. The contention of the Madras Government was that they were entitled to take up the entire hill side upon payment of a sum which represented the capitalised value of this annual rental of Rs. 120. That contention of the Madras Government found no favour with the District Judge, who proceeded upon the basis of the possible rental for the whole of the hill-side and not upon the basis of the actual rental received for the part let out to quarrymen. This view of the District Judge was approved by the Privy Council, and the method was described to be the best, if not the only one, for getting at the market value of the ownership. I must confess, Sir, that I have not yet heard any reason, good, bad or indifferent, why we should change a system which not only accords with common-sense, but is also supported by an authority of so high a character. Let us now take another illustration. I have a plot of bustee land which is let out to tenants from year to year. If it continues to be used as a bustee, it will bring me in perhaps Rs. 2 per cottah. If it is used as a building site it will be sold for Rs. 500 a cottah. Am I to be told that the Corporation are entitled to take up this land by paying me the capitalised value of a rental of Rs. 2 per cottah? These concrete cases, more than any abstract discussions, serve to bring out forcibly the absurdity of the proposed system, and further illustrate the danger of legislating without due advertence to the mischievous consequences which may result in a variety of actual instances. I entertain no doubt as to what would be the inevitable fate of propositions like these if they were attempted to be incorporated into the statute book in any other legislative assembly.

"I now purpose to discuss the provisions of clause (*d*), which provides as follows:—

'The market value of the land or building shall, until the contrary is shown, be presumed, for the purposes of the said clause *first* of sub-section (*1*) of section 23, to be twenty-five times the annual value of the property, as entered in the assessment book prescribed by this Act.'

"I can well anticipate that my hon'ble friends to the right will say that this is not a matter of vital importance, as it does not purport to embody any hard-and-fast rule of law, but simply introduces a rebuttable presumption. That looks very fair at first sight, but it is, or at any rate ought to be, well

known that it is one of the elementary principles of jurisprudence that you ought not to introduce into the statute book a presumption which is untrue in the majority of instances. I hope you will not be surprised if I undertake to prove to you in the course of a few minutes, if you will bear with me so long, that this presumption really bears that character.

"Now let us turn for a moment to section 148A (*now* 150), which defines the principle upon which annual value is calculated. We had an animated debate upon that section, and we may, all of us, be presumed to be familiar with its provisions. It will be remembered that it deals with the assessment of all classes of buildings. Clause (*a*) deals with buildings erected for letting purposes; clause (*b*) deals with buildings not erected for letting purposes and not ordinarily let. Take clause (*b*) first. Suppose the Corporation wishes to take up a building erected last year for Rs. 10,000 and which comes under clause (*b*). It has been assessed by the Corporation on the estimated present cost of erection, 5 *per cent.* upon which is Rs. 500; that is the annual value entered in the municipal assessment book when the Corporation proposes to acquire it under this section. The Corporation has to pay twenty-five times Rs. 500 or Rs. 12,500. Now, in the name of common-sense, I ask why this presumption is to be introduced into the law so that the Corporation is forced to pay more than it would otherwise have to pay? In every single case under clause (*b*) this presumption will operate to the disadvantage of the Corporation. I, therefore, affirm without hesitation that you ought not to introduce into the law a presumption which will be untrue in all the cases covered by sub-section (*b*) of section 148A (*now* 150).

"Let us now turn to clause (*a*), which deals with the case of buildings erected for letting purposes: in such a case you will remember that it is not the actual rental which is the basis of the valuation, but it is the rental paid by the hypothetical tenant to whom it is imagined to be let from year to year. Now a building which is fifty years old and a building which was erected yesterday may be let probably for about the same sum to tenants from year to year. If I rent a house for a year, whether the house is fifty years old or whether it was built yesterday, is just the same to me, provided it is in a good state of repair. The monthly rental may be the same for a house built yesterday and a house built fifty years ago, but the market value of the houses would be widely different. Old houses would probably require substantial repairs every two or three years, and, at no distant date, may have to be entirely taken down and rebuilt; therefore, no one will pay the same amount for an old house as for a house built yesterday. Now, is it soberly and seriously intended that the same value should be paid by the Corporation in both cases? My hon'ble friends will say that the section does not say so; it embodies only a rebuttable presumption. I know what a presumption means in the hands of Judges and how imperceptibly it tends to crystallise into a rigid, inflexible rule of law. The litigant who is called upon to negative it, indeed, finds himself in an unfortunate position. I ask, again, why do you say that it is absolutely necessary to place a presumption upon the statute book which will be proved to be untrue in the majority of cases? It has not been proved, it has not even been alleged, that any necessity for such a provision has been felt. The Hon'ble the Legal Remembrancer possesses, I believe, the widest experience in Land Acquisition cases, and I feel sure that he will bear me out when I say that he has never had the smallest difficulty in determining the market value of a building in the hundreds of cases which have come before him under the law as it stands at present. I am certain, Sir, that this presumption if introduced into the law will be a fruitful source of mischievous litigation, and will needlessly involve the Corporation in a ruinous and lamentable waste of their funds."

The Hon'ble Mr. Oldham said:—"Owing to the very unexpected turn the argument has taken, my reply to this amendment must be quite distinct in regard to clause (*c*) and clause (*d*). I will first premise the observations I am about to make by saying that no one can complain that the maxim quoted by the Hon'ble Babu Surendranath Banerjee from Lord Truro has not been very fully observed by the Courts in this country, because the scale of compensation which has been allowed has certainly not erred on the side of stinginess. The other day the Hon'ble Babu Surendranath Banerjee told us that he was a citizen first and a

member of the Corporation afterwards. In this particular instance he has shown himself to be a member of the Corporation first and a citizen afterwards; for it is the citizens who will have to pay. This section is, I may frankly admit, a deliberate attempt to change the law. Whether, as the Hon'ble Dr. Asutosh Mukhopadhyaya says, the law will only be changed for the Corporation, and that the Port Trust, the East Indian Railway, the Eastern Bengal State Railway and the other Railways will continue to acquire land under the present law, does not, as I understand the matter, affect our deliberations. Those bodies must look out for themselves. If the law is changed for the Corporation, the Corporation will be so much the gainers. Perhaps if I read out in a tone of approval the extract from the Building Commission's Report which my hon'ble friend Babu Surendranath Banerjee has read out in such a denunciatory tone, it may have a somewhat different meaning to the Council. My hon'ble friend wanted to infer that this opinion was not concurred in by the Indian members of the Commission because it was expressly said to be the opinion of the majority. Well, all I can say in that connection is that in his elaborate Note of Dissent Babu Nalin Behari Sircar does not once refer to the subject, and I do not think the inference which my hon'ble friend has drawn can follow, because I find that as regards section E the only dissentient member was the Hon'ble Mr. Glass."

The Hon'ble Babu Surendranath Banerjee said:—"Babu Nalin Behari Sircar himself told me that he was opposed to it."

The Hon'ble Mr. Oldham said:—"Yes, but I am speaking now with regard to the inference drawn, so that I am not sure that the dissentient might not have been Mr. Risley himself. However that may be, what the Commission said was this:—

'The extravagant prices which the Corporation has been made to pay for property acquired by it have arisen from the interpretation put by the Courts upon the decision of the High Court of Calcutta in the case of Premchand Bural and another *v.* The Collector of Calcutta, I. L. R. 2 Cal. 103.'

"My hon'ble friend has himself admitted that the compensation awarded in *Premchand Bural's* case was outrageously excessive. It is solely with the object of saving the citizens from such outrageous excesses that this provision is proposed.

"As regards the case of Ballygunge cited by my hon'ble friend Babu Surendranath Banerjee, I do not understand that the law will be interpreted as he surmises it would be. But after all the owners of land in Ballygunge cannot demand that the citizens of Calcutta should have to pay for their land the utmost possible prospective value which it might some day possibly be worth. It must be taken at a reasonable value; it must be taken at its immediate and probable value in the market. The market value still remains the standard. I am not prepared to affirm, Sir, that I can incontrovertibly defend the somewhat stringent words with which this clause ends after the very strong case made out against them by the Hon'ble Member for the University, although I am not wholly convinced by his arguments. Take the case of the five bighas, where one in the middle was waste and four let to tenants. I think that the owner would be able to show his intention with regard to that middle piece of land, and that the value would have to be assessed according to his reasonable and manifest intentions. However, as I have said, I am not an out-and-out advocate for the concluding words of this clause.

"As regards clause (*d*), Sir, which presupposes the presumption of twenty-five times the annual value, I am in agreement with my hon'ble friend. The proposals of the Building Commission on that subject were that twenty-five times the annual value should be taken as perhaps the best rough-and-ready means for arriving at an assessment. The Hon'ble Mr. Glass thought that twenty-five times the annual value was excessive, while Babu Kally Nath Mitter thought twenty-five times would be too low. I remember the Hon'ble Mr. Turner said in Select Committee that in his experience twenty times the annual value would be the proper amount, and the answer given to that was that he was probably thinking of joint holdings and of a house standing on land as well as the value of the land. We agreed as a sort of compromise to have twenty-five

times the annual value, thinking we were meeting the wishes of our colleagues, the Indian members. In the course of my experience twenty-five times has never been exceeded in any land acquisition proceedings. If anything over twenty-five times came before the land acquisition authorities, they would immediately ask for an explanation. I think that perhaps twenty times would be a fair substitution as suggested by the Hon'ble Mr. Turner. As regards the rule, the Hon'ble Member for the University has already set us an example in his amendment the other day. I refer to his amendment to section 347A (*now* 357). It was intended to provide how an annuity payable by the holder of land belonging to a Corporation was to be capitalised, and the Bill provided for its being capitalised according to its actual value. My hon'ble friend suggested as a rough-and-ready working rule 25 years' purchase. The Hon'ble Member in charge of the Bill conferred with me on the subject. We thought those were rather favourable terms, and, though probably a little below the actual value, we thought it desirable to accept them. The forming of a working basis by legislating with a presumption of this sort is very desirable. In this connection I would like to ask my friend the Hon'ble Babu Surendranath Banerjee's attention to the Land Acquisition Act itself. The provisions under which the officer, regarding whom he expressed such genuine panic on Saturday, can act, are contained in section 11, and section 11 only obliges him to award the compensation which in his opinion should be allowed. It is section 23 which lays down more precise conditions which are to guide the Courts and to limit the Court's judgment in the matter. The working plan as it has been in practice is very much this. The Land Acquisition Deputy Collector works in constant dread of the Civil Courts. If a reference has to be made to the Civil Court, and if the Civil Court's award is different to what he proposed, that result is a reflection on his character and discretion; so that he has constantly to ask himself what the Civil Court will do in such and such a case. So that if twenty times—or whatever the figure which the Council may ultimately agree to adopt—is inserted in section 585 (*now* 557) of the Bill which does not directly affect or govern the proceedings of the Land Acquisition Deputy Collector, he will constantly have to bear it in mind, because he has constantly to ask himself what the Civil Court will do. He will know that the Civil Court will have this presumption before it, and he will have a fair starting point, and it may be assumed that twenty times will be almost invariably taken as his basis. Whether that is too high a basis is a point for the members of the Corporation to consider and discuss."

The Hon'ble Mr. Handley said:—"I should like to say a few words, as the Hon'ble Member for the University has appealed to me. I can certainly support what my friend has said on the point that the Civil Courts have no difficulty in ascertaining the market value of land. The only point is that it takes some time and a great deal of expense both in the Civil Court, and subsequent to appealing. As I understand this section, it is intended to try and do away with all that delay and expense of litigation by furnishing a rough and ready presumption of 25 years' purchase, and, more over, the Hon'ble Member must have seen that it says 'until the contrary is shown.' So that it still leaves it open to the Civil Court to determine what may be the actual market value of the land. In the proviso there is a safeguarding of the interests of the occupier or owner when it says:—

'Provided that this presumption shall not be made in respect of any land or building until a re-assessment has been made after the commencement of this Act, for the district in which such land or building is situated.'

"So that the intention is to give the best value of the land at that particular moment, but as regards the first clause (*c*), there is certainly a good deal to be said on both sides. The Hon'ble Mr. Oldham has told us that the executive rather dread the decision of the Civil Court. I am not sure that it is so. On the other hand, the public whose lands are taken may not be thoroughly satisfied with the result, and, whatever that result may be, either party has its remedy. If the Collector thinks that the Civil Court has given too much, he has his remedy of appeal just the same as the claimant has if he considers the Civil Court has given him too low a value. So that, if the Civil Court

goes wrong, either party has a perfect right of appealing to the High Court; but as regards this particular wording, to which the Hon'ble Member has taken such exception, the Hon'ble Mr. Oldham said that this was specially introduced to meet the difficulty in *Premchand Burai's* case. In that case it was said that to capitalise the present rental of the property at so many years' purchase was not always a fair way of arriving at the market value. Nor do I think that in practice you will meet with much difficulty. The cases to which my friends have referred, not only *Premchand Burai's* case but the *Harrison Road* case and the case of *Monindro Nath Chatterjee*, must be well-known to many, and also the case that occurred the other day, the extension of the General Hospital. In that case there was a filthy bustee occupied by sweepers and cowherds with their buffaloes, and when this bustee was removed and the case came into Court, the first witness that stepped into the box was an Engineer, and he produced a beautiful plan on paper with most beautiful residential houses for Europeans which he said might be let at Rs. 300 or Rs. 325 a month, and on this basis they advanced a most enormous claim to this land. At that time this ruling would apply to them, and I may say I myself decided that case, and this principle the Hon'ble Member for the University says will be brought in into the system. I am glad it will, because I do not quite follow the rule in *Premchand Burai's* case, so that he will have an opportunity of seeing that question soon decided. In *Premchand Burai's* case, as well as I remember, just as in the *Harrison, Road* case and in *Chatterjee's* case, there were some active steps taken, as the Building Commission says, to improve the property. In *Aghore Nath Chatterjee's* case, the parties laid the foundations and were going to build a huge lodging-house. It was on that basis that such a very large award was given by the District Judge. In this case of the Hospital extension nothing whatever was done. No active steps had been taken; nothing was shown that such an idea had entered the mind of the owner to build such residences on that land; and, if you do not draw a line somewhere, you might take up a bustee and the parties might come forward with beautifully drawn plans and say they were going to start a jute mill and ask for compensation upon the scale of possible profits on the jute mill with so many looms. Where are you to draw a line? This, I understand, was the idea that was in the mind of the Building Commission, that if an owner really had shown a disposition by taking active steps to improve his property, then that would be taken into consideration in awarding compensation. But if he had done nothing whatever than claim what we call a fancy price, how are you to estimate such a disposition as that when he comes forward with a plan showing he is going to start a jute mill or a cotton mill or residential houses or even the Bengal Club there? Any proposition of law might be put forward in the Courts, and if they were to take *Premchand Burai's* case in its widest meaning, the Court might be bound to give compensation on that scale. Therefore, I understand, this limitation is particularly against that: 'the disposition at the time it is purchased,' that is, such purpose to which it might reasonably be put or to which the owner had such intention of putting it: not a fancy idea that might arise when the land was taken up by Government to enhance its price and to put a fictitious price upon the land by getting up some scheme which never had any existence before except perhaps on paper."

The Hon'ble Mr. Baker said:—"When the Hon'ble Members who moved these amendments were dealing with clause (*c*) they referred to the inadequate amount of compensation that would be paid on account of gardens and waste or unoccupied land. The Hon'ble Babu Surendranath Banerjee referred to the case of a piece of garden land in Ballygunge, which he said actually brought in Rs. 5 a month or Rs. 60 a year, and he said that, if clause (*c*) was allowed to stand, the owner would only get compensation on that basis. The Hon'ble Member for the University referred to a case which occurred in Madras about some hill which was absolutely waste, and he wished to know whether Government would be entitled to take it up practically for nothing, because it brought in nothing to the owner. Now, Sir, the answer in both those cases is that they would be governed not by clause (*c*) but by clause (*d*). In the case of the

garden at Ballygunge, the Hon'ble Member who referred to it did not tell us what the annual value was as entered in the municipal assessment register. Now, under clause (*d*), the presumption is that the compensation to be paid is twenty-five times, not the actual letting value, not the actual return for the moment, but twenty-five times the annual value, as ascertained by the Municipal Assessment Department and entered in the assessment register. This is an entirely different thing. The actual annual value and the actual letting value of houses may be an entirely different thing from the annual valuation as determined by the Municipal Assessment Department."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"As a rule the actual letting value is the annual value."

The Hon'ble MR. BAKER said:—"The Hon'ble Babu Surendranath Banerjee is right. As a rule the actual letting value is the same as the rent paid by the hypothetical tenant, but in exceptional cases that is not so, and the cases that he has mentioned are precisely cases of that exceptional nature. As regards waste land unoccupied in the heart of the city, no one will for one moment pretend that although they are bringing in nothing to their owners at present, they are, therefore, worthless, and they are certainly not entered at *nil* in the municipal assessment register. The Hon'ble Dr. Asutosh Mukhopadhyaya referred to the case of two houses, a new house and an old house of 50 years old. Both of these may be letting for the same rent at the same moment; they may both let for Rs. 100 a month. He asked the Council whether it would be right that the same compensation should be paid for the old house as for the new one? That is exactly a case of the kind which was covered by the decision the Council came to under section 148A (*now* 151). The annual valuation of the old house will be less than the annual value of the new house, and, therefore, the amount of compensation payable under clause (*d*) of this section will be greater in the one case than in the other.

"Then, Sir, the Hon'ble Member for the University pointed out that this 25 years' purchase presumption would operate unfavourably towards the Corporation in some cases, and he instanced the case of residential houses which was dealt with so thoroughly the other day. The Hon'ble Member is perfectly right. It is quite true that in those cases the number of years' purchase ought to be 20 years and not 25 years. It will be within the recollection of the Council that, when we were dealing with the determination of the annual value of residential houses, I produced letters which had been sent to me by Messrs. Mackintosh Burn and Company and Messrs. Mackenzie, Lyall and Company, and I showed to the Council that the annual return on house property in Calcutta was somewhere about 5 *per cent.* or a little more; and the Council accepted that view, and decided that the annual valuation of residential houses should be taken to be 5 *per cent.* on their estimated present cost of construction. Now to invert that decision, or to express it in a different way, the result of that is that the capitalised value of the annual valuation is 20 years' purchase; that is to say, it is twenty times the annual valuation as entered in the assessment register; and, Sir, I think the Council would be perfectly justified in following Mr. Oldham's advice and substituting 20 years for 25 years in clause (*d*). I imagine that the Hon'ble Member who moved this amendment would probably oppose any alteration of that kind. Babu Kally Nath Mitter said before the Building Commission that 30 years should be given. Why? He has given no reasons. The only reason why we should be justified in giving 25 years' purchase or taking that as the presumption is in order to soften the severity of the law of land acquisition. We know that in Calcutta there is a strong prejudice against giving up and being deprived of one's ancestral house, and it is a feeling which the Legislature will do well to take into consideration. I think that we ought not to reduce the number of years' purchase below 25, not because it would not be absolutely just, but because it would be felt as a hardship; but to give anything more than 25 years would be, I think, unfair to the rate-payers and unfair to the Corporation."

The Hon'ble MR. BOLTON said:—"The ruling in the case of *Premchand Burral* was passed under Act X of 1870, which provided for taking the market

value as it stood at the time of awarding compensation for the land. There is necessarily always an interval between the declaration that the land is to be acquired and the time of the award, the interval often extending for many months. During that interval owners of properties declared for acquisition had the opportunity of making various fictitious arrangements for the purpose of establishing a claim to higher compensation at the time of the award. The High Court had thus before them the fact that the law allowed the owners to make dispositions of their property before the award, when they delivered their judgment in *Premchand Bural's* case, and it is presumably for this reason that they ruled that such dispositions should be taken into account. The law was, however, amended by Act I of 1894, and in the first clause of section 23 it is provided that the market value shall be that value at the time of the declaration for acquisition. Owners can, therefore, no longer make dispositions of their property after that date, and the High Court's ruling has apparently ceased to apply. A fresh ruling under the new law should be awaited. The Building Commission might, indeed, have dispensed with recommending the provision under discussion, because section 23 of Act I of 1894 now to a great extent meets what they propose; that is, the market value is to be the value at the time of the declaration, and not at the time of the award. They apparently, however, desired to emphasize the fact that any disposition of the property subsequent to the declaration should not be taken into account in awarding compensation, and, as serving that purpose, I think that the present provision should remain in the Bill."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I quite sympathise with those remarks that the public ought not to pay for any malpractices on the part of a person with a view to raise artificially the value of the property. Therefore, the compensation ought to be paid upon the value of the property at the time of the declaration. If that is the intention of the section, why is it not specified?

The Hon'ble MR. BOLTON said:—"That is stated in the Land Acquisition law itself."

The Hon'ble MR. BAKER said:—"It is expressly stated in clause (*c*) of section 585 (*now* 557) of the Bill."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"What would 'disposition' mean?"

The Hon'ble MR. BOLTON said:—"The Building Commission apparently took the term from the ruling in *Premchand Bural's* case for the express purpose of protecting the Corporation from awards based on that ruling."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"Is it not covered by section 23?"

The Hon'ble MR. BAKER said:—"The words 'disposition of the land or building' mean the manner in which the land or building is being used. It is not a question of the date. The date is settled."

The Hon'ble MR. BOLTON said:—"Another provision of the present Act may be mentioned in support of the Building Commission's recommendation. It will be seen that section 24 of the present Act specially provides that the Court shall not take into consideration in awarding compensation any increase to the value of the land acquired likely to accrue from the use to which it will be put when acquired, that is to say, that the Court is not to take into account the possible gain which the owner of the property might have obtained at some future time."

The Hon'ble BABU JATRA MOHAN SEN said:—"I should like to add one or two illustrations to those that have been given by the Hon'ble Dr. Asutosh Mukhopadhyaya and the Hon'ble Babu Surendranath Banerjee. Take the case of a tank partly silted up near a road—and we have a very large number of

such tanks in the added area. If we take in valuing this land the present disposition of the property, it would be that that property is a nusiance. The only disposition that it has is a periodical notice calling upon the owner to cleanse it; and we all know that if this property was filled up and sold in the open market it would fetch the same price as any other building site; but if we are to apply the present clause (*c*) to that property, I think the Corporation would not pay anything to the owner, but on the contrary get something from him, because he has to incur periodically some loss and, perhaps, also to undergo prosecution under notices from the Municipality.

"Then, again, take the case of a building with a tank attached to it. In the added area we have many such tanks attached to buildings, which are, in fact, a nuisance to the buildings themselves. If the building is let to a tenant now, it will not fetch the same rent which it otherwise would if there was no tank attached to it. The man is not able to spend money to fill the tank, but if that tank was filled probably he would get a higher rent. Now if he was willing to sell the tank and the house to a willing purchaser, the latter would pay not only for the building but also for the tank, and if he was able to build a new building altogether on a new model, he would pay a very much higher price; but if the Corporation is going to acquire it, the Corporation will only pay, say, twenty times or twenty-five times the rent that he is receiving now. That will be, I submit, an injustice to the owner of the property, because if he sells it to a willing purchaser in the market, he gets much more than is provided for in this section.

"Then, again, if we take the illustration which was given by the Hon'ble Dr. Asutosh Mukhopadhyaya, the illustration of five bighas, four bighas of which are occupied by tenants and one is waste. I think if the property was sold in the open market the one bigha which is waste would fetch a higher price than the four bighas occupied by tenants, for their trouble would be to turn out those tenants. But under the present sub-sections (*c*) and (*d*) probably he would get a very low price, because the present disposition of the property yields nothing.

"Then a reference was made to the report of the Building Commission, that if an owner took active steps to improve the property, probably just before the declaration, he would be entitled to a much higher price, but that has been again nullified by the third recommendation in asking the Legislature to enact proviso (*iii*) of clause (*c*), which provides that—

'if the market-value has been increased by means of any improvement made by the
Mack owner or his predecessor in interest within two years before the aforesaid declaration was
d I showed such increase shall be disregarded, unless it be proved that the improvement was
ewhere ab *fide* and not in contemplation of proceedings for the acquisition of the land or
published ided aken under the said Land Acquisition Act.'
made *bonâ f* ent. on the entire onus upon the man to prove in the first place, which
building being n, or to rule of law, that the improvement was made *bonâ fide*.
Thus throwing of ion is to prove that the improvement was not made

The Hon'ble BABU BOIKANTA NATH SEN said:—"After what has been urged
will go against the settled rulings of th ick I ought to take up unnecessarily the
by my hon'ble friends I do not think

time of this Council, but what I beg to submit, Sir, is this. Clause (c) is either unnecessary or is in contravention of the provisions of Act I of 1894. In section 23 of that Act, we find that in 'determining the amount of compensation to be awarded for land acquired under this Act, the Court shall take into consideration the market-value of the land at the date of the publication of the declaration relating thereto.' Here we find this additional clause :—

'The market-value of the land or building shall be deemed, for the purposes of clause *first* of the sub-section (*1*) of section 23 of the said Land Acquisition Act, to be the market-value according to the disposition of the land or building at the date of the publication of the declaration relating thereto under section 6 of the said Land Acquisition Act.'

"Has this sentence any meaning? 'According to the disposition of the land or building.' If it be said that it is co-extensive with the first clause of section 23, then it is unnecessary. If, on the other hand, it is contended that it has some meaning, what is the meaning? It would be restricting the Courts in respect of matters which they have to take into consideration, and which they shall not take into consideration under sections 23 and 24. Section 23 provides that in awarding compensation certain matters shall be taken into consideration. Section 24 provides that certain matters shall not be taken into consideration. Now, the Hon'ble Mr. Bolton has referred to the fifth clause of section 24. I would ask why is this provision here again: 'any increase to the value of the land acquired likely to accrue for the use to which it will be put when acquired.' The wording may not be identical, but it is the same. My contention is that, if it be said that this is merely a reproduction of the provisions of sections 23 and 24, then it is unnecessary. If the phrase 'according to the disposition of the land or building' has any particular meaning, then I submit it would be restricting the powers of the Court in fixing compensation so far as they at present enjoy under the existing law, and if it be in any way in contravention of or in conflict with the existing Act, I submit it is a matter for the consideration of the Council whether an India Council Act can be thus superseded, repealed, practically, or interfered with or modified by an Act of the Provincial Council. It may be a question, it will be perhaps a very nice question, for lawyars to discuss hereafter whether this would not be *ultra vires*. I leave this to be considered by the Council. Then it strikes me if the provisions intended to be introduced by in any way in direct conflict with or in contravention of the provisions of the existing law which is embodied in an Act of the Supreme Council, the authority of that Council should be obtained."

The Hon'ble Mr. Baker said :—"In introducing this Bill we received the sanction of the Government of India to these clauses This Council has the power to modify an Act of the Government of India with the sanction of that Government"

The Hon'ble Babu Boikanta Nath Sen said :—"Under the existing rules a preliminary sanction has been taken, but the question even then will arise whether this sanction would cure any defect which would exist if this be found to be in any way contravening or being in conflict with the existing law embodied in that.

"With regard to clause (d),—and here I may say that I do not wish to waste the time of the Council, especially as the Members of Council are very anxious to go away, and more especially those like myself who come from the mufassal,—it appears to me that there is a latent desire and an indirect attempt to prevent fraudulent under-valuation effected by the rate-payers by resorting to unfair means in getting an under-assessment, and I fully sympathise with that. If people come to know that the valuation made in the assessment book would be taken as the standard for the purpose of awarding compensation when cases of land acquisition arise, they would think thrice perhaps before they make any attempts by resorting to unfair means to have their holdings under-valued. I think it will have a direct effect from that point of view, and so far I thoroughly agree; but the question is whether the valuation in the assessment book ought to be taken as the standard. When this Act, I of 1894, was passed, I have no doubt Hon'ble Members will remember there was a great deal of discussion about the fixing of the market value. It was a very

difficult question, and, therefore, it was that in that law those two sections were embodied. Certain matters will have to be taken into consideration; certain matters will be excluded from being taken into consideration. It left the Courts entirely at liberty in the application of equitable principles to fix the assessment according to the circumstances of each case. Now here the Courts will be handicapped. It has been observed by the Hon'ble the Legal Remembrancer that perhaps the law's delay would be avoided to a certain extent. That may be, but the provision won't be equivalent to a stereotyped hard-and-fast rule that this is the annual value which is to be put down in the assessment book, and this is to be the guide. I believe, and I fear, it will act injuriously both for the Corporation and for the rate-payers. I say also that it is not a safe standard; it is not a judicious standard to be adopted. This question ought to be left for decision by the Courts having regard to all the circumstances of the case. Delay may take place; the law's delay is proverbial, and so long as the law will have to be administered in any country there will be delay, you cannot cut down the delay in this way. I submit, therefore, that both these clauses ought to be left out."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"I do not wish to get entangled in the meshes of a legal controversy, because if I do get entangled in such a controversy it will be difficult to get out of it. It has become abundantly clear in the course of the debate that no case whatever has been made out for any change of the law. My friend the Hon'ble Member for the University appealed to the Hon'ble the Legal Remembrancer as to what his experience of these cases was, and he said that, working under the existing law, he had found no difficulty whatever, and the only difficulty that ever arose was in connection with the delays that were caused by the operation of the present law. You have already passed a section which avoids those delays, and, therefore, it seems to me that, so far as the practical working of this law is concerned, no difficulties having been felt, there is no justification for this important modification in the law, which is unique and unprecedented, which has no analogy in the municipal legislation of the Empire or of the civilised world. I challenge Hon'ble Members to refer to a single Municipal Act where such provisions in land acquisition proceedings find a place. Therefore, it seems to me that absolutely no case has been made out; and then, Sir, not only has no case been made out, but the whole volume of opinion, the balance of argument, is entirely adverse to the enactment of these provisions. Our contention—I do not know whether we have been able to make the point clear—is this: the present law has worked well; do not have any hard-and-fast rule based upon assessments which are untrustworthy and unreliable; these will lead to difficulties and complications, and, in some cases, the provisions of the Bill will be attended with loss to individuals, in some cases with loss to the Corporation. Why take a leap into the unknown? I think, Sir, this is common sense, especially having regard to the fact there is very strong feeling against these provisions.

"One word about the question of valuation to which the Hon'ble Member in charge of the Bill referred. The Hon'ble Member said that with regard to the waste lands to which I alluded in the course of my observations, the municipal assessment books must have an annual valuation. I do not know what municipal assessment books contain or do not contain. The municipal assessment books are made up by irresponsible parties, though no doubt they are subject to the supervision and control of the Assessor. But the Assessor cannot look into the minutiæ of these assessments, and I say it is positively dangerous to make the allotments of compensation depend upon these assessments. My hon'ble friend referred to the annual valuation of an old house and of a new house. And he said there must be a difference in the assessment book. I say no if both the houses are let on hire, and my reasons are these: the annual value in both cases would be dependent upon the letting value—the value upon which the old house and the new house are let. The old house lets for Rs. 100 a month, the new house also lets for Rs. 100 a month, because people do not make a distinction in that way. Therefore the annual value being dependent upon the letting value, the annual value will be the same figure in the one case as it will be in the other case. Therefore any compensation

paid upon the basis of the annual value would be exactly the same in the one as in the other case. Therefore the compensation paid for the old house would be exactly the same as the compensation paid for the new house. If the compensation paid for the new house is inadequate and insufficient, the compensation paid for the old house is excessive and extravagant. How my friend the Hon'ble Member in charge of the Bill persuades himself into an opposite line of argument and an opposite line of conclusion is one of those mysteries which I have not been able to understand. The conclusion seems to be plain and palpable. In some cases there will be loss to the Corportion, in others loss to the public, and it seems to me unnecessary altogether to introduce a change in the law."

The Hon'ble Dr. Asutosh Mukhopadhyaya, in reply, said:—"I cannot conceal, Sir, that my experience in connection with this debate has been of a very novel character. Each of the four hon'ble gentlemen who spoke on the Government side has made admissions which, when taken together, completely destroy the Government cause. This is a startling statement to make; but I shall show presently that there is no exaggeration whatever. It will be convenient, however, if we specify what those admissions are, and deal with each of them separately.

"The Hon'ble Mr. Oldham endeavoured to meet the concrete case put by me so far as clause (*c*) was concerned. Clause (*c*), it may be remembered, deals with the case of the present disposition of the land and building, that is to say, the disposition of the land and building at the date of the publication of the declaration. I gave as a concrete illustration the case of the waste land. My hon'ble friend said there will be some means of valuing it. No doubt there is a means of valuing it, but the law expressly says that you are not to value it, you are not to look to its potential value, but you are to look to its disposition at the time of the publication of the declaration. I am constrained to say, Sir, that my hon'ble friend has given no answer whatever to my argument. Then he takes clause (*d*), and there he frankly confesses that my arguments are unanswerable; but what is the remedy he suggests? Reduce twenty-five to twenty! I am quite willing to take that if he will fall in with my views in their entirety. I pointed out that, so far as clause (*d*) was concerned, twenty-five times the annual valuation in the case of residential houses would certainly involve the Corporation in serious loss; but I also pointed out that twenty-five times in the other case would involve the rate-payers in equally serious loss. My hon'ble friend did not advert to this latter part of my argument, and I have the strongest objection to his adopting the first half of my argument and abandoning the other half when the two together really form one indivisible whole.

"I now turn to the observations of the Hon'ble the Legal Remembrancer, who in answer to me admitted that there was no difficulty in administering the present law, except for the delays which are unavoidable; and he ventured to indulge in the hope that if the presumption which is embodied in clause (*d*) is incorporated in the statute book, such delay will be avoided in future. I venture to think, however, that the result will be just the other way. Under the existing law, when there is no presumption whatsoever, District Judges are allowed to deal with the particular facts of the case they have before them. Under the new law they will be hampered with this additional presumption, which I have shown may be successfully challenged in the majority of instances, and, therefore, the preliminary question in every case will be whether the presumption is applicable or not. Either the Corporation or the rate-payer, whosoever may be interested to do so, will, in the first instance, endeavour to destroy that presumption, and once it has been destroyed the whole operation which has to be performed under the existing law becomes inevitable. Then the Hon'ble the Legal Remembrancer pointed out another very important clause which I had overlooked, namely, that there is a proviso to clause (*d*) that the presumption that the market value is twenty-five times the annual value of the property is not to come into operation till there has

been a fresh re-assessment after the commencement of this Act. It will be in the recollection of the Council that the other day they accepted my amendment to section 148B (*now* 152), in which they specified the dates upon which the assessments made under the present Act are to terminate in each of the wards of the city. I have already pointed out to you that this presumption is not applicable to all cases in Calcutta; but I now desire to point out, what is still more anomalous, that this presumption will be applicable to different wards on different dates. Take ward No. 10. There the existing valuation comes to an end in March, 1900, so that till then no presumption will apply there. Take ward No. 6. There the valuation comes to an end in 1901. In some of the wards the valuation will come to an end so late as 1906; so that I take it the consequence of this new law will be that in the case of land acquired by the Corporation in 1905 on one side of a street the presumption will apply; in the case of land taken on the other side of the street no presumption will apply. Therefore, not only is it true that you have not one presumption applicable to the whole of Calcutta, but you have one presumption applicable to the Corporation, another to other people, and you have this presumption coming into operation in different parts of Calcutta on different dates ranging from 1900 to 1906. I do not think this is an invention of which any Legislature will be proud.

"I shall next deal with the observations of the Hon'ble Member in charge of the Bill. I devoutly wish, Sir, that instead of being a Member of the Covenanted Civil Service my hon'ble friend had been a Member of the Bar, for he would have been the best defender of bad cases. My hon'ble friend in answer to my argument pointed out, with his usual acuteness, that the cases to which I referred will be covered by clause (*d*); that is precisely my objection. Clause (*c*) and clause (*d*) contradict each other. What is the remedy you propose to apply in the case which is covered by each of the two clauses (*c*) and (*d*)? Clause (*d*) provides that—

'The market value of the land or building shall, until the contrary is shown, be presumed, for the purposes of the said clause *first* of sub-section (*1*) of section 23, to be twenty-five times the annual value of the property, as entered in the assessment-book prescribed by this Act.'

"Well and good. A parcel of land is valued in 1901; it is acquired by the Corporation in 1906; if you apply the presumption in clause (*d*), the market value in 1906 is twenty-five times the annual value as assessed in 1901; but the rule in clause (*c*) also applies, so that you must proceed on the basis of the disposition of the land in 1906. Now, if circumstances have changed in the meanwhile, the valuations obtained by the two processes will be different—a necessary consequence of the fact that you have one presumption in clause (*d*) and another rule laid down in clause (*c*). You have clearly two presumptions which contradict each other. Therefore, before the present law can be applied, you will have in every individual case to test the presumption which arises. My hon'ble friend next said, as regards my illustration of the new house and the old house, that the annual value will be different in the two cases. I submit with great respect that this is begging the whole question. Remember that, under section 148A (*now* 151), the principle upon which you proceed is the letting value, not in the case of a lease for a term, but a lease from year to year; that is to say, whether the house be old or new, you have to see what amount of rental would be paid by a tenant who took it only for a year; and whether the house be old or new, if it is in good repair, he will pay the same amount of rent in the two cases. Of course, if you proceeded upon the basis of a lease for a term, say, for ten years, the result might be different; for it would make considerable difference to a tenant who wants a lease of a building for a long term, whether the house is old or new. But so long as you proceed on the basis of a yearly tenancy, the annual value of the old and the new house, as entered in the municipal assessment roll, is bound to be identical, unless, indeed, such assessments are based on some novel and arbitrary principle. I repeat, therefore, that when my hon'ble friend assumes that the valuations in the two cases will be equal, he assumes the very thing which I challenge and which has to be proved.

"Lastly, I must take the observations of the Hon'ble the Chief Secretary. If I understood him correctly, he said that the law as laid down by Sir Richard Garth had been altered by the Act of 1894. Assume this to be the right view; the present provision, then, is a wholly unnecessary piece of legislation, and should be abandoned. But, as a matter of fact, the change in the law has not the remotest bearing upon the present question. Under the law of 1870, the market value had to be ascertained at the date of the award; under the law of 1894, it has to be ascertained at the date of the declaration. But the question now before the Council is whether you are to regard the actual disposition at the date when the declaration is made or any possible disposition of the property. In the judgment of Sir Richard Garth, the learned Chief Justice did not dwell at all upon the fact that under the law as it then existed the property was to be valued, not at the time of the declaration, but at the time when it was actually taken up and the compensation awarded. The point for discussion was, are you to consider the state of the property at the date when it is acquired or estimate its value with regard to any possible use to which it might be put, not between the date of the declaration and the date when it is actually taken up, but any possible use to which it might be put by the owner at any time if the property instead of being acquired for public purposes continued in his possession? That is quite clear from section 23 itself, which provides that you are to take the market value of the land at the date of the declaration. What you are now seeking to do is arbitrarily to define this market value and to put a further restricted meaning upon it. Let me put a concrete case before the Council. Here is a bustee which you want to take up. The owner says that its market value has to be determined at the date of the declaration. He contends that if a person purchased it he would have to pay for it, not what it may bring him in as a bustee, but what it would bring him in as a building site. If he can make that good under the existing law, he will be entitled to get from the party who takes up the land compensation on the basis of valuation upon the footing of its being used for a building site; in other words, if he can make out that the particular plot of land may be used as a bustee or may be used as a building site, the market value will be assessed on the basis of a building site. You change this under the new law and provide that when the Corporation acquires the property used as a bustee, there is to be no reference to any prospective disposition. You do not adhere to the provisions of section 23 of the Land Acquisition Act, you substantially change them in favour of the Corporation alone. But, in your anxiety to favour the Corporation, you manage to contradict yourself. In section 585 (*now* 557) you attempt to define market value with reference to the annual value as determined for purposes of assessment. You apply your definition to houses let from year to year, but you overlook that, when the question of assessment of these very houses was discussed, you declined to accept my suggestion that such assessment should proceed on the basis of the market value. In one part of the Bill, you declare that there is no relation between market value and rateable value; in another part of the Bill, most inconsistently, you make the one depend on the other; in other words, there is one mode of valuation when property has to be rated, another mode of valuation when it has to be confiscated; in each instance, the citizen is the loser and the Corporation the gainer."

The Hon'ble Mr. Baker said:—"May I be permitted to say one word in reply with reference to what fell from the Hon'ble Babu Surendranath Banerjee and the Hon'ble Babu Boikanta Nath Sen. It is with reference to the section as a whole. It is this. In Calcutta, unlike any other part of Bengal, we have the whole area to which the land acquisition provisions can apply, carefully assessed in the ordinary course of business by a special establishment. All those assessments are subject to the right of the owners first to lodge an objection to the Vice-Chairman, and, finally, to an appeal to the Small Cause Court; and we may take it that on the whole the assessments are most carefully and most accurately made, the interests of both parties being carefully safeguarded. Surely it is a matter of common sense when the Corporation comes to take up land whose value has been determined in that way, that the value to be awarded should depend in some way or other upon the assessment previously made."

The motions being put the Council divided as follows:—

Ayes 6.

The Hon'ble Raja Ranajit Sinha, Bahadur, of Nashipur.
The Hon'ble Babu Jatra Mohan Sen.
The Hon'ble Babu Boikanta Nath Sen.
The Hon'ble Babu Surendranath Banerjee.
The Hon'ble Mr. Apcar.
The Hon'ble Dr. Asutosh Mukhopadhyaya.

Noes 12.

The Hon'ble Mr. Buckley.
The Hon'ble Mr. Buckland.
The Hon'ble Mr. Handley.
The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Mr. Mackenzie.
The Hon'ble Mr. Spink.
The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
The Hon'ble Mr. Oldham.
The Hon'ble Mr. Baker.
The Hon'ble Mr. Bolton.
The Hon'ble Mr. Slack.

So the amendments were lost

The Hon'ble Mr. Baker said:—"Before the next amendment on the paper is proceeded with, may I be permitted to move the following proviso to clause (*b*) of section 585 (*now* 557). It was alluded to when we were dealing with that clause. I said then that I would be willing to make it clear that compensation for sudden disturbance should be allowed, and I think the general idea was that that ought to be done. The Secretary has drafted the following proviso:—

'When proceedings have been taken under the said section 17 for the acquisition of any land, and any person sustains damage in consequence of being suddenly dispossessed of such land, compensation shall be paid to such person for such dispossession.'"

The Hon'ble Babu Surendranath Banerjee said:—"I gladly accept the amendment."

The motion was put and agreed to.

The Hon'ble Babu Surendranath Banerjee said:—"Before I move my next amendment, I should like to ask the Hon'ble Member in charge of the Bill whether he will accept it or not. If he does not accept it, I do not see the use of going on with it. The amendment is as follows:—

'that for the words 'two years' the words 'one year' be substituted in line 5 of proviso (*iii*) to section 585.'"

The Hon'ble Mr. Baker said:—"I do not accept the amendment."

The motion was then, by leave of the Council, withdrawn.

The Hon'ble Dr. Asutosh Mukhopadhyaya moved that in section 585 (*now* 557), clause (*c*), proviso (*i*), line 9, for "may" be substituted "shall."

He said:—"This is a very small matter. It seems to me that 'may' here means 'shall.' If there is actual loss, compensation 'shall' be paid to the owner and not 'may' be paid to him. As the word occurs twice in the same section, I want to put in the word 'may' in one place and 'shall' in the other."

The Hon'ble Mr. Oldham said:—"'May' means 'may' in this section. It is intended not to bind the Corporation hand and foot, but to leave the law in some degree elastic. It has been already explained how uncertain it is. One Hon'ble Member has asked what the exact meaning of the word 'disposition' was. All that has to be elucidated, and I think it is safer to leave the word 'may' in."

The Hon'ble Mr. Baker said:—"I am informed by the Secretary that this particular clause including the word 'may' was drafted by Mr. Justice Trevelyan himself."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"I am not surprised to hear that, and I must press my amendment on the Council."

The motion was then put and lost.

The Hon'ble Dr. Asutosh Mukhopadhyaya, by leave of the Council, withdrew the motion standing in his name, that in section 585 (*now* 557), clause (*e*), the words "*surki* mills" be omitted.

The Hon'ble Babu Jatra Mohan Sen moved—

(1) that in section 585 (*now* 557), proviso (*iii*), for the words "unless it be proved that the improvement was made *bonâ fide* and not," the words "when it is established that the improvement was not made *bonâ fide* and was made" be substituted;

(2) that to the said proviso (*iii*) the following be added:—

"*Explanation.*—Service of notice, if any, made by the Chairman on the owner or his predecessor of the intention of the Corporation to take proceedings for the acquisition of the land or building shall be conclusive evidence to establish that the improvement made thereafter was not made *bonâ fide*, and was made in contemplation of proceedings for the acquisition of such land or building.

Proviso (*iii*) shall not apply when the declaration is published more than two years after the matter of the intended acquisition is first discussed at a meeting of the Corporation, or after the service of the notice referred to in the *Explanation*, whichever event first occurs."

He said:—"With Your Honour's permission I would take these two amendments together and also to add to the explanation after the words 'if any' in line 1, the words 'is issued by the Chairman' and leave out the word 'made.'

"The object of these amendments evidently is to shift the burden of proof from one party to another. Clause (*iii*) provides—

'if the market-value has been increased by means of any improvement made by the owner or his predecessor in interest within two years before the aforesaid declaration was published, such increase shall be disregarded, unless it be proved that the improvement was made *bonâ fide* and not in contemplation of proceedings for the acquisition of the land or building being taken under the said Land Acquisition Act.'

"The clause as drafted throws the onus of proof on the owner; the object of my amendment is to throw the onus upon the Corporation. Now, Sir, the report of the Building Commission in one part said that if any step is taken to improve the property, then of course 'the present disposition of the property' as embodied in clause (*c*) would not be injurious to this case; but this proviso militates against that recommendation. You say that, if a person makes an improvement shortly before the declaration, he will get a proper price; but in the next place you say that if the improvement is made not within a few days or a few months or a year, but within two years after the declaration, you must prove that those improvements were made *bonâ fide*, and were not made in

contemplation of an intended acquisition. It is dangerous, I submit, to make a provision of this kind. We all know what the presumption is in Civil Courts: that once an onus is thrown upon a party, it is difficult for him to discharge it. Take for instance a congested area. It is desirable that the congested area should be opened up and some road should pass through it. A discussion is going on, and it is difficult to say what line the road will take. Now the man, not knowing whether the line of the road will take the direction covering his land or house, makes improvements. Perhaps two years afterwards or one and a half year afterwards it may so turn out that the line takes such a turn that his land has to be acquired. Then the presumption would arise that he did not make these improvements *bonâ fide*, and it would be difficult for him to establish the case beyond giving his own deposition.

"Now, Sir, it is a settled principle of law on the rule of evidence and burden of proof that circumstances of mere suspicion which lead to no certain result is no proof of bad faith or fraud, and that no fraud can be presumed against anybody in any case, or, in other words, fraud and dishonesty are not to be assumed upon conjecture, however probable. It may be said that fraud is incapable of being proved by direct evidence, but circumstantial evidence is none the less not difficult of proof and is equally cogent and strong as the evidence of the senses. The evidence of circumstances of fraud must be strong and sufficient to overcome the natural presumption of honesty and fair dealing, and it must be such as to satisfy a reasonable mind of the existence of fraud by raising a counter-presumption, there being no such thing as legal fraud in the absence of moral fraud.

"As to the onus there is no reason why we should deviate from the rules enunciated by the Evidence Act. If the Municipality is convinced of the necessity of acquiring any land or building, there is no difficulty in apprising the owner of such intention by notice prohibiting him to spend money in the improvement of the property. It may be said that if the land is not acquired the Corporation may be held liable to pay damages; but the Corporation must take that risk if it really wants to avoid the burden of proving fraud.

"The provisions proposed to be enacted being in derogation of, and encroachment upon, the rights of owners must be so made as to cause least hardship to them. It is, therefore, I propose, that the onus of proving want of *bonâ fide* must be thrown on the Corporation, which it can easily avoid by giving a notice to the owner.

"Then again there should be some limit of time within which decided action in the shape of publication of declaration should be fixed, and I have not altered the period suggested, which is two years, but have made it definite in the *proviso* suggested by my amendment. Assume, again, a proposal to acquire a piece of land is mooted. After a correspondence of, say, two years, the matter is dropped, and in the meantime the owner is in possession of funds which he intends to invest in building on the land. Who is responsible for the owner's loss? Then, again, suppose as soon as the owner begins to build on the same land, say, after a year, the matter was dropped, but after the correspondence was re-opened for acquiring the same piece of land, and it is ultimately decided that the acquisition is necessary, and a declaration is published under this Government's further orders. In this manner, the owner may be delayed to exercise his undoubted right to improve his property for an indefinite period.

"Let me take another instance. A discussion is set on foot at a meeting of the Corporation to open a congested area by making a road, or that the idea is conceived by one of the authorities, and the matter is made the subject of correspondence. No plan is drawn; there is no knowing what the line of the road will be, but should any person make any improvement and the road happens to pass through his improved property, the onus is thrown upon him to prove *bonâ fide*, and we all know how difficult it is to discharge it. It may be urged on behalf of the Corporation that the man was aware of the proposal of the acquisition, and he, in order to get a large compensation, made the improvement, and the suggestion is sure to be accepted. Now here the Corporation may not know what line the road would take, and yet the presumption is going to be made in favour of the Corporation and against the owner of the property who may be ignorant as to the line the road would take."

The Hon'ble RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR, said:—"I beg that the amendment which stands in my name in the list of business may be taken with the two just moved. My amendment is as follows:—

"That in proviso (*iii*) to clause (*c*) of section 585 (*now* 557) the words 'if it be proved that improvement was made not *bonâ fide*, but' be substituted for the words 'unless it be proved that the improvement was made *bonâ fide* and not.'"

"My amendment, though not identical with the amendment just moved by the Hon'ble Babu Jatra Mohan Sen, purports to be the same, and the object of my amendment is this: that in the matter of land acquisition matters the Chairman of the Corporation is also to be considered a party, and when it is to his advantage that the improvement made by the owner should be disregarded, it is fair that he should have to prove that the improvement was made not *bonâ fide* but on contemplation to fetch higher compensation."

The Hon'ble MR. BAKER said:—"In moving his first amendment the Hon'ble Babu Jatra Mohan Sen said that his object was to throw the onus of proof on to the Corporation. Could anything possibly be more unreasonable? What the Corporation would have to prove would be a negative as to the intention of some private person in doing some act, two years beforehand. How could they possibly discharge any such obligation? The Hon'ble Member referred to some principles of the law of evidence. As I understand it, Sir, there is a recognised principle in the law of evidence to the effect that the burden of proving any particular fact shall lie upon the party who is best able to prove it. Surely, if an owner has carried out an improvement *bonâ fide* within the period specified in the section, he is the person best able—in fact he is the only person who is able—to show that the improvement was carried out in good faith and not with the intention of extorting higher compensation from the Courts.

"Then, Sir, with reference to the second amendment of the Hon'ble BABU JATRA MOHAN SEN, I would ask the Council to look at the terms of the proviso, which is as follows:—

'Proviso (*iii*) shall not apply when the declaration is published more than two years after the matter of the intended acquisition is first discussed at a meeting of the Corporation.'

"Could any words possibly be more vague and indefinite? There may be no record. The matter may come up at a meeting of the Corporation in a casual incidental way without notice; there might be no proper discussion on it; no one might know anything about it. But because one or two members may have been talking casually about it, this proviso is to come into operation and the rule in proviso (*iii*) of section 585 (*now* 557) is not to apply. I will not trouble the Council with any further observations. It appears to me that the whole of the second amendment is absolutely impracticable. I should have had very little objection to a notice being served by the Chairman on the owner of any land whose property it was in contemplation to take up, but to rule that after the lapse of two years, if the Corporation have not published a declaration, the whole of this clause is not to apply would absolutely destroy the effect of the section which the Building Commission recommended."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I feel very strongly the force of the observations which have been addressed by the Hon'ble Member in charge of the Bill. It would be difficult on the part of the Corporation to prove a thing of that kind, because the knowledge would be knowledge which would be in the possession of the party concerned; and as for proving a negative, I think my hon'ble friend will remember the case where he has called upon an unfortunate person, who makes an application for the approval of a site of a building or for a plan of a building, to prove a negative: the applicant is to satisfy the Chairman that there are no objections which might be brought forward against the site or against the plan. Therefore, as far as that is concerned, my hon'ble friend in charge of the Bill and the hon'ble mover of this amendment stand exactly upon the same footing. The Hon'ble Member in charge of the Bill has placed an impossible burden upon an unfortunate individual, and my friend the Hon'ble Babu Jatra Mohun Sen proposes to place an impossible burden upon the Corporation."

The Hon'ble MR. OLDHAM said:—"No one has noticed the explanation proposed to be moved in section 585 (*now* 557). I do not suppose my colleagues in the Corporation will consent to that. It leaves it possible for the Chairman to employ any spare time he may find on his hands in issuing notices which would bind the whole of Calcutta."

The Hon'ble BABU JATRA MOHAN SEN said:—"It is not an unknown thing in the Law Courts that the onus of proving that a man has not a certain intention often lies upon the party who has to establish a negative. For instance, in the case of fraud, although it is within the knowledge of the person who commits fraud, nevertheless both in criminal and civil cases the onus is not upon the person who alleges absence of fraud to prove that he did not commit a fraud, but upon the person who alleges that fraud has been actually committed. Therefore, it is not unusual in Courts of Justice to prove a negative, but is it really the case here, as the party alleging fraud has to prove it. As my friend the Hon'ble Babu Surendranath Banerjee has pointed out, the case where a person has to do the impossible feat of satisfying the Chairman that there is no objection on the part of the Chairman or any party as to whether a site is fit for a building site. If that could be proved by a person, I do not see why the Corporation should not prove a negative of this kind. And then again it is very easy for the Corporation to know whether they are going to acquire a piece of land. Service of notice is the easiest mode of proving a case. Therefore, I have provided that, if notice is served by the Corporation intimating their intention of acquiring a particular piece of land, the onus is to be shifted, and I have provided that it would be conclusive evidence that the improvement was made *mala fide*. That is a very simple procedure to follow."

The Hon'ble BABU JATRA MOHAN SEN's first motion was then put and lost.

The Hon'ble RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR's motion was then put and lost.

The Hon'ble BABU JATRA MOHAN SEN's second motion was then put and lost.

SECTION 559.

The HON'BLE RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR, by leave of the Council, withdrew the motion, standing in his name, that the words "and unfiltered" be inserted after the word "filtered" in clause (*5*) of section 590 [*now* clause (*6*) of section 559].

The Hon'ble BABU SURENDRANATH BANERJEE moved that after the word "market" in line 5 of clause (*35*) of sub-section (*2*) of section 590 [*now* clause (*36*) of section 559] the words "or elsewhere" be inserted.

He said:—"This is a small matter, and I will not trouble the Council at any length. This section refers to the making of bye-laws by the General Committee. Clause (*35*) [*now* (*36*)] provides:—

'for preventing persons suffering from any loathsome disease from keeping stalls in, or being employed in preparing or selling articles of food in, any market, or from entering any municipal market or touching any article brought thereto for sale, and for authorising the expulsion of such persons from any municipal market.'

"I do not know whether the Hon'ble Member in charge of the Bill will think that they ought to be prevented, but loathsome people suffering from disease ought to be prevented from selling these things."

The Hon'ble MR. BAKER said:—"It seems to me, Sir, that while the provision is perfectly right as regard municipal markets or any market, it would not be right in a Municipal Act to take power to prevent these people from selling food elsewhere. That is a matter for a Police Act or a Lepers Act. I think it would be out of place in a Municipal Act."

The motion was then, by leave of the Council, withdrawn.

The Hon'ble BABU SURENDRANATH BANERJEE also moved that after clause (*35*) of section 590 [*now* clause (*36*) of section 559] the following clause be added:—

'(*35a*) for preventing persons suffering from any infectious or contagious disease living in places where food or drugs is or are sold, stored or prepared, and for regulating the business of the place where any such case has occurred."

The Hon'ble MR. BAKER said:—"I will accept this amendment if the word 'disinfecting' is substituted for the words 'regulating the business of.' The expression 'regulating the business of' is too wide."

The motion was put in the amended form and agreed to.

The Hon'ble MR. BAKER moved that in clause (*5*) of section 590 [*now* clause (*6*) of section 559] the words "directing and" be omitted.

He said:—"It was provided on the motion of the Hon'ble Babu Surendranath Banerjee the other day that there should be a section inserted in the Bill directing the weekly testing of the purity of water. Therefore, it becomes unnecessary that a bye-law should direct the testing of the purity of the water."

The motion was put and agreed to.

SECTION 569.

The Hon'ble MR. BAKER moved that in section 597 (*now* 569), sub-section (*1*), the words "section 61B (*now* 68)" be inserted before the words "section 65 (*now* 73)."

He said:—"This is practically a consequential amendment. When we were dealing with section 61B (*now* 68), which provides that the Local Government may make rules prescribing the qualifications of candidates for employment in the Health, Conservancy and Engineering Departments, respectively, of the Corporation, it was decided, at the instance of the Hon'ble Babu Surendranath Banerjee, that the rules should be framed by the Corporation with the sanction of the Local Government. The sanction of the Local Government is provided for by inserting a reference to section 61B (*now* 68) in section 597 (*now* 569), and I now move that that reference be inserted."

The motion was put and agreed to.

SECTIONS 574, 575 AND 577.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, by leave of the Council, withdrew the following motions standing in his name:—

(*1*) that, in the tabular statement annexed to section 602 (*now* 574), for "329F (*now* 344), sub-section (*1*)," be substituted "329F (*now* 344);"

(2) that, in the tabular statement annexed to section 602 (*now* 574), the following be inserted:—

Section 391D (*now* 383), sub-sections (*3*), (*4*).	Building contrary to plan or rules.	One hundred rupees.
Section 398 (*now* 388) ...	Erecting hut without permission	Twenty-five rupees.
,, 421 (*now* 402) ...	Ditto ...	Ditto.
,, 422 (*now* 403) ...	Ditto ...	Ditto.

The Hon'ble MR. BAKER moved that, in the tabular statement annexed to section 602 (*now* 574), the following be inserted:—

Section 253A (*now* 262) ...	Replacing or alteration of fittings for supply of filtered water for the flushing of privies or urinals.	Fifty rupees.

The motion was put and agreed to.

The Hon'ble MR. BAKER also moved that, in the tabular statement annexed to section 603 (*now* 575), the following be inserted:—

Section 253A (*now* 262) ...	Replacing or alteration of fittings for supply of filtered water for the flushing of privies or urinals.	Five rupees.

He said:—"This is a necessary penalty for neglecting to replace or alter the fittings for the supply of filtered water for the flushing of privies or urinals. In section 602 (*now* 574) the penalty proposed is Rs. 50, and in section 603 (*now* 575) the daily fine of Rs. 5 is suggested. I beg to move that these penalties be inserted."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I have no objection."

The motion was put and agreed to.

The Hon'ble MR. BAKER said:—"At this stage I would ask permission to move, in consequence of the decision arrived at this morning with reference to party walls, that the reference to section 370A be omitted from sections 602 and 603 (*now* 574 and 575)."

The motion was put and agreed to.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that, in the tabular statement annexed to section 603 (*now* 575), the following be inserted:—

Section 329F (*now* 344), sub-section (*1*) ...	Erection or maintenance of sky-sign without permission.	Fifty rupees.

He said:—"Section 329F (*now* 344), sub-section (*1*), read with section 602 (*now* 574), provides that for the erection or maintenance of a sky-sign without permission a fine of Rs. 200 may be imposed. I propose that a penalty for continual infringement of the provisions of section 329F (*now* 344), should be prescribed. In section 602 (*now* 574) we have a penalty of Rs. 200 for erecting or building a sky-sign without permission, and it is proposed that, if on the imposition of the fine on the first occasion the owner continues the illegal act, there should be a further fine.

The Hon'ble MR. BAKER said:—"I accept the amendment."

The motion was put and agreed to.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA also moved that in section 605 (*now* 577), line 4, after "employer" be inserted "or employé."

The Hon'ble MR. BAKER said:—"I accept the amendment."

The motion was put and agreed to.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA also moved that, in the tabular statement annexed to section 603 (*now* 575), the following be inserted, namely:—

Section 254D (*now* 268), sub-section (*1*) ...	Waste of water supplied to premises.	Five rupees.

The motion was put and agreed to.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA also moved that, in the tabular statement annexed to section 603 (*now* 575), for "Section 478 (*now* 453), sub-section (*5*)," be substituted "Section 478 (*now* 453)," and for "Section 482A (*now* 455)" be substituted "Section 482A (*now* 455), sub-section (*5*)."

The motion was put and agreed to.

The Hon'ble BABU SURENDRANATH BANERJEE, by leave of the Council, withdrew the motion, standing in his name, that the words "or employment" in line 7 of section 605 (*now* 577) be omitted.

He said:—"This amendment must be withdrawn having regard to the adverse verdict of the Council upon a similar amendment. This is merely consequential, and I withdraw it."

NEW SECTION.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, by leave of the Council, withdrew the motion, standing in his name, that after section 608C (*now* 583) the following be inserted:—

"608D. It shall be competent to the Court which sentences an offender under section 602, section 603, section 607, section 608, section 608A, section 608B or section 608C (*now* 574, 575, 579, 580, 581, 582 and 583) to direct by the sentence that in default of payment of the fine the offender shall suffer simple imprisonment for a term not exceeding one month."

SECTION 584.

The Hon'ble BABU SURENDRANATH BANERJEE moved that section 609 (*now* 584) be omitted.

He said:—"I have one word only to say with regard to this matter. Section 609 (*now* 584) provides:—

'Any mehter or other servant of the Corporation referred to in section 467 (*now* 438) who withdraws from his duties in contravention of that section shall be punished with fine which may extend to one hundred rupees, or with rigorous imprisonment for a term which may extend to three months, or with both, and shall forfeit any salary which may be due to him.'

"I am bound to mention that this is the law, but the law is absolutely nugatory. The object is to prevent a strike, but this section has never been enforced. We had something like a strike during the plague; but the Executive did not feel strong enough to enforce the provisions of this section. All that I have got to say is that, as this section is practically a dead-letter, why have it in the law? But, if the Hon'ble Member in charge of the Bill has any strong objection, I will not press it."

The Hon'ble MR. BAKER said:—"When this matter was discussed in the Select Committee Babu Narendra Nath Sen strongly opposed his colleague. He said he was entirely in favour of retaining the provision, which is in accordance with the existing law. Then the Hon'ble Babu Surendranath Banerjee, finding himself alone, withdrew his objection."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"I will follow the example which I set in the Select Committee, and I will withdraw the amendment."

The motion was then, by leave of the Council, withdrawn.

SECTION 585.

The Hon'ble BABU SURENDRANATH BANERJEE moved that for the word "or" in line 6 of section 610 (*now* 585), the words "and in default of payment of fine" be substituted.

He said:—"Section 610 (*now* 585) provides:—

'Any person who, in contravention of section 667 or section 668 (*now* 647 and 648), obstructs or molests any person with whom the Chairman has entered into a contract, or removes any mark, shall be punished with fine which may extend to two hundred rupees, or with imprisonment for a term which may extend to two months.'

"This is an amendment which leans in the direction of mercy. If there is an interference, the person who molests or interferes is to be fined, and, in default of fine, he is to be imprisoned. The section gives the discretion to the Magistrate either to fine or to send the person to imprisonment.

"The offence is not of such a serious character as to deserve imprisonment in the first instance. Therefore, I want to take away the discretion which the section gives to the Magistrate to send the man to prison."

The Hon'ble MR. BAKER said:—"This section merely reproduces the present law, and I think that no case whatever has been made out for making any change."

The motion was then put and lost.

SECTION 596.

The Hon'ble BABU SURENDRANATH BANERJEE moved that after the word "dissatisfied," in line 1 of sub-section (*4*) of section 621 (*now* 596), the following words be inserted:—

"with any order passed by the Chairman under sub-section (*2*) or."

He said:—"This amendment refers to section 621 (*now* 596), which provides:—

'The Chairman may enter upon any land adjoining or within one hundred yards of any works authorised by this Act or any rule, bye-law or regulation made hereunder, for the purpose of depositing upon such land any soil, gravel, sand, lime, bricks, stone or other materials or of obtaining access to such works, or for any other purpose connected with the carrying on of such works.

(*2*) The Chairman shall, before entering upon any land under sub-section (*1*), give the owner and occupier three days' previous written notice of his intention to make such entry, and of the purpose thereof, and shall, if so required by the owner or occupier, set apart by sufficient fences so much of the land as may be required for the purposes mentioned in or referred to in the said sub-section.

(*3*) The Chairman shall not be bound to make any payment, tender or deposit before entering upon any land under sub-section (*1*), but shall do as little damage as may be, and shall pay compensation to the owner and occupier of the land for such entry and for any temporary damage that may be done in consequence thereof, and shall also pay compensation to the said owner for any permanent damage resulting therefrom.

(*4*) If such owner or occupier is dissatisfied with the amount of compensation paid to him by the Chairman, he may appeal to the General Committee, whose decision shall be final.'

"The Chairman may delegate this power to some underling, and, therefore, it seems to me that a right of appeal ought to be provided against any harsh order which might be passed by any person to whom this authority might be delegated."

The Hon'ble MR. BAKER said:—"Here, again, the section is a mere reproduction of the existing law, and the Hon'ble Member has cited no case in which any inconvenience or difficulty has arisen in consequence.

"The Chairman will have no greater power of delegation in the future than he has had in the past. The power to enter on land for the purpose of depositing materials is a very small matter indeed. It is an absolute right at present in the hands of the Corporation, or rather of the Chairman under the present law. We propose that that same absolute right, which may be absolutely necessary for the proper conduct of the Corporation's work, should remain vested in the hands of the Chairman. The only matter with regard to which any right of appeal should lie is as to the amount of compensation, and for that appeal we have provided."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"I should like to point out a misapprehension. If it is the present law, it is a power vested in the Chairman which he exercises subject to the revisional jurisdiction of the Corporation. Therefore, what I propose is much less than what is provided in the present law. The Corporation can now revise any act done in this behalf by the Chairman or by any of his subordinates. I do not want to go so far. I want that the power of revision which in respect of proceedings of this kind is vested in the Corporation should be vested in the General

Committee. I think the Hon'ble Member in charge of the Bill ought, after this explanation, to accept my amendment."

The motion was then put and lost.

SECTION 617.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved that in section 640 (*now* 617), after the figures "652 (*now* 632)" the words "and in the Land Acquisition Act, 1894, as amended by section 585 (*now* 557) of this Act," be inserted.

He said:—"This, Sir, is a matter of great practical importance and is intended to make clear what I cannot but believe is the intention of the law. My object is to have it made clear that a Small Cause Court is not to have any jurisdiction under section 640 (*now* 617) in cases under the Land Acquisition Act, and I am assured by the Hon'ble Member in charge of the Bill that this is precisely the intention. The section as amended will read as follows:—

'Where, in any case not provided for by section 639 (*now* 616), any Municipal authority or person is required by or under this Act or any rule, bye-law or regulation made hereunder to pay any expenses or any compensation, the amount to be so paid and, if necessary, the apportionment of the same, shall, in case of dispute, be determined, except as is otherwise provided, in sections 552, sub-section (*3*), 538, 621, 638, and 652 (*now* 505, sub-section (*3*), 512, 596, 615 and 632), and in the Land Acquisition Act, 1894, as amended by section 585 of this Act, by the Court of Small Causes, on application being made to it for this purpose at any time within one year from the date when such expenses or compensation first became claimable.'

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I think this amendment ought to be accepted. There is a general feeling in some quarters that these cases will now be tried by the Small Cause Court, and that the jurisdiction of my hon'ble friend, who so worthily presides over these cases in the 24-Parganas, may not be withdrawn, and I hope, Sir, my hon'ble friend's amendment will be accepted."

The Hon'ble MR. BAKER said:—"I quite accept the amendment."

The motion was put and agreed to.

The Hon'ble BABU JATRA MOHAN SEN moved that in section 640 (*now* 617) the figures "522" be substituted for "552 (*now* 505)."

The motion was put and agreed to.

NEW SECTIONS.

The Hon'ble MR. BAKER moved that the following sub-heading and section be inserted, namely:—

Recovery of certain dues.

"642A (*now* 620). Any sum due to the Corporation—

(*a*) for water supplied or taken under section 252A (*now* 254) or section 254Q (*now* 279), sub-section (*1*), or

(*b*) on account of any fee imposed under section 459C (*now* 431), clause (*b*), section 483 (*now* 458), sub-section (*2*), section 497 (*now* 475) or section 540 (*now* 520), clause (*a*), or

(*c*) on account of any fee imposed under sub-section (*3*) of section 505 (*now* sub-section (*2*) of section 481) in respect of any place set apart under proviso (*iii*) to sub-section (*1*) of that section,

shall be recoverable in the manner provided by Chapter XVIIA (*now XVIII*) for the recovery of the consolidated rate.

[margin:] of certain

He said: "The object of this section is to provide for the recovery of certain dues and fees which otherwise the Corporation would only be able to recover by means of a civil suit. These particular fees are the following:—

under section 252A (*now* 254) there is the cost of water supplied for non-domestic purposes,

under section 254Q (*now* 279) there is the cost of water supplied to persons residing outside Calcutta,

under section 459C (*now* 431), clause (*b*), there are fines leviable for the removal of trade refuse,

under section 483 (*now* 458), sub-section (2), the fees for removing carcasses of dead animals,

under section 497 (*now* 475) there are fees for the use of dhobi-khanas,

under section 540 (*now* 520), clause (*a*), there is a fee payable for disinfecting public conveyances, clothing, and other articles which are infected by some dangerous disease, and

under section 505, clause (*3*) [now 484, sub-section (*2*)], there is a fee for licensing private markets.

"If we add no provision of a similar kind to this section, it would be necessary for the Corporation to file a suit in order to recover any of these dues. That is plainly undesirable, and I, therefore, propose that we should take power to recover them under the proceedings for recovery of consolidated rates."

The Hon'ble Babu Surendranath Banerjee said:—"I have great pleasure in supporting this amendment. I think public dues ought to be recovered in the way the Hon'ble Member suggests. I should like, however, to ask a question, namely, whether any fee is levied on *kalisthans* or private slaughter-houses—those places in the northern part of the town where there are images of the goddess Kali, and kids are slaughtered. I want to know whether they pay any fees at all, and, if not, whether it is intended by clause (*c*) to impose any fees upon them."

The Hon'ble Mr. Baker, in reply, said:—"Section 505 (*now* 481) relates to slaughter-houses, and you will find full information as to the fees which are leviable in that section. The section was considered very fully, and was largely modified at the instance of Babu Narendra Nath Sen. The section only provides for such fee as may be prescribed by the Corporation."

The motion was put and agreed to.

The Hon'ble Mr. Baker also moved that the following sub-heading and section be inserted, namely:—

Limitation of time for appeal.

"642B (*now* 621). In any case in which no time is prescribed by the foregoing provisions of this Act for the presentation of an appeal allowed thereunder, such appeal must be presented within thirty days after the date of the order or proceedings against which the appeal is made."

He said:—"This is intended to provide a limitation for appeals. In various sections of the Bill an appeal is allowed either to the Small Cause Court or to the General Committee or in one case to the Government of India. In three cases we have prescribed in the section itself the period of appeal. Under section 26E (*now* 23) the period is 30 days; under sections 148M and 148N (*now* 162 and 163), which are appeals against assessments to the Small Cause Court, the period is also 30 days; and in Schedule III (*now* II), Rules 14 and 17, when the appeal goes to the Small Cause Court or a Bench of Commissioners, the period fixed is 15 days. But there are eight or nine other cases in which appeals are allowed, and in those cases we have not fixed any period of limitation. Therefore, it is now proposed to rule that in all cases, where no specified period is allowed, a term of 30 days shall be prescribed. Thirty days appears to be a convenient period, and, I think, that may be fairly accepted."

The Hon'ble Babu Surendranath Banerjee said:—"I have a small suggestion to make. There may be cases in which perhaps it may not be possible to submit an appeal within 30 days. The Hon'ble Member in charge of the Bill may not perhaps object if I suggest a small amendment, *viz*., that after the words 'within thirty days' be inserted 'or a longer period according to the discretion of the General Committee.' Supposing a person is away in the mufassal, and he is not able to come within 30 days. These are executive and not judicial matters. In such a case a discretion ought to be given to the General Committee to prolong the period for the receipt of the application. I do not think the Hon' ble Member in charge of the Bill will object to this. And I may point out that section 5 of the Indian Limitation Act enables the Courts to exercise this discretion."

The Hon'ble Mr. Baker, in reply, said:—"The General Committee will always be able to exercise that discretion without any express provision here."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"How are we to know that? If you have a hard-and-fast rule, I do not know whether they will exercise the discretion. I think it is not sufficient to say that they have got the discretion and leave it to be inferred."

The Hon'ble MR. BAKER said:—"Would the Hon'ble Member agree to the following words being added after the words 'such appeal' in line 2 of my amendment: 'subject to the provisions of section 5 of the Indian Limitation Act.'"

The Hon'ble BABU SURENDRANATH BANERJEE said:—"Yes, that will do."

The Hon'ble MR. BAKER said:—"In that case, with Your Honour's permission, I will make that modification."

The motion in this amended form was put and agreed to.

SECTIONS 617 AND 629.

The Hon'ble RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR, by leave of the Council, withdrew the following motions standing in his name:—

(*1*) that the words "on the recommendation of the Corporation" be inserted after the words "The Local Government may" in line 1 of section 649 (*now* 617);

(*2*) that the words "a Municipal Commissioner or being" be inserted after the words "by reason only of his being" in section 650 (*now* 629).

NEW SECTIONS.

The Hon'ble MR. BUCKLEY moved that the following sub-heading and sections be added after section 668 (*now* 648):—

"*Special provisions as to land and buildings in Hastings.*

ontrol of General ficer Commanding Presidency District over Government land and buildings.

"668A (*now* 649). Notwithstanding anything contained in this Act, all land and buildings belonging to the Government in that part of Hastings which is included in Calcutta shall be subject to the control of the General Officer Commanding the Presidency District.

Sanction of Government of India required to erection or re-erection of masonry buildings.

"668B (*now* 650). Notwithstanding anything contained in this Act,—

(*a*) permission to erect a masonry building in the said part of Hastings shall not be given or be deemed to have been given unless and until the sanction of the Government of India has been obtained; and

(*b*) such sanction shall not be applied for unless the plan of the building and the site-plan of the land are approved by the Commissioner of Police.

Demolition of buildings erected or re-erected without such sanction.

"668C (*now* 651). (*1*) If the erection or re-erection of any masonry building in the said part of Hastings is, after the commencement of this Act, commenced, carried on or completed without obtaining the sanction of the Government of India, the General Committee shall, if requested by the General Officer Commanding the Presidency District so to do,—

(*a*) by written notice direct the owner to demolish the building, or

(*b*) themselves cause the building to be demolished, at the expense of the owner.

(*2*) No person shall be entitled to any compensation on account of such demolition.

Application of section 608 (fines).

"668D (*now* 652). Section 608 (*now* 580) shall also apply when any direction is given under clause (*a*) of section 668C (*now* 651)."

He said:—"The amendment refers to the portion of the Maidan which the Hon'ble Members know as Hastings, situated in the north-west corner of the Maidan. The portion to which the amendment refers lies to the south of Clyde Row, and to the south of the new road which leads down to Tukta Ghat, and to the north of Tolly's Nala. This place was originally called 'Coolie Bazar,' and was used as a depôt of the Fort, and is still used to some extent for the residence of commissariat coolies. A special Act was passed in 1868 referring to this area, and it was incorporated in Calcutta; since that date the Act of 1876 and the Act of 1888 have both included the area in question as part of Calcutta; and in this Bill the same area is included as part of the Town. During these years several notifications were issued with the sanction of the Government of India which refer to this same part, among others, as being within Fort William in Bengal. So that Hastings since 1868 is within the limits of Calcutta, and at the same time under those notifications is within the limit of Fort William. Fort William means the Maidan *plus* the Fort. There is a special Act referring to the Fort alone, and the Maidan, which is outside the

glacis of the Fort and within the limits of Fort William, is under the jurisdiction of the Government of Bengal. There are no very clear and accurate rules about this Maidan: but there are certain arrangements between the Government of Bengal and the Government of India in the Military Department concerning the action of the authorities within these limits. The Government of India has now decided to issue a new notification declaring that the southern part of Hastings will not be within Fort William in Bengal. Although this will make matters satisfactory as regards Calcutta, it does not fully satisfy the Government of India. It has always been held essential that within a certain distance of the Fort there should be a control over the erection of buildings, and the Government of India insists that there should be this control over buildings in Hastings; consequently they have directed that the Government of India in the Military Department should have a control over the construction of buildings there, and any one who wishes to build in Hastings must first get the consent of the Commissioner of Police, who will forward the application to the Government of Bengal for the purpose of obtaining the sanction of the Government of India. When that sanction has been obtained, all the provisions in the Bill for the construction of buildings in Calcutta will apply and will have to be carried out. These regulations have, as a matter of fact, been in force all these years, although the Members of the Corporation may not be aware of it."

The Hon'ble Mr. Apcar said:—"I have no desire to follow my hon'ble friend in the circumlocution proceedings which he has described. I only wish to know whether these regulations should apply now to the part of Hastings north of Clyde Row."

The Hon'ble Mr. Baker said:—"That portion of Hastings is not within the limits of Calcutta."

The Hon'ble Babu Surendranath Banerjee said:—"We are reduced to a somewhat anomalous position. Hastings is a part of Calcutta; we are responsible for its sanitation, and yet, when buildings have to be constructed, the application has to be made first to the Commissioner of Police, then to the Government of Bengal, and then to the Government of India, and the Government of India will send it back to the Government of Bengal, who will forward it to the Corporation! How long will this circuitous process take? When will the applicant expect to get a reply?"

The Hon'ble Mr. Apcar said:—"It is for the purpose of giving the military authorities control so as not to interfere with the command by the Fort of the approaches of the river."

The Hon'ble Babu Surendranath Banerjee said:—"I don't object. I only want information. I want to point out to the Council the serious difficulties which will be placed in the way of parties making applications to build in Hastings."

The Hon'ble Mr. Baker said:—"Hastings is entirely a Government estate, and people who build there can only do so to a very small extent. It is really not a matter of any great importance."

The motion was put and agreed to.

Schedule II.

The Hon'ble Babu Boikanta Nath Sen moved that the following amendments be made in column 3 of the table appended to rule 1 in Schedule III (*now* II), namely:—

(1) opposite serial number 1, for "Two hundred rupees" substitute "One thousand rupees";
(2) opposite serial number 2, for "One hundred rupees" substitute "Five hundred rupees"; and
(3) opposite serial number 3, for "Ditto" substitute "One hundred rupees."

He said:—The real question is that the fee payable by a Company or Association or body of individuals, the paid-up capital of which is equivalent to ten lakhs of rupees or upwards, should be Rs. 1,000 and not Rs. 200; that the fee payable by any other Company or Association or body of individuals should be Rs. 500 and not Rs. 100; and that the fee payable by merchants, bankers, wholesale traders, commission agents, architects, civil engineers, builders, contractors, auctioneers or carriers should remain, as in the Bill, Rs. 100. I find that the Calcutta Corporation has got stupendous drainage and other works in hand, and this Bill contemplates the carrying out of very large schemes of improvement. Funds will, therefore, be required, funds commensurate with the magnitude of the works. Where are these funds to come from? It is all very well to make provision for carrying out big schemes, but the real question is that you must have funds to carry out these schemes. The Corporation will either have to raise loans or increase its taxes. There are no other means of getting money. Even if Maharani Surnamoye were alive, she would not have been able to make a gift of money commensurate with the large works in hand. I venture to submit that large companies, rich merchants and rich bankers ought to pay much larger sums for their licenses than are provided for in the Bill. An annual payment of Rs. 1,000 will not be seriously felt by companies, merchants and bankers whose capital may range from ten to fifty or sixty lakhs. The rates and taxes of the Calcutta Municipality, I find, amount to about 46 lakhs a year, of which the European commercial community pay but a small proportion, and, if you take into consideration the amount of exports and imports, the proportion paid by them will amount to the very small fraction of ·012. Therefore, can it be said, with any degree of propriety, that it will be unjust if these classes of Companies and Associations are called upon to pay annual license-fees of Rs. 1,000 and Rs. 500, respectively, when their profits amount, perhaps, to lakhs of rupees a year? I venture to submit that not only is there justice and fairness in such a demand, but I believe the demand of the Corporation in this respect cannot be met by any reasonable argument on the other side. The European commercial community are represented by gentlemen who have their British instincts, and they should not complain that the payment of the increased license fees, which I propose to ask them to pay, is harsh or unjust, when they consider all that the Corporation has been and is doing for them. The Calcutta Fire-brigade is maintained by the Corporation for the benefit of the owners of jute-mills and others. They enjoy these benefits, and they ought to show their appreciation of these benefits by accepting this amendment. It cannot be said that the increased amount of fees to be paid will convert the license-tax into a sort of income-tax. An income-tax is paid for Imperial purposes and for Imperial reasons; this license-tax is for purposes of local administration and for local advantages derived from the municipality. And those purposes become emphasised when it is considered that the community to be affected by the proposed amendment preponderate, according to statements connected with this Bill, in wealth and influence, and who also preponderate in representation both in the Corporation and in the General Committee; and I, therefore, venture to submit that their contributions ought also to preponderate in proportion to their wealth and influence and representation in the Municipality. I do not wish to take up the time of the Council by speaking unnecessarily, but only wish to add that this schedule does not seem to have been framed on sound principles. There is such disparity between the several provisions of this schedule, that it seems to be the product of a strong combination of injustice and anomalies. A barrister who may earn Rs. 10,000 a month pays Rs. 50 a year, while a vakil who, perhaps, makes Rs. 50 a month has to pay the same amount. I think it would be well if the Council gave its attention to the correction of this schedule. I do not think I need say anything more, except that I consider this an amendment which the Council should accept."

The Hon'ble Mr. MACKENZIE said:—"Sir, so far from cordially accepting the terms of the amendment, I am as strongly opposed to it as I can possibly be, and I ask the Council to reject it, on the ground that the license fees at present levied on the classes named press quite heavily enough—in fact too heavily.

"The Calcutta limited companies are the main support of the municipalities in which their factories are situated—in fact, they pay for everybody else who lives in such municipalities. If a merchant pays his municipal taxes, what should it matter to the Corporation what number of agencies that merchant's office roof covers? And yet, as a matter of fact, he pays license-tax for each such agency. Take the case of tea companies, in which unfortunately big capitals usually means the opposite of large returns, and many of these cannot now meet expenditure. How could they afford to pay Rs. 1,000 for license-tax?

"If, Sir, this amendment be carried, which I hope it will not, it will be my duty to propose that on the same principle that the Imperial Government exempt machinery from import-duty, that the Corporation should exempt limited companies from fees of the kind proposed in the amendment. The growth and prosperity of limited companies in many ways lead to the prosperity of the municipality, just as machinery leads to the prosperity of the Empire; therefore they should be free to flourish exempt from taxes or charges for which the municipality do little or nothing.

"Throughout this debate, Sir, I have upheld the principle that, while we are imposing new duties and responsibilities on the municipality by reason of building regulations, &c., we should do nothing to diminish or contract the present income of the Corporation; but I should object to its being increased at the expense of those who at present contribute most largely to it, and specially so that any augmentation should be enacted without reference first being made to the Chamber of Commerce and other bodies interested."

The Hon'ble MR. BAKER said:—"I am disposed to agree with the hon'ble mover of the amendment that it will be desirable to devise some means by which a larger income will be provided for the Corporation; but I am altogether opposed to the present amendment, which simply has the effect of increasing the amount of license-tax paid by joint-stock companies. The hon'ble mover proposes that companies with a capital of ten lakhs and upwards should pay Rs. 1,000 a year, instead of Rs. 200, and those with a capital of less than ten lakhs should pay Rs. 500, instead of Rs. 100, multiplying the amount in both cases by five. But he leaves all the other items in the Schedule untouched. There are two reasons for which I cannot accept this amendment. There is no reason why a joint-stock company, whatever its capital may be, should be taxed so highly, while private firms are left alone. A large mercantile firm often uses in its business a larger capital than joint-stock companies do, and there is no reason why one should be taxed so differently from the other. Suppose a company, with a capital of ten lakhs, makes a profit of 5 per cent., that is to say, Rs. 50,000 a year; the Hon'ble Member proposes to tax that company to the tune of Rs. 1,000 a year, so that they will have to pay 2 per cent. on their profits in the shape of a license-tax. I consider this to be very excessive taxation coming on the top of the other taxes these companies have to pay. Why should a joint-stock company have to pay a much larger tax than large commercial firms, whose income may be much larger? It would be preposterous to accept such a proposal.

"Then, as the Hon'ble Mr. Mackenzie has observed, there has been no time to consult the Chamber of Commerce on the subject, who are more interested in such matters than any one else. [illegible] t is monstrous that an amendment like this should be sprung upon us at the eleventh hour, when there has been no time to ascertain the views and opinions [illegible] of those who are best able to advise us on the subject. To illustrate the serious risks into which we may fall in accepting amendments like this without due consideration, I may mention that, after receiving notice of this amendment, I consulted the Chairman of the Corporation to see whether any modification could be made in this Schedule III (*now* II), and we worked out the skeleton of a new proposal. I won't trouble the Council with the figures, but when I came into the Council room I showed them to the Hon'ble Messrs. Mackenzie and Spink, and in a moment Mr. Spink pointed out the inequitable way in which it would affect the firm in which he is interested, and other firms he knew of. This shows that we should proceed in the most cautious manner in introducing any change in a matter like this. Moreover, the amendment is quite unnecessary. If Hon'ble Members will refer to section 59-A (*now* 56) [illegible]), sub-section (2), they will see that

power is expressly reserved to the Local Government, after due publication and consulting persons who are interested, to alter this Schedule III (*now* II), from time to time. If it appears necessary at any time to modify the classification or the rates of license-fee, it is open to the Government, with the assistance of the Corporation, to frame a proposal for the amendment of the schedule. I hope the Council will reject this amendment of the Hon'ble Member if he sees fit to press it."

The Hon'ble Mr. Spink said:—"I should like to point out that for the most part joint-stock companies are the last whose license-tax should be increased. The bulk of the share-holders of joint-stock companies are resident out of Calcutta, and the field of their operations is also out of Calcutta; therefore they do not benefit by any improvements which the Corporation may make. It is merely the fact that the offices of the Agents of these Companies are in Calcutta that makes them amenable to the payment of the license-tax. Many of them are in difficulties, and it would be a serious penalty on them to increase the amount of their license-tax to any great extent. I know that there are great inequalities in this schedule, and I think there are a great many others who can more readily bear an increase of the tax than joint-stock companies. My hon'ble friend, the mover of the amendment, has hit upon the very worst item of the schedule for an increase of taxation, and for that reason I object to this amendment very strongly."

The Hon'ble Babu Surendranath Banerjee said:—"I cannot admit that an amendment of this kind should not have been made at this stage. The Hon'ble Member comes new to this Council; he was not a member of the Select Committee, and it is not necessary to give notice of an amendment for more than two days previous to a meeting of the Council. Therefore, if any Hon'ble Member, by giving notice of an amendment according to the rules, places the Hon'ble Member in charge of the Bill in a difficult position, he has no right to complain. I am of opinion that the Hon'ble Member has done a distinct service to the Corporation and the Council by bringing this amendment forward, because he has been instrumental in eliciting an important expression of opinion from both the Hon'ble Mr. Mackenzie and the Hon'ble Mr. Spink, who agree in thinking that the schedule, as it now stands, is an iniquitous schedule. If the Hon'ble Member had not given notice of this amendment, this expression of opinion would have been lost to us. It would never have been elicited but for this amendment. Therefore, I do not think the Hon'ble Member in charge of the Bill has any right to complain of the amendment. On the contrary, he ought to be thankful for this amendment having been brought to the notice of the Council. I quite agree that this is a difficult matter, that it should be exhaustively gone into, and that it should be carefully discussed; but I cannot agree that the Chamber of Commerce and the Trades Association should be alone consulted to the exclusion of the other public bodies. The fact must be admitted that the European commercial community—I say this with all possible respect to the Hon'ble Mr. Mackenzie and the Hon'ble Mr. Spink—now that they are about to obtain a preponderance of representation in the Corporation, do not pay a proportionate amount of taxation to the Corporation. Their influence in the General Committee ought to be proportionate to the amount of taxation they pay. They pay about 2 per cent. of the municipal taxes, and they will monopolise all power in the Corporation. That does not commend itself to my notions of the fitness of things, and I am sure it will not commend itself to the sense of justice of the European commercial community. I was expecting a cordial greeting being accorded to the proposal of the Hon'ble Babu Boikanta Nath Sen from my hon'ble friends to the right (Messrs. Mackenzie and Spink), because this proposal seeks to remove the inequalities and injustice resulting from this Bill, and, therefore, this proposal ought to have commended itself to their instincts of justice. The proposal in its present form may not be accepted, but my hon'ble friends ought to have considered it in the spirit in which it was made. The Hon'ble Member in charge of the Bill admits the inequalities in the schedule. A barrister who earns Rs. 10,000 a month pays Rs. 50; a barrister who does not earn even Rs 50 a month pays the same

amount. All taxation, says Mill, whose *dictum* you have accepted, ought to be proportionate to the sacrifice which a person or a community ought to be called upon to make. I will not detain the Council longer, but I do say that this is a matter deserving consideration. and if my hon'ble friend will hold out the hope that within a measureable distance of time the Government, of which he is the adviser, will undertake the duty of revising the schedule, I think the Hon'ble Babu Boikanta Nath Sen will withdraw his amendment."

The Hon'ble BABU BOIKANTA NATH SEN, in reply, said:—"After what has been so ably put forward by the last speaker, it is not necessary for me to add anything more than this, that I only want to explain why I picked out these two items in the schedule for increased taxation. I saw that there was injustice in the schedule from beginning to end; but I thought these two were cases in which the insufficiency of the taxation could easily be remedied, while at the same time it would bring in a perceptible increase of income to the Corporation. That is my sole object. But after what has fallen from the Hon'ble Member in charge of the Bill, and as I see that section 595A (*now* 568), sub-section (*2*), does afford the means of making alterations in this schedule, if the Hon'ble Member will hold out hopes that justice will be done within a reasonable distance of time, I am quite willing to withdraw my amendment."

The motion was then put and lost.

SCHEDULES IV AND V.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA moved—

(*1*) that the words "body corporate" be inserted after the word "company" in rule 2, rule 3, sub-rule (*5*), rule 7, sub-rule (*4*) (*now* rule 8), and rule 8 (*now* 9), sub-rule (*9*), of Schedule IVA (*now* IV), and that the words "bodies corporate" be inserted after the word "companies" in rule 3, sub-rule (*4*), of the same schedule.

The Hon'ble DR. ASUTOSH MUKHOPADHYAYA also moved that the words "body corporate" be inserted after the word "company" in clause (*5*) of rule 6 of Schedule IVB (*now* V).

He said:—"These are consequential amendments, rendered necessary by the acceptance of previous amendments."

The Hon'ble MR. BAKER said:—"I accept these amendments."

The motions were put together and agreed to.

SCHEDULE IX.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the words "owner or occupier of a market or bazar" be added to Part I of Schedule VIA (*now* IX).

He said:—"This schedule deals with the scavenging-tax and the persons who have to pay it. They are hackney-carriage owners, carters, &c. I wish to add 'the owner or occupier of a market or bazar,' who pays this tax now."

The Hon'ble MR. BAKER said:—"I accept the motion."

The motion was put and agreed to.

SCHEDULE X.

The Hon'ble BABU JATRA MOHAN SEN moved that in Schedule VII (*now* X) after the words "if the said sum is not paid into the Municipal Office at," the words "or to an officer appointed to receive the same" be inserted.

The Hon'ble MR. BAKER said:—"I accept the motion as a consequential amendment."

The motion was put and agreed to.

SCHEDULE XV.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the words "where necessary" be inserted after the word "provided" in line 2 of clause (4) of rule 13 of Schedule XIIA (*now* XV).

He said:—"Where the drain is ventilated throughout the whole length, or in such a manner that the portion beneath a building is ventilated, I think it is not necessary to have ventilators. I consulted the Superintendent of the Drainage Department before proposing this amendment. It gives a discretion, but does not take away any authority."

The Hon'ble MR. BAKER said:—"I accept the amendment."

The motion was put and agreed to.

SCHEDULE XVII.

The Hon'ble RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR, moved that in clause (*b*) of rule 1 of Schedule XIVA (*now* XVII for the words "filled-up tank" the words "tank which has been filled up otherwise than with pure earth or equally good material" be substituted.

He said:—"It is the present practice to allow huts and masonry buildings to be built on tanks filled up with pure earth. Many buildings have been so allowed since 1889. It will be hard on the owners of tanks if they are not allowed to let them out when filled up with pure earth."

The Hon'ble MR. BAKER said:—"Under this amendment a filled-up tank may be used as a site for building upon, although it is not considered safe to do so by the Engineer. Therefore I cannot accept the amendment."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I understand that this amendment only refers to buildings on the sites of tanks filled up with pure earth. Speaking from memory, my impression is that our bye-laws provide that, if a tank has been filled up with refuse, the site is not allowed to be built upon for a period of twenty years, but if a tank is filled up with good earth the condition of things is quite different. It is obvious that in the former case the site should not be used until the refuse is thoroughly decomposed, but if a site has been filled up with good earth you ought to be allowed to build upon it at once."

The Hon'ble MR. BAKER, in reply, said:—"The words used in the bye-law are 'street or other refuse.' I am in the hands of the Hon'ble Mr. Buckley in this matter, and, if he thinks this may be allowed, I have no objection. The question was discussed in the Select Committee, and we came to the conclusion that the rule should stand as it is."

The Hon'ble MR. BUCKLEY said:—"There are certain objections to building on ground recently filled up even with good earth. The present bye-law fixes twenty years as the period during which a site filled up with refuse cannot ordinarily be built upon, but with the consent of the General Committee the period may be reduced to ten years if the state of the soil after investigation be found to be fit to build upon."

The Hon'ble MR. BOLTON said:—"The provision in the Bill prohibits building for ten years if the site is not insanitary; but if the site consists of good earth, I do not see why building should not be permitted at any time."

The Hon'ble MR. BAKER said:—"I have to point out that the Hon'ble Babu Boikanta Nath Sen has an amendment proposing to reduce the period from ten years to two years."

The Hon'ble BABU BOIKANTA NATH SEN moved that in line 5 of clause (*b*) of rule 1 of Schedule XIVA (*now* XVII) "two years" be substituted for "ten years."

He said:—"I thought that this, coupled with the Chairman s certificate that the site is fit to be built upon, ought to be sufficient."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"The two amendments stand on a different footing. Why should there be a lapse of even two years, if it is a site filled up with good earth? If there are engineering difficulties, the Engineer's Department will take care not to give their sanction."

The Hon'ble MR. BUCKLEY said:—"I do not think we should allow building within two years even if the site is of good earth. Excavations even in good soil occasionally produce fever. I recommend that the provision should stand as it is."

The Hon'ble MR. BAKER said:—"There are two conditions implied in the provision which the Hon'ble Babu Boikanta Nath Sen wants to amend,—first, that the site must have been filled up ten years previously; and, secondly, that the Chairman must give his certificate; therefore, the investigation cannot begin until ten years after the tank was filled up. The case put by the Hon'ble Raja Ranajit Sinha Bahadur, of Nashipur, refers to a site filled up with good earth. I do not wish to accept the latter amendment, but, unless the Hon'ble Mr. Buckley objects, I would accept the substitution of two years for ten years in line 5 of clause (*b*) of rule 1 of Schedule XIVA (*now* XVII)."

The Hon'ble MR. BUCKLEY said:—"It would not be safe to reduce the period to less than five years."

The Hon'ble BABU BOIKANTA NATH SEN said:—"I must consent to modify my amendment by substituting "five years" for "two years."

The motion in the amended form was then put and agreed to.

The last motion having been carried, the Hon'ble RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR, by leave of the Council, withdrew his motion for the amendment of Schedule XIVA (*now* XVII), rule 1.

The Hon'ble MR. BUCKLEY moved that in sub-rule (*2*) of rule 2 of Schedule XIVA (*now* XVII) the words "which is re-erected" be inserted after the word "building," and that the words "erection or" in the proviso to the same sub-rule be omitted.

He said:—"This is a matter which affects the height of a building. The Building Commission in their report (page 19, paragraph 56) reported in favour of having all houses—new houses as well as houses re-erected and altered—reduced to what is known as the 45° rule; in other words, the top of a house standing on one side of a street is not to intersect a plane drawn from the other side of the street at an angle of 45° with the plane of the ground, which means that the house is to be of the same height as the width of the road. In the Select Committee this recommendation of the Commission was modified, and the Bill was altered in so far that we allowed a house to be made rather higher in certain streets than the Commission recommended: we introduced this sub-rule (*2*) that in the case of a building in any street in existence which is less than 25 feet wide, the angle shall be 56½° and not 45°, which means that the house may be half as high again as the width of the street. The Building Commission wished to maintain the 45° rule everywhere, but the Select Committee, while it intended that the 45° rule should apply to all new houses in all streets, wished to allow existing houses in narrow streets to be re-erected up to their existing height or up the 56½° rule whichever was less. But the sub-rule (*2*) and the proviso as they are worded have this effect: they limit houses between the 45° and the 56½° angle to their present height, but they allow new houses to be built to 56½°. If a man has a house intermediate between the two, he can re-erect or alter it up to the present height; but the man who constructs an entirely new house would, as the rule is worded, be able to build it up to the 56½° height. That was not intended either by the Commission or

by the Select Committee, and the wording, as I now propose to alter it, will allow a building on an entirely new site only to be built up to the 45° rule."

The motion was put and agreed to.

The Hon'ble RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR, by leave of the Council, withdrew the motion, standing in his name, that the words "and also so far as it will abut or abuts upon the narrower of such streets to a distance of 40 feet from the wider street" in sub-rule (*4*) of rule 2 of Schedule XIVA (*now* XVII) be omitted.

The Hon'ble BABU SURENDRANATH BANERJEE moved that to rule 6 of Schedule XIVA (*now* XVII), the following be added :—

"(*2*) Subject to the approval of the General Committee, a verandah may be erected upon the space between such line and alignment."

He said:—"As the verandah would be left open, I do not think there should be any objection to this amendment."

The Hon'ble MR. BAKER said:—"I am entirely in favour of this amendment, provided that the words 'an open verandah' be substituted for 'a verandah.'"

The motion in this amended form was put and agreed to.

The Hon'ble BABU SURENDRANATH BANERJEE moved that clauses (*b*) and (*d*) of rule 13 of Schedule XIVA (*now* XVII) be omitted.

He said:—"It must not be supposed that I consider this to be an unimportant matter, but I think a matter like this should be the subject of bye-laws. In allowing the Chairman to fix the proportions of the mortar to be used there is the danger of his delegating the power to a subordinate. Neither the Chairman nor the Engineer will see these rules carried out, but some subordinate; and the proportions of materials in the mortar will depend sometimes on the amount paid to him. There ought to be bye-laws which lay down those proportions and fix the thickness of the walls. At present these matters are regulated by bye-laws. I object entirely to open a door to the blackmailing of poor people."

The Hon'ble MR. BUCKLEY said:—"The question of fixing the proportion of materials forming the mortar [clause (*b*)] is not of great importance. The Chairman will prescribe generally what the nature of the mortar is to be; there will be two classes of buildings, and the general specification will be followed. But clause (*d*) is important, and the Corporation have at present most elaborate rules with reference to the thickness of walls at various heights, and in Bombay —and certainly in London—they are elaborately prescribed. I think clause (*d*) should certainly remain."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"If these things are made the subject of bye-laws, the Chairman will have nothing to do with the matter. They are regulated by bye-laws at the present moment, and in Bombay it is the same; then why should it not be done here?"

The motion was then put and lost.

The Hon'ble MR. BUCKLEY moved—

(1) that to the sub-heading "*Part IV.—Dwelling-houses*," above rule 17 in Schedule XIVA (*now* XVII), the words "*and other domestic buildings*" be added;

(2) that in rule 20 of Schedule XIVA (*now* XVII) the words "domestic building" be substituted for the words "dwelling-house;"

(3) that in sub-rule (*1*) of rule 22 of Schedule XIVA (*now* XVII) the words "domestic building" be substituted for the words "dwelling-house," and that throughout the said rule 22 the word "building" be substituted for the word "house;"

(4) that in rule 23 of Schedule XIVA (*now* XVII) the words "domestic building" be substituted for the words "dwelling-house" in both places in which they occur, and that the word "building" be substituted for the word "house;"

(5) that the following amendments be made in rule 24 of Schedule XIVA (*now* XVII), namely:—

(*1*) in sub-rule (*1*) substitute the words "domestic building" for the words "dwelling-house;"

(*2*) in sub-rule (*1*) substitute the words "the buildings" for the words "the house and such building;" and

(*3*) in sub-rules (*1*) and (*2*) substitute the words "the said domestic building" for the words "the house."

(6) that in rule 26 of Schedule XIVA (*now* XVII) the words "domestic building" be substituted for the words "dwelling-house;"

(7) that the following clause be inserted in section 3, namely:—

"domestic building" includes a dwelling-house or any other masonry building which is neither a "building of the warehouse class" nor a "public building" as defined in this section.

He said:—"These matters are important in one sense and in another sense they are merely verbal amendments. The Calcutta Building Commission in their report, paragraph 117, made certain very important proposals about the space to be allotted at the back and sides of a building. In their report they used the word 'building' in some places and 'house' in other places, meaning that the stipulations with regard to space should apply to all classes of buildings and houses, and in their draft Bill, from which the sections in question are taken [section 42, sub-section (9)], the Building Commission used the word 'house;' so that the sections to which I am referring were not restricted in any way by the Calcutta Building Commission, and in that sense these clauses were passed and approved by the Select Committee. But when the sections of the draft Bill of the Building Commission were actually incorporated into the draft Bill in Select Committee, we did not use the word 'house,' but the expression 'dwelling-house.' The word 'house' has no technical meaning: the expression 'dwelling-house' has a technical meaning in the Bill. It has thus come about that the Bill before the Council conveys a different meaning from the Bill drafted by the Commission, and a different meaning to that which the Select Committee intended to give it. The difference is very material. The expression 'dwelling-house' only means a house in which people live, and it does not include a stable, or a shop, or a cook-house or such other buildings. The space which is specially provided at the back of all houses is intended to be a continuous open space to give a draught of air along the back of the row of houses, and it is necessary that this open space should be continuous. It is necessary therefore, and it was intended, that it should be at the back of all houses and not only at the back of 'dwelling-houses.' As the Bill stands, if there were a shop in a line of buildings it would not be obligatory to have a space at the back of it, and the continuity of the open space would be broken. The same remark applies, to a certain extent, to the spaces which are prescribed in the Bill at the sides of houses. The amendments which I now propose introduce the word 'domestic building': this is not quite as wide a term as 'house,' but it will include all houses which should have the prescribed spaces at the back or sides. The amendment will substantially give effect to the intention of the Building Commission and the Select Committee."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I am prepared to accept these amendments, provided the Hon'ble Member excludes places of private worship. I understand he is prepared to make that reservation on behalf of Hindu temples, and, if so, I am prepared to accept these amendments."

The Hon'ble MR. BAKER said:—"If the Hon'ble Mr. Buckley has no objection, I will raise none to the exclusion of private places of worship from the category of domestic buildings. I myself do not favour their exclusion, for I am not sure that these private places of worship have any special claim to exemption from the rules in this schedule."

The Hon'ble MR. BUCKLEY, in reply, said:—"My view is that if a person is living in a place which is said to be a place of private worship, it ought not to be excluded; but in view of the strong opposition of the Hon'ble Babu Surendranath Banerjee, I will not object to exclude places of private worship."

The Hon'ble MR. BAKER said:—"In that case I will move that the following clause be inserted in section 3:—

'"domestic building" includes a dwelling-house and any other masonry building which is neither a "building of the warehouse class" nor a "public building," as defined in this section, nor "a place exclusively used for private worship."'"

The last motion in the amended form was put and agreed to.

The preceding motions for the amendment of Schedule XIVA (*now* XVII), Part IV, standing in the name of the Hon'ble Mr. Buckley were then put and agreed to.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the word "enclosed" be inserted between the word "and" and the word "verandahs" in line 4 of rule 21 of Schedule XIVA (*now* XVII).

He said:—"The space occupied by open verandahs should not be taken into account, and, if there are open verandahs, allowance should be made for the space occupied by the courtyard."

The Hon'ble MR. BUCKLEY said:—"I do not think this amendment can be accepted. In many ways, as I said before, the proposals of the Calcutta Building Commission have been minimised in Select Committee. We have given way, here and there, little by little, on representations made by members of the Corporation, who wish to whittle away as much as possible the recommendations of the Calcutta Building Commission, to which so much trouble and thought were given. The open spaces in court-yards are very much smaller than the Commission would allow, and I am very unwilling to make any further concession. I may say that the rule as it stands at present in the bye-laws of the Corporation is one-fourth of the aggregate floor area of all the rooms abutting the court-yard, and that area probably does not include verandahs."

The Hon'ble BABU SURENDRANATH BANERJEE, in reply, said:—"I quite admit the concessions which have been made, but they do not come to the full extent of our demands. These are new regulations altogether, and they have created a considerable degree of alarm. We ought, therefore, to proceed with great caution. A few more concessions will allay public excitement, and in that hope and confidence I suggested a few amendments in Select Committee."

The motion was then put and lost.

The Hon'ble BABU SURENDRANATH BANERJEE moved that the words "or on the sides" be inserted after the word "rear" in line 3 of rule 22 of Schedule XIVA (*now* XVII).

He said:—"This open space, I suggest, should not only be in the rear, but, subject to the discretion of the Chairman, such open spaces might be left on the

sides. There is a danger in this provision which my hon'ble friends do not realise. If you leave an open space in the rear, sometimes it may form a *cul de sac*, and it will be difficult for conservancy carts to approach these open spaces; whereas, if you have spaces on the sides subject to the discretion of the Chairman, you may secure ventilation much more effectively than by the uniform rule that in every case the open space must be in the rear. I am afraid the Hon'ble Mr. Buckley and the Hon'ble Member in charge of the Bill are too inexorably wedded to English ideas to depart from them. Open spaces in England must be at the back: we all know that. But I submit there would be a distinct advantage if discretion was given to the Chairman to modify this rule by allowing open spaces at the sides in preference to open spaces in the rear."

The Hon'ble Mr. Buckley said:—"I object most strongly. This proposal is entirely opposed to the theory of the open spaces at the back. The Building Commission went very fully into the matter. The idea is to let the wind in in a line at the back. If you allow open spaces to be either at the back or at the sides, you prevent the free current of air along the back of the houses, and obstruct ventilation; you may entirely shut out all air."

The Motion was then put and lost.

The Hon'ble Babu Surenranath Banerjee moved that the word "eight" be substituted for the word "ten" in line 5 of sub-rule (2) of rule 22 of Schedule XIVA (*now* XVII).

He said:—"Under the existing bye-laws you are obliged to keep 4 feet open space at the rear. This rule provides for 10 feet; I suggest 8 feet: I give double the extent of the open space provided under the present law. The Hon'ble Member in charge of the Bill was at one time prepared to accept this amendment coupled with a condition which we were not able to accept. You provide for ventilation in such a variety of ways that if you make this small concession you do not lose anything."

The Hon'ble Mr. Buckley said:—"We have conceded and conceded and conceded; and yet the Hon'ble Member is not satisfied. It is perfectly true that the Hon'ble Member in charge of the Bill did at one time agree to make this concession, subject to a certain condition; but, not having agreed to make a concession on his side, the hon'ble mover of the amendment wants a concession to be made on our part. There is a rule that no one can be allowed to build on more than two-thirds of the area of the land, and that, in most cases, makes the open space 10 feet or more. A space of 10 feet is laid down in the London Building Act, and it is a reasonable figure. The sections drafted originally by the Commission were most complicated and intricate. I am quite satisfied that 10 feet is a reasonable minimum space. It is the minimum in London, where you do not need so much ventilation as you do in a tropical climate; and we have conceded quite as much as we should have done."

The Hon'ble Mr Baker said:—"The rule in London is not only 10 feet but 63½°, therefore the height of a building cannot be more than twice the width of the space at the back. That affects the position very much. In the Select Committee, I offered to agree to 8 feet, if that was accepted as a final settlement of the whole question. The Hon'ble Member refused to accept this, and the suggestion therefore dropped."

The Hon'ble Babu Surendranath Banerjee said:—"The bargain was that we should not raise this question in Council."

The Hon'ble Mr. Baker said:—"The proposal was offered as a settlement of the whole question."

The Hon'ble Babu Surendranath Banerjee, in reply, said:—"But my recollection is that we were not to raise this question and possibly other questions in Council, and if we consented we were to have a minimum of 8 feet. I do

think, as representatives of the rate-payers, we ought to have the liberty to raise whatever questions we think fit connected with the details of the Bill. Now with regard to the London minimum, the two things are distinctly different. In London, houses have not any court yard at all; in most Indian houses we have a court-yard. The arrangements of Indian families require two separate apartments, one for the males, the other for the females, and necessarily there would be a courtyard and this open space between. You insist upon the London rule despite the fact that we have there open spaces which the London rule does not require and does not provide for. Often there are two courtyards, and therefore you ought not to need a minimum of 10 feet. That is the logical position, and I think I have a right to ask the Council to accept that position. We ought not to stick to the London rule bearing in mind the totally different circumstances of houses in Calcutta and in London."

The motion was then put and lost.

The Hon'ble RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR, moved—

(1) That in line 5 of clause *(a)* of rule 27 of Schedule XIVA (*now* XVII), the word "six" be substituted for the word "twenty."

(2) That clause (*b*) of rule 27 of Schedule XIVA (*now* XVII) be omitted.

He said:—"Rule 43 lays down that no portion of a hut shall be placed within 6 feet of a masonry building, but under rule 27 the owner of the land in a bustee on which a dwelling-house is to be erected must give up all land which may be required so as to have a space of 20 feet in front of and along the entire length of the boundary line of the premises. It appears to me that these two provisions are inconsistent, and that it will be very hard if 20 feet space is to be left in front of a building. I therefore move these two amendments."

The Hon'ble MR. BAKER said:—"There is no inconsistency. Under rule 43 there is a provision that no portion of a hut shall be placed within 6 feet of a masonry building. It contemplates the previous existence of a masonry building, and in that case you cannot erect a hut within 6 feet of that building. But clause 27 provides for the case of a dwelling-house newly constructed in a bustee. We have provided by section 347 (*now* 350), clause (*2*), that the width of proposed streets shall not be less than 40 feet. Now the erection of a masonry house is the first step in converting bustee land into ordinary land, and every house constructed in that way must abut on a street and the street must be 40 feet wide; therefore you must provide along the length of the front of the premises of each masonry building erected in a bustee an open space of 20 feet, so that when a house is built on the opposite side and 20 feet is in the same way left in front of the entire length of the premises of such house, you will have a complete street of 40 feet. Unless you have such a rule, the rule that every new street must be 40 feet wide will be totally inoperative."

The first motion was then put and lost.

The second motion was then, by leave of the Council, withdrawn.

The Hon'ble MR. BUCKLEY moved that the figures "18" in rule 29 of Schedule XIVA (*now* XVII) be omitted.

He said:—"This is a clerical mistake. Rule 18 is not applicable to warehouses, and ought not to have been referred to in this section."

The motion was put and agreed to.

The Hon'ble MR. BUCKLEY also moved that in rule 29 of Schedule XIVA (*now* XVII), the words "domestic buildings" be substituted for the words "dwelling-houses," and that the words "which are not situated in a locality which has been set apart, by direction under section 365 (*now* 367), for the erection of buildings of the warehouse class" be added after the words "warehouse class."

He said:—The Hon'ble Babu Surendranath Banerjee was complaining that we are so very uncompromising that we do not make concessions. In this amendment I am offering him a concession. Rule 29 provides that the provisions of rules 22, 24 and 27 shall have effect in the case of buildings of the warehouse class. The effect of this would be that in the case of all warehouses it would be necessary to leave the spaces at the rear and sides which are defined in those rules. The amendment which I propose modifies this and makes the rule less strict. The effect of the amendment will be thus: that where a building of the warehouse class is situated in contact with a domestic building, that warehouse will have to be provided with the space at the back which is necessary for ventilation; but, if the warehouse is situated in a part of the town deliberately set aside for warehouses, the space will not be obligatory. In that case a space at the back is not so necessary as when a warehouse is erected in an inhabited part of the town."

The motion was put and agreed to.

The Hon'ble MR. BUCKLEY moved that in the second line of rule 50 of Schedule XIVA (*now* XVII) the words "any building which was erected before the commencement of this Act" be substituted for the words "a building," and that clauses (*a*) and (*b*) of the said rule be omitted.

He said:—"This is very little more than a verbal alteration. Rule 50 refers to the case of applying rule 2 where you are altering a building. The amendment proposes that instead of the word "building" the words "any building erected before the commencement of this Act" should be used. The effect of the rule will be that, in the case of any building erected before the commencement of this Act, the rule of $56\frac{1}{2}°$ shall apply instead of the rule of 45°. That is the intention of the rule as it stands, reading it with the sub-rule (*a*)."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I understand that the object of the amendment is merely to more clearly express the law, and that alterations to the building will come within the $56\frac{1}{2}°$ rule."

The motion was put and agreed to.

The Hon'ble BABU SURENDRANATH BANERJEE moved that clauses (*a*), (*b*), (*c*) and (*d*) of rule 52 of Schedule XIVA (*now* XVII) be omitted.

He said:—"This is a somewhat important matter, and I think we have a right to some sort of compromise. Rules 31 to 36 prescribe important rules applying to the erection of buildings; rules 47 to 49 apply to the erection of huts. I suggested that these rules ought not to apply to necessary alterations. That was accepted, but certain reservations were made, and they are stated in this rule. I suggest that the reservations contained in clauses (*a*) to (*d*) be omitted. I think that the construction of a roof or a party-wall is a necessary matter, or any repairs which involve the reconstruction of a masonry wall, &c., the closing of an opening in a wall, or the construction of an internal wall or partition. I ask that this amendment be accepted in view of the compromise which has been come to."

After consultation with the Hon'ble MR. BUCKLEY, the Hon'ble BABU SURENDRANATH BANERJEE moved, in lieu of the above amendment, that the

following amendments be made in Schedule XIVA (*now* XVII), rule 52, namely :—

(1) in clause (*a*), omit the words "or re-erection";
(2) in clause (*b*), omit the words "a ceiling";
(3) in clause (*c*), for the word "opening" substitute the words "door or window."

The Hon'ble Mr. Baker said:—"I accept the amendment as modified."

The last motion was then put and agreed to.

SCHEDULES XIX AND XX.

The Hon'ble Babu Surendranath Banerjee also moved—

(*1*) that in Schedule XVIII (*now* XIX) a column be added for the heading "Where born" after the column headed "When born;"
(*2*) that in Schedule XIX (*now* XX) a column be added for the heading "Name of medical attendant, if any, during last illness" after column 8.

He said:—"This is the present practice. The object is to ascertain where the birth took place."

The Hon'ble Mr. Baker said :—"I accept the amendment."

The motions were put together and agreed to.

SECTION 3.

The Hon'ble Mr. Baker moved that the last eight words of clause (*5*) of section 3 be omitted.

He said :—"This clause contains the definition of a bustee, and the last eight words of the clause are 'and are not separately numbered in the assessment-book.' Those words do not occur in the existing law, and the effect of their insertion will be to enable an unscrupulous owner of a bustee to defeat the law. Suppose a man has 27 cottahs of bustee land with huts on them, the whole being registered in one name and bearing one number. Suppose he collusively subdivides the 27 cottahs into three plots and gets two of the plots registered in the name of two of his tenants. Then the whole of the 27 cottahs ceases to be bustee land."

The Hon'ble Babu Surendranath Banerjee said:—"I agree with my hon'ble friend. But this is the definition of the Building Commission, whose wisdom has been our wisdom in a variety of matters."

The motion was put and agreed to.

The Hon'ble Mr. Baker also moved that in clause (*22*) of section 3 the word "material" be inserted between the word "no" and the word "portion."

He said :—"The Chairman of the Corporation pointed out to me that the effect of not inserting the word 'material' will be that if a man inserts half a dozen bricks above the plinth in any corner of a hut, it will no longer be a hut. It is quite clear that the word 'material' should be inserted."

The motion was put and agreed to.

RE-NUMBERING OF SECTIONS OF BILL.

The Hon'ble Mr. Baker moved that the Secretary be directed to re-number in consecutive order the Chapters, Schedules and clauses of the Bill, and to make corresponding alterations in all cross-references thereto.

He said:—"That is a purely formal motion. The numbering of the Bill remains as we settled it in Select Committee, as we thought it should be more convenient for the majority of the Council not to attempt to re-number the sections of the Bill until the clauses of the Bill are settled by the Council; but it was never intended that the Bill should remain in its present form. It was always contemplated that consecutive numbers would be given all through the Bill, and that will now be done."

The motion was put and agreed to.

The Council was then adjourned to Wednesday, the 27th September, 1899.

CALCUTTA;
The 16th January, 1900.

F. G. WIGLEY,
Assistant Secretary to the Govt. of Bengal,
Legislative Dept.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

THE Council met in the Council Chamber on Wednesday, the 27th September, 1899.

Present:

The Hon'ble SIR JOHN WOODBURN, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
The Hon'ble MR. W. B. OLDHAM, C.I.E.
The Hon'ble MR. R. B. BUCKLEY.
The Hon'ble MR. C. W. BOLTON, C.S.I.
The Hon'ble MR. E. N. BAKER.
The Hon'ble RAI DURGA GATI BANERJEA, BAHADUR, C.I.E.
The Hon'ble MR. C. E. BUCKLAND, C.I.E.
The Hon'ble MR. F. F. HANDLEY.
The Hon'ble MR. F. A. SLACK.
The Hon'ble KHAN BAHADUR MAULVI DELAWAR HOSAIN AHMED.
The Hon'ble BABU JATRA MOHAN SEN.
The Hon'ble MR. T. W. SPINK.
The Hon'ble RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR.
The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH, C.I.E.
The Hon'ble MR. D. F. MACKENZIE.
The Hon'ble MR. J. G. APCAR.
The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, M.A., D.L., F.R.A.S., F.R.S.E.
The Hon'ble BABU BOIKANTA NATH SEN.
The Hon'ble BABU SURENDRANATH BANERJEE.

THE DISASTER AT DARJEELING.

The Hon'ble THE PRESIDENT said:—"Hon'ble Members have heard with deep concern of the terrible disaster which has befallen Darjeeling. The loss of life has proved to be far more grave than it was at first believed, and I cannot put the tale of human lives lost at less than about 400. I am sure that the whole Council will join with me in the most heartfelt sympathy for the families of the victims of this calamity."

THE CALCUTTA MUNICIPAL BILL.

The Hon'ble MR. BAKER moved that the Calcutta Municipal Bill, as amended by the Council, be passed.

He said:—"I do not think the Council will expect me, at this stage, to enter upon a lengthy vindication of the Bill. Some of my hon'ble friends opposite propose, I understand, to take this opportunity of expressing once more their disapproval of the measure; but for my part I regard the motion as almost entirely formal. The Bill has been scrutinized and examined with the greatest minuteness. Its guiding principles were settled after the full and interesting debate in March and April, 1898, and were revised after the debate of last month. Its details were criticized and reviewed with almost unprecedented elaboration by the Corporation itself, and by the numerous public bodies and associations to whom it was referred. In the Select Committee, whose sittings extended over more than five months, it was again subjected to a most searching examination, with the result that large sections of it were wholly recast, nearly 1,000 modifications, great and small, having been introduced. And finally for the past three weeks this Council has been engaged almost continuously in considering an army of proposed amendments, nearly 600 strong, sifting out the wise from the unwise and incorporating all suggestions of value. To urge now that we should not pass the measure on which so much pains and thought have been expended, and that we should deliberately throw away the fruit of our long-continued labours, is surely to stultify ourselves completely. It must be obvious to all that such a course is not to be thought of.

"And, Sir, I think I may fairly maintain that the Bill as it now emerges from the final consideration of the Council is a better Bill than that which was originally introduced—a stronger and more workable measure. The cardinal principle of the original Bill was the creation of three co-ordinate authorities,—the Corporation, the General Committee and the Chairman,—and the distribution between them of the functions most appropriate to each, each of them being made independent within its own sphere. This principle we have endeavoured to preserve intact. But, in addition to this, we have incorporated a number of improvements of much practical value. In the first place, we have been able to get rid of the incongruity between the composition of the Corporation and that of the General Committee, which was a prominent feature of the original Bill. This incongruity attracted more unfavourable criticism than perhaps any other provision of the first scheme; and I am at liberty to confess that I personally regarded it from the first with grave misgiving, as the fatal flaw in the girder which might at any moment bring the whole structure about our ears. Then, we have made provision for the adequate representation, relatively, of those great commercial interests which have literally created modern Calcutta, but which, when left to the chances of election, have found themselves hopelessly out-numbered. Again, we have devised a scheme of central control, which is as simple, ready and effective as we can make it, and under which the Government will no longer be subject to the reproach that it is responsible but powerless. On the other hand, we have restored to the Corporation an effective power of control in matters of finance—a power which under the first draft of the Bill they possessed only in name. We have also secured to them the power of subordinate legislation, of which it had been proposed to deprive them altogether. Turning from matters of procedure to matters of substance, we have endeavoured to provide Calcutta with an effective building law, based on the most approved modern models, in lieu of the confessedly imperfect and inoperative

The sections of the Bill having, under the direction of the Council, been re-numbered, the present number of each section is inserted in brackets, wherever the new numbering is altered.

regulations which have so conspicuously failed to control the expansion of the city during the past ten years. And by the legal device, for which the Council are indebted to Mr. Wigley, of placing the bulk of the detailed rules in a statutory schedule which can be amended from time to time, we have secured the elasticity which is so essential when we are regulating matters which touch the daily lives of the people. In respect of the water-supply, of conservancy, of drainage, of the registration of births and deaths, and of a multitude of minor but important matters of municipal administration, an endeavour has been made to secure a substantial advance based on experience both here and elsewhere, while at the same time avoiding innovations likely to excite reasonable popular apprehension. How far we have been successful time alone can tell; but I can conscientiously affirm that we have done our best to give heed both to the lessons of experience and to the admonitions of all reasonable critics, and that, alike in the Select Committee and in this Council, it has been our consistent endeavour to hold the balance true.

"It is significant, and also a little disappointing, that, of the multitude of amendments which it has been our duty to consider, so large a proportion has been devoted to the merely constitutional portions of the Bill, and so few, comparatively speaking, to those which seek to make provision for the public health, safety and convenience. And in this fact, whether we regret it or not, is to be sought the answer to the protest of the Hon'ble Surendranath Banerjee when he complained that so many of his amendments had been rejected by the Council. It is not to be supposed that the Government of Bengal, which is responsible for the administration both of the Province and of the Calcutta Municipality, would set its hand to a measure of legislation such as this without first making up its mind as to the evils to be remedied and the general outlines of the remedy to be applied. Speaking for myself, Sir, I hold the view that, whatever the theory may be, from the very necessity of the case, this Council is, and must be, a subordinate Legislature. It can have no authority to enact any measure the broad principles of which have not been endorsed and accepted by the Government of the day, with which all ultimate responsibility rests. When the principles of any measure have after due consideration received the sanction of the executive Government, the function of the Council is confined to settling the details. And it is an idle task for any Member to endeavour, by any application of the forms of legislation, to defeat those principles or render them nugatory. I feel sure that the Hon'ble Members who have filled the notice-paper with sheaves of amendments, the avowed object of which was to uproot the very foundations of this Bill, never in their own hearts felt any doubt as to what must be their inevitable fate. In so far as they addressed themselves not to the structure of the municipal machine, but to the work which the machine was required to do, the reception of their suggestions and amendments has been very different. It is apparent to all who have followed the proceedings of this Council during the last three weeks that every amendment dealing with the departmental provisions of the Bill has received open-minded and impartial consideration at the hands of Government, and that a substantial proportion of them has been accepted and embodied in the new law. That, Sir, is, I conceive, in strict accordance with the true functions of this Council.

"It has been asserted that the present measure is destructive of the true principles of local self-government, and that, if it is enacted, nothing will remain of local self-government but the name. You, Sir, in your addresses, on the 14th November, 1898, and again on the 7th August last, have exposed the misconception on which this charge is based. You have shown that what we are now doing is merely to change the form of self-government, and to replace a system which experience has proved to be defective by another more adapted to the needs of the time. I should like to go even a little further than that; for I maintain that the change which we are now effecting is itself a real and striking recognition of the depth to which the principles of local self-government have struck their roots in this town. So long as that system was in its infancy, it may have been right and politic to encourage its development by fair words, by indulgent blindness to its early failures and shortcomings,

and by cordial and even exaggerated commendation of its successes. But, Sir, local self-government has now outgrown the need for treatment which is only appropriate to the period of pupilage. The stage has passed when it could be rightly regarded as a youth of promise, and it must now be content to be judged as a man is judged—by its performance. An instructive parallel to the process through which self-government in Calcutta is now passing will be found in the history of the great Volunteer movement in England. When the Volunteer Army was first started shortly after the Crimean War, and for many years afterwards, it was treated as a desirable game or plaything, to be encouraged and belauded, but not to be regarded as a serious factor in the national defences. For many years the official utterances regarding the Volunteers were uniformly laudatory and even fulsome; their obvious defects were ignored, and flagrant breaches of military discipline were winked at which would have instantly led to severe consequences had they occurred in the regular army. All this has now changed. By steady perseverance, the Volunteers have at length raised themselves to a strength and to a pitch of efficiency which have caused them to be recognized as a valuable and integral component part of the defences of the empire. And now the attitude of the heads of the Army is far different from that of earlier years. They treat the Volunteers as men, and not as children. They do not scruple to point out their defects and shortcomings; they insist on a strict standard of discipline; and they do not hesitate to prune away any offending members whose imperfections impair the efficiency of the whole force. The reasons for this attitude are perfectly well understood in England, and public opinion thoroughly appreciates and approves the motives of the change. That, Sir, is something very like the stage to which the system of local self-government has now grown in Calcutta. And with what justice, reason or consistency can Government be charged with hostility because in the 23rd year of the life of the Calcutta Corporation it now seeks to measure its work by the standards of manhood, and not by the standards of youth?

"One word in conclusion. I trust I shall not be regarded as going beyond my province if I venture to bring to the notice of the Council the invaluable services which it has received in respect of this measure from our Secretary, Mr. Wigley. The labour devolving upon him in the various stages of the Bill has been enormous and incessant, and I think every Member of the Council, and especially those who were also Members of the Select Committee, will agree with me that his duties were uniformly discharged with the utmost ability, courtesy and patience.

"With these words, Sir, I beg to commend to the Council the motion that the Bill as amended be now passed."

The Hon'ble Mr. Apcar said:—"My opinion is so strongly opposed to the Bill that is about to become law that I cannot allow this opportunity to pass without entering my final protest against it.

"I am entirely in favour of securing every sanitary precaution for the health and well-being of the city. At this stage, I would refrain from offering any remarks in respect of the incidence of taxation and the general details of the Bill. But I feel constrained to raise my voice against the methods that have been employed in pressing on this measure, and against the revolutionary changes that have been effected in the constitution of the Corporation. Without investigation or enquiry, and, in this, contrary to all precedent; on statements that cannot stand the test of examination and cannot be justified in fact; without a hearing being granted to those who have been placed under the shadow of grave and indiscriminating charges; with no regard for the past history of the question and with no consideration for the policy of previous administrations; without practical knowledge of the subject on the part of those responsible for the measure; in supersession of concurrent official declarations of the highest authority, this Bill has been introduced, has been passed through its various stages, and this Council are called upon to-day to finally affirm it.

"The work of forty years has been undone. Self-government that was intended, in all sincerity, to be real and genuine in its operation, is to be

replaced by self-government in a form that is only a mask for official absolutism.

"Sir, laws depend as much on the pipes through which they pass, as on the fountain from which they flow, and here my objection comes with added force when the Government is subverting a policy which was foreshadowed 60 years ago, and for nigh upon 40 years has been upheld and given effect to, by successive rulers of this Province, supported by successive Viceroys, and always with the assent of the Home Government, under both Conservative and Liberal Administrations.

"The proceedings leading up to and in connection with this measure have been of so unusual a character—so blindly persistent—that I am led to express the wonder that I feel whether you, Sir, and the official Members who support you in this Council, are conscious that you have been engaged in sitting in judgment, not on the instruments of their policy, but on your predecessors in office; that you, with one voice—and when in this Council you do agree, your unanimity is truly wonderful—have been condemning, not those upon whom duties have been imposed, but those who have been responsible for, and have passed, the laws under which the city has been administered; that you are stigmatising the past rulers and administrators as having been improvident and without foresight; as having been unable to appreciate facts then existing and incapable of judging as to what was right to be done; in a word, as having failed in every particular on which the title of wise and statesman-like government rests? And to such a degree has your condemnation proceeded, so undeniably wrong and absolutely mistaken do you wish to proclaim your predecessors to have been, and so evident and palpable you desire to suggest is the remedy to be applied, that you have, without any semblance of an enquiry or investigation, determined what form the new constitution shall take. Again, I say, let the Council mark! The sweeping condemnation on past administrators, and on past Members of the Legislature, attaches, not to one Lieutenant-Governor, not to a single administration, but to the whole succession of them, one after the other. To what can this revolution in the views of the Government and in the votes given in this Legislature be attributed? We know that it sometimes happens that a wave of sympathy and sentiment overpowers the councils of Governments, and sweeps away, in its course, long-established laws. We have seen this occur where democratic influences have force, and public opinion is a determining power. But conditions such as these have no existence here, and in this question there has been no cause such as I have indicated.

"At the inception of this measure there was apparent an unconcealed antipathy, which can be traced to an earlier period, towards those who have borne the drudgery of the work of this city, who, as has been truly said, have not usurped power, but who, finding others abandoning it, have laboured in the interest of the city, and in carrying out their duties have done their work, as my hon'ble friends, Mr. Oldham and the Member in charge of the Bill have described, in emphatic contradiction to all that had been said before, faithfully, honestly, and with singular ability. A very noticeable circumstance during the progress of this measure is the change in the attitude of those who have become responsible in the Council for this measure, in the later phases of the proceedings, towards a certain class of the citizens of Calcutta. I am not here as a champion of the Hindus. They need no champion outside their own community in the presence of the non-official Members of the Council who represent them. But as a Member of this Legislature, and now engaged in dealing with this Bill which is a subject of recognised public importance, I may be permitted to express my satisfaction with the change in this connection. With this there nevertheless has been no relaxation in the strenuous efforts to destroy every trace of the constitution that made self-government by the Corporation of Calcutta a reality, and gave them open control of the administration.

"So far has this policy of restriction been carried that the Chairman, in his executive functions, is without supervision or control. However much the public may desire it, they are left absolutely without power of obtaining

any information of what he may be doing, or how his subordinates may be conducting themselves. The supervision and control that was found to be so necessary, and was a salutary check on the vagaries of the Executive, is completely withdrawn, and not even the opportunity of criticism is left. The Chairman of the Corporation, whom in the past we have known not merely as an advocate, but as the active protector of his executive subordinates, is in the future to be the sole arbiter of our fates, which are now to be confided to such persons as the Executive of the Corporation of Calcutta. Again, the public are to be left at the mercy of the General Committee in respect of such functions as have been allotted to that body. That body need give such information only as they may be pleased to vouchsafe, and they can withhold whatever they in their unfettered discretion may choose to withhold. It is perfectly true that the General Committee is formed out of the Commissioners of the Corporation, but it is no less a fact that that Committee has been formed into an independent authority, working with closed doors and under the presidency of the Head of the Executive, and in their body the representatives of the rate-payers, through whom the grievances of the public have hitherto found vent, under the new law, will be in a helpless and standing minority. What a contrast is this to the conditions under which the Corporation has worked for 36 years past!

"The Corporation through all these years have enjoyed full and effective control over the administration, and have earned the encomiums of the statesmen who have ruled under successive administrations. They have, by working in the light of day, taken the public into their confidence, and have submitted themselves to their judgment. When there has been a grievance to be redressed, a wrong to be complained of, any suggestion to be made in the interest of the public, any Commissioner has hitherto had the right of audience in the General Committee. In the new law, the Government have refused to concede the right to the Corporation of even a *précis* of the proceedings of the General Committee, so that we now have the prospect of the Municipal Executive, a body whom we have found ourselves unable to trust in the past, completely shut off from any supervision and criticism by the general body of Commissioners: the General Committee, a body of 12 persons who will be entrusted with large and independent powers—nearly all of which, however, they can delegate to the Chairman if they so wish, and attend their meetings simply to endorse the Chairman's proceedings and pocket their fees for the work—and yet will not be responsible to the general body of Commissioners. They will deal with large sums of money, and will be working with closed doors, yet need give only such information as they may choose to give to the general body of Commissioners, that is, to the public, and then at a meeting under the presidency of the Head of the Executive, who is also their own *ex officio* Chairman, and as such, and naturally so, a partisan in any question affecting their action, to control all discussions. In all these re-arrangements, the public may well enquire, where will the Corporation, that is, the general body of Commissioners, come in? What will be their functions, and what will be their share in the scheme that is called self-government? Their functions were rightly gauged by those who originally framed the Bill, for they allowed them the privilege of meeting only four times in the year. The general body is to be the elective body, to elect 8 members of the General Committee, 4 being elected by half their number and 4 by the other half, and Government nominating the remaining 4 members. They may consider the annual budget, they may also consider the annual administration report. Each of these two functions occurs once annually. And all contracts involving an expenditure of more than Rs. 10,000 must receive their sanction. There will be some such contracts in the near future, but the necessity for them will not continue for any length of time, nor will there be many of such at any time, even if the necessity for them does continue for a long time. They cannot be regarded as likely to give permanent occupation to the general body. To discuss the annual report will require intimate knowledge of the subject, which must die out soon among the general body. To discuss the budget with intelligence will also require intimate knowledge, and it is a subject in which not many will be qualified to enter. If interest is kept up in these budget discussions by the general body, opportunity will recur periodically,

but only once in the year. After the passing of the budget the general body will exist with suspended animation until the next annual meeting. Is this scheme seriously to be represented as self-government? If the Government desire to make of the Municipality a Government department, they can easily do so. If they wish to form a small Municipal Board, let that system be adopted. But why devise the elaborate machinery now adopted for such a very little effect? If the European community, for whose gratification this measure is ostensibly designed, continue as apathetic and indifferent in the future as they have been in the past, the law may continue in force for some time until the mischiefs of the system, in spite of all the provisions that exist in the law to cover them, are disclosed. And not the least among the mischiefs that I fear is financial bankruptcy. If, however, the Europeans begin to take interest in the municipal administration, they will soon wake up to the consciousness of a system carried on under cover of the name of self-government, which in effect is nothing of the sort. They will not consent to continue as nonentities in such a form of administration, and in these circumstances it is inevitable that there will be an outcry from them for a change at no distant date, when the fate of the law will be sealed.

"Your Honour has referred to the advantage of the Head of the Executive being in the chair of this Legislature, with reference to the scheme under which, in the Corporation, the Head of the Executive is to be in the chair, both of the General Committee and of the Corporation. I venture to point out that there is a great difference between deliberative bodies where executive functions have to be discussed and where only laws have to be considered. I have myself, I may say, no desire to commit such a solecism as to question the rulings from the chair; but I may be permitted to remind Your Honour of the many amendments in this Legislature that have been disallowed by the Chair in our proceedings, although there are strict precedents in their support. 'The toad beneath the harrow knows, exactly where each tooth point goes, The butterfly upon the road preaches contentment to that toad.' No one will acknowledge more readily and with greater personal goodwill that the harrow that plies under the hand of the occupant of the Chair is covered with the softest velvet. Howmuchsoever the butterflies ranged on either hand in your support in Council may preach contentment, they are not under the harrow, and however softly tempered or softly covered the tooth points may be, they are there and must be felt. After all, Sir, this Legislature is only in an embryo state, and when more fully developed we may even see the precedent of other more advanced legislative assemblies followed, and find this Legislature removed from Executive control in the office of its President. I acknowledge that there may be necessity for Executive control to continue for the present in this country. I merely desire to submit that Your Honour's analogy does not hold good, and does not justify the control of the meetings of the Municipality, by the Head of their Executive as their Chairman.

"The Hon'ble Member in charge of the Bill has said that there has been the fullest discussion on every point; but there is one point, and a most important one, to which I would ask his attention, with regard to which I have heard no explanation. The Bill was designed with elaborate care in order to provide for the condition that the numerical majority of the Hindus would continue to exist in the Corporation. Sir Alexander Mackenzie, in very decided terms, publicly stated that the number of Commissioners as constituted under the present law would remain untouched, that is to say, that the Hindu majority would continue to be a factor in the question. Permit me to remind you, Sir, and at the same time the Council, of your own words on the point—lest we forget!

"I feel that it is almost ungracious, when I recall the patient courtesy with which you, Sir, have listened to the proceedings of this Council and the consideration that we all have met with at your hand to criticise any word spoken by you. But I hope it will be recognised that this is a debate on an important question, and I have to make use of all the material that I find necessary and available. On my part I can say, no one will appreciate with keener interest and good humour any reply that is fair and to which I may have laid myself

open. It is far from my desire, and indeed would be contrary to my wishes, to suggest an attack on you, Sir. But, Sir, I have to perform my duty here, and I hope that I may be permitted to perform my duty without in any way causing any kind of umbrage. Sir, these are your own words:—

'And, speaking for myself, I endorse with the heartiest pleasure and satisfaction the decision that the constitution of the Corporation shall remain as it is. I look upon it as of the greatest value to the administration of the City that there should be numerous wards and numerous delegates. The information and advice about local needs, which these delegates bring, will be of most important service. There could be no more excellent illustration than in the assistance they gave last hot weather in calming the fears of the people and establishing the temporary hospitals, which were the best means of reassuring them. I welcome, therefore, the arrangement which retains a large number of local Councillors, and the dangers of possible friction I personally regard as enormously outweighed by the certain advantages of their help.'

"Of the sincerity of these words I do not suppose there is an educated man in Bengal—or in the North-West—or in the Central Provinces—who would entertain the suspicion of a doubt. They might have certainly been accepted as Stygian oaths and inviolable promises. No expressions could have better conveyed a determination to maintain the number of Commissioners at 75, and that it was necessary and wise to maintain that number. To my bewilderment, being only a raw, newly joined recruit in this Legislature, which has been described by high and responsible authority as free to shape the measure before it in accordance with the views entertained within the Council, I have found these explicit declarations swept away like chaff before the wind, and this independent Legislature shaping this measure, which presumably has been committed to their judgment, not in accordance with the declarations of their policy by two successive rulers of this Province, but in accordance with the executive order of superior authority. But, Sir, if the Local Government find themselves unable to stand up to the recoil of their own gun, there is yet another consideration in which the Government of India express themselves as being in complete accord with them, but which has been lost sight of. Sir Alexander Mackenzie and Mr. Risley have directed their objections to the Hindu element in the Corporation and the effect of their predominance in that body. The Government of India, in their summary, under four heads, of the grounds for a change, follow the same line, except indeed they mention the failure of water-supply, which is news to me, and since the changes in the constitution will not improve it, I let that pass. All the rest is directed at the Hindu element in the Corporation. The objections of Mr. Turner and of the Hon'ble Member who still represents the Trades centred round the same point. All that the Hon'ble Member who now represents the Chamber said hinged on the same subject. When circumstances have altered, when the mischiefs that were said to exist have been removed, when the causes that have been stated to have given rise to the evils complained of can no more be found, when the reasons, the presence of which we were told led to the introduction of this Bill, cannot be quoted, what justification is there for the revolutionary changes that now have been made? The whole aspect of the question has now been altered—it has been completely altered. The Bill was introduced under wholly different circumstances, and I have watched with keen interest to learn 'why—for what reasons—the Bill has been continued to be proceeded with on the lines on which it was originally framed. But the Government have not even attempted to give any reason or suggestion or any explanation whatsoever. If it was desired to define the powers of the executive, that could have been done without making the revolutionary changes that now have been effected in the constitution of the Corporation, but the new law has not improved matters, even in this connection. The public have been entitled to learn the reasons for such revolutionary changes, and I am curious yet to learn how these changes can be justified. I have looked for the sturdy independence, the self-reliance and the public spirit, that has placed the Trades Association in so high a place in public esteem, to assert itself in this Council; but I have looked for it in vain. I had hoped to find in the Chamber of Commerce the home for independent thought and independent action; but I have found their representative voting away, with the official Members, all the substance of what makes self-government a reality. If in their opinion, even under European influence, the Corporation cannot be trusted with any measure of real self-government,

and they have wanted a constitution with an independent and irresponsible executive, with powers given to a small Municipal Board that can be rendered purely nominal, with payment for the nominal performance of public duties, and working with closed doors, they have got their desires in the Bill. But they have never yet said that this is their idea of municipal reform. And, if only those whom they represent will take an interest in municipal affairs, I may be allowed to express my opinion, for theirs are the communities among whom I live and move and have my being, it is not difficult to predict that it will be from them that the objections to the scheme embodied in the Bill will come, and it will come from them with added force.

"If the desire for reform had been the real motive for this Bill, the proceedings leading up to its introduction would have been vastly different. Instead of a Bill being secretly fashioned in the inner recesses of the Secretariat and sprung upon an astonished public, there would have been an open enquiry and investigation, the opinions of those with knowledge and experience would have been courted, and an endeavour would have been made to give us a system that would have aimed at removing the mischiefs that had been found in the enquiry to have existed, and to provide against them. If decentralisation was required, it could have been seen how that could be effected, and we would not have had the Hon'ble Mr. Buckley declaiming on every opportunity that decentralisation was the greatest need of the municipal administration, and by the irony of events, with mechanical precision, holding up his hand to vote for complete centralisation of power in the Chairman. 'It is to be regretted that Calcutta was too proud,' said Sir Alexander Mackenzie, 'to borrow its constitution from Bombay, which to my mind has an admirable system, combining all that is required of popular representation with a strong executive.' Sir, if that was the acme of Sir Alexander Mackenzie's desires, and if the enquiry had made out that the present constitution ought to be changed, we might have had the Bombay system in its entirety, as is indicated by the originator of the Bill before the Council. We then would not have seen the Hon'ble Member in charge of the Bill rendered so unhappy by having to make protestations of the deepest hostility to any powers at all being left to the Corporation, and victimised by being driven to use arguments that were consistent only in their inconsistencies, not once or twice only, but again and again throughout the discussions,—now scornfully rejecting the Bombay Act, now quoting it in seductive tones in his own support as against proposals based on results that have been found to have been beneficial and successful under the present Act, and, of all contentions in the world, having to rely on the provisions of the present Act as to powers given under it to the Chairman to vindicate his amendments. Those with knowledge of our municipal administration have, from the first, regarded this Bill as being ill-considered and unworkable in practice. It has been before the Council for a long time, as we have so often heard. It never occurred to the framers of the Bill to insert the provisions of section 24A (*now* 16), which I shall presently more fully mention, and the Bill passed through two references to the Select Committee without any idea, apparently, that they would be wanted, and it brings into relief the criticisms on the Bill to which I have referred. That the section should have been found to be necessary only at the last stages of the Bill, and that the law would have been found unworkable without it in certain particulars, the proceedings themselves testify. But, Sir, the introduction of the section is not without interest to those who have been opposing the Bill, and for a very special reason. Sir Alexander Mackenzie and Mr. Risley loudly proclaimed that, under the present Act, the Chairman's powers were undefined and in a fluid state. I deny that there has been any difficulty in practice under the present Act: the duties have been sufficiently defined, and there has been no question in this respect. But Sir Alexander Mackenzie and Mr. Risley undertook to clearly define the respective functions and duties of the three so called co-ordinate authorities, and their intention was expressed by the frame of the Bill as it existed until a few days ago. Now we have it that the General Committee who have had certain specific duties assigned to them, to be performed by them at their own discretion and on their own responsibility, may delegate all that required 'their approval, sanction, consent or concurrence' to the Chairman. The powers that the General Committee can delegate are described, as will have been observed, in the widest terms. And

now the new law that was to effect such a great reform in this particular, and in place of uncertain provisions as to the respective duties of the authorities, to present well defined duties in explicit terms—and we know that Sir Alexander Mackenzie and Mr. Risley took credit to themselves for having carried this intention to effect—we, after all, find the provisions of the new law taking a form, at the last moment, more uncertain and undefined than the law that was so lightly condemned, and the Hon'ble Member who has been in charge of the Bill has now helped to complete the discomfiture of the attack on the Corporation, and has justified by his conduct, if not by his vote, the proceedings of his earlier official predecessors who were responsible for the law that is being repealed.

"Sir, if a constitution had been decided upon after sober enquiry and investigation, I might have differed from the views of the Government, but I would not have had the same ground for the strong objection I offer to the measure before us, and the proceedings relating to it. I shall now place before the Council, what they apparently do not know, the unbroken system of enquiry in years past that has been adopted in questions relating to municipal administration.

"The first proceedings to which I shall draw attention will be the report of a Committee made in the year 1840—I think that it will be found to be of great interest—that was appointed by Lord Auckland to enquire into local management and taxation in Calcutta. I would draw particular attention to the references made to the disposition of the mercantile community as distinguished from the trades, and in what a studied fashion they kept themselves aloof from municipal administration; and to the policy and anticipations of Government, even in those early days, with regard to the educated natives and the help to be expected from them:—

'Your Committee have received only two plans of municipal government—one from C. K. Robinson, Esq., Magistrate, and the other from the Trades Association, the Chamber of Commerce declining to enter upon the subject as being beyond their province. Your Committee may have every reason to believe that the members of the Trades Association would perform the duties which they have proposed laboriously and zealously, and that if the inhabitants of Calcutta were all, or even a majority of them, Europeans, such a plan, based on election by inhabitant householders, would be found well adapted for municipal government; but considering that the European inhabitants are an insignificant part of the whole population of Calcutta, and that by far the greater part of them can only be regarded as temporary residents, your Committee cannot take upon themselves to recommend what they consider wholly unsuited to the present state and condition of the great majority of the inhabitants.

'Your Committee are, however, of opinion that, considering the rapid progress now making in education, many years will not elapse before a class of natives will be found in Calcutta able and willing to aid their European townsmen in performing those municipal duties usually entrusted to the inhabitants of cities in Europe; and your Committee therefore feel anxious that some preparation should, if possible, be made for so training the inhabitants of Calcutta that they may in time relieve the Government entirely from the attention which it is now compelled to give to those minute local details.'

"The administration of Calcutta by a small Municipal Board continued until the year 1863, when a change was introduced in consequence of complaints emanating from the Trades Association. Again we find enquiry and close investigation into the question. Evidence was taken, and the whole subject was sifted before any new system was adopted. I shall place before the Council the remarks of Mr. Eden, afterwards Sir Ashley Eden and Lieutenant-Governor of this Province, who was in charge of the measure that eventually was accepted. The first proposal had been for an administration by 36 persons, and the scheme did not include any participation on the part of the officials of Government as such. Mr. Eden in introducing his measure said that there were two schools of opinion—one of them supporting the view that 36 persons would be found ready to devote their time in the interest of their fellow-citizens, the other not agreeing with this view. I shall give in Mr. Eden's own words the views of the latter school, and again I would draw attention to the opinion entertained in his day with regard to the chances of Europeans taking part in

the administration of Calcutta and the qualifications of the natives for doing so. This is what he said in Council on the 17th of January, 1863 :—

'There are those who hold an entirely opposite opinion, who say that it would not only be impossible to get thirty-six volunteers to carry on the work of the Municipality, but that not even six men would be found ready to sacrifice any reasonable portion of their time for the good of the public. They say that the European residents who understand and appreciate representative administration are too busy to take any part in local administration in this country, and that the native residents neither understand nor appreciate anything of the sort.'

"The next change in the administration was effected in 1876. Again, we find the Government of the day approaching the subject with an open mind and in a liberal spirit. Counsel were heard on the question of the elective system before a Committee of the whole House, and after an open discussion the elective system was granted, the Lieutenant-Governor of the day, Sir Richard Temple, giving the widest latitude to his official Members in all the questions that were raised. It was on this occasion that the Government deliberately rejected the proposal of a Municipal Board working with closed doors, on the ground that the most complete publicity was beneficial in the interests of the public. We have the strongest testimony from more than one quarter that the success of the new system equalled anticipations. I have already quoted a letter in a previous stage of the proceedings under the signature of Sir Alexander Mackenzie, dated 10th January, 1884, when he was Secretary in the Home Department of the Government of India, conveying the approval of that Government of the work done by the Corporation. He said that they had done 'much excellent work' in the year. And it was significant and important that this should have been communicated at that time by the Supreme Government, because it was about the time when the Beverley Commission, of which we have heard so much, was appointed. And those who have been quoting that Commission against the Corporation have lost sight of the fact that the agitation that led up to its appointment gained strength by reason, not so much of the faults of the Commissioners, but what was discovered to be the *laches* of the executive, who had neglected to flush the sewers, and thereby had been the cause of the very foul odours in the European quarter that had caused the strong outcry among the European residents of Calcutta. I have already in a previous stage of our proceedings quoted Sir Henry Cunningham, who led the agitation in those days, that the announcement of the existing conditions with relation to the Beverley Commission was 'a most satisfactory' one and how he 'had never heard of any one so ignorant and so foolish as to under-value what has already been done,' and that the Corporation under its popular form of government had 'revolutionised the sanitary condition of many parts of the town.' Again, when we have the next change, which occurred in 1888, we find it preceded by a careful enquiry instituted by the Government of the day. It was at this time that the amalgamation of the suburbs was effected, and it was preceded by careful investigation by a Commission appointed for the purpose. In the proceedings in Council relating to that Bill the whole subject of representation was most thoroughly discussed. As the Member in charge described it, the measure that the Government adopted was a 'compromise between two extreme views' on the question, and the extreme view against the measure put forward on behalf of the European community never contemplated changes as revolutionary as those now adopted by the Government. And let me quote contemporary opinion on the work and efficiency of the Corporation, that was expressed by an official supporter of the Government on the motion that that Bill be passed into law. 'Speaking as an occupier,' said Sir Alfred Croft, 'I should say that the Municipality is well governed, it is well watered, well lighted, well drained, well watched,—in fact, in all points by which one can judge of the success and value of a Municipality, the Municipality of Calcutta comes out well.' What more favourable opinion can ordinarily be expected of any Municipality? And let me give again the words of Sir Henry Harrison :—

'Was it not still more gratifying to reflect that this experimental system had in sober truth developed in many of the most experienced Commissioners that moderation in judgment, that sense of responsibility in action and discussion, that toleration of opposition, that

practical sagacity which is at once the test of the experienced administrator and the best guarantee for the confidence bestowed in him? Was it not a legitimate triumph that, now that the necessity of making more sustained efforts for the improvement of the suburbs of Calcutta was at last fully realised, no better course suggested itself than to make them over to the same body who had reclaimed the town of Calcutta?'

"I am led to ask the Council to compare this glowing eulogy on the Hindu Commissioners with the report of the Committee that I first quoted, when the policy of leading the natives of this country to take part in municipal administration was first foreshadowed; and later, with the words of Mr. Ashley Eden, when in 1863 he expressed a view that they were not yet fit to take part in the administration. Sir, it is no exaggerated language that Sir Henry Harrison uses when, after describing the high qualities that have been developed in the natives of this country by the wise and statesmanlike policy of succeeding generations of governors, he speaks of the achievement as 'a legitimate triumph,' and particularly when the splendid product of British sympathy and British genius could be put to practical use when the Government had failed in their administration of the vast area of country comprising the suburbs, and help was required to administer it with better results; no better means, says Sir Henry Harrison, could be devised for this purpose than for Government to hand it over to those who had, as Sir Henry Harrison truly says, 'reclaimed Calcutta.' Are we to regard these persons so spoken of by a responsible official as being still *in statu pupillari*, as has been described here to-day? Are they to be regarded as persons who have not yet learnt responsibility in administration? Or are we to regard them as having attained their majority and as having proved themselves equal to the task left for them to do? I think, Sir, it is the latter view we must take, but, where now is the triumph to which Sir Henry Harrison exultingly referred? Where now is the principle to which Sir Henry Harrison referred with legitimate pride? All those qualities that had been fostered by Government with so much care and thought are now wasted. The services of those to whom Sir Henry Harrison referred are now lost to their city and as if they never had been, except, indeed, the splendid monument of their efficient administration that they have left as a standing testimony against their detractors.

"Sir, I am entitled to quote the Act of 1888 as a stamp of approval by the Government of the constitution of the Corporation of Calcutta and of their previous municipal administration. Have the Corporation been found wanting in their duties, so as to forfeit the good opinion of which the Act of 1888 was the outcome? What has happened that there should be any of these drastic measures adopted for the purpose of setting aside the people who have been able to appreciate their duties and to perform them well? Sir, that can easily be told. We know what the condition of the suburbs was, and we know what has been done since they were taken over by the Corporation. I can show that they have not betrayed the confidence that was reposed in them, and that they have administered the affairs entrusted to them with pronounced success. Let me compare the condition of the suburbs when Government handed over charge, with its condition now. I shall quote from a report by Sir Henry Harrison which has been most opportunely published at this juncture, and for which the Corporation are indebted to their present Chairman, describing the state of the suburbs under its administration by the Government and at the time when they were handed over to the Commissioners of Calcutta, with what has been done for that area by that much-abused body. Sir Henry Harrison in his description says that hardly a rupee of capital had been expended upon it, and expenditure was quite as urgently requisite for the suburbs as it was in the case of the town 20 years before. He enumerates the wants of the suburbs thus:—

'*1st.*—The water-supply of the town should be extended so as to give reasonable facilities for obtaining pure water for domestic purposes to all residents in the suburbs.

2nd.—Some system of underground drainage should be introduced.

3rd.—The new area is intersected with tanks, many of them filled with most unwholesome water, the number of which far exceeds that in the town ten years ago. Considerable outlay for the conveyance of earth from a distance will be requisite.

4th.—The condition of the Muhammadan burial-grounds is such that it is imperatively necessary to take up land at an estimated cost of 1¼ lakhs, in order to enlarge them, and allow a suitable interval between the use of the same ground for a second interment. It is found

that at present the same land has to be used over and over again, after three years in the less crowded, two in some of the others and scarcely more than one year in the most crowded cemeteries. Will the Government give the money, or will it refer the Burial Board to the Municipality?

5th.—The conservancy of suburbs is at present managed by the contract system, and it is understood that it does not give satisfaction. It will be at least desirable to incur a considerable outlay in building *gowkhanas* and purchasing conservancy carts and cattle; possibly also a railway extension may be necessary so as to remove the bulk of the refuse more easily to a distance.

6th.—A proper *dhobikhana*, as at Bombay, where *dhobis* will be provided with pure water and other cleanly surroundings will also be a great desideratum.

It would be easy to add to the list, but the above outline is sufficient to show that a considerable outlay in the form of capital, is a *sine quâ non* to the success of the new Corporation.'

"It is interesting and instructive to note how far those needs have been supplied. I quote a *résumé* from the current Administration Report in which the Chairman of the Corporation has summarised what has been done:—

'No less than 132·03 miles of mains and services have been constructed at a cost (including alterations to mains and piping) of Rs. 10,30,562. This, together with the sum of Rs. 7,80,297 in a new pumping station and accessories, makes a total expenditure of Rs. 18,10,859, and to this should be added part of the expenditure incurred in increasing the pumping power of the town. As a result of this large expenditure the added and suburban area is now supplied throughout with an excellent supply of filtered water. The first need of the added area has therefore been met.

'The second crying need of this area was declared to be the provision of a scheme of underground drainage. This question and that of improving the drainage outfall of the town area was gone into most carefully by the Corporation. It will probably take nearly three years more to complete the whole scheme in all its details, but the work has made good progress, and it is hoped that the scheme when finally carried out will be entirely successful. Due action has, therefore, been taken to provide for the needs of the suburban area in this respect.

'The third point, upon which improvement was said to be required, was to fill up the filthy tanks which are so numerous in the suburbs. It has been found impossible to deal adequately with this very large question, but the provision of filtered water has done away with all necessity for using the water of these filthy tanks for drinking. A number of tanks have no doubt been filled up, but the total number is so large that very little impression has been made upon it.

'The next point upon which improvement was required was stated to be the provision of proper Muhammadan burial-grounds. Here, again, this need has been to a certain extent met, as the Corporation two years ago provided a fine cemetery at Gobra, which has been filled up much faster than was expected, and the arrangement of which has now been sanctioned. The total cost amounts to Rs. 35,584.

'The next point upon which improvement was declared to be necessary was in the conservancy of the suburbs, which was managed by the contract system. Here, again, much has been done to improve matters. But it is in the matter of the disposal of night-soil that great improvements have been effected, and the trenching system has been entirely abandoned owing to the construction of temporary sewage depots at Hazra Road and Budge-Budge, where the night-soil is emptied into the sewers and then pumped into the large Circular Road sewer at Bhawanipur. This scheme necessitated an expenditure of Rs. 3,93,325.

'The last improvement suggested by Sir Henry Harrison was the establishment of a *dhobikhana*. Here, again, the need has been met. A municipal *dhobikhana* was erected at a cost of Rs. 50,967, including the cost of acquisition of land.

'Since the added area has been included, the Corporation has either fully or partially met all the needs of the added area, which were declared to be most pressing. They have given a full supply of filtered water, they are constructing a complete system of sewers, they have established an incinerator to dispose of the refuse, and have changed the system of the disposal of night-soil, while they have instituted a municipal *dhobikhana*.

'But they have done much more than this, for they have extended the unfiltered water-supply to the south added area, and have opened out a number of very fine roads. On the former they have expended Rs. 7,98,547 (including 41·75 miles of mains, branches and hydrants). On the latter they have expended Rs. 8,80,140.'

"But it would be wearisome to go into further details. It will suffice to say that we are now paying the sum of three lakhs of rupees as interest on the capital sum that is being employed in the suburbs in improvements. I again would remind the Council that under the administration by the Government, as Sir Henry Harrison described it, hardly a rupee of capital had been expended in it, and that it was in as backward a condition when the Calcutta Corporation took it over, as the town of Calcutta was 20 years before. The Corporation, it will be seen, cannot be justly charged with having neglected their opportunities, but, on the contrary, they deserve the highest commendation for the excellent work that they have done since the amalgamation.

"Sir, with all this, why is there this change? What necessity is there for it? At whose suggestion has this change been brought about? Certainly not at the suggestion of Sir Henry Harrison, because it is clear he could not have said that the Corporation was unworkable. In describing the method of working in the Municipality, in the course of the proceedings of this Legislature in connection with the Act of 1888, which it is the purpose of this Bill to replace, he said:—

'He believed the system of work which had gradually developed itself in the Municipality was eminently advantageous and reasonable.'

"At a later stage of the proceedings to which I have referred, when combatting a proposal to alter the constitution of the Municipality as it at present is formed, he said:—

'We have existing lines to work upon, and unless we are prepared to say that the Corporation will not work on these lines, it is undesirable to change them. I am not prepared to say that the proposed constitution is unworkable.'

"He was succeeded by Mr. Lee. Well, Sir Alexander Mackenzie has told us that every Chairman, at one time or another, except Mr. Lee, has said that the constitution was unworkable. The Hon'ble Mr. Oldham spoke of Sir Henry Harrison, Mr. Lee and Mr. Bright as 'the champions of the Commissioners.' In the first place, Mr. Lee never spoke to Sir Alexander Mackenzie, and in the second place he has put his opinion on record, and that opinion is contrary to the idea of the constitution being unworkable. I know that Mr. Bright did not make any suggestion of this sort, and I am glad of the opportunity of being able to say so in his presence to-day. Mr. Williams, with regard to whom Sir Alexander Mackenzie denied with emphasis that he had complained of the Corporation, it could not have been. Mr. Ritchie was the only Chairman left of all those who have held office since 1888; it could not have been him, because many of these matters which are brought forward as charges against the Corporation are matters which occurred during his Chairmanship, and in connection with which he has in the most frank and manly way taken the whole blame, if any there be, on himself, and has entirely exculpated the Corporation and the Commissioners. Then, who of all the Chairmen—and none but the Chairman can be said to speak with any authority—have complained of the system being unworkable? We are driven to this conclusion that Sir Alexander Mackenzie must have been the dupe of his own theories and general ideas which falsified his judgment. I cannot find one of the Chairmen since 1888 who could possibly have made any such suggestion as that which underlies the provisions contained in this Bill. Sir, we know further that Sir Steuart Bayley thought nothing of the kind. That Sir Rivers Thompson did not think it was necessary to change the constitution is clear, because I have already placed before the Council how he resented the proposal made by Sir Henry Cuningham, who himself withdrew it. Then, Sir, what is the reason for all this? I come now to what the Hon'ble Mr. Oldham said at our first meeting. What he said, as far as I could understand him, was that the only exception he took was to the Hindu predominance. Then he spoke in the warmest terms of eulogy of the Hindu Commissioners. He said:—

For more than a year I have been a Commissioner myself, and have worked with them and therefore have been able to understand more clearly than before now, from time to time, such as men as Sir Henry Harrison, and Mr. Cotton and Mr. Lee, and now the present Chairman, Mr. Bright, have stood forth as the champions of the Commissioners. I believe them to be an upright and devoted body of men who have carried out with singular ability the duties entrusted to them; but I deny that they are representatives.'

"The Hon'ble Member was not satisfied with what he had said. Later in his speech he returned to the point. He said:—

'The sole difficulty I have found, so far as my own attitude in the case is concerned, is that we are now endeavouring to take away, after 21 years, a power of which they have been faithful trustees and which they have exercised so well.'

"Now, Sir, under the present Bill the predominance of the Hindu is gone, and I looked for the support of the Hon'ble Mr. Oldham in our endeavours in

some degree to alter the constitution of the Corporation as it is designed in the Bill, seeing the position he took up when the Hindu predominance existed. Certainly from the words he used I expected his support. But I looked in his direction in vain. Inexorably, his hand went up always in support of the lead given by the Hon'ble Member in charge of the Bill. What the reason is why he persists in supporting this change in the constitution I am wholly unable to understand. All that he complained of was the Hindu predominance. Under the new scheme that predominance cannot exist. He, nevertheless, supports every change that has been suggested in this Bill. But, let us examine, what were the reasons he gave for his view that the Hindu predominance is a determining factor as against my contention that as a matter of fact the Hindus in the Corporation have not used their numbers to swamp their colleagues? He said that so far as the General Committee is composed of elected Commissioners there is not a single Muhammadan, and that so far as it is composed of nominated Commissioners there is only one Muhammadan. The latter gentleman is my hon'ble friend, Prince Mahomed Bakhtyar Shah. But the Prince being a nominated Commissioner his election to the General Committee has been made by the nominated Commissioners, among whom there are only three Hindus, so that it is clear there is no Hindu predominance among the nominated Commissioners and other Muhammadan Commissioners have not been kept out of the General Committee by reason of Hindu predominance. Then, as I have said, the Hon'ble Mr. Oldham referred to the General Committee not having upon it a single elected Muhammadan Commissioner. It is perfectly true there is not a single elected Muhammadan Commissioner; but, if the Hon'ble Mr. Oldham had been in the Corporation previously, he would have known that last year there was one, and that the year before there were two, and in previous years Muhammadans have been elected; the form of election is of such a confusing character that it is impossible to distinguish in the long list from which selection has to be made, so that the Muhammadan and the Hindu members can *qua* Muhammadan and Hindu be fully represented. Whom would my hon'ble friend exclude in order that his place might be taken by a Muhammadan? The absence of a Muhammadan from the General Committee is quite an accidental circumstance, and it cannot in any way be used to say that the elections are not fairly conducted. The appointments of these Committees depend on the merits of individuals. We have in the Committee possibly six or seven who are elected year after year, and I venture to say that the Hon'ble Member approves of these elections. We have others constantly shifting, and it happened that at the last election time there perhaps was no Muhammadan Commissioner who had been found so attentive and regular as to obtain election for himself. But that one little matter does not show that it is due to any Hindu predominance. Then my hon'ble friend referred to his own ward, No. 15, where he resides, and said that there have been two Muhammadans elected to controvert my contention that under the new scheme Muhammadans will have but a small chance of being elected. Now does my hon'ble friend know the circumstances as I know them? Why, the Muhammahan gentleman whose name my hon'ble friend brought forward so prominently sent in his name at the last moment, when he found that only one candidate had been nominated, when the ward enjoyed the privilege of returning two Commissioners. It was expected that a European would offer himself, and no one stood in consequence. But the European came in too late to be qualified as a candidate, so that in regard to Ward 15 the Hon'ble Member's contention with regard to Muhammadans is not conclusive nor is carried for. I will give another instance, in regard to Ward No. 16, that indicates insufficient interest and consequent want of attention on the part of Europeans in municipal affairs. No one had sent in his name to the very last as the second candidate, when a Hindu gentleman, finding the vacancy going a-begging, sent in his name. A European then sent in his name, but it was too late, and his nomination was not admitted by the permanent Chairman. The officiating Chairman came in and overruled the permanent Chairman, and permitted the European to come into the contest, and he was thereupon elected to one of the seats for Ward No. 16. In these two matters it is not the Hindu predominance at all that is in question, but the negligence of the Europeans in sending in their names.

"Then, Sir, I come to the statement of my hon'ble friend, which I am sorry he has made. He referred to Sir Stuart Hogg's argument about 'birds of passage' as follows :—

'When I think of him as using this astounding argument, I can only look on him as giving up, with both hands, in the very plenitude and wantonness of power, everything that might be urged on his side.'

"Well, Sir, does my hon'ble friend quite realize the meaning of those words? Sir Stuart Hogg was then retiring from the Chairmanship of the Corporation, so that if he had this 'plenitude and wantonness of power,' it was not as if he was going to revel in it; and are we to take it that he had no consideration for his own community and for the member of his own service who was going to succeed him, and that he merely made use of this argument as a practical joke? I ask the Hon'ble Member to reflect what the position held by Sir Stuart Hogg was. He was a responsible officer of Government performing responsible functions in this Council. He was in charge of the Municipal Bill of that day, and to speak of an argument he seriously put forward in the terms employed by the Hon'ble Member caused me to feel regret. Why, Sir, it would leave open to any one, coming after the Hon'ble Mr. Oldham, to criticise what he has said about the Hindus being such trustworthy Commissioners as being said in the plenitude and wantonness of power, or if that expression be not applicable to the Hon'ble Member's position, then as being a statement that was not genuine or sincere. I confess that I should view with regret a condition when our proceedings are placed on a level that criticisms of this character would indicate. I am not a member of the service to which Sir Stuart Hogg belonged; nevertheless I cannot allow the criticism on him to pass unchallenged. I do not allow that Sir Stuart Hogg was otherwise than genuine and sincere in his argument. Apparently those who represent the Government feel hit by his argument very strongly, and they are consequently trying to belittle it as much as possible. Then, Sir, my hon'ble friend, Mr. Baker, compared the Corporation to a railway, and said that a railway is not to be gauged by its value to the shareholders. Of course, Sir, a railway is a great benefit to the country through which it passes, but on that account its administration is not taken away from the shareholders. Then, Sir, we have heard the Hon'ble Member in charge of the Bill speak of the Educational Department and say that you cannot value the Educational Department by the salaries paid to the teachers. I am unable to catch the Hon'ble Member's meaning in his illustration. For analogy, are we to look to the Executive of the Corporation who receive salaries? Surely the Hon'ble Member does not mean that we are to value the Corporation by the salaries paid to their Executive, and the benefit derived by the Executive is the measure by which we value the Corporation. Now, the first benefit of the Educational Department is to those who are taught, and if you were to place them in charge of the Educational Department there would be a fine hurlyburly. Then, Sir, we come to what the Hon'ble Member for the Chamber of Commerce said. He said he had been a member of the Corporation since March, and that he only consented to be nominated on the understanding that he would not be required to attend meetings of the Corporation until the new Bill came into force. Then, Sir, what was the use of joining at all? He did not do us the honour to attend until the last occasion when we held a meeting.

"Is this the standard by which we are to judge of the interest that the mercantile community take in the municipal administration? Does not this abstention give point to the Hon'ble Mr. Oldham's remark on the occasion of the reference back to the Select Committee last month, when in speaking of the Hindu Commissioners, he said :—

'I cannot say that they have usurped power. They have attained it by fair means and their own abilities, and because it was left to them.'

"Is not this a sufficient answer to the charge, baseless as I always shall insist, that the Hindu Commissioners have swamped the proposals of the Europeans by their solid and class voting? The Europeans do not take their proper share in the municipal administration. I say it with regret, but it cannot be seriously

denied, that what may be called local patriotism is not a marked feature among the Europeans of Calcutta. It is because they have abandoned the field, deliberately, for their own convenience and in order to give their time and attention to more lucrative employment, that others, and conspicuously among them the Hindu Commissioners, filled the vacancy. These have undertaken public duties and have carried on these duties in the words of the Hon'ble Mr. Oldham 'with singular ability' and as 'faithful trustees.' And when the Hon'ble Mr. Oldham continues in the speech from which I have quoted, and says,

'But it has become a monopoly and is complained of,'

I answer that the preceding sentences are an answer to him. It should not be a subject of complaint that they should have performed functions that would have been left unperformed but for their public spirit. And there is the less reason for him to suggest a complaint or to array himself against them when he himself admits that they have conducted themselves faithfully and with ability.

"We have been told by the Member who preceded the Hon'ble Mr. Mackenzie in the representation of the Chamber how their reforms were swamped and obstructed by the Hindu Commissioners. Well, Sir, I have been a member of the Corporation for many years, I have taxed my memory and I have been trying to obtain information as to the part that has been played by those who have represented the Chamber. I do not recollect, and I have been unable to learn of, an occasion on which the representatives of the Chamber have been swamped by the Hindu majority. The occasions when they have intervened actively have been few and far between. The Council can judge of the character of the interest they have shown by the subjects in which they have interested themselves. One of their representatives was interested in the rules to be made by the Municipality with regard to game birds, another in the tramways question and supported a policy which was considered to be inimicable to the Municipality by the Hon'ble Member in charge of the Bill, another in the gratuity to be paid to the widow of a deceased European officer of the Corporation, and the fourth Commissioner, as I have already mentioned, was the Hon'ble Member himself when he took part in the discussion referred to the other day. That discussion disclosed at all events, since there were so many standing orders broken, that he came to make up for lost time. It would be well, Sir, if the members of the commercial community were provoked to good works by those with whom they cannot agree. It is simply a waste of power for any one to join and refuse to take part in the meetings. I say that not only have their reforms never been swamped by the Hindu majority, but I also assert that they have never given that majority an opportunity of swamping them. They cannot judge of what they could or could not do by abstaining from attending altogether, and, Sir, I am bound to say that although there has been the most complete acceptance of the disclaimer on his own part by the Hon'ble Mr. Mackenzie of any knowledge in regard to the incident in connection with himself that was mentioned the other day, I cannot help thinking how few would escape blame if the measure with which we measure were meted to us again. The Hon'ble Mr. Mackenzie has had an opportunity in this Council of giving an explanation with regard to himself which, as I have said, has been accepted. The Hon'ble Member has had the advantage of having had an opportunity of giving an explanation, and he has availed himself of it. Here we have Hindu Members who have been blamed by the Hon'ble Member's brother, Sir Alexander Mackenzie, and others for all sorts of things, even for corruption, and they have never had the opportunity of explaining them away. Can the Government say if the Hindu Commissioners had enjoyed the same advantage and an opportunity had been given them that they also would not have been able to explain away the charges alleged against them in a manner equally satisfactory?

"Endeavour has been made to controvert my contention that the idea of Hindu predominance is a myth. I certainly have not been shaken in that contention; on the contrary, I feel the stronger in my contention after having

heard all that can be said against it. Hindus have of course been in a numerical majority. But that they have used their numbers for the purpose of outvoting their colleagues is an idea that cannot be substantiated.

"If we set aside the idea that the constitution of the Municipality was unworkable as mistaken, and the idea that the Hindus swamped the reformers by their class votes as illusory, for what are we to say that the Bill was necessary? What have we remaining except the charges made on the introduction of the Bill and when it was referred to the Select Committee on the first occasion? Those charges have been shown to be fallacious, and if only an enquiry, which has been so persistently asked for, and which in fairness ought to have been granted, had been held, they would have been disproved in the most complete manner and would have to be set aside beyond all doubt and controversy. I do not wish to go back into all the old matters which have already been dealt with, but there are some further matters which appear in the reply of Mr Risley when the Bill was referred on the first occasion to the Select Committee. He said that the Corporation did not realize their duties with reference to the building bye-laws. Well, Sir, if bye-laws have been contravened, it is entirely the fault of the presiding authority in allowing anything of the kind to be done. I have made enquiries, and I have found this, that those very instances which Mr. Risley gave would have been permitted under the provisions embodied in the new law. Then, Sir, he has given other instances of failure on the part of the Commissioners, amongst others, with regard to the *dhobi-khana*. I have shown already that it is not the fault of the Commissioners that that undertaking has not been carried through. Then he referred to the Loans Department. I have shown already how the present Chairman entirely agreed with the Commissioners and set aside the orders of his predecessors. Then Mr. Risley referred to the Warrant Department. There, again, I have shown that the Chairman is entirely in accord with the Commissioners in the action they have taken. He referred to the *bustee* improvement question; but he did not take into account, as I have shown, the money spent for *bustee* cleaning as well as for improvement. He only took into account the sums spent for structural improvement, and even then he did not take into account the sum of 8 lakhs which have been spent in the opening up of Harrison Road, a continuous *bustee* of more than a mile and a half in length. It will be remembered that I read out to the Council the letter setting out this fully, which was dated 13th April, 1895, and addressed by Mr. Ritchie when he was our Chairman to the Local Government. Mr. Risley was, I believe, Secretary in the Municipal Department at the time, and the letter must be filed in his own office. But he did not avail himself of the information that was ready to his hand when he made his attack on the Commissioners. Then Mr. Risley referred to the question of the plague. He said that the Commissioners were incapable of meeting the emergency. I am not going through all the details of that subject, but I emphatically deny that whatever was done by the Commissioners with regard to this matter was done under pressure by the Local Government, as was suggested. The sum of Rs. 30,000 has been spent by the Commissioners out of their own free will and on the initiative of the Corporation, as can be most decisively shown, and not from any outside pressure, such as Mr. Risley endeavours to show; and in this connection there is a point which I think ought not to escape the attention of this Council, and it is this. Mr. Risley said how at the last moment it was due to the strong pressure employed by Sir John Lambert at the meeting of the 9th October that the Commissioners consented to employ a Chief Superintendent of Conservancy. Well, Sir, as a matter of fact, Sir John Lambert attended the meeting of the Corporation on the previous day and spoke against a permanent officer, which was the point of controversy; he suggested a temporary officer, which was a very different proposal; and it was at once accepted by the meeting as worthy of consideration and referred to the General Committee, which is the Finance Committee, to consider the details of the question. The Committee met on the following day, when he attended, and from the proceedings of that meeting I hold in my hand I am able to say he did not speak a single word in favour of the suggestion he made in the general meeting. The motion was nevertheless carried unanimously, and the proposal, based on Sir John Lambert's suggestion,

was carried into effect without delay, so that the idea that the appointment was in any way due to the pressure brought to bear by Sir John Lambert or that the Corporation were in any degree reluctant and required pressure to agree to it is not borne out by the facts we know. There is a resolution under the signature of Mr. Risley, dated the 10th of October, 1896, in which this appears:—

'The Lieutenant-Governor expressed his entire approval of the steps taken under the Commissioners' orders to give special attention to the cleansing and sanitation of Calcutta.'

So that that entirely disposes of any charge under that heading. I have now been through all of these charges preferred by Mr. Risley except that referring to the Goragatcha trenching ground. We have been blamed very much because of the nuisance which existed there. But Mr. Risley has omitted to mention that when the suburbs came under the administration of the Calcutta Municipality, this trenching ground was the subject of contention in the Law Courts, because of its being a nuisance, and proceedings were stayed against the Suburban Municipality only because there was going to be the amalgamation to which I have referred. After the amalgamation every endeavour was made by the Commissioners to stop this nuisance. I personally with other Commissioners again and again pressed upon the Executive to abate it as an urgent question, and whenever asked the Commissioners voted funds But nothing could be done, because the Health Officer and the Engineer could not come to any agreement as to what was required Eventually this is what the Chairman wrote on the subject in a letter, dated 15th August, 1895, and addressed to the Local Government. I will read extracts of it to show how little the Commissioners were to blame in this matter. After giving a history of the subject, in the course of which he quotes the Health Officer's note, and dated 11th May preceding:—

'The first thing that happened after the suburbs were amalgamated with the town was the prosecution of the Municipality for creating a nuisance at Goragatcha. Such a prosecution had been long threatened against the Suburban Municipality, but had been stayed off by the promise that when the amalgamation took place, the nuisance would be removed.'

"It is the duty of the Executive to place proposals before the Commissioners, but no scheme was submitted to them. The Chairman later says:—

'I did not lay the complete estimate for raising and levelling the land before the Committee in October, because the estimates with which I was furnished seemed to be unnecessarily high, and also because we were threatened with a suit of which the object was to prevent us trenching at Goragatcha at all which was not disposed of till 31st May, 1895. * * * When it became apparent that the temporary scheme designed by Mr. Hughes] was not approved by Mr. Latham [Sanitary Expert of London who was consulted], I recommended to the Commissioners the acquisition of 50 bighas of land at Jinjrapul. This was sanctioned on 29th May, though the site was subsequently altered to Batchala. At the same meeting, Rs. 27,745 was sanctioned for raising the site of the new land at Batchala. * * I must admit that the result has been unsatisfactory; but in doing so I desire to absolve the Commissioners from blame * * *

'9. It is the custom of Government to review minutely every year the annual report submitted by the Corporation, which gives the fullest account of the progress of their works, of their schemes, and of their administration, generally. The work of the Commissioners has of late years secured the express approval of Government, and the Commissioners have had no hint on a full review of facts and figures, ways and means, that Government think that they have been wanting in a sense of their duties and responsibilities as guardians of the public health.'

"Mr. Risley was, I believe, Secretary when this letter was sent to the Local Government, and it must be filed and was available in his own office when he made his attack on the Commissioners. I refrain from comment on the aspect that presents itself, but I crave leave to ask, is the cause just that is advocated by the methods I have disclosed?

"Sir, in this connection there is a matter which is of great interest and to which I particularly desire to call the attention of my hon'ble friend Mr. Buckley. The Hon'ble Member rose up and loftily exclaimed: 'What! do you mean to say that the Local Government here are not as fit as the Local Government Board in England to control the Municipality?' My hon'ble friend does not bear in mind how much the conditions differ in

favour of the Local Government Board in England. In England there is the command of a large supply of expert opinion. There, officiating appointments are practically unknown, and office-holders continue in their duties from year's end to year's end, with only an occasional holiday when they generally are within call of their head-quarters. In India, officiating appointments cannot be said to be the exception. It seems to me as if every officer is acting for some one else who has either gone to Europe on leave or has been lent to another Administration. And the Government appear to constitute themselves a sort of educating agency. How often do we see appointments made when the person appointed has to learn the business of his new appointment. City engineers and sanitary experts are not born, but must have long training and wide practical experience before they can become authorities. The Local Government have very able officers in their service, but how many have the necessary knowledge by training and by experience to constitute them reliable authorities in the Departments I have referred to? Well, Sir, our experience is that we have had many matters which have been urged by the Government of Bengal, which have not been practicable in which they have shown that they have not the knowledge to make them safe-guides."

"I wish to mention in connection with this Goragatcha scheme that the then Lieutenant-Governor, Sir Charles Elliott, went down to the spot and himself ordered that there should be five feet of trenching for one foot of soil, and stated that he had done so in reply to a petition of the residents of Alipore. This was in May 1895. Then there was a complaint made by the Chamber of Commerce in July—I may mention, incidentally, that the President of the Chamber was a resident of Alipore—and then the Government wrote to them to say that they had given directions among other things that 'in no trenching ground should the depth of the trenches exceed three feet, nor should the bulk of sewage deposited exceed one-half of the amount of earth filled in'—a remarkable departure within three months, is it not? The letter of the 15th August from Mr. Ritchie was the reply to the letter giving these directions. But let me show the value of the Government directions, and on the information and knowledge on which they act from extracts of a letter I hold addressed to the Chairman in the handwriting of the Health Officer of the Corporation, Dr. Simpson, who has so often been referred to by Government as an eminent expert in sanitary science. I have obtained the document from the Municipal Secretary. This letter was 'in reply to the letter of the Bengal Government, dated 23rd September.' He writes:—

'That the District Magistrate's report as to all attempts to trench the ground on proper principles have been abandoned and the night-soil is simply poured into deep trenches, which are insufficiently covered with earth' is extraordinarily inaccurate. * * * The only remark I have to make is that it is a pity a responsible official should not have been more careful in his statements on a subject on which the public mind is peculiarly sensitive and where the Corporation are labouring under great difficulties.'

"Then, after showing that the Civil Surgeon of the 24-Parganas in his report that had been quoted in the letter to which he was replying, had not appreciated 'one of the practical difficulties of trenching,' Dr. Simpson continue as follows, and I ask the Hon'ble Mr. Buckley's particular attention to what he says:—

'If the instructions of the Government, as conveyed in their letter dated the 5th (*sic*) of July, had been followed and the bulk of sewage deposited in the trenches had equalled one-half the amount of earth filled in, the nuisance created would have been of a most pronounced character and would have probably produced a similar effect to that caused by carrying out the Government instructions conveyed in letter No. 58 T.M., dated 14th May 1895. With reference to Goragatcha, these two instances show that the Government are not well advised in these matters, and that they have been issuing orders on a subject in which the local authority have the advantage of sounder advice and more practical experience.'

"It is my intention to give one or two more instances to show to what an extent the Government are liable to mislead themselves, in order that there may be no misapprehension that I am not speaking in vague generalities, and that I can substantiate what I have said in this connection. I shall content myself with what appears in but one letter from the Chairman, Mr. Ritchie, dated the 13th April, 1895. This letter is the same one from which I quoted

with reference to the charge of Mr. Risley that the Commissioners had neglected the directions of the Government with regard to *bustee* and town improvement. The subject that I will take now is the suburban drainage scheme. The Government had incessantly charged the Commissioners with unnecessary delays, heedless of their protests that they were being unjustly charged. The European Press and the European public, uninformed as always on municipal questions, thought that they would be perfectly safe re-echoing charges made by the Government. Sir Alexander Mackenzie, on entering upon office, modified the opinion formed by Government, but Mr. Turner repeated the charges in this Council. This is what the head of the executive of the Corporation says in his letter :—

'3. It is at the chief executive officers of the Corporation, and not at the Commissioners, that these criticisms should be levelled.* * *

'4. I accept the full responsibility for the alleged unnecessary delays, and I wish to make it clear that the Corporation is in no way responsible for them.* * * * *

'11. It is unnecessary for the purposes of the present letter that I should touch further upon the details of the controversial points in the Calcutta drainage questions. I would only state my opinion that the better acquainted a person is with the physical conditions surrounding Calcutta, the more will he recognise the extreme difficulties of the drainage problems presented, and that it is a mark of sciolism to treat these problems as if they were capable of summary and expeditious settlement, and to refuse to make allowances for the great difficulties involved, as the public are too apt to do.'

"I ask the Hon'ble Mr. Buckley to particularly note the expression that is used with reference to the attitude of the Government—'mark of sciolism.' When we have a Government servant telling the Government straight that their attitude is due to superficial knowledge, I think that the situation must be described very mildly indeed. I would ask the Council to observe that I have not dug deep for illustrations, nor cast for them over a wide area. I have given them instances from matters that have incidentally presented themselves in the course of the debates in Council. It should not be a matter of surprise if I do not share the Hon'ble Mr. Buckley's confidence that the Local Government will always be a safe and reliable guide and adviser to the Municipality.

"The Hon'ble Member in charge of the Bill has during the progress of the proceedings given us assurances, on more than one occasion, of the intentions of the Government which have not been specifically expressed in the Bill. I confess that I wish to see the intention clearly expressed in the terms under which duties have to be performed or obligations are created. I unreservedly accept the Hon'ble Member's sincerity in the explanation he has given us, and I have no doubt left in my mind that under the present administration my hon'ble friend's statements will be strictly respected, but I do not view the prospect under future administrations without hesitancy. I will give my reasons for my doubts, and I take my illustration from material that is incidentally presented in the letter of the 13th April, to which I have referred for so many illustrations. I refer to the educational grant. By the Act of 1888 grant for primary education was for the first time an object to which municipal funds were made applicable. The proposal to make it a charge was vigorously opposed on the ground that the funds available were considered not more than adequate for municipal needs, and it would have been defeated if Dr. Gurudas Bannerji, now Mr. Justice Bannerji, had not pointed out that in fact a grant was already allowed, and it would be a hardship to disallow after amalgamation what had been allowed before. But I will give Sir Henry Harrison's own words in Council with regard to the question:—

'The reason was that we found that in the Suburbs such expenditure was actually being incurred, there being a grant of Rs. 3,000 for the purpose. We thought it would be invidious to deprive the Suburbs of what they had hitherto received, the intention being merely that their rights should be preserved to them.'

"I will quote from the Chairman's letter :—

'12. I pass from the drainage question to the matter of devoting funds to primary education. In paragraph 14 of the Resolution of the Government of Bengal, it is stated that "the Lieutenant-Governor observes with surprise the reluctance of the Commissioners to make the allotment of Rs. 10,000, which has been suggested as the smallest sum which the

Commissioners can properly devote to a purpose which is universally recognised as holding a high place among the legitimate obligations of local authorities." Throughout the administration of Sir Charles Elliott the Bengal Government have treated the provision of primary education as an essential duty of the Corporation.'

"And we have the curious incident of the Chairman of the Corporation sending to the Bengal Government a copy of the proceedings of the Bengal Council in support of the protest of the Corporation against a demand made by the Government! During the administration of Sir Stuart Bayley the intention expressed by Sir Henry Harrison was respected. In the administration of his successor the history of the subject had been lost, and an endeavour was made to throw off the burden that lay on the Government and place it on the shoulders of the Corporation. Opportunity was given for this, because the words of the Act were capable of the extension of the grant to other primary schools besides that for which it was intended to allow the grant. Have I not reason, then, for having pressed for clear specific words to express the exact intention of the Government?

"Sir, during the progress of these proceedings I have with deliberate and set purpose utilised illustration after illustration in support of my contentions in order to answer the charges which Mr. Risley has made against the Commissioners. There are many matters which ought to be looked at from the other side which have not had consideration given to them; and I desired to demonstrate how very necessary it was that there should have been an enquiry in the first instance to see where the mischief really lay before this Bill was framed and before any action was taken by the Local Government. My deliberate purpose has been to show that many cases of mischief have escaped consideration.

"The charge upon which not the least stress has been laid has been the appointment of Special Committees, and the Complaints Committee has been singled out for special animadversion. With regard to the Complaints Committee we have found that complaints have been made by the public which have never been attended to, we have found eight, nine and ten reminders which have not been heeded. I remember one instance where I found thirteen reminders and was not able to trace the original complaint which had been made. I have placed before the Council, with regard to the tramway depôt, the fact that even the complaints from Government were not attended to. I have shown with regard to the Town Hall that no less than Rs. 18,000 had been passed by the Engineer's Department for payment that ought not to have been allowed at all. I have shown how, in the Suburban Drainage Scheme, the Vice-Chairman did great service by disclosing a series of grave irregularities and neglect on the part of the Engineer's Department, all of which instances were substantiated on enquiry, with the result that the rate-payers were saved a large sum of money. I have shown how I personally disclosed that a most important part of the same drainage scheme was being executed without the sanction of Government as required by law, and the Chairman utterly oblivious of that fact. I have shown that the Executive are not to be trusted, and that it is not right to place them in an independent position.

"I say that all these matters that I have specifically referred to, and scores of instances of a like character, demanded that proper enquiry, and for the Commissioners to have allowed the administration to have proceeded in the ordinary routine and as if no investigation was required would have laid them open to the charge that they were neglecting their duties, and were not conscious of their responsibilities.

"I have challenged in as emphatic language as was open to me in this Council, in a previous stage of our proceedings, the truth and justice of the reasons for the charges that have been made, and I have most openly courted an enquiry with regard to them, but I have received no answer to what I have said. I claim to have displaced the burden of the charges that had been placed upon the shoulders of the Commissioners by statements of facts which there has been no attempt made to controvert. No such attempt could be successfully made, because my statements are supported by the direct authority of the records in the Municipal Office, and also in the offices of the

Local Government. Where, then, are we to look for the reasons for the alterations that are to be effected under the new law? Mr. Risley gave one of them to be to secure better mortality returns, and he disclosed his idea of how this was to be done by the provisions of the Bill as it was originally framed. On examination in Special Committee his idea had to be abandoned, and the new law has made no practical change. We have been told that there has been a breakdown in our conservancy. The subject has not escaped the attention of the Commissioners. No class of persons have suffered so much as those whom the Hindu Commissioners represent in the northern section of the town, and no class of Commissioners, as I am sure the Chairman will bear me out, have been so urgent as they have been for improvement in the conservancy, and the Chairman, I am sure, will support me that they have not been wanting in zeal and interest, and it is due to no fault of theirs, as an enquiry would show, if it is not more efficient. When Sir Alexander Mackenzie made his famous speech at Entally, all the faults, all the deficiencies which have been made so much of and given as reasons for this legislation, if they existed were known, yet it is evident, if only the question is examined, that the changes now enacted were not then, at that time, contemplated. The conclusion seems inevitable that the changes were determined upon first and the reasons for them put forward later, and possibly no one regrets his own connection with the subject more than my friend Mr. Risley himself, from whom I cannot withhold my sympathy altogether when he was placed in the position which he was compelled to occupy.

"I come now to the letter of the Government of India. I was taken aback when you, Sir, placed it in the same category as a Privy Council ruling, and as such told us that it should be regarded with the same respect and final. There is no doubt that the rulings of the Privy Council are regarded as being beyond controversy. Why is there the confidence in the High Courts and the Privy Council that the peoples of this country feel when they regard the action of the Executive as inscrutable, and sometimes with suspicion? It is that golden rule which has served to impart firmly their faith in the inviolable sense of the justice of British rule, and fixed their loyalty: the Privy Council are honoured and revered because of the absolute trust that they will most scrupulously uphold that golden rule—*Audi alteram partem.* I will not repeat what I have lately said in this connection, for it should be fresh in the minds of the members of the Council. Those who have blamed, those who have had charges levelled at them, those who in the interest of the public have opposed this enactment, have not been heard. I will go further and say the subject on which we have legislated has not been understood by responsible authorities by whose decision we have to abide. It is final because it has been treated as final, for the purposes of this legislation. I shall respect it because it has become the law, but I expect that the law cannot be continued unamended. I confess that I had hoped that there would have been some change in the Bill as an outcome of the letter which pointedly suggested the adaptation of the Bombay system. What is the difference between the two systems? The difference is that the executive is merged in the deliberative body in Bombay. The distinctive and fundamental idea of the present Bill is that the executive is kept wholly distinct from the deliberative body. If we are going to have the Bombay system adopted in any particular, surely that—its guiding principle—should be one which ought to be embodied; but it has not been regarded. Sir, in conclusion I would point to my own position in this matter. I joined the Municipality as a nominee of the Health Society, I was asked to join because of the rather prominent part I had taken in connection with the Ilbert Bill agitation. I had helped to bring into existence the Defence Association which is now a recognised political body, and when I went into the Corporation I went in with all the prejudices and opinions which I find so prevalent even now. But, Sir, when I had joined I found that it would not be fair to criticise those who were taking their part in the administration of the city unless I myself took my part also. I did so, and it certainly opened my eyes. I felt that I would not be justified in criticising in the way that I had before been so ready to do with imperfect or no knowledge. I am not here as an advocate for either Hindu or Muhammadan. I wish now to support that view which I believe will give the best administration to the city of Calcutta.

And why is there this difference of opinion between myself and those with whom I have been so long associated? The secret is that I have the knowledge and experience of municipal administration. The Hon'ble Mr. Oldham has told us that he has been a member of the Corporation for only one year. The Hon'ble Member in charge of the Bill had only a short experience in the Corporation. In the Corporation there has been no one so ready as I to oppose the introduction of political views. I am not accepted by the progressive Hindus as one of themselves. A supporter of mine in the election for this Council came to me, with tears in his eyes, telling me how he had been burnt in effigy because he had voted for me, and against one who is a leader in the Congress party. Throughout I have been opposed to the principles which are the leading principles of those who form the majority among the Hindus. But although I went to the Corporation as a political opponent from the first I met with the utmost consideration. There has never been a single Committee to which I have offered myself as a candidate to which I have not been elected. Sir, I am not here as an advocate of the Hindus, but I have seen how hard-working, busy men have come after a long day's work and entered into these public duties with zeal and efficiency, and I think I would be wanting in self-respect and every feeling of loyalty if I did not, when I find that the Local Government have joined those described by Mr. Risley as the worst informed as to the evils that exist and the least responsible as regards the possible remedies for them, joined in meting out condemnation to the Hindus, if I did not rise in my place and speak out. The work in opposition to the Bill has been hard indeed. While the task of the opposition has been severe to hopelessness, the load on the present Government, I think, is the heavier, because with them rests the responsibility of the measure. And my regret and sympathy for them is the greater since we now are closing the last page of the most inglorious chapter in the history of the Bengal Legislature."

The Hon'ble Mr. Oldham said:—"Late as it is, I am glad of the opportunity of being able to correct the misapprehension into which the Hon'ble Member who has just sat down has fallen as regards my connection with the Corporation. He appears to think that I am the merest neophyte in regard to municipal matters. He says that I would know more about them if I had been longer with them, and that it is dangerous for me to speak about what I do not understand. It will be a surprise to my hon'ble friend to hear that I am, with the exception of the venerable Maharaja Sir Norendra Krishna, the very oldest member of the Corporation in this city. I was a member of the Municipality when my hon'ble friend was a school-boy at Harrow or a freshman at Oxford. My hon'ble friend looks incredulous. I will give him the date —it was May, 1867. I think it is probable that at that time my hon'ble friend was technically liable to be birched by Dr. Vaughan. I have kept up my connection with the Corporation ever since. During the presidency of Sir Henry Harrison my interest in the working of the Corporation was very keen, and from it was derived that appreciation of the Hindu Commissioners to which I have given expression in this Council; and it so continued until I renewed my connection with the Corporation in 1898. My attendance since I rejoined has been regular, and the last annual report shows that last year it has been as nearly as possible double that of my hon'ble friend, and this proportion has been maintained since; so that by arithmetical calculation, and if work is to be measured by attendances, I have been doing as much in a year and-a-half as my hon'ble friend would do for the Corporation in three years! But I can assure my hon'ble friend that the Commissioners are not an inscrutable body of men. Any one with ordinary powers of observation who had served an apprenticeship of three months with the Commissioners would have just as good an idea of their work and their idiosyncracies as if he had spent a lifetime among them, and for four months I sat with them and studied their work without opening my mouth at meeting, apart from the knowledge which I had gained previously. It is in the light of that knowledge that I will refer to the remarks of my hon'ble friend on those parts of my opening speech which appear to him to be inconsistent, or which he is unable to understand. The result of my observation of the Corporation during the long period of thirty-two years is that it has failed as a representative body. I cited as an instance

the ward in which I now live. That ward was formerly represented in the Corporation by two European Commissioners. Then there was only one European, and at the present moment there are none at all. So utterly aloof did business men and Englishmen generally hold themselves from the Corporation; so thoroughly did they manifest their disgust with it, and so entirely did the system of representation fail. That was the point of my remarks which my hon'ble friend found it so hard to understand. That was the reason why I referred to only two Muhammadan Commissioners having been elected in a ward in which the English vote is infinitely stronger than the Indian vote. When the Hon'ble Member was reading that part of his written speech which referred in some detail to the relations of the new General Committee to the new Corporation, I could not help thinking that he must surely have written that speech eighteen months ago, when people were indulging in the dismal prophecies and gloomy prognostications generated by the new Bill. He seemed to speak as if the new Corporation will meet only once a quarter."

The Hon'ble Mr. Apcar said:—"I said the framers of the original Bill had correctly gauged the amount of work the Corporation would have to do when they laid down that they were to meet only four times a year."

The Hon'ble Mr. Oldham said:—"It was that intention which was dilated on, and any one unacquainted with the facts could not have realised from my hon'ble friend's speech that the Corporation is to meet not only once a month, but as often as it likes."

The Hon'ble Mr. Apcar said:—"My hon'ble friend will pardon me. My contention was that there really will not be more work for the Corporation to do than they can get through in four quarterly meetings."

The Hon'ble Mr. Oldham said:—"That I understand to be the argument, but my hon'ble friend did dilate on the fact that the Corporation could only meet four times in the year, and that it could only take interest really in the annual budget, the annual report, and one or two other matters. Well, my conception of the functions of the new Corporation is entirely different. As I understand the matter, their duties will be far more extensive and will require many more than four meetings in the year. But at all events it is a fact that my hon'ble friend did not once allude to any of their other functions. He did not once allude to the fact that the Corporation has power to call for information from the General Committee. To any one who knows anything about the subject it is perfectly clear that it will be physically and morally possible for the Corporation to exercise an influence over the General Committee which will practically be control."

The Hon'ble Mr. Apcar said:—"The Hon'ble Member is misrepresenting me. I did refer to that, but I said the General Committee have it entirely in their discretion to grant or withhold information."

The Hon'ble Mr. Oldham said:—"I beg my hon'ble friend's pardon. I certainly did not hear those words. I did not hear that matter referred to at all. However that may be, my hon'ble friend certainly did not draw the picture which I am now drawing. That is that under the new law the Corporation will be able to obtain information from the General Committee, and that they will be able, sitting in solemn conclave with open doors in the light of day, and with all the responsibility which that position will give them, to denounce the General Committee and its works. Not that I believe that this is in the least likely to happen; I do not believe that it is possible. My hon'ble friend seems to forget that two-thirds of the members of the General Committee are to be elected by the Corporation, and if they behave in an obnoxious manner, their tenure of office will be extremely precarious, and they will be unseated. As a matter of fact, they will be the picked men of the Corporation. They will have intimate relations with the general body of the Commissioners, and they will of course discuss with them the business of the General Committee, just as they discuss it at present. Well, my hon'ble friend has corrected me, and I am glad he has corrected me, because I was about to accuse him of a method

which I think he has pursued in another part of his speech, and of which I will give a more questionable instance; that is, of laying stress on one side of the case and entirely ignoring the other side. The other point I was going to touch upon, Sir, was when my hon'ble friend taunted Your Honour with the change of views which, under the ruling of the Government of India, Your Honour has been obliged to adopt in this Council with regard to the constitution clauses of the Bill. The particular point is one of the greatest interest to me, for, if it is not indiscreet of me to say so, I had the honour of being referred to by you, Sir, on the question of there being two elected Commissioners for each ward. At that time I was much impressed with the energy displayed by the Ward Commissioners in regard to the establishment of Vigilance Committees and segregation hospitals, and with the control they exercised over municipal underlings; and I did think the retention of two Commissioners for each of the twenty-five wards would be wise. These were also Your Honour's views, and in the November following Your Honour was pleased to express your affirmation of these views, and explained in this Council the opinion which the Hon'ble Member has quoted. But in August last Your Honour with unfeigned regret had to explain to the Council that you had been overruled on this point by a superior, a responsible, and an impartial authority—that of the Government of India. My hon'ble friend was well aware of this, but he ignored it, and persisted in his taunt, even after the explanation given by my hon'ble friend in charge of the Bill that this Council is a subordinate Legislature. My hon'ble friend said he doubted if it might not be ungracious in him to cast up this change of opinion. If he retains any doubt as to the ungraciousness of his action, I can solve it and assure him with the utmost confidence that it was ungracious, most ungracious, and I venture to think that when he comes forth from this Council into the general society in which he and I move, he will find it called by a far harder name."

The Hon'ble Mr. Mackenzie said:—"May it please Your Honour, as the Member representing the interests of Commerce on this Council, I trust I may be permitted to offer my congratulations to the Hon'ble Mr. Baker, the Member in charge of the Bill, on his very able conduct of the measure. I consider, Sir, that he has done yeoman service to the town and to the State in the thorough and able manner in which he has piloted the Bill, first through two Select Committees and then in what I believe I am right in characterizing as the longest and most critical debate ever held in this Council Chamber. The Hon'ble Member in the course of the debate has more than once disclaimed being a lawyer, but I am sure that the learned Hon'ble Members of this Council who are also members of that noble profession—the law—will agree with me in saying that the legal acumen displayed by the Hon'ble Member in charge belies that protestation. I shall not attempt to slay the slain by dwelling upon the absolute necessity of a reform in the municipal government of Calcutta. It is sufficient for me that the Governments of Bengal and of India, and the Secretary of State, have admitted this to the full, and that the demand that the European community have been making for years is at last being listened to. We of the commercial and trading community were perfectly satisfied with the Bill drawn up by the late Lieutenant-Governor, after full discussion with those whom we represent. We were as conscious as he was that the scheme which it embodied was not altogether symmetrical, or, if the phrase be preferred, 'logical,' but it was eminently workable, and provided the city with all that is required in the shape of a working Chairman, backed by a Council on which interests were represented and not *races*. I am free to admit that some of us thought it dealt too tenderly with the election sham; but when the Bill was introduced the object was to create, without undue delay, a municipal authority with power to cleanse the town effectually, in the hope of keeping away the plague. It was doubtless felt by its author that to burden the measure with a radical reform of the constitution of the main municipal body would open the door to endless discussion and controversy. I cannot help thinking, Sir (in fact we have evidence of the fact), that the native gentlemen who so strongly opposed the Bill, as originally framed, must now be feeling somewhat sorry for themselves. It was intended by that Bill to confine the work of the Commissioners in meeting to a *quasi*-legislative function, which alone a large body of

that class was capable of performing, and to relieve them of executive responsibilities, which are best exercised by one man or by a small carefully chosen Town Council. The Select Committee, however, saw fit to restore to the main body very much of the executive control which the experience of the past has shown them to be incapable of exercising wisely, and that has opened the door to a complete reconsideration of the composition of that body. If the main body of the Commissioners is to control the executive, it is clear that it must itself be so constituted as to afford some guarantee that that control will be properly exercised. From that point of view the proposals of the Government of India have my support, but even with the reform in the constitution arranged, it is essential that the everyday work of the city should be left to the Chairman, as it is in Bombay to the Municipal Commissioner. I consider it essential that the Chairman, being responsible for this, should have a free hand in the selection of his subordinate staff. They should look to him alone for orders and promotion. We should thus get rid of jobbery of subordinate appointments, which it is notable has characterised the present *regime*. Inspectors of nuisances, for instance, must be chosen, not because of their high caste or their relationship to Municipal Commissioners, but be men ready to do their work completely and honestly, and to carry out the orders of the Chairman and the Executive without fear or favour. I am glad, Sir, that the Government of India has admitted that it has a stake in Calcutta, and is responsible in the end for its good government. We all know how much has yet to be done to open out congested areas and effect structural reforms. If the Corporation is to be left to carry out all this unaided, either the reforms will be unduly delayed or the burden of local taxation will become intolerable. I trust, Sir, that the Supreme Government will recognise that taxation is already as high as can be borne, and will make over to the town other sources of income such as Bombay enjoys, or lend substantial aid in other ways. It has been argued by an Hon'ble Member that 'the active opposition of the people seals the fate of the measure, and must go a great way to mar whatever good its framers may have anticipated from it.' But, Sir, what is meant by 'the people?' They care only for reduction of taxation. 'The people' and 'the Commissioners' are *not* the same thing. In one of the notes of dissent it is suggested that 'the Bill will distinctly reduce within narrower limits the power of the executive and make it *irresponsible*. Under the existing law the *Chairman exercises almost* all the powers which are vested in the Corporation.'

"In regard to this, Sir, I would only say that under the present system no one is responsible. If the Chairman has final authority, then he *is* responsible. If he has power only subject to appeal, then the appellate authority is responsible. By giving a general appeal you whittle away all executive responsibility. No officer of the Corporation will venture to do anything disapproved of by any Commissioner, or by anyone who can get at a Commissioner.

"When the Bombay Act (III of 1872) was under discussion Mr. Mangal Das proposed to give a right of appeal to the Town Council against every act of the Municipal Commissioner. The motion was lost, Sir Andrew Scoble, then Advocate-General of Bombay, opposing it as rendering the Act utterly impracticable (see Bombay Legal Proceedings of 1872, pages 319—22).

"As to the Chairman exercising all the powers of the Corporation, how *can* he act vigorously when his actions are liable to be upset at any moment?

"Then, Sir, in the matter of European and commercial representation, we have had it well rubbed into us in the several Notes of Dissent what a very insignificant place these interests occupy. In one of these Notes we are told that 'the Statement of Objects and Reasons makes a distinction between the interests of trade and those of the Government,' but that, 'as a matter of fact, the two interests are identical.'

"This, Sir, is news to me, and I should like to ask the writer whether trade has at any time merely followed the lead of Government, and whether trade interest would press for a license tax on its own business.

"If it means that the interests are identical so far as having a clean town and a healthy and properly conserved town is concerned, then I am at one with the writer.

"Further, a distinction is made between trade interests and 'the interests of the rate-payers.' But does not trade pay rates? And does it not pay license tax as well? Chapter XIV and Schedule III (*now* II) of the Act answers these questions completely.

"In a statement furnished in one of the Notes of Dissent it is shown that while Europeans own 12·6 per cent. of the assessable property in town, and pay 18·3 per cent. of the total rate levied, the Hindus own 60·4 per cent. and pay 59·5 of the rate; and I may add that while the former number 5·6 of the General Committee, the latter (the Hindus) have, or till lately had, 66·6 of the General Committee! But, Sir, this is not a fair representation of the monetary stake of Europeans, seeing that under proviso (*ii*) to section 148A (*now* 151) of the Bill the value of machinery is *excluded* from the assessment. Is capital irretrievably sunk in Calcutta to count for nothing? And Calcutta as a trade centre represents the important interests of the jute and tea industries and the whole export trade of Northern India. What is Hindu property against all this?

"Further, I say that the statement is not a fair representation of the contributions of commerce to the funds of the Corporation, in so far as no account is taken of the amount paid as *license tax*, which is *not* included in the consolidated rate, and which in itself is more than half the amount stated, to say nothing of the other heads of taxation more largely contributed to by commerce than by other interests. Indirectly commerce pays to the Corporation the rates levied on the Port Commissioners' property in the Docks, &c. Were it not for commerce there would be no Port Commissioners and no rates payable by them; in fact, commerce practically pays the rates on all the lands and buildings in the town, for but for commerce the value of these would dwindle away to nothing.

"So much then, Sir, for the attempts on the part of dissenting Hon'ble Members to belittle the interests of commerce, and the absolutely unfounded statement that 'the difference to them being inappreciable, they are not concerned whether the rates are at 25 per cent. or 15 per cent.'

"Then, Sir, in the Notes of Dissent we are threatened with 'consequences,' 'discontent' and friction. What the 'consequences' may be, I think we may look forward to with equanimity; that the discontent will disappear in time is only reasonable to suppose.

"If there be 'friction,' it can only arise out of *faction*—the spirit of a section which would wreck the common interests, because it finds its own class deposed, which will not work with others because its own self-esteem has been injured.

"Personally I have a higher opinion of the sound common sense of the better class of native Commissioners than to attach importance to these warnings, and I would say to them—let us agree to accept things as they are, and with one object in view, *viz.*, the good of the land we live in.

"In this connection, Sir, I would venture to pay a very sincere, and in my opinion, and I feel sure in the opinion of the Council, a well-merited, tribute of praise to the Hon'ble Members who have opposed the measure, for the uniform good temper displayed by them throughout the protracted debate. I desire to specially mention my hon'ble friend Babu Surendranath Banerjee, on whom the principal share of the burden has fallen. Those whose cause he has been pleading have good reason to be proud of their advocate. *No item* essential to that cause, however small, has escaped his notice, or failed to elicit his strenuous support. He has had to fight a losing battle, and he has shown that most enviable of all qualities, *viz.*, that of being able to fight without loss of temper and with entire absence of personalities, veiled insinuations, and assumed monopoly of knowledge indulged in by another Member of the opposition. This fact, I think, augurs well for the hope I have expressed, that we shall yet see the *best* of the native Commissioners, who have recently felt it incumbent on them to withdraw, returning to share the labours (and I would add parenthetically the *fees*) with those on whom the work of municipal administration under the new Bill may devolve.

"With these remarks, Sir, I beg to record my vote in favour of the Bill being passed."

The Hon'ble RAJA RANAJIT SINHA BAHADUR, OF NASHIRPUR, said:—"Your Honour, I think no measure of this Council ever excited so much criticism as the one which we are discussing to-day. There is not a single section of the native community left which has not strongly opposed this Bill. I agree in the main with the principles enunciated by Your Honour's predecessor in office, Sir Alexander Mackenzie, from the presidential chair in this Council prior to and after the introduction of this measure, that the every-day work of the city should be left in the Chairman's hands, and that in cases of emergency, such as the outbreak of plague, he should have larger powers to deal with them, and that there should be a small executive body interposing between the Chairman and the Corporation to deal with such matters which cannot properly be discussed by a large body, and which are at the same time so important as not to be left to the Chairman alone for disposal, and that the three chief interests in Calcutta, *i.e.*, the rate-payers, men of commerce, and the Government, should be represented in it. With Your Honour's permission I shall read extracts from the speeches of Sir Alexander Mackenize. On 26th February, 1898, he said:—

'The Bill is a large and, I hope, very complete measure, and deals with all branches of the administration of the city. It leaves untouched the number of Commissioners and the existing methods of electing and appointing them. While it reforms the procedure for election, which is admitted by everyone to be defective, it does not alter the franchise, nor does it reconstruct the present arrangement of wards. It provides the Corporation with an efficient executive, and interposes between the main body of the Commissioners and the Chairman a working Committee of twelve elected and appointed, so as to represent the three chief interests in Calcutta—the Government, the commercial community and the residents. * * * The General Committee, as the working body of the Municipality, stands between the deliberative and executive authorities, and deals with those matters which by their nature are ill-adapted for discussion by the Corporation, and yet are too important to be left to be disposed of by the Chairman alone. Power is taken for the General Committee to appoint Sub-Committees, on which I hope to see all the real workers among the Commissioners utilized.'

"And again on the 4th April of the same year, after the introduction of this measure in the Council, he said:—

'My theory of the Bill, the cardinal principle of the Bill, the essence of it, is that we must leave the ordinary every-day work of the city in one man's hands. * * * * If that is once secured, all the rest appears to be a matter of arrangement and detail.'

"But, Sir, I find the Bill is not confined within the said principles, but has gone far beyond it. Many revolutionary changes have been introduced in it. As I am not a resident of Calcutta, and have no personal experience of Calcutta municipal affairs, I shall deal only with the general principles of the Bill. I find unlimited powers have been given to the Chairman, who is not made responsible to anybody, and that large powers given to the General Committee by depriving the Corporation. The powers which were formerly reserved for the General Committee in the Bill as was originally revised by the Select Committee, and could not then be given to the Corporation composed of a large body of 75 Commissioners, could with propriety have been given to the Corporation as it will now be constituted. Sir, under orders of the Government of India dated 17th June, the number of the elected Commissioners in the Corporation was reduced on the model of the Bombay system. We all appealed that, if the Bombay system was to be adopted at all, it should be adopted in its entirety, as it was not fair to accept the most stringent parts of the law, leaving aside the most popular portions of it. And the Government of India also said in the 16th paragraph of their Despatch they 'are inclined to think that in this suggestion and in a mere close adaptation of the Bombay model might be found the solution for which they are seeking.'

"So, Sir, it would not have been against the principles laid down by the Government of India if a few seats were allowed to other influential representative bodies of Calcutta. I brought forward an amendment to that effect, but it was rejected by the Council on the very day I could not unfortunately attend owing to my illness. I am sure, if this would have been accepted, it would have to a certain extent pacified the popular feeling in the matter, and would have been in perfect harmony with the Bombay system. In the Corporation as now constituted the rate-payers, *i.e.*, the native element, are placed in minority, as the number of

the elected Commissioners is 25, whereas the number of the appointed Commissioners, including the Chairman, is 26; and so, Sir, the broad principles of local self-government have been contravened. Then, Sir, as to the constitution of the General Committee which is vested with all the real powers in the municipal affairs, the Government of India desired that two-thirds of the members of the said Committee should be elected by the Corporation; but, as it now stands, I find the rate-payers to be in a hopeless minority. Not only this, Sir, but the non-official majority, which was in the Bill originally revised by the Select Committee, has also practically been done away with. The interests of the rate-payers in the town are great; they constitute the bulk of the population and contribute the bulk of the municipal taxes, so in my humble opinion they should have a larger share of representation in it; and I do not think it would have been against the principles laid down by the said Government if six seats in the said Committee had been allowed to the representatives of the rate-payers. Then, as to the representation of commerce, I find that four members of the said Committee, who were to be elected by members representing commerce, will now be elected not by them alone but by the Government appointees also; and as the number of the Government appointees in the Corporation is 15, and whereas the number of Commissioners to be elected by the Commercial bodies is 10, and if they vote to the full strength of their respective constituent elements, it is evident that the Government appointees will be able to secure those four seats also; so, practically speaking, no independent representation is allowed to that body, which was one of the fundumental principles of this Bill, and thereby the non-official majority in the General Committee had been practically done away with. Sir, I further beg to submit that the General Committee is again based on an illogicial solution which the Government of India was so anxious to avoid, as the representatives of the rate-payers form half the bulk of the Corporation; whereas in the General Committee they bear only one-third proportion. I am not yet fully convinced if the Government of India ever contemplated to bring about such a change in the General Committee. To my mind, Sir, it appears contrary. I still think that the Government of India thought they were making some concession in that respect. If they would have contemplated such a change, they would have never expected that their decisions in the matter would be a truce to all dissensions. I shall quote the exact words which the Government of India said in that respect:—

'The Government of India, however, who in framing these proposals have been actuated by a sincere desire to promote harmony equally with good government in the future, entertain the hope that there may, henceforward, be a truce to such dissension, and that the Bill, as remodelled, may be accepted by all classes in the spirit in which its modification has been discussed and put forward by them.'

"Sir, whatever be the case, the Bill as it now stands is certainly worse than what was originally introduced. I must admit that many improvements have been made in other portions of the Bill though not to our entire expectations, and many contentious matters have been removed, such as those relating to the registration of deaths and cremation of dead bodies, for which we are extremely thankful. I consulted not only many leading landholders who reside in Calcutta, and who are interested in the matter, but also some of them who have no interest here, and I found all of them opposed to this Bill. So, as a representative of the landholders, I think it is my duty to oppose the Bill in its present form. I shall be wanting, Sir, in my duty if I fail to acknowledge with gratitude some concession which Your Honour has made in some important parts of the Bill while it was under discussion, and we are also thankful to my hon'ble friend, the Member in charge of the Bill, for the courtesy he has shown all throughout the discussion of such an important measure. With these few observations I beg most respectfully to oppose the motion."

The Hon'ble Babu Baikanto Nath Sen said:—"The passage of this Bill through the Council is irresistible, however strong the current of public opinion may be, and by public opinion I mean popular opinion. However strong that public opinion might have been—and it has been strong enough in all conscience—it has not, as we know, been strong enough to cause a diversion or

deviation in the course of this Bill. If I had not been a new Member, and if I had had to take any share in the debates and discussions on the Bill at its earlier stages, perhaps I would have kept quiet and would have given a silent vote, simply entering my protest; but, as it is, I feel it my duty to make some observations on this occasion.

"It has been observed by the Hon'ble Member in charge of the Bill that at this stage, when the Bill in its present shape has been discussed in eleven sittings, that it would be stultifying ourselves to suggest that it may be thrown out. Undoubtedly it would stultify the authors of the Bill, but not those who have opposed the Bill from the beginning to this stage. It is in this position that we stand, and it is simply to justify the conduct that I am taking in this Bill, the attitude that I feel myself compelled to take, that I beg to offer a few observations by way of explanation. Now, Sir, the Hon'ble Member in charge of the Bill has observed that this Bill is a better and stronger one than the one which was originally introduced. He has further observed that three co-ordinate authorities have been created; that the want of proportion between the Corporation and the General Committee—that illogically—has now been removed; that there is a proper and true representation of the commercial community in the Corporation as well as in the General Committee; that the central control power has been secured for the Government; that good building regulations have been introduced; that beneficial measures regarding water supply, conservancy, drainage and the registration of the births and deaths have all been introduced by this Bill. On the other hand, the champions of the Corporation, the Hon'ble Mr. Apcar and the Hon'ble Babu Surendranath Banerjee, have also drawn Your Honour's attention to the other aspect of the case. The beautiful and recommendatory features have been put forward in lucid and condensed language by the Hon'ble Member in charge of the Bill with his usual ability. On the other hand, the Members for the Corporation have attempted to show how the existing Corporation is being deprived of its existing powers, how the Corporation becomes simply a consultative body having no voice whatever in executive functions and in the real administration of municipal affairs. It is not for me, Sir, to go over these grounds, nor is it necessary for me, a non-resident of Calcutta as I am, to go into the details, especially as these details and all these matters have been discussed during these eleven sittings. I do not propose therefore to go into these questions. It has been very properly observed by the Hon'ble Member in charge of the Bill that this Bill has been attempted to be introduced as an efficacious measure which will improve the health of Calcutta, it will improve it in sanitary respects, and time alone will prove whether it will be successful or not. We have got two sets of prophets here: one set of prophets prophesy that it will be a success; on the other hand, there are six others present who forecast the other way. No doubt, time will certainly decide whether the majority or the poor minority have been making the prophecy which is correct or not I venture to think, with due deference to the majority, that the minority will turn out hereafter to have made the correct prophesy.

"Now, Sir, I have been told to-day that this Council is subordinate to the Supreme Council. I was all this time under the hallucination that this Council has freedom of action so far as provincial legislative measures are concerned; that this Council has a free hand. Now I am told that it is subordinate to the Supreme Council in matters of legislation. If it is so in that case, accepting that the Supreme Government has authority to direct this Council in legislative measures, that it has authority to indicate the line of legislation and formulate to us the principles of legislation, and accepting also Your Honour's decision that we cannot go beyond or behind the Government of India's Despatch, I beg still to contend that we have a right to discuss whether the principles formulated and the recommendations which have been made by the Supreme Government have been properly construed, and whether effect has been given, to the intentions of the Government of India by the Select Committee and by this Council. I will touch only and confine myself to one point. When the Bill after it evolved from the first Select Committee and went up to the Government of India, at that time 75 Commissioners were to have constituted the Corporation and 12 the General Committee; and the General

Committee were to be constituted in three equal component parts from three different quarters—the Corporation, the mercantile community and the Government. Now there was a great deal of excitement in consequence of that; public meetings were held; platform speeches were made; the Press discussed; and memorials were forwarded to His Excellency in Council, and then His Excellency decided that while there was illogicality in form; therefore the number of the Corporation should be reduced to 50. A hope was expressed by the Government of India that there be a truce to dissension. Now we are about to attribute earnestness to what was expressed by the Government of India in a serious matter like this. That is the position? Did the Government of India mean that, well you native rate-payers of Calcutta, when it was proposed that you should get 75 Commissioners for the Corporation and that the constitution should be in this way, you objected to this; there is want of harmony amongst you; well I want to stop all this; I want to please you all, and I wish that there should be a truce to all this dissession. What do I do? I say I will reduce the number from 75 to 50. I do that. Then further what do I do? I send back the case for the reconsideration of the Government of Bengal and for the reconsideration by this Council, with the hope that the Government of Bengal 'will doubtless consider the matter. The Government of India think that a General Committee, thoroughly representive both of the principal interests involved and of the larger Corporation, and qualified to discharge the important duties which it is proposed to place upon its shoulders, might be constituted by the nomination, as in Bombay, of one-third of its total number of 12 members by the Government and by the election of the remaining two-thirds by the Corporation itself. The circumstances of Bombay, however, differ materially from those of Calcutta, in one respect, *viz.*, in the numbers and strength of various communities that compose the total population of the city, and are represented in the Municipal body. The Bengal Government will doubtless, therefore, find it desirable to suggest some plan that will secure to that proportion (two-thirds) of the General Committee which is to be elected by the entire Corporation, a strictly fair and proportionate representation of the constituent elements of the electoral body. Otherwise it might be possible for either party, in the chances of voting, by a bare numerical majority, to swamp the General Committee, and to secure that the entire two-third proportion should be of their own political complexion or class.'

"The Government of India then curtail the number from 75 to 50, and then it was suggested that the Government of Bengal should find some method by which there would be a true and fair representation in the General Committee. The rate-payers were thus attempted to be satisfied. The communication of the Government of India seemed to be clear that, while the number 75 was reduced to 50, there would be given a large proportion in the General Committee; otherwise it would be a sort of practical joke, and we precluded from attributing such a thing to the Government of India. The Government of India was certainly earnest; they wanted to give us something, and I submit that this would certainly have been, if, leaving aside the number 4 to be appointed by Government, of the remaining two-thirds in the General Committee these members had been elected by the Ward Commissioners and if two only by the commercial community, and that would have maintained the proportion in respect of the Corporation. The Corporation consisting of 25 out of 50, 25 by Ward Commissioners, half the number, half in the General Committee, 6 appointed by Government, 15 appointed Commissioners in the Corporation, almost one-third, one-third also in the Corporation and the other 10 in the Corporation, one-fifth in the General Committee, 2 would have been the fair proportion. There would have been therefore in that case a proportionate correspondence in the constituent elements of the two bodies. I venture to think, therefore, that it was really the desire of the Government of India that while reducing the members 75 to 50 of the General Corporation, it was the clear intention of the Government of India, in order that there might be a truce to all dissension, that the people might be satisfied, that there might be harmony among them, that there should be a greater representation in the General Committee. I venture, therefore, to submit that the Select Committee has misinterpreted and misconstrued this despatch of the Government of India,

and that this Council too has confirmed the action of the Select Committee in accepting the numbers proposed by the Select Committee in the Bill.

"Now, Sir, I need only say a few words more. It has been observed by the Hon'ble Member in charge of the Bill that local self-government is not being destroyed at all and there has been a change only in form. I submit, Sir, it is not in the form, but in the change in framework. There is a Corporation which is representative central power now; it will now be deprived of all its powers. There are three co-ordinate authorities created. The Chairman, let him be vested with certain executive functions, even sitting over the Corporation he might be permitted, his powers might be strengthened, but to create another body which will not be like the body we have now. local self-government is practically virtually being destroyed in Calcutta. Sir, the operation of this Bill when it is passed will not be confined to Calcutta, but I beg to submit that it will have its effect all over the Province. We come from the mufassal; we are not quite so much or directly concerned with the operation of the Act at Calcutta, but apprehensions are being entertained by the people living in the mufassal, a disappointment which has been caused by the formulation of the principles by the Government of India in their despatch. The alarm which has been caused is being shared by the people residing in the mufassal. They fear that under the garb of reform the pruning knife hand will be extended in a short time in the mufassal. That is a sort of thing which is very undesirable. The contentment of the people constitutes one of the pillars of the State. If there is contentment throughout the country, nothing need be feared about the internal disturbances. The contentment of the Bill might be sought after, but this Bill, I fear, if passed into law, will create discontent in the whole Provinces. With these remarks I beg to enter my humble, respectful, and yet firm and emphatic protest against the passing of this Bill."

The Hon'ble Mr. Spink said:—"I have much pleasure in supporting the motion of the Hon'ble Member in charge of the Bill, that the Bill as amended be passed. I very gladly pay a tribute to the excellent work performed by the learned Secretary to the Council in connection with this measure. I congratulate Your Honour and the Members of this Council that the final stage of this exhaustive and prolonged debate has now reached its final stage, and the general public will, I am sure, alike share the relief when debate and agitation on this vexed question have been set at rest. I do not propose, Sir, to detain this Council with any lengthy speech after the most able and exhaustive exposition by the Hon'ble Member in charge, for it seems to me that the most ardent debater and the most interested listener must have had enough lately to satisfy the most hungry cravings!

"Well, Sir, my hon'ble friend Babu Surendranath Banerjee has frequently told us during this debate that he is no prophet, and yet, Sir, scarcely a day has passed in which he has not foretold the saddest prospects for Calcutta under this new Bill; and as for the Bill itself, I shall not be exaggerating if I say that he has foretold its doom.

"I am happy to say that, notwithstanding all that I have heard on the other side, and I have listened with the greatest attention and interest to all that the opponents of the Bill have had to say—and I am bound to add that their case has been conducted with the greatest ability and their arguments pressed with no little eloquence and insistence—I am still of the same opinion which I at first entertained, *viz.*, that this Bill is the best solution of the difficult problem of improving the municipal Government of Calcutta. No stone has been left unturned by the opposition in their endeavour to prove that no case has been made out for changing the law, and here again, I fear, I cannot agree. I am pleased to endorse all that fell from the Hon'ble Mr. Baker in regard to local self-government.

"We have been frequently told that this Bill lays the axe at the root of the broad principles of local self-government. Well, Sir, I am prepared to go with the Hon'ble Member who has told us this so far, that it does lay the axe at the root of local self-government by a single section of the community, and it is needless to say that I refer to the Hindu section; they appear, Sir, to appreciate local self-government in a high degree, so much

so that they not only want to govern themselves, but they want to govern every one else, and they have been allowed to do so up to the present time; but of course a time has come when this could no longer go on. To my mind, Sir, it has been clearly shown that a change in the system has become necessary. Had the Government proceeded with more measured steps in the first instance when delegating their power to the local body, perhaps so great a change as embodied in the Bill would not now have been found to be necessary. Be that as it may, the elective system has been fully tried, and it has failed in its original object to provide Calcutta with a representative local governing body.

"I believe when the original measure was passed a distinguished leader of the Indian community—I refer to Babu Kristo Dass Pal—gave it as his opinion that it was not at all to be regarded as a consequence of the system which was about to come into operation that a Hindu majority would be returned. How utterly he failed to gauge the probabilities of the measure has been conclusively shown by subsequent events; the system completely failed, as everybody knows, to return a mixed representative body, and, if for no other reason, it is certainly necessary for this, to change the law, in order that every interest in the capital shall be adequately represented in the Corporation. The provisions in the Bill will certainly do this, and it cannot be argued that a measure that distributes the privileges and powers associated with municipal government to all sections of the community strikes a blow at the foundations of local self-government. I maintain, Sir, that it widens the broad principles of local self-government, and for that reason I welcome this measure.

"It requires no words of mine, Sir, to demonstrate what commerce and trade have done for Calcutta; it is obvious to all, and has been denied by none, and it has been frequently referred to by Hon'ble Members in this Council; but as a member of the trading community of Calcutta I feel sure that I may be pardoned if I have regarded the situation throughout the consideration of the Bill more from a commercial than a sentimental point of view. I have nothing to say against sentiment, Sir, for it pervades our daily life, and happily so; but in a consideration like this I think we should not allow it to have too great an influence upon us. My friend the Hon'ble Babu Surendranath Banerjee may, perhaps, disagree with me, because he has so frequently pressed the sentimental side of the question in his arguments, and when listening to them I must confess that it has come to me in the light of a revelation that so much sentiment in such matters does lie hidden in the Hindu breast. Well, Sir, the commercial community of Calcutta had a rude awakening when plague visited its doors. Never before, I may safely say, was the fact so convincingly, and with such force and suddenness, brought home to it, of how intimately the interests, I may say without exaggeration, the very safety and existence of its vast commerce and trade, are associated with the good government and sanitary conditions of this great port;—and because of this, Sir, it has become necessary that the commercial interests involved shall have a voice in municipal matters. For reasons already explained, this has not been possible under the existing law, and the provisions embodied in the Bill will, in my humble opinion, fully meet the case.

"The holding aloof of the European community from the Corporation in the past has been a favourite theme of the opposition. Whatever justification there may have been for it has, I submit, been fully explained away; and under altered conditions, what apathy, if any, there may have been, will cease to exist. As far as the members of the Calcutta Trades Association, which Association I have the honour to represent in this Council, are concerned, I think that I may claim that in whatever degree blame may attach to other members of the European community, members of the Calcutta Trades Association should be completely absolved of any. My hon'ble friend Babu Surendranath Banerjee was good enough to refer, in complimentary terms, to the good work done and devotion shown to the interests of the city by the members of that Association from the earliest days of the Justices up to the present time, and I appreciated very much his acknowledgments made in his usual graceful language, and likewise those of my hon'ble friend Mr. Apcar—although, perhaps, his remarks have not been quite so complimentary to myself—coming as they did from two of the

oldest and most devoted members of the Corporation. Well, Sir, I am prepared to pledge myself to the assurance that as in the past, so in the future, will members of the Calcutta Trades Association be ready and willing to give their time and services to the work of the Corporation, and, if I mistake not, so will my hon'ble friend Mr. Mackenzie as regards members of the Chamber of Commerce. My hon'ble friends in the opposition need have no apprehension that the operations of the Bill will be allowed to fail for want of support from the commercial community of Calcutta. And, Sir, I hope it may not be considered presumptuous on my part if I say that, in my opinion, a larger infusion of this element into the Corporation should be of great benefit to it. The co-operation of sound men of business, who are in the habit of dealing daily with great commercial problems, such as the promotion and carrying out of large schemes, both of a public and private nature, entering into contracts, scrutinizing estimates, dealing with accounts and general office administration; with the other elements which make up the Corporation, should assist immeasurably in carrying out the work of the Corporation in an effective and prompt way.

"I do not wish it to be supposed, Sir, that I underrate the value of the services which have been so liberally and loyally given by the Indian members to the Corporation up to the present day, among whom are to be found a large number of eminent lawyers and journalists; but I must confess, and I say it with the greatest deference to that learned profession, that in my experience I have invariably found that to introduce law means to introduce delay and to hang up your scheme indefinitely; and I do believe that if the commercial progress of the Empire rested in the hands of lawyers we should soon come to a standstill. My hon'ble friend Babu Surendranath Banerjee and his colleagues have once or twice said that they would welcome a larger number of the European community into the Corporation, and in face of this he had an amendment on the aggenda paper which, if it had been carried, would have excluded the Calcutta Trades Association! I am bound to say, Sir, and it did credit to his better judgment, that he soon produced an alternative amendment which did not seek to disturb the commercial element; and I attribute the reason for his so quickly realizing his mistake to the fact that he recognized how much the security of the accumulated wealth of his co-religionists in Calcutta depends upon the progress and stability of the commerce and trade of this port.

"I do not propose, Sir, to discuss the details of the Bill; they have been carefully thought out and most carefully considered both in the Select Committee and in this Council, and every effort has been made in the provisions of the Bill to safeguard the interests of every section of the community, rich and poor, while promoting those of the Municipality. Many concessions were made in Select Committee to meet the views of the representatives of the Indian community, their arguments have had a sympathetic hearing, and I believe it is admitted by them that the Bill, from their point of view, emerged from the Select Committee in an improved form. The Select Committee certainly did much to elevate the position of the Corporation and to ameliorate the condition of the poorer classes.

"I strongly approve, Sir, of the principle of co-ordinate authorities; the work of the Municipality should be got through much more smoothly and quickly and without unnecessary and frequent interference, one authority with another.

"I do hope that, as soon as this Bill becomes law, that one of the first things the new Corporation will do will be to put its house in order, in other words, to scour out and reorganize the whole of its establishments, and to appoint responsible officers in each department, even if it necessitates some extra expenditure; for I feel convinced that, if this is done, great economies will eventually be effected and great improvement in the collections made.

"I quite appreciate the fact that the Corporation requires more income, and I hope some means may be devised to improve its revenue without inflicting undue hardship on any one section of the community. It is a difficult question and requires careful consideration, it is one which may be left with all confidence in the hands of the Local Government.

"The Bill as amended, Sir, as the Hon'ble Member in charge has said, is the result of the most searching investigation and revision, the principles of which were adopted in the first instance after mature consideration and based upon a wide knowledge of facts by your distinguished predecessor and subsequently accepted by Your Honour as sound; it has received the approval of the Government of India, and has been confirmed by the Secretary of State for India; it has the approval of a majority of the Select Committee and a majority of this Council; and I have much pleasure, as I said before, in supporting the motion before the Council that the Bill as amended be passed.

"Only one word before I finish—I hope I may be permitted to give expression to the hope that when the time arrives for this Bill to come into force that all loyal citizens, whether European or Indian, will come forward and unite to assist Your Honour's Government to make this new law the success which it ought, and which I firmly believe it will, be."

The Hon'ble Dr. Asutosh Mukhopadhyaya said:—"Sir, I do not use the language of mere convention when I say that my first words on this occasion must be expressive of thanks to Your Honour and to my hon'ble colleagues for the patient and attentive hearing accorded to me during a debate which has now lasted for over eleven days. During this period it has been my duty to criticize, without reserve, various provisions of this Bill; but I shall not conceal my regret that the time at my disposal, since I have had the honour of a seat in this Council, has not been sufficient to enable me to bestow upon every single provision of the Bill that searching and exhaustive criticism which I am accustomed to bestow upon whatever passes through my hands in another place. Nor shall I conceal my disappointment that my criticisms have not commended themselves to this Council in a larger measure than has actually been the case; with all respect for the judgment of the majority, and in spite of the adverse decision recorded, some of these criticisms still appear to me to be so reasonable that but for what fell from the Hon'ble Member in charge of the Bill this morning, I would be unwilling to believe that they would have been equally ineffectual, even if they had been advanced by an abler advocate gifted with powers of more persuasive eloquence.

"I have no desire, Sir, to review at this stage the history and fortunes of this legislation. I will not stop even for a moment to enquire whether it was wise, whether it was statesmanlike, for any Government to introduce into the Council chamber a measure of such magnitude, intended to mutilate, if not to destroy, the form of municipal government which has prevailed in the capital of the Indian Empire for well nigh a quarter of a century, till the facts had been ascertained by an independent commission of enquiry in whose decision the public might repose implicit confidence. I will not pause for a moment to enquire whether it was wise, whether it was politic, for any Government to undertake a measure of this character upon an alleged but unproved ground of corruption, which was first publicly formulated in a State document more than twelve months after the Bill had been introduced into the Council. These may or may not be appropriate subjects of discussion now. But I take it, it is perfectly legitimate at this stage to consider whether the Bill as amended, which in a few moments will become the law of the land, does or does not make adequate provision for the removal of the evils to remedy which the Bill was avowedly introduced. One of these so-called evils has been described to be the complete failure of the elective system to secure adequate representation even of the different interests existing in the native city; or, to put it in a more practical and more intelligible form, one of the avowed objects of the Bill was—I am quoting the language used by Hon'ble Members in this Council—one of the avowed objects of the Bill was to destroy the dominance of the educated Hindu in the Calcutta Corporation. That object, Sir, I mournfully confess, has been adequately secured by the provisions of this Bill; and I say, with all the emphasis I can command, that the Bill, in so far as it has attained this object, has my unqualified disapproval; in this respect it has not, and it cannot have, the smallest measure of my sympathy. But, Sir, it is instructive to enquire, what have you substituted for the dominance of the educated Hindu? You have not satisfied yourself with replacing it by the dominance of the mercantile European or the progressive Muhammadan; but you have replaced it by

the irresponsible executive. The fundamental principle of the Bill is the creation of three co-ordinate authorities—the Corporation for purposes of deliberation, the Chairman for purposes of executive government, and interposed between the two, a small General Committee, which in some respects is subordinate to the Corporation, which in others is superior to the Chairman and is sometimes independent of both. All this, Sir, looks very nice on paper, but by virtue of the power of unlimited delegation of authority which the Chairman possesses under the law, and against which it was my duty to enter my most emphatic but ineffectual protest, you have not three, but an unlimited number of co-ordinate authorities. I have no desire to anticipate the verdict of posterity, but I venture to affirm that it will be absolutely impossible for the Chairman, however able and however devoted he may be, to exercise any effective control over the numerous band of the executive to whom his authority must necessarily be delegated, and who in practice will either be irresponsible or will enjoy the delightful position of having an autonomous responsibility. But this is not all. You deny to the members of the Corporation the right of access to the records of the Chairman and the General Committee, you render public criticism impossible, you draw a thick veil of mystery over the misdeeds of the executive.

"But these, Sir, are not the only objectionable features of the Bill. I venture to remind the Council that one of the alleged flagrant abuses to remedy which the promoters of the Bill were so anxious was the growth of party-spirit and the appearance among the elected Commissioners of a class of professional and, in some cases, corrupt politicians. I ask, Sir, if there are any provisions in this Bill intended or calculated to remedy these evils if they really exist. I confess, Sir, I cannot recall to mind any single provision in this direction. On the other hand, I can recall to mind at least one provision which will have the effect of alluring the needy to the Municipal Board and of keeping away the honourable who will naturally shrink from a contest which may be construed as a contest for personal gain. I affirm that nothing has been done to remove or to prevent the recurrence of the alleged corruption. You declare that you have discovered a hidden gangrenous sore in a limb of the commonwealth, you refuse to open and examine it, you replace it by a new one, but you provide no guarantee that the sore will not reappear.

"I do not propose, Sir, to pursue this somewhat painful line of investigation, but apart from these questions I cannot conceal from myself that you have embodied in the Bill provisions not a few, which are inconsistent with the first principles of jurisprudence. In this connection, Sir, no one regrets more keenly than I do the absence at this crisis of my hon'ble friend the Advocate-General, whose impartial and independent criticisms would have been of the utmost value. Forgetful of Macaulay's maxim, that in codification we must have uniformity when we can have it, diversity when we must have it, but certainty always,—you have introduced into the law presumptions which are demonstrably untrue, and you have introduced variations from the general law for which there is no possible justification. You have maintained an arbitrary system of assessment which is inconsistent with the first notions of political economy, which is inconsistent with the law as administered in England, and which was introduced by reason of a misconception of what that law was. You have incorporated into the Bill variations upon the provisions of the Land Acquisition Act which are absolutely indefensible in principle, which under the garb of law will facilitate the confiscation of private property, which will in some instances operate to the injury of the citizen and in others, most unexpectedly, to the injury of the very Corporation they are intended to benefit. To crown all, the provisions of the Bill are so numerous, many of them are so novel and so complicated, and their intention and operation will lead to so many doubts and difficulties, that they will puzzle the best administrators, lead to the inevitable oppression of the poor, and foster mischievous litigation. These, Sir, are blemishes of a grave and serious character, and I shall be wanting in loyalty to the profession to which I belong if I were to accord my sanction to them.

"Before I resume my seat, Sir, I desire to take the opportunity of referring to the startling theory propounded this morning by the Hon'ble Member in

charge of this Bill. I have met with some surprises in the course of this prolonged debate, but I did not know that the greatest of these surprises had been reserved for the very last moment. The Hon'ble Member in charge of the Bill has seriously defined the function of this Council to be to carry out the mandate of the Government of the day when the principle of any proposed measure of legislation has been approved by that Government. I would not have been surprised, Sir, if this had been authoritatively laid down to be the duty of the official Members of this Council. Thus qualified, I might have left the proposition alone and unchallenged. But I repudiate, in the clearest possible terms, this extraordinary theory when it is applied to non-official Members. In spite of the doctrine expounded by the Hon'ble Member in charge, I retain, Sir, the right to think and judge for myself. I have made none the custodian of my conscience, and, so long as I have the honour of a seat in this Council, it will be my duty to advise the Council to the best of my ability and judgment, regardless of what this or that party may approve or disapprove."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"Before I proceed to offer the few observations I have to make with regard to this Bill, I should like with Your Honour's permission to put a question to the Hon'ble Member in charge of the Bill. The question I wish to ask is, if formal sanction has been communicated to this Government by the Government of India in reply to the letter of this Government, No. 180D., dated the 4th May, 1899. In that letter sanction was asked to the penal clauses of the Bill. I have carefully gone through the Despatch of the Government of India, but I do not find any formal sanction whatsoever. May I be permitted to ask the Hon'ble Member in charge of the Bill whether this sanction has been obtained?"

The Hon'ble MR. BAKER said:—"The sanction is implied in the long letter which the Government of India addressed to this Government on the 17th June. The effect of that letter was to authorise the Council to proceed with the Bill on the lines laid down by the Government of India."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I take it then that no formal sanction has been obtained except such as may be implied."

The Hon'ble MR. BAKER said:—"I am informed by the Secretary that, under the rules of the Government of India, if formal sanction is not received within two months, it may be implied that sanction has been given."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"Just as I was coming to this Council this morning, I received a letter which reminded me that to-day was the anniversary of the death of Raja Ram Mohan Roy. It seems to me to be most fitting that the anniversary of the death of the greatest Bengali of modern times should correspond with the date which will be remembered by the future historian of Bengal as the date which marks the extinction of local self-government in that city where he lived and worked and which was the city of his love.

"Sir, I do not remember any project of law which within the lifetime of this generation has created a graver sense of uneasiness, or one which has more profoundly stirred the hearts of the people. It has evoked the most persistent agitation since its introduction into this Council—an agitation which for its earnestness, the depth of feeling which underlies it, and the visible alarm which it embodies, is unparalleled in the annals of this city. It will not do to seek to belittle the intensity of these demonstrations. It will not do to say that this agitation is the work of wire-pullers. Where would the wire-pullers be if there was not a substratum of feeling upon which they might work? And, Sir, am I to understand that you are to set down as wire-pullers men like Raja Benoy Krishna Deb, Bahadur, Kumar Radha Prasad Roy, Bahadur, Kumar Monindra Chunder Mullick, Bahadur, Babu Jotirindranath Tagore and others, the illustrious scions of illustrious and princely houses? If they

have been driven into the ranks of the agitators, the Bill is responsible for it. It is bad measures that make men agitators. It is good measures that rob them of their work. It will not do, I say so deliberately, to belittle the agitation which has been set on foot against this Bill. It represents all the culture, all the talent, all the wealth of this great city. It represents all that is highest and best and noblest in the municipal and the public life of Calcutta. Men who have never stirred out of their homes to attend a public meeting, men who have never uttered the whisper of a complaint against any measure of the Government of this country, men who have hitherto lived in the quiet and contented possession of their wealth and in the enjoyment of all that wealth implies, have felt themselves constrained under a sense of overwhelming duty to record their deliberate protest against this measure. Mark the opposition of my friend Raja Ranajit Sinha, Bahadur, of Nashipur, a most peaceloving, loyal and law-abiding man, and yet, as the representative of the landholding interest in Bengal, speaking with the weight of that interest behind him, he feels it his duty to record publicly and emphatically his deliberate protest against this Bill.

"My friend the Hon'ble Mr. Oldham in the course of the observations which he addressed to us was pleased to say that this protest is the work of the Brahmins and the lesser Brahmins. No, Sir! This protest emanates from the voice of a united community. It is repeated in every Indian newspaper, it is reproduced in every vernacular journal, it is the talk of every bazaar in the Indian part of the town, it is the staple of conversation in every Indian home, and it has at last been reproduced on the Indian stage. The volume of opinion grows day by day until it bids fair to become the common opinion of a united community. I desire to remind my hon'ble friend, who is so anxious to belittle the intensity of public feeling with regard to this matter, of an expression of opinion which comes from an authority which my friend is bound to respect—an authority which is held in the highest respect by this Council—the authority of no less a man than John Stuart Mill. In his Essay on Representative Government, John Stuart Mill says 'The opinions and sentiments of the educated classes are sure to filter downwards and become in the course of time the opinions and sentiments of the uneducated masses.' Let us not, therefore, lay the flattering unction to our souls that this protest comes from a few interested people and their still fewer followers, and that, behind the din and noise which they have created, the great Indian community of Calcutta repose in the silence of peace and tranquillity.

"And here I have a matter of complaint, and when I make it I desire in the most explicit terms to eliminate your respected personality from that complaint. The complaint I have to make is as to the way the representations of my countrymen have been treated. The most painful feature in this most painful controversy is the total disregard shown for the Hindu opinion of this city. I repeat the question—how have you treated those representations, the memorials and petitions which were addresed to this Government not by dozens but by scores and hundreds? How have you treated these representations? With the exception of a memorial that was addressed to the Government of India, not even the courtesy of a reply was vouchsafed to any of them. My hon'ble friend will reply—and I can almost anticipate what he will say—that these representations were placed before the Select Committee and carefully considered by that Committee. I do not wish to question that statement in the smallest degree. No doubt they were carefully considered, and they were as carefully rejected. So far as the constitutional clauses of the Bill were concerned, these representations might not as well have been made. I ask then—where was the necessity for inviting the Indian public bodies to express their opinion with regard to those features of the Bill, the constitutional clauses especially, in connection with which the conclusions of the Government were foregone conclusions? Where was the necessity of enacting the solemn farce of inviting public opinion when anything that public opinion might say was not likely to make the least impression upon the mind of the Government? How different, Sir,—and I deplore the fact,—was the state of things in 1876 from the state of things now! How much more deferential the Government in those days was to the

expression of public opinion—what greater latitude, wider scope and independence of action was permitted to official Members? Read the proceedings of the Council in connection with the Calcutta Municipal Bill of 1876, and you will find that the official members frequently voted on opposite sides, the Lieutenant-Governor on one or two occasions being in the minority. All that is now changed, and the result is that our amendments were massacred in the most ruthless manner.

"My hon'ble friend expressed his surprise that we should have our amendments chiefly to the constitutional clauses of the Bill, and that we should have thought it unnecessary to address ourselves more vigorously to the substantial part of the measure There was a very good reason for that. Great concessions were made by my hon'ble friend in the Select Committee in respect of what he calls the substantial part of the Bill. The building regulations, as I said the other day, were completely recast, and my hon'ble friend Mr. Buckley, who has all the instincts of an administrator, expressed to me, if I may be permitted to betray the secrets of his prison-house, his surprise that such proposals should ever have been thought of as were embodied in the original Bill in regard to the building regulations. Therefore, Sir, so far as the substantial part of the Bill was concerned, important concessions have been made. Very little changes had to be proposed in that connection, but as regards the constitutional clauses my friend was inexorable; he would not move an inch; manfully or unmanfully he stuck to his guns—he would not make any concession, except the one to which I have had occasion to refer; and therefore in the discharge of that duty, which is imposed upon us by the mandate of our consciences and the mandate of our constituents, we felt it incumbent upon us to address our amendments chiefly to the constitutional provisions of the Bill. And, Sir, it was the highest duty imposed upon us as the citizens of this great metropolitan town that we should challenge with all the emphasis that we could command these revolutionary provisions in the Bill, the effect of which was to destroy the germs of local self-government in the capital of the Indian Empire. Your Government, Sir, was bent upon committing a grave mistake, and we as loyal citizens felt it our duty to prevent the commission of the mistake. Therefore it was that we directed our unremitting attention to those amendments which affected the constitutional part of the Bill. Our amendments as regards this part of the Bill were for the most part rejected, and our arguments did not produce the least impression. Was that due to the badness of the cause, or was it due to the inaptitude of the advocate? I can at least recall to mind one or two occasions in which it was due to neither of these causes I will take a concrete case. In April, 1898, this Council by a unanimous vote affirmed the principle that there were to be 75 Commissioners on the Corporation, and that two-thirds of the Commissioners were to be elected. In August, 1899, the Council reversed its judgment in this respect. My friend and myself argued, we protested, we entreated, we exhausted all the resources of argument in connection with this matter; but we made no impression. The Council was obdurate and our amendments were rejected. Arguments which held good in 1898 were considered to be bad and useless in 1899. The *personnel* of the Council being practically the same, what then, Sir, had happened in the meantime to bring about this change in the spirit of our dreams? It was the mandate of the Government of India, and here we have the secret of the explanation which accounts for the ruthless massacre of our amendments. Our amendments, based upon reason, were overborne by authority—it was reason pitted against authority—mandate against argument—and reason succumbed—authority prevailed. I think my hon'ble friend the Member in charge of the Bill will bear me out in that statement.

"My friend has been good enough to say that ours is a subordinate Legislature. My friend the Member for the University has recorded a vigorous protest against the application of that expression, so far as it concerns the non-official Members of this Council. While my hon'ble friend says that we are a subordinate Legislature, a far higher authority than my hon'ble friend, the highest authority connected with the Government of India, the Secretary of State himself, from his place in Parliament has declared that the Bengal Council was a self-governing body. We are indeed not a self-governing body. We may protest, we may argue; but we are overborne by

the votes of the official majority. If we were a self-governing body, if we had been left to our own unaided impulses in this matter, to our own unfettered judgment and discretion, I am perfectly certain that the Bill would, so far as regards some of the most important features of the constitutional clauses, have borne a very different aspect altogether, and the community would have been spared the disappointment which they feel owing to the modification of the Bill in accordance with the mandate of the Government of India.

"And here, Sir, if I may do so without disrespect, I may add that the sense of disappointment has been accentuated by the ruling of Your Honour which shut out some amendments bearing upon the constitutional clauses of the Bill, on the ground that they traversed principles which had already been accepted by the Council. I most respectfully ventured to point out at the time that the ruling was altogether new and unprecedented, and that it was unfortunate as being applicable to a case which had excited the keenest controversy. I am bound to say, Sir, from my place as a responsible Member of this Council, that Your Honour's ruling in this connection has intensified public dissatisfaction.

"And here, too, I may advert for a moment to our daily sittings which happily are going to close to-day. Here we have been summoned and we have met from day to day for a period of more than a fortnight, and have sat sometimes from 11 in the morning to 5 o'clock in the afternoon in connection with a matter of the gravest magnitude and importance. Sir, where was the necessity, may I be permitted to ask, for all this worry and hurry? The affairs of Calcutta have been managed in the past without a measure of this kind, and those affairs might have been managed in the future, at any rate for a year or two, without a measure of this kind. I desire to point out that high-pressure legislation is often conducive to inefficient legislation, and that what is done in haste may have to be undone at leisure.

"And, Sir, I cannot help remarking in this connection that the circumstances of the Bill are altogether of a most extraordinary character. The Bill is of portentous size, extending over 650 sections; it was introduced into this Council amid the stifling heat of an April month, when people are more fit to be in bed than attend to public business, and it is being considered amid the dog-days of September, after having been threshed out by a Committee upon which is entailed severer labour than any Committee has ever undergone in connection with any measure of this Council; and now, Sir, it emerges from this Council in a shape and form which makes it, I venture to add, one of the least acceptable measures which this generation has witnessed. My friend has been good enough to tell us that this Bill is a better Bill than the Bill as revised by the Select Committee. I listened with astonishment, bordering upon bewilderment, to a statement such as that. This Bill a better Bill than the one as originally revised by the Select Committee! Why, Sir, if I may be permitted to introduce this Council into a little secret I will say this—that it is the character of this Bill, the determined attitude of Government in regard to it, the hopelessness of obtaining any modification, and the natural desire to be spared the necessity of witnessing the closing scenes connected with the extinction of a cherished institution—it is these circumstances rather than any personal considerations or personal motives which determined the action of the 28 Commissioners who resigned; and I am proud to say that I am one of them. The Bill is distinctly worse, less acceptable, more retrograde and reactionary than the Bill as revised by the Select Committee, and I go a step further and say than the Bill as originally introduced into this Council. I think I shall be able to convince my hon'ble friend in five minutes time that he is hopelessly in the wrong, and that he ought to accept my view of the matter.

"The Bill as revised by the Select Committee restored to the Corporation the power of making some of the superior appointments which the original Bill had withdrawn, and which was obtained through the intercession of my hon'ble friend. It also sought to invest the Corporation with the power of the purse. These two powers remain to the Corporation at the present moment, and possibly my friend will say that therefore the Bill is a distinct improvement upon the Bill as originally introduced. No such thing. These concessions are

nullified by the reduction of the representative element to one-half its numerical strength. The powers which the Corporation now possesses will be powers which will no longer be used by the representatives of the people. Those powers will be used by others than the representatives of the rate-payers, and therefore it must be admitted that the Bill is distinctly worse than the Bill as originally introduced, because that Bill left untouched the numerical strength of the representative element in the Corporation.

"There is, I am afraid, a considerable measure of misapprehension with regard to this Bill in high quarters. The Government of India recommended a closer adaptation of the Bombay system. I venture to submit that there has been no adaptation of the Bombay system in any form or sense. The essence of the Bombay system, as my friend to my right has pointed out, involves the complete separation of the deliberative and the executive bodies. The principal characteristic of our system is a commingling of the two bodies and their functions. This is preserved in the Bill. Thus the chief characteristic and the leading feature of the Bombay system is wanting. Lord George Hamilton seems to be under the impression that he is giving us the Bombay system. In reply to certain observations which were made by Mr. Herbert Roberts from his place in the House of Commons, the Secretary of State said that, inasmuch as the Bombay system had been so successful in Bombay, there was no reason to apprehend a different result when that system came to be applied to the conditions of municipal life in Calcutta. He was under the impression that we are getting the Bombay system. Not at all, Sir. My hon'ble friend the Member in charge of the Bill strenuously resisted every attempt on our part to approximate the Bombay system to the system provided under the Bill. Like Cerberus, guarding the portals of the nether world, my friend has been maintaining jealous watch and ward over the provisions of the Bill, and he would not permit any sacrilegious interference with its substance.

"My friend the Member for the Corporation and myself made certain recommendations, the object of which was to assimilate the system provided in the Bill to the Bombay system. We proposed that the Corporation should elect its President. The Hon'ble Member in charge of the Bill objected, and the Council rejected the motion. We proposed that the General Committee should elect its President. My friend objected; the Council rejected the amendment. My friend would not even permit the Sub-Committees to elect their Presidents, in case the Sub-Committees had the Chairman as a member. He thought if the Chairman was there, he ought to preside, otherwise forsooth his dignity and prestige would be gone! We climbed down. We thought it was impossible to persuade the Hon'ble Member in charge of the Bill to accept these leading features of the Bombay system. So we recommended, again following the lines of the Bombay system, that the Corporation should have the power to appoint Committees to institute inquiries into matters relating to the municipal administration of Calcutta. The Hon'ble Member objected, the Council followed his lead, and our amendment was lost. And then, Sir, the last of our amendments in this respect related to a very small matter, and it was this: that the Corporation should have the power of calling for any papers or extracts of proceedings from the Chairman. My friend again objected, again the Council followed his lead, again we were in hopeless minority. The faithful, the loyal, the devoted six manfully standing by their guns, and the twelve on the other side overwhelming us with the weight of their number.

"The object of the Bill throughout has been the exaltation of the authority of the Chairman and the diminution of the authority of the Corporation. The Hon'ble Member in charge of the Bill went so far as to say that he would not give to the Corporation any power which could with due propriety be vested in any other municipal authority. If that was the feeling which underlay this measure, why enact the farce of a Corporation at all? Why not reduce it to a department of the Government? Far better would it be from the administrative point of view—far more acceptable would it be to public opinion, if the Chairman was made an officer of the Government, responsible to Government for his actions, than that he should be left irresponsible in his present exalted office, presiding over a body retaining only the semblance and not the reality of local self-government. And yet in

the same breath my hon'ble friend—and he has repeated the statement to-day—has told us that the Bill does not involve the extinction of local self-government, but only provides for the re-adjustment of the principles of local self-government. The Bill does not involve the extinction of local self-government! I am surprised at that statement. What does local self-government mean? If these words have any significance, any import, any weight, they mean this: the administration of local affairs by the representatives of the local public. But, Sir, if the representatives of the local public are reduced to a minority—perhaps to a hopeless minority in the governing body of the Corporation—what becomes of local self-government? Local self-government ceases to exist. My friend has been good enough to tell us that there has been a re-adjustment of the principles of local self-government. The Government of India, too, in their despatch observe that there should be adequate representation of the various interests which compose the corporate life and wealth of the city.

"Now, Sir, let us examine this principle with reference to that which constitutes the basal principle of local self-government as laid down by the most illustrious exponent of representative institutions the world has ever seen. John Stuart Mill says—and I again quote from his Essay on Representative Government:—

'As the principal duty of the local bodies consists of the imposition and expenditure of local taxation, the electoral franchise should vest in all who contribute to the local rates to the exclusion of all who do not.'

"Therefore, Sir, according to John Stuart Mill, local representation must follow the lines of local taxation. Those who pay have a right to be represented. Those who do not pay have no right to be represented. Those who pay ought to be represented in the proportion in which they pay. Now let us apply this principle to the question of representation as raised in this Bill. What is the contribution of the local European community to the municipal taxation of the town? The sum total of municipal taxation comes up to about 46 lakhs of rupees. The local mercantile community contribute little more than one lakh or about 2 per cent; and, Sir, if, having regard to the contribution which the mercantile community make to municipal taxation, it could be urged that they were inadequately represented on the Corporation and the governing body of the Corporation, then a substantial ground would exist for the read-justment of the principles of local self-government. But no such case has been made out.

"And, Sir, in this connection I must advert for a moment to the observations which have been made by my friends the representatives of the Chamber of Commerce and the Trades Association. I have listened with very great attention and with the utmost respect to the speech of the Hon'ble Member representing the Chamber of Commerce. His speech when analysed divides itself into two parts. I desire to consider each of these parts. There is, firstly, the financial position taken up by my friend, and, in the next place, the constitutional features of the Corporation as provided in the Bill. My friend has told us that there is the Port Trust, which pay two lakhs of rupees towards municipal taxation. I quite admit that. And, Sir, if that were taken into calculation, would it make any difference—any appreciable difference—in the percentage of municipal taxation as contributed by the mercantile community? I do not think it would. My friend has been good enough to tell us—and the same argument has been repeated time after time by the Members representing the interests of trade and commerce in this Council—that but for European trade and commerce Calcutta would be a mud-bank. I will come to the theory of the mud-bank presently. But, Sir, if we, the people of Calcutta,—I am speaking on behalf of the residents,—are so largely benefited by European trade and commerce, may I be permitted to respectfully ask whether my friends are not benefited almost in equal measure by being in Calcutta and, while there, making their thousands and tens of thousands and then retiring to their homes with their fortunes made? My friend the Hon'ble Mr. Spink shakes his head. Of course I do not know what his experience of the matter may be; but if Calcutta has benefited by the presence of European merchants, the European merchants have also benefited by being associated with us. It is a question of reciprocal obligations—a question of mutual benefit. Therefore,

my friends have no right to put the matter forward in the way they do, as if we were the only parties who were benefited by the presence of European merchants here. Then, Sir, my friend has said there is a large quantity of capital sunk in Calcutta. If there is any capital sunk in Calcutta, how much larger is the quantity of capital outside Calcutta. Where are your mills? Surely not in Calcutta."

The Hon'ble Mr. MACKENZIE said:—"Howrah has a lot of mills."

The Hon'ble Babu SURENDRANATH BANERJEE said:—"Howrah is not Calcutta. We might extend the provisions of the Bill to Howrah, but Howrah is not Calcutta. Therefore, Sir, my friend will admit that he has made a mistake regarding the capital sunk as being in Calcutta.

"I rejoice, however, to find that there is a strong unanimity of opinion to which expression has been given by both my friends, the Member for the Chamber of Commerce and the Member for the Trades Association, to the effect that we must have more money for the improvement of Calcutta, that the limit of taxation imposed upon the humble dwellers of residential houses has reached its maximum, and that therefore, Sir, we have a right to appeal to the Government of India to come to our aid, and if the Government of India is obdurate and stony-hearted in the matter, and will not respond to our appeal, then we would appeal to the Hon'ble Members here representing trade and commerce, and ask them to consent to the imposition of an octroi or some other duty which would make a substantial addition to the municipal funds. Such a contribution from the mercantile community would at any rate have the effect of placing their representation somewhat upon a footing of correspondence with the taxation which they would contribute.

"With reference to the constitutional issues raised by my hon'ble friend, I do not know that it is necessary for me to deal with them at any length. My hon'ble friend representing the Chamber of Commerce seems to be opposed to any sort of appeal. He said, if you give the right of appeal against the orders of the Chairman, that would fritter away his responsibility It is a novel principle which for the first time has been propounded by the Hon'ble Member. There are appeals from the Magistrate of the district to the Commissioner of the Division. Then there are appeals from the Commissioner of the Division to the Board of Revenue or the Lieutenant-Governor. Am I to understand that this right of appeal from one officer to another which continues in an ascending scale is in the smallest degree calculated to minimise that sense of responsibility by which I am perfectly sure every officer of Government is animated?

"One remark of my hon'ble friend I strongly object to. It must have been a slip—it must have escaped him in the hurry of the moment—it could not have been put down in his manuscript as a matter of deliberation or careful thought. He said he was glad that so far as the making of appointments was concerned by the Chairman his power has been raised in respect of salaries from Rs. 200 to Rs. 300 a month, for that would have the effect of avoiding jobbery. I will quote my hon'ble friend in charge of the Bill against the *obiter dictum* of the Hon'ble Member representing the Chamber of Commerce. My hon'ble friend the Member in charge of the Bill with all the weight of his knowledge as regards municipal affairs, and with all the experience which he possesses in regard to the Municipality of Calcutta, was pleased to tell us the other day in the most distinct, clear and emphatic terms that so far as the making of appointments was concerned there was no jobbery, no corruption, no malpractices of any kind; and, Sir, if my friend would only weigh the matter a little carefully he would find that his statement will not stand the test of scrutiny. The Chairman now makes appointments up to Rs. 200 a month. He will make appointments under the present Bill up to Rs. 300 a month. I gave a list of those appointments which he is likely to make. If there is jobbery now, there will be jobbery under the Bill. It would not make any great difference if over and above the appointments which the Chairman now makes he was called upon to make a few more appointments.

"Now, Sir, I would like to advert to the argument of the mud-bank. My friend was pleased to tell us that but for the European merchants and tradesmen Calcutta would be a mud-bank. Sir, I have heard it very often repeated that were it not for European capital and enterprise Calcutta would still be a reeking swamp. I am free to admit that we owe a great deal to European merchants, to the energy, ability and enterprise which characterise the princes of European commerce. But so far as the creation of Calcutta is concerned, is not the Government a substantial factor, and is not the Government of this country—that Government over which Your Honour presides—is it not a Government of Hindus, Muhammadans and Christians—is it not much more the Government of the Hindus and the Muhammadans than it is the Government of European merchants? And, Sir, have not my countrymen contributed to the making of Calcutta? Admitting for argument's sake that Calcutta is what it is owing to the enterprise of European merchants, would not such an assumption irresistibly lead to the conclusion that the Act of 1876 was a mistake, having regard to the law which we are now about to enact? Are my friends, the official Members, here prepared to say that the Act of 1876 was a mistake? Are they prepared to say that the Act of 1888 was also a mistake? Are they prepared to say that Sir Richard Temple and the distinguished men with whom he was associated, and that their successors Sir Stuart Bayley, Sir Henry Harrison, Mr. Herbert Reynolds and Mr. Macaulay—that all these great and distinguished men committed a blunder, and that they aggravated the blunder by extending to the suburbs the municipal system which it is now proposed to uproot both in Calcutta and the suburbs? I am a Hindu, and I am penetrated with a deep instinct of reverence for the past. I cannot approach the past except with feelings of the highest respect. Revolution and revolutionary measures are abhorrent to my nature. If mistakes were committed, and even if it was admitted that a mistake was committed in 1876, I ask is it not too late now to rectify that mistake? Mistakes, too, are consecrated by prescription. But, Sir, I go further and hold that the Act of 1876 was not a mistake, and I am prepared to accept the position which was taken by the Hon'ble Mr. Turner in this Council in connection with this measure. He said, quoting from Lord Ripon's scheme of local self-government, that it was consistent with its principles to reverse any system of local self-government when it failed, owing to the pertinacious neglect or the continued incompetency of those entrusted with its working. Has there been any such neglect, any such incompetency alleged against the Calcutta Corporation? And, if any such allegation has been made, can it be said that it is capable of being proved? My friend, the Hon'ble Member in charge of the Bill, in the course of the observations which he made to-day, was pleased to say that local self-government must now be judged as an institution which is in its youth, and by its results. I am prepared to meet my friend upon his own chosen ground, and I will say this: that if local self government is to be judged by its results, it will be found that it has a claim to perpetuity in the capital of the Indian Empire. Read the proceedings of the Corporation. Read the administration reports of successive Lieutenant Governors. Read the high testimony which they have borne to the efficiency of the Corporation. Look round Calcutta. Look at the sanitary works which have been carried out by the much-maligned elected Commissioners. Calcutta has been reclaimed by them and has been converted by them from a reeking swamp into one of the healthiest cities in the province. Therefore, Sir, I am entitled to hold that, judged by its fruits, local self-government has been a success in Calcutta, and therefore the Act of 1876 and the Act of 1888 were not mistakes, but that you are about to commit a grave blunder by reversing the policy of 1876.

"I do not think, Sir, that I should be justified in detaining the Council much longer. I have only a few words more to say, and I take my stand in opposing this Bill upon the resolution and the orders of the Government of India. The Government of India have declared in their despatch of the 17th June last that there should be no contravention of the broad principles of local self-government. I hold that this Bill is absolutely destructive of the principles of local self-government. Then, again, Lord Ripon in his great scheme of 1882 repeatedly insisted upon the desirability of associating the people of this country in the matter of the management of their local affairs, if

only as a relief to the local officers and as a means of gratifying the legitimate ambition of the people. I will quote only two extracts from the Resolution:—

'The universal complaint in all departments is that of overwork. Under these circumstances it becomes imperatively necessary to look around for some means of relief; and the Governor General in Council has no hesitation in stating his conviction that the only reasonable plan open to the Government is to induce the people themselves to undertake, as far as may be, the management of their own affairs; and to develop or create, if need be, a capacity for self-help in respect of all matters that have not for imperial reasons to be retained in the hands of the representatives of Government.'

"And again—

'The desire of the Government of India therefore is not to force upon all parts of the country a uniform system of its own devising, but to secure the gradual training of the best and most intelligent and most influential men in the community to take an interest and an active part in the management of their local affairs.

'It is one of the inevitable drawbacks of a widespread system of State education that it encourages to an unhealthy extent a desire for employment in the public service, not only as a mode of livelihood, but as a means of obtaining influence and distinction No more effectual remedy for this evil can be provided than by affording to persons of education and talent fair opportunities for devoting their energies to the public service in a non-official capacity.'

"The Government of India under Lord Ripon went so far as to say that they were prepared to sacrifice the ends of administrative efficiency for the higher purposes of popular and political education. All this is now to be reversed. The preponderance of the Hindus is to be cut down; their authority in the Corporation is to be curtailed. What have the Hindus done to merit this treatment at the hands of the Government? Is this the reward of their loyal, faithful and devoted service to the cause of local self-government extending over a period of 25 years! In the crisis of the plague they rendered valuable help, and Your Honour's Government was pleased to acknowledge their services. Is this then to be their reward? After this, what will be their incentive to associate themselves with the Government in public work for the benefit of the country? I venture to submit that the educated Hindus have a claim upon the sympathetic consideration of the Government. Sir, speaking as an educated Hindu, and as a representative of that race, I desire to say that we are the products of English education and English influences. We have been fed upon the strong food of English literature and of English constitutional politics. We are fired with a lofty ambition to serve our country and our Government. Are you going to stifle our ambition in that respect by closing against us one of those institutions which, more than anything else that I can think of, has contributed to the development of the public spirit and the public life of this city? Far different was the policy, far different the traditions consecrated by the illustrious names of those Anglo-Indian statesmen whose genius and philanthropy have founded and consolidated the vast and stupendous fabric of imperial sway. In 1833, Lord Macaulay, speaking from his place in the House of Commons, on the occasion of the enactment of the Charter Act, used language which appears to me to have about it the ring of prophetic inspiration. He said:—

'It may be that the public mind of India may so expand under our system as to outgrow that system; that by good government we may educate our subjects into a capacity for better government; that having become instructed in European knowledge, they may, in some future age, demand European institutions. Whether such a day will ever come I know not. Whenever it comes, it will be the proudest day in English history.'

"Thanks to the beneficent efforts of a succession of distinguished Anglo-Indian statesmen, that day has now arrived; and, Sir, are you going to undo their work and the promises of their work? You will never succeed. You will never be able to roll back the tide of progress which has set in with such irresistible force in this country. The forces of progress will triumph over the forces of reaction. There may be a temporary check—a temporary defeat—a temporary reversal; the flag which we hold aloft may drop from our sinking hands, but others will take it up and lead it to an assured victory. Sir, to me the institution of local self-government in Calcutta has something of personal interest and personal concern. I cannot forget the debt which I owe to the Corporation. That debt will remain graven upon my mind so long as

life endures. All that I possess in the shape of public spirit, in the shape of love of justice, in the shape of a sense of sobriety and of moderation, I owe to the Corporation; and to me it is a matter of the most poignant regret that an institution so full of promise for the benefit of our children should be closed against them, that, not being trained in the civic traditions of a self-governing Corporation, they will be driven to the ranks of irresponsible agitators. The ceremony and the function of to-day possesses for me elements of the saddest character. As I said the other day at a great meeting of my countrymen at the Town Hall, I was associated with the birth of local self-government in this city—I watched it at its cradle—I ministered to its growing wants—I rejoiced at the exuberant vigour of its manhood, and now it is my mournful task to be associated with a function which means the extinction of local self-government in Calcutta. No sadder or more melancholy task was ever assigned to a public man; but these are the vicissitudes of public life. All the same, Sir, most earnestly and most emphatically do I renounce all responsibility in connection with this measure; and I will continue to live in the hope, the trust and the confidence, based upon my unswerving faith in the dispensations of a God of Righteousness—I will live in the hope and the trust that better days are yet in store for my native land, that the wisdom of the past will soon be vindicated, and that the inestimable boon of local self-government will, within a measurable distance of time, be restored to the city of my birth, the home of my sires, the destined home of my children and my children's children, round which cluster my dearest, fondest and tenderest associations."

The Hon'ble MR. BOLTON said:—"It will perhaps be an advantage if the fervid speeches of my hon'ble friends who have last spoken were followed by the few calm remarks with which I desire to conclude my share in the discussion of this important measure. I have not hitherto joined in the debates on the most important controversial questions which have been discussed in the course of these sittings, and I do not propose to take a different course to-day. These matters have been uniformly dealt with with admirable fullness by my friend the Hon'ble Member in charge of the Bill. I have no desire to strike a single note of discord or unpleasantness at the last hour. The stage has been reached at which it is possible to congratulate the Council, the Government, and the public on the termination of the prolonged contest which the Bill has excited. That legislative proposals introducing changes so important in the municipal constitution of the metropolis of the Province should have stirred the educated classes and aroused strong opposition was natural, and was necessarily anticipated. But it may be hoped that the final decision of Council will now be accepted and an end put to fruitless controversy. Whatever the views of the opponents of the Bill in regard to the principles on which the administrative machinery of the Municipality will be reconstituted, it will be generally admitted that many provisions have been introduced which cannot but conduce to the improvement of the administration of the city and the well-being of its inhabitants. I desire to offer my tribute of appreciation to the Members who have represented in this Council the opposition to the Bill. In the fulfilment of the task which they felt called upon to undertake, they have displayed unremitting industry, ability and patience, and, if they have lost, to them remains the satisfaction of having discharged their duty in the fullest degree. Well may they say that it is better to have fought and lost than never to have fought at all. I trust that the men of light and leading in the Indian community of Calcutta will not permit any feeling of disappointment to restrain them from taking in the future as active a share in the work of the Corporation as they have done in the past. It will still be open to them under the new constitution to assist actively and with much influence in the municipal administration, and I venture to add that it is incumbent on them to place their services at the disposal of their countrymen and of the Government."

The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH said:—"Your Honour, I have great pleasure in supporting this Bill. It is a wise, salutary and urgently needed measure. The experience of years has proved how much such an enactment was required. The Bill has been framed after mature deliberation,

and the fullest consideration has been given to the opinions and suggestions of all interested in the matter. I look forward with the firmest hope to witness in my own time the good effects of the new Municipal Act in the town of Calcutta. The Bill is as perfect as anything human can be, and the Calcutta Municipality should soon take its rightful position as the model Municipality.

"There is, however, one matter affecting Muhammadan interests which I feel, as a representative of the Muhammadan community, I should not omit to mention. The Bill, as it stands now, will have the effect of shutting out the Muhammadans to a great extent from election, a fact to which the results of the past election bear ample testimony. As the Bill has for one of its objects to allow due representation on the Municipal Board to such class or community as may be inadequately represented, I would suggest that in the rules to be framed by the Local Government to regulate elections, provisions may be made to secure a fair proportion of Muhammadan representation on the Board and the General Committee. It must be distinctly understood, however, that I do not advocate the increase of the number of Commissioners to be elected. I think we should all of us be deeply grateful to our good Lieutenant-Governor and the Hon'ble Mr. Baker for the enormous trouble they have taken in this matter and for the wonderful patience they have displayed. His Honour's kindness is beyond all praise."

The Hon'ble Mr. Buckley said:—"Sir, during the progress of this Bill both in this Council and in the Select Committee, I have hitherto taken no part whatever in the discussion on the clauses which are commonly described as the constitutional ones. I do not desire to do so now beyond saying this: that to my mind municipal government is not a matter of classes; it is not a matter of races; it is not a matter of creeds; and, above all, it is not a matter of politics. I think municipal goverment is a pure, simple and often a very uninteresting matter of business," and that it matters little how the men who are selected for the work are appointed provided that they are interested in the work and competent to do it. Sir, the Hon'ble Babu Surendranath Banerjee has frequently in this Council argued for the supremacy of a class. Just now he told us that one class paid 40 lakhs, another class paid one lakh of municipal taxes; and, if I follow his argument, he would wish that the representation on the Municipality should be in those proportions. I do not believe in the application of this principle. You cannot regulate all matters in this life by the rule of three. The most powerful Committee in this world—the British Cabinet—is formed on no principles whatever, and I believe has no place, strictly speaking, in the constitution of the country.

"I would wish to refer, Sir, mainly to a few practical matters with which I am far more competent to deal than any questions connected with the constitution. The Hon'ble Mr. Baker in speaking this morning said that this Bill might be divided into two heads—the constitutional part and the practical part. The Hon'ble Babu Surendranath Banerjee, in his eloquent and moving speech, made it a great grievance that the representations of certain bodies had not received even the courtesy of a reply. To my mind those representations did receive the courtesy of the best reply it was possible to give them. They were most fully considered, and, what is more, they did have weight in influencing and changing many of the practical conditions of the Bill. The Hon'ble Babu Jatra Mohan Sen has been good enough to say that in the Select Committee I myself had some influence in making changes which were acceptable to the native community. To a very large extent, Sir, those amendments were the result of a careful and laborious study which I made of all the representations, not only those forwarded by responsible bodies, but those—some of great value—which were made by independent gentlemen who are members of the Corporation, and I do take some little credit to myself that I was able to make some little modification in the building clauses and matters connected with them, which I believe were to the advantage of the native community.

"Sir, I wish rather to look forward than to look back. I would like to see what some of the duties and what some of the functions will be of this new Municipality. I prefer to do this rather than, like my friend the Hon'ble

Mr. Apcar, to lose myself in the mazes of old discussions with reference to some rather unsavoury matters. The first point with reference to these practical matters to which I would refer is the important change which has been made in connection with the water-works of this town. I am rather surprised that no objection has been raised to the change either in the Select Committee or in this Council. The water-works of Calcutta are, I think, the most popular works that the municipality have carried out. At the same time, they are works which are of the greatest value to the people, which are most appreciated by them, and which it would be the greatest mistake to tamper with or alter to their prejudice. Now, Sir, I am firmly convinced that the alteration which will be made by this Bill, in gradually giving a continuous, in place of the present intermittent, supply, will be to the advantage of the people; but I am quite sure also that, just as in the first instance when water-works were established in this town they were opposed by the people, so I am quite certain that these alterations will be opposed when they come to be enforced, that they will be unpopular and that they will be decried. Sir, the Hon'ble Mr. Baker, in consultation with Mr. Hughes and others, has taken the greatest care in all the stipulations contained in the water-works clauses to deal with the change it is proposed to make with the greatest consideration for the people. The works, when they are carried out at a certain cost, will be more sanitary, more economical, in the long run they will save water and make it available for the increased population in the suburbs; they will be more satisfactory to the people, and they will not necessitate inquisitorial visits to their houses. But, Sir, when that system is enforced gradually and step by step, as it is laid down in this Bill that it shall be—it is laid down in the Bill that the alterations are to be enforced within five years in the town and seven years in the suburbs—I say, when these stipulations are enforced step by step, it is absolutely essential, if good results are to be obtained, that the rules which are incorporated in the Bill should be firmly and yet rigidly insisted upon. Hon'ble Members of Council will perhaps hardly follow me, when I say that it is a physical impossibility to enforce the excellent arrangements which are portrayed in this Bill unless in reference to every individual house and in dealing with every individual person the regulations of the Bill are fully carried out. The work of the past has not shown that the Municipality does enforce regulations which are, at first, distasteful. It is essential that the new Municipality should do so or the improvements in the water-supply, contemplated by this Bill, will fail.

"I will now turn, Sir, to the important alterations which will be produced by the sections which deal with buildings. There are five main classes of such alterations. I will not detain the Council in detailing them. The most important are those which deal with the restriction of the area on which any person may build, or, if he re-erects his house, the proportion of the site on which he may re-erect his house. This, Sir, too, will give dissatisfaction; but again I say that it must be firmly enforced if any good to the town is to be obtained.

"One of the next most important points is that which deals with the width of streets. The Corporation will not be able to any large extent in the old town to do, I think, very much good under those regulations; but they will in the suburban part be able to do a great deal of good, and one of the results which will follow from the full execution of all the stipulations of this Bill and other works which are in contemplation will be that a portion of the population of the town will go to the suburbs; and I hope that the new Municipality will look after and will lay out their streets and roads in the suburbs on the principles which are detailed in the Bill.

"The Hon'ble Babu Surendranath Banerjee made some reference to the commercial community and intimated that they were unwilling to contribute their fair share to the expenses of the town. He also said in a former speech that the recommendations of the Building Committee with reference to opening out of the bad parts of this town had not received the consideration of Government, and I think his words were that Government had gone to sleep over them. Sir, I do not think the Hon'ble Member is well informed. I know that

the Government has not gone to sleep on those recommendations, and that the question of opening out large parts of the town is not being neglected. The hon'ble gentleman will remember that one of the proposals made by the Building Commission was the insertion of certain new imposts from which funds would be provided for extensive improvements in the town. He will also remember that one of those imposts was to be one which, if it is imposed, will bear upon the commercial, and only on the commercial, population of this town: that is a jute tax. I do not think, Sir, that he is justified in saying that the commercial population of Calcutta is not willing to bear its share of the burdens that are coming to the town.

"Sir, the arrangements which have to be made with reference to the practical part of the Bill lead me to make one appeal to the new Corporation. We have heard frequently from the Members who have opposed this Bill that everything that goes wrong in the Municipality is the fault of the executive. The cry has been raised over and over again—it is the executive that is in fault! I am not prepared to say that there is not some force in this cry. I think there is: but, Sir, the force, to my mind, tends rather in a direction different to that which is indicated by the Hon'ble Members who have brought forward the charge. The Hon'ble Mr. Apcar went so far as to speak of the executive, who have served the Corporation so long, as a body that the Municipality has been unable to trust in the past; and he twitted me, and as I fully admit he has a right to do, with what perhaps may be my hobby horse with reference to this Municipality, the word 'decentralization.' The Hon'ble Babu Surendranath Banerjee has frequently said, and he said it in his speech to-day, that if you pass this Bill, if you do this, that, and the other, why do not you make the Corporation a department of the Government? Sir, my answer to this is also to a large extent my answer to those who constantly, frequently and persistently attack the executive of the Corporation. What, I ask, would be the very first thing the Government would do if it did make the Corporation a department of the Government? I would take one section of the executive establishment with which I have some personal knowledge, the Engineer's Department. One section of the Engineer's Department deals with buildings; it deals with roads, with drains, and with a thousand other things which affect people. The Government also has a staff in this town which deals with buildings, deals with roads, deals with a few drains, and deals with the water-supply to large hospitals, and so on. I have been to some trouble to compare the establishment in the two cases, and, to put the matter shortly, my comparison results in this: that the Government, roughly speaking, pays just double what this Corporation does to its executive staff for the same volume of work. It has in this town two Executive Engineers with a full staff; the Corporation practically has only got one Executive Engineer with, I think, an inefficient staff. I say, Sir, that if your Government were to take over the management of the town, the very first thing they would do would be to carry out substantially a scheme which has been before the Municipality for years, a scheme of decentralisation, a scheme for appointing four officers of the rank of Executive Engineers in different parts of the town to carry out the duties which are imposed upon them. Sir, we have often heard, from the Members who represent the Corporation, how terrible is the corruption which prevails among the municipal underlings. I do not know how far this extends, but of this I am quite certain: that if they would carry out what I have said, and would place responsible officers, who are above suspicion, in such situations that they can be accessible to complainants who have now to pay these bribes, that they will go a long way indeed in abolishing all that corruption. But, Sir, my main object in referring to this matter is not so much to make any suggestion of detail, but it is this: in this Bill there are new duties laid upon the Corporation, and I am quite certain that they will not be efficiently performed unless not only do they reorganise their own doings and their Committees and their Sub-Committees, which section 88 (*now* 95) allows them to do, but also reorganise, increase and strengthen the executive establishment which they delight to find fault with. That the Bill will do good I have no doubt. That it is perfect I do not maintain; but if the men who can influence this town, and do influence the town, will come forward and will work heartily in view of the responsibility that is placed

upon them, I have no doubt that the Bill must speedily tend to the great advantage of Calcutta."

The Hon'ble MR. BAKER said:—"I do not propose to go over the whole of the debatable ground which has been traversed by so many speakers to-day. I propose only to refer very briefly to two or three points which have been touched upon by the Hon'ble Babu Surendranath Banerjee and one or two other speakers.

"In the first place, Sir, I desire to associate myself with what has fallen from the Hon'ble the Chief Secretary and also from the Hon'ble Mr. Mackenzie in the tribute of admiration which they bestowed on the excellent good temper, patience and courtesy with which the Hon'ble Babu Surendranath Banerjee has conducted his difficult task. That admiration is increased by the really eloquent speech with which he favoured us this afternoon.

"The idea which appears to run through the whole of the arguments and criticisms which have been directed against the Bill is that the Commissioners elected at ward elections are the only representatives of those interests which are entitled to representation, and that they alone are the representatives of the public. The Hon'ble Babu Surendranath Banerjee, in defining local self-government, has said that local self-government means the administration of local affairs by representatives of the local public. With the change of one word I would accept that definition. Instead of 'local public,' I should say 'local interests.' With that change I think the definition is a correct one; but the Hon'ble Member proceeds to misapply it. He assumes that the only representatives of local interests or of the local public are those Commissioners who are elected at ward elections. It is just because the Ward Commissioners do not represent all local interests equally or justly, that we now seek to make this change in the law. We are not seeking to create a new distinction; we are seeking to remove an old one. We are seeking to redress a wrong and an injustice which was not foreseen in the Act of 1876; which was only dimly understood when the Act of 1888 was before the Legislature; but which during the past ten years has become patent for all the world to see. The interests which are represented by commerce and trade are practically excluded from the constitution of the Corporation under the present Act. That is the wrong which we have now set ourselves to redress. The Hon'ble Member said that he would deal with the so-called mud-bank theory, but all that he said was this: he admitted that Calcutta had owed a great deal to European commerce and to European merchants; but, he asked, is not Government also a substantial factor in creating the wealth of Calcutta? Sir, on the 7th August, when I had occasion to deal with this matter, I coupled together the Government and the interests of trade and commerce, and I said that these two great interests taken together had created nine-tenths of the whole value of property in Calcutta. Since then, Sir, my attention has been drawn to a statement that was made by Sir Henry Harrison in 1890. I am quoting from memory, and I cannot therefore be certain of his exact words, but the substance was this: that even if Calcutta remained the seat of the Government of India and the Government of Bengal, yet, if trade and commerce were to be withdrawn from Calcutta, five-sixths of the whole value of property would disappear. Five-sixths of the whole value of the landed property and house property in Calcutta is directly due to the operations of trade and commerce. These interests, if left to the chances of election, would find themselves in a hopeless minority. The European community have from time to time been taunted for abstaining from doing, what is nominally in their power, to serve on the Municipal Board, because they find themselves in a minority. I think, Sir, that those charges come with a very bad grace from gentlemen whose representatives now tell us that the Corporation is about to be closed to the Hindus. In what sense is the Corporation going to be closed? The Hindus if they take advantage of the opportunities which are open to them will have at least one half of the total number of Commissioners on the new Board, and if they continue to discharge their duties with the same vigour, the same knowledge, and I will say with the same ability as in the past, they will exercise, I will not say a dominating, but, at all events, a powerful influence. The

Hon'ble Member said that the agitation against this Bill was not the work of a class; it was common to all classes, high and low; it was common to all newspapers. I will read to the Council a short extract from a paper which has a large circulation in Calcutta—the *Basumati*. The paper is that of the 17th August, and this is what it says:—

'There are many among us who think that the Viceroy's decision has destroyed the principle of local self-government. We do not think so. No one will say that self-government is confined to one, and only one, form. There are various ways, various methods, various forms, of self-government. If the existing system of self-government cannot be changed or modified even with a view to improve our present condition, then it is no self-government which we enjoy; it is subserviency to a *form*, to a barren system. The Bill in question no doubt changes the existing form of self-government; it does not destroy its principle.'

The Hon'ble BABU SURENDRANATH BANERJEE said:—"What the Hon'ble Member has just read is not the opinion of the *Basumati*, but a translation of a speech of the Hon'ble Member himself."

The Hon'ble MR. BAKER said:—"The Hon'ble Member is entirely mistaken. In the first place, I have never said anything resembling these words. And, secondly, the passage is an editorial, and not a report at all. My hon'ble friend Mr. Oldham informs me that the *Bangabasi*, with a much larger circulation, has expressed the same sentiments. This is a translation of what appeared in the *Basumati* on the 17th August. I am certain it is no translation of any speech of mine."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I must point out to the Hon'ble Member that the *Basumati* is one of the strongest opponents of this Bill."

The Hon'ble MR. BAKER said:—"Then they blow hot and cold. Probably they have two editors and more than one policy.

"I will now turn to a remark which was made by the Hon'ble Mr. Apcar. He said the original Bill assumed that there was to be a Hindu preponderance in the Corporation; and he argued, now that you have got rid of the Hindu preponderance, why do you retain the provisions of the original Bill? He was referring to the distribution of powers between the three co-ordinate authorities. Now Sir, if the Hon'ble Member had taken the trouble to compare the original Bill with the Bill as it emerged from the Select Committee, he would have found that there were very material changes; that in very numerous points the Select Committee had transferred powers and duties from the Chairman and the General Committee to the Corporation. And, if he turns to paragraph 12 of the letter from the Government of India, he will find that it was these very changes and that very transferance of power to the Corporation which led the Government of India to suggest the modification in the Corporation itself.

"I will now turn, Sir, to one remark which fell from the Hon'ble Dr. Asutosh Mukhopadhyaya. One of the points to which he took serious objection was the unlimited power of delegation which is conferred by the Bill on the Chairman. I listened to his remarks with surprise. The Council will probably remember the fate of the Hon'ble Member's amendment on that very point. I pointed out in a very few words that the effect of the amendment which the Hon'ble Member moved with a view to restrict the Chairman's power of delegation would be to bring the whole work of the Municipality to a standstill within 24 hours. I pointed out that it would be necessary if this amendment was carried that the Chairman and the Engineer in their own persons, those two officers and no one else, must do the whole work of examining the 20,000 water-connections in the town, the 5,000 connected and the 52,000 unconnected privies. On that the Hon'ble Babu Surendranath Banerjee rose and advised his friend to withdraw the amendment, and that advice was accepted. In the face of that, I think the Hon'ble Member is hardly justified in taking exception to the powers of delegation which the Bill confers, and I will just add that those powers are exactly the same, neither greater nor less, than the powers which the Chairman exercises under the existing Act.

"The Hon'ble Member also took exception to the description which I gave this morning of what I conceived to be the functions of this Council. I was careful in the remarks I made to state that I was expressing my own opinion only and was speaking only for myself. The Hon'ble Member entirely demurred to the restrictions which I considered to exist on the powers of this Council, but he was answered in the most complete and the most surprising manner by the Hon'ble Babu Surendranath Banerjee himself. That Hon'ble member asked, why has the Council, which in April, 1898, accepted the view that there should be 75 Commissioners, why is it that in August, 1899, the same Council reduced that number to 50? He told us that this was done simply under a mandate, because that was the direction of the Government of India, because that was the principle which had commended itself to the Executive Government. That, Sir, is exactly my position. When any principles are accepted and laid down by the Executive Government, it is the duty of the Council to accept those principles, and it has no authority to enter upon any legislation which is in conflict with those principles.

"The Hon'ble Babu Surendranath Banerjee complained of the hurry with which the proceedings connected with this measure have been pushed through. He said we had been sitting daily, sometimes from 11 to 5 o'clock, and he might have added sometimes from 11 to 6 o'clock. I would invite the Hon'ble Member to the proceedings in the Council of His Excellency the Viceroy in connection with a much larger and much more contentious measure than this—a measure which is only 18 months old—I mean the Code of Criminal Procedure. The Report of the Select Committee, if I remember rightly, was published on the 17th February, 1898. The Council adjourned until the 4th March. It was again adjourned without any discussion of the measure until the 11th March. The Council met on the 11th March. It sat and discussed the measure on that day and on the following day, and on the afternoon of the 12th March that Bill was passed. It is an Act which is, I think, even larger in mere bulk than the Bill which is now before us. It is infinitely wider in its operation, for it extends to the whole of India; it affects the procedure in every Criminal Court in this country, and it contained also some new matter of a highly contentious character; it had been under consideration for a long time; it introduced many changes in the law, including changes in connection with the law of sedition. Those were certainly important and contentious in the highest degree, and yet the time that was allowed for consideration of that Bill was only three weeks, and the time occupied in the actual discussion was only 48 hours.

"Lastly, Sir, the Hon'ble Member said that this Bill would be one of the least acceptable ever passed by this Council. I find, Sir, that exactly the same thing was said in 1888, when the Bill which is now Act II of 1888 was being passed; and the very gentlemen who are denouncing the measure which is now before the Council at this moment are the staunchest upholders of the Bill which was denounced in 1888 by their predecessors in the Council."

The Hon'ble the PRESIDENT said:—"I congratulate the Council on the completion of this very heavy task. It has been a heavy task. I can recall no measure of legislation in this country which has entailed such prolonged and minute labour. A strong Committee of the Council was engaged on its details for six months. The Council as a Committee of the whole house has sat for eleven days considering the report of their Select Committee and the 565 amendments which were tabled to improve and alter the Bill as it left the Committee's hands. I have never known a Bill subjected to so close and searching a criticism. The 565 amendments concerned 197 of the 641 sections of the Bill. If the minute scrutiny of the most experienced critics ensures the success of a public measure, assuredly no measure had ever more of that scrutiny than this.

"I should like to express my recognition of the general fairness and courtesy with which the discussion has been conducted The speeches have been for the greater part most interesting, the arguments have been perfectly fair, and we have received a considerable number of excellent practical suggestions, to which the votes of the Council have given their approval. The Hon'ble Mr. Baker has paid a tribute to the Secretary of the Council in which I heartily agree. I must add myself one word of appreciation of the skill and mastery of detail

with which the Hon'ble Member in charge of the Bill bore his important part in these long debates. He was pitted in this arena against the most trained and practised knights of controversy, and he bore himself manfully and well. Thanks to his perfect familiarity with every detail, the Council had the great advantage of a complete statement on both sides of the case on every issue that was raised.

"In the whole course of the discussion the only circumstance on which I look back with regret was one which indeed preceded it. I refer to it with reluctance, but it has been twice dragged into to-day's debate; I mean the simultaneous resignation of twenty-eight of the Municipal Commissioners. I refer to it with regret, because among them were men for whom I entertain a genuine regard and liking, a liking which will be in no whit diminished by our political differences in this matter. We have been honourable opponents in this controversy, and, because we have been so, one laments to see one's adversary put himself at a disadvantage by putting himself grievously in the wrong.

"I pass on to the two simple points in the debate, on which in summing it up I am alone called upon to speak. There have been before this Council two cardinal issues. The first is: why should we change the constitution of the Municipality? The other is: if we change, what form should the change take? The answer to the first issue was given in the long and ample statement with which Mr. Risley introduced this Bill. In the shortest and simplest words, the constitution had not succeeded. On two occasions I have given in Council my personal opinion on this great issue. I have given it with all the courtesy I could command; but I am constrained to repeat that I cannot refuse the evidence of my own eyes and my own experience, that for the better government of Calcutta a material change is imperiously needed. I spoke then, as I speak now, with the utmost courteousness and respect, because of the disappointment and resentment which the statement of this opinion must give to many excellent men. I have given them credit, as I do again for the best of intentions, for an earnestness and assiduity of purpose, which merited better results. But, alas, good intentions do not necessarily lead to good government, and for the capital of India we must ensure a thoroughly efficient conduct of its public affairs.

"Now what was the cause of this failure? It has been explained again and again that the cause was over-centralization, absorption of the executive authority in the hands of the Corporation and of the over-grown Committees, which it amassed on every branch of the administration. I think of all the speeches that have been delivered in this Council the most impressive was one of those of the Hon'ble Mr. Buckley. Several Members of this Council have been members of the Corporation; not one except the Hon'ble Mr. Buckley has been its servant. He was for a time its Engineer, and he told you how impossible it was to get work done. There is no man in this room more calm and dispassionate, no one more sympathetic to the opponents of this measure, and his words came with all the weight of his high character.

"That being the cause, we have to provide its remedy. The Bill leaves to the Corporation the power of the purse, the raising and distribution of the funds, and the decision on all the broad issues of the municipal administration, but it decentralises the executive authority. That is placed in the hands of a limited Committee, and of the Chairman acting under its sanction and control. In this Committee are equally represented the three great interests of the city—the rate-payers, the merchants and the Government. Against this adjustment, there is the one passionate outcry, that it is a destruction of local self-government. Twice I have said that it is not. I have to say it yet once more. True, it terminates one form of it that has not answered, but it substitutes another. No Government in the world could stand which stolidly refused to amend its constitution as experience dictated. In England, the home of self-government, the system and method of self-government have been steadily altered as experience was gained. When the vested interests of the ancient vestrymen were touched, precisely the same outcry was raised which we have heard in this Chamber. But England, with all possible tenderness to the

disappointed vestry-men, went patiently and firmly on. The change was needed, the change was made, and self-government stands on a stronger, because on a more efficient, basis than before.

"So it will be here. Eloquent declamations of a retrograde Government will doubtless continue, but, as time goes on, the sound sense of the community will prevail. The people will recognize the advantage and convenience of a more prompt and efficient administration, and the very men, whose earnestness of purpose has been the bright particular star in all this stormy quarrel, will come to see that under the new system they will have gained a new authority and a real power to achieve good for their fellow-citizens, which was constantly hampered and thwarted under the system which ends.

"Before I close I should like to say one word, if I may intrude so small a matter, about my personal share in this controversy. I trust that I may claim to have been throughout my service a friend of India and of the Indians. That is no credit. It is certainly no boast. It is the simple duty of every Englishman in India. But to me it has been a quadrupled duty. Four generations of my name have eaten the salt of India, and I am the last. On me it was incumbent to do all that in me lay to help and forward the people of this generous country. The sands of my official life are fast running out. Is it possible, is it conceivable that, except under the cogency of a plain and clear necessity, I should set my hand to a measure which I know must hurt and wound those whom I seek to serve? I have been told—not in this Council, for my colleagues know me too well—but I have been told in the plainest terms that I shall be excommunicated for my part in this matter. I venture to hope not, but were it so I should still unfalteringly do my duty. I stood once at the bed-side of a famous Indian officer. A surgeon performed an operation which saved his life, but in the moment of his agony he anathematized the surgeon as inhuman. Even out of evil, perhaps always out of evil, cometh good, and out of all this pain and wrangle there will emerge a new order, and with it a new prosperity to this great city."

The motion being put, the Council divided as follows:—

Ayes 12.

The Hon'ble Mr. Buckley.
The Hon'ble Mr. Buckland.
The Hon'ble Mr. Handley.
The Hon'ble Rai Durga Gati Banerjea, Bahadur.
The Hon'ble Mr. Mackenzie.
The Hon'ble Mr. Spink.
The Hon'ble Sahibzada Mahomed Bakhtyar Shah.
The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
The Hon'ble Mr. Oldham.
The Hon'ble Mr. Baker.
The Hon'ble Mr. Bolton.
The Hon'ble Mr. Slack.

Noes. 6.

The Hon'ble Raja Ranajit Sinha, Bahadur, of Nashipur.
The Hon'ble Babu Jatra Mohan Sen.
The Hon'ble Babu Boikanta Nath Sen.
The Hon'ble Babu Surendranath Banerjee.
The Hon'ble Mr. Apcar.
The Hon'ble Dr. Asutosh Mukhopadhyaya.

So the motion was carried.

The Council was then adjourned *sine die*.

CALCUTTA;
The 16th January, 1900.

F. G. WIGLEY,
Asst. Secy. to the Govt. of Bengal, Legislative Dept.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met in the Council Chamber on Wednesday, the 20th December, 1899.

Present:

The Hon'ble SIR JOHN WOODBURN, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
The Hon'ble MR. W. B. OLDHAM, C.I.E.
The Hon'ble MR. R. B. BUCKLEY.
The Hon'ble MR. C. W. BOLTON, C.S.I.
The Hon'ble MR. E. N. BAKER.
The Hon'ble RAI DURGA GATI BANERJEA, BAHADUR, C.I.E.
The Hon'ble MR. C. E. BUCKLAND, C.I.E.
The Hon'ble MR. F. A. SLACK.
The Hon'ble KHAN BAHADUR MAULVI DELAWAR HOSAIN AHMED.
The Hon'ble MR. J. PRATT.
The Hon'ble BABU JATRA MOHAN SEN.
The Hon'ble MR. T. W. SPINK.
The Hon'ble RAJA SHASHI SHAKHARESWAR ROY BAHADUR, OF TAHIRPUR.
The Hon'ble RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR.
The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH, C.I.E.
The Hon'ble MR. D. F. MACKENZIE.
The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, M A., D.L., F.R.A.S., F.R.S.E.
The Hon'ble BABU BOIKANTA NATH SEN.
The Hon'ble BABU SURENDRANATH BANERJEE.

NEW MEMBER.

The Hon'ble MR. PRATT took his seat in Council.

STATEMENT BY THE PRESIDENT.

The Hon'ble THE PRESIDENT said:—"Gentlemen of the Council, I am sorry that I have been compelled to ask your attendance after so short a recess. Many of you were present at the Durbar of Saturday last, and I then explained the reason for the assembly of the Council. The main business before you will be a Bill enlarging the Municipal Act in regard to Darjeeling. As I said on Saturday, time is in this matter of unusual importance; for, if anything is to be done to prevent further damage to life and property in that Municipality, the necessary works must be pushed forward as far as possible before next rains. The provisions of the Bill will be explained to you presently by the Hon'ble Member in charge of it, and I will not myself intrude upon his province.

"The Council will reasonably expect from me some statement in regard to the revised regulations for the Council which have been recently published in the Gazette of India. The question of the revision of the rules of 1893 was raised last year by the British Indian Association, who represented that the privilege of recommending a Member should be extended to the landholders, and a report was submitted to the Government of India, by whom the opinion of this Government was also desired, as to whether five years' experience of the working of the regulations suggested any alteration of them. The regulations of the Bombay Council provide for the recommendation of a Member by the Sirdars of the Dekkhan or such other class of landholders as might from time to time be prescribed; as also of a representative of the landholders of Sind; and in the North-West Provinces any association or associations of landholders may also be invited to recommend to seats in the local Council. In Bengal, on the other hand, the regulations gave no right of recommendation to the landholders; the corresponding provision being that ordinarily one of the seats to which the Lieutenant-Governor nominates at his discretion should be held by a representative of the great landholders of the province. The desire of the zamindars to be accorded the privilege of themselves recommending a Member appeared, therefore, reasonable, and it remained to consider in what way the request conveyed by the British Indian Association could be met without affecting the directly representative element in the Council. Of the seven seats reserved for recommendation by public bodies and Associations, the Corporation of Calcutta, the Senate of the Calcutta University and the Chamber of Commerce as a commercial Association have each been assigned one, and from none of them could the privilege of recommendation have been possibly withdrawn. It was necessary, therefore, to find a seat for the landholders from the remaining four seats allotted to the District Boards and to the Municipal Corporations other than Calcutta. These seats represent the interests of the population of the districts, and special representation of the landholders fulfils the same condition. The transfer of one of them to the landholders does not, therefore, detract from the representation of those interests. In considering whether the seat should be taken from the Municipal Corporations or the District Boards, this Government was influenced by the fact that the District Boards represent an overwhelming majority of the population, while the Municipal Boards represent the special interests of a total urban population of less than three millions. Municipal interests are, moreover, also represented in the Council by the Member for the Calcutta Corporation. The transfer of one seat from the municipal bodies to the landholders was, therefore, recommended, and the change has been embodied in the new regulations. The Lieutenant-Governor will retain his right of nominating to three seats. I think my predecessors were right in the opinion that this number is necessary for the proper representation of communities that might not otherwise obtain representation at all, or for the fuller representation of the interests specially affected by measures brought before the Council. No change can ever be made without disappointment to some, but an

impartial opinion will not, I think, hesitate in agreeing that the great associations of the landholders of Bengal are entitled to a direct and permanent representation in the Council. The municipal bodies there is no reason for disturbing in their representation at present, and the assurance which I gave to the municipalities of the Dacca Division will be fulfilled.

QUESTIONS AND ANSWERS.

Lady Students in the Presidency, Bethune, Ravenshaw and Government Arts Colleges.

The Hon'ble Dr. Asutosh Mukhopadhyaya asked—

I. Has the attention of the Government been called to the fact that young ladies are now admitted to the different classes of the Presidency College as students, and that they are allowed seats in the same class rooms with young men, while lectures are delivered?

II. Will the Government be pleased to enquire and state whether young men and ladies reading for Degree Examinations in Arts, at either Oxford or Cambridge, are in any, and if any what, College admitted as members and taught in the same class rooms?

III. Will the Government be pleased to lay on the table copies of the following papers:—

(1) A despatch from the Court of Directors of the East India Company to the Governor General of India in Council (No. 49, dated 19th July, 1854).

(2) Letter No. 29, dated 5th May, 1854, from the Government of India to the Court of Directors, relating to the establishment of a Presidency College at Calcutta.

(3) Despatch from the Court of Directors to the Government of India (No. 62, dated 13th September, 1854).

(4) Despatch from the Secretary of State for India to the Government of India (No. 4, dated 7th April, 1859).

IV. Will the Government be pleased to state whether it is not quite clear from the documents mentioned above, specially from paragraphs 57, 83 and 90 of the Despatch of 1854, and from paragraphs 25, 26, 27, 28, 29, 30 and 47 of the Despatch of 1859, that it was contemplated that there should be separate institutions for the education of males and females?

V. Will the Government be pleased to enquire and state whether any, and if any what, special arrangements and precautions have been found necessary for the proper protection of the lady students admitted to the Presidency College?

VI. Will the Government be pleased to enquire and state if it has been found necessary to punish a student for ungentlemanly conduct towards any of the lady students?

VII. Will the Government be pleased to enquire and state whether it is true that scandalous scribblings have recently been found on the walls of the Presidency College, referring to some of the lady students, and that no detection of the offender has been found possible?

VIII. Will the Government be pleased to enquire and state the respective dates on which the first lady student passed the Entrance, F.A. and B.A. Examinations of the Calcutta University: also the number of the lady students who have passed the F.A. and B.A. Examinations since these dates, and also how many of these passed as private students and how many as students of an affiliated institution other than the Presidency College?

IX. Will the Government be pleased to state whether in recent years any, and if any what, exceptional circumstances have happened to render it necessary that the Presidency College should be thrown open to lady students?

X. Will the Government be pleased to state whether the Bethune College is furnished with an adequate staff for the education of female students up to the F.A. and B.A. Standards, whether it is efficiently managed, and whether the results have been found satisfactory?

XI. Will the Government be pleased to enquire and state whether within the last five years any applications have been made by lady students for

admission into the Ravenshaw College, Cuttack, and what orders, if any, have been passed upon each of such applications?

XII. Will the Government be pleased to state—

(i) whether it is desirable, and

(ii) whether the Government intends,

to allow lady students to continue to obtain admission into Government Arts Colleges and to be taught in the same class rooms with young men?

The Hon'ble Mr. Slack replied to the above questions as follows:—

"I. Yes."

"II. Young ladies reading for the Degree Examination in Arts both at Oxford and Cambridge are not admitted as members to any of the Colleges to which men belong, but are admitted to the College lectures given to the undergraduates. Instances of such Colleges are Exeter, Balliol, Queen's, Corpus Christi, Wadham."

"III. These are put on the table."

"IV. Assuming that the higher education of women was considered in 1854, when the documents referred to by the Hon'ble Member were drawn up, there is nothing in such documents to show that the Presidency College was intended exclusively for males, nor is there anything to show that in 1854 Government contemplated that no female should be educated save in a school specially set apart for females to the exclusion of males.

"The answer, therefore, to the Hon'ble Member's question is in the negative."

"V. A separate waiting-room has been provided for the lady students, and they have separate accommodation in the lecture-room."

"VI. Government has been informed that in two cases students were punished for ungentlemanly conduct towards lady students. The offences in both cases were trivial."

"VII. It is the case that such scribblings were found on the walls of two of the rooms in the College, and that the offenders were not detected."

"VIII. Statements giving the information asked for have been supplied to the Hon'ble Member.

* Including two Presidency College students, who are the only lady students who have ever passed from the Presidency College.

No lady students have ever passed the B.A. from the Presidency College.

"IX. There is nothing to show that the Presidency College was reserved entirely for male students."

"X. The answer to the first part of the question is that provision has not been made at the Bethune College for teaching all the courses. It was, at the instance of the Secretary of the Bethune College Committee, that the female candidates who are reading in the Presidency College were admitted there instead of at the Bethune College, so that they might take up Physics and Chemistry instead of Botany."

"XI. Yes; and at present a lady student is studying in the M.A. class.

"XII. In the opinion of Government it is desirable that female students, who desire it, should be allowed equal facilities with male students for education. It is impossible to provide separate instruction of the calibre of that of the Presidency College to the small number of lady students who at present come forward. If then Government can be sure that there is a genuine desire by female students, under the approval of their guardians, to enter the highest courses of college education, and if it is certain that proper discipline can be maintained, the admission of female students to institutions ordinarily reserved for the education of males appears to be justified. The experiment accordingly was made in 1897, and, according to the information at the disposal of Government, with so much success as to give no present grounds for interfering with it."

EXPENDITURE ON WATER-SUPPLY IN THE MUFASSAL.

The Hon'ble RAJA RANAJIT SINHA, BAHADUR, of Nashipur, asked—

Having regard to the fact that all the District Boards of Bengal have not spent even the minimum of Rs. 5,000 out of their income every year for the improvement of water-supply in the mufassal as directed by the Government in their Resolution on the working of District Boards during 1894-95, will the Government be pleased to direct the District Boards to carry out the orders of the Government strictly, and to give particular attention to the subject, especially in those parts of the districts where malarial fever and cholera generally rage?

The Hon'ble MR. BAKER replied:—

"On the 15th April, 1899, I informed the Council of the orders issued by Government on the subject of improving the water-supply of the mufassal; and on the 5th August I supplemented this by laying on the table a statement showing the expenditure incurred by the District Boards and Municipalities of every division on water-supply during the past five years. This matter receives the constant attention of Government and is regularly noticed in the annual review of the working of District Boards and Municipalities. The Lieutenant-Governor is in entire sympathy with the desire of the Hon'ble Member that a pure supply of water should be provided throughout the country; but it is evident that in such a matter progress must be methodical and gradual."

PLAGUE IN CALCUTTA.

The Hon'ble RAJA RANAJIT SINHA, BAHADUR, of Nashipur, asked—

Having regard to the fact that in the published vital statistics for Calcutta there appears almost an uniform number of deaths and seizures from plague, and to the fact that many people do not believe these cases to be plague, will the Government be pleased to appoint a Committee of expert medical men to report if the cases now occurring, and reported to be plague cases, are cases of real bubonic plague?

The Hon'ble MR. BAKER replied:—

"A few weeks ago the Lieutenant-Governor arranged to depute two specially selected Assistant Surgeons for a time to test the correctness of the reports of plague cases in Calcutta. The enquiry is not yet complete, but so far it goes to show unfortunately that cases of genuine plague unquestionably do exist in the town."

THE ZAMINDARI DAK CESS.

The Hon'ble RAJA RANAJIT SINHA, BAHADUR, of Nashipur, asked:—

Will the Government be pleased to lay on the table a statement showing the receipts on account of the zamindari dâk cess for each district in Bengal for the last ten years, and the expenditure incurred during that period on account of the establishment kept up in each under the provisions of Act VIII of 1862?

The Hon'ble MR. SLACK replied:—

"The Statement is laid on the table."

THE LOOP LINE.

The Hon'ble RAJA RANAJIT SINHA, BAHADUR, of Nashipur, asked:—

Has the attention of the Government been drawn to the inconveniences felt by the people for want of convenient up and down trains by the

loop line from and to Calcutta, the centre of traffic and commerce, just as passengers can avail themselves of by the chord line? Will the Government be pleased to direct the Railway authorities to make the necessary alteration in the railway timing to suit loop passengers, and thereby remove their grievances?

The Hon'ble MR. BUCKLEY replied:—

"The answer to the first part of the question is, Yes.

"The answer to the second part of the question is, during 1898 the inconvenience was represented to Government. The East Indian Railway authorities were addressed on the subject, with the result that the timing of two trains, No. 13 Up and No. 14 Down, was altered to connect with the Bombay Mail. This alteration was acknowledged by the Commissioner of the Bhagalpur Division as a great boon to the travelling public. Since then no further complaint has been made to Government."

DARJEELING MUNICIPAL BILL.

The Hon'ble MR. BAKER moved for leave to introduce a Bill to amend the Bengal Municipal Act, 1884, in its application to Darjeeling. He said:—

"It will not be necessary for me to take up very much of the Council's time in explaining the necessity for the legislation or the general nature of the amendments which we propose to make in the law.

"The necessity for supplementing the powers of the municipal authorities in Darjeeling by enacting a measure drawn with special reference to the peculiar needs of that station has been thrown into acute relief by the disastrous cyclone of September last.

"The rainfall last season in Darjeeling was unusually heavy, being 17 inches above the average on the 24th September. During the 24 hours ending at 8 A.M. on the 24th September 5½ inches fell, followed by 19 inches before 4 A.M. of the following morning. Of this amount, more than 14 inches fell between 4 P.M. of the 24th and 4 A.M. of the 25th, making an average of more than an inch an hour for twelve hours continously. This unprecedented fall, following on an already excessive seasonal rainfall, resulted in numerous and disastrous landslips throughout almost every part of Darjeeling, causing the loss of 72 lives, and extensive destruction of roads, houses and other property.

"Early in October, the Government appointed a Committee, consisting of Engineers and residents of Darjeeling, under the presidency of Mr. Joscelyne, Chief Engineer, to inspect and report on the condition of buildings, roads and drains in Darjeeling, and to submit recommendations for such protective measures as they might think necessary.

"The Committee made a very thorough and searching investigation. They visited every part of Darjeeling, examined the condition of almost every building, road or drain which had suffered material damage, and, with the assistance of the owners of the property, endeavoured to determine the causes of the injury in each case. They received very valuable assistance from Mr. T. H. Holland, of the Geological Survey Department, whose services were specially lent by the Government of India. Their Report, which was published in the Calcutta Gazette a few weeks ago, clearly traces the causes which led to the loss of life and property, and indicates the measures which are required in order to ensure safety in the future.

"The Committee have shown that the direct and immediate cause of the landslips was the excessive rainfall concentrated into a very short space of time. But they also show that there were a number of contributory causes, all of human agency, which facilitated the occurrence of the slips, and greatly increased the damage done by them. The chief of these may be summarized as follows:—

(1) Defective drainage of building-sites.

(2) Excessive lead of road drains.

(3) Imperfect or badly constructed revetments.

(4) Neglect to reduce or protect steep slopes.

(5) Under-cutting of steep slopes for the formation of paths, roads and out-houses.

(6) Quarrying and removing of stones from *jhoras* and hillsides.

(7) Defective supervision of building-sites, including sites of huts.

(8) Absence of power to regulate quarrying, or to deal with natural water-channels, outside municipal limits.

(9) Insufficient turfing, and omission to plant suitable trees.

(10) Construction of gardens and flower-beds in unsuitable places.

(11) Formation of catte-runs by indiscriminate grazing of cattle on hillsides.

"If all of these matters can be properly attended to, the occurrence of landslips in the future will be rendered less probable; and, if they do unfortunately occur, the destruction of life and property caused by them will be reduced to a minimum.

"The object of the Bill which I ask permission to introduce is to take legal power to deal effectively with these matters.

"The present municipal law in force in Darjeeling is Bengal Act III of 1884, amended by various Acts of 1886, 1894 and 1896. This measure was framed with reference to the requirements of municipalities in the plains of Bengal. With the exception of two sections, 232 and 350A, it contains, so far as I am aware, no provision for the special needs of a town situated in the hills, where the rainfall is enormous, and which is constantly exposed to danger from landslips. It is entirely silent as to such matters as revetments, retaining walls, the turfing of banks, and the sloping of hillsides to the proper angle of safety. As regards drainage, it treats the subject wholly as a measure of sanitation, and takes no account of the aspect which is so important in the hills, *viz.*, the view of it as a means whereby large masses of rain-water can be passed away safely without injury to the hillside. It confers no power to close permanently any public road notwithstanding that it may have become a source of danger to property situated above or below it. It gives no power of control over private roads or bridges, and very little power over drains on private property, although in the hills these may be such as to seriously threaten the safety of the public As regards the Building Regulations, these are imperfect even as applied to towns in the plains; but, as applied to a town situated on a steep mountain side, they are almost useless. No one could have walked round Darjeeling in the month following the cyclone, no one can study the Report of Mr. Joscelyne's Committee, without being convinced that much of the lamentable loss of life, especially among servants and the residents of huts and bustees, was directly due to want of control over buildings and sites. In a hill town nothing is more essential than the power to refuse permission to build on an unsuitable site. This power is wholly wanting in the present Act. In Appendix IV of the Report it is pointed out that 'power is required to absolutely prohibit building on a proposed site, and to absolutely prohibit the re-erection, rebuilding, any alteration or repair of or addition to a building on a site already used' without payment of compensation; and under the present law no such power exists.

"The Bill which it is proposed to introduce has been framed to make good all these defects. It follows generally the recommendations made by the Committee in their Report and in Appendix IV, and it has been drafted in consultation with Messrs. Earle, Upton and Gardiner, who were members of the Committee, and who formed the Sub-Committee which drew up Appendix IV. This Appendix, which contains most of the specific proposals for amendment of the Act, was considered at a meeting of the chief house and land owners of Darjeeling convened for the purpose, and was approved by them subject to certain minor modifications which have been accepted by Government.

"It may be as well to give a brief account of the leading provisions of the Bill. The first point to which I need allude is one to which my attention has been drawn by an Hon'ble Member this morning. The Hon'ble Member had seen a copy of the Bill which had been placed on Members' tables, and was struck with the second section, which gives power to the Local Government, on the recommendation of the Commissioners, to extend the provisions of the Act to any area adjacent to Darjeeling; and the Hon'ble Member expressed some

apprehension as to the particular object of this provision. The explanation of this section would come more appropriately at a later stage of the Bill, but I may now say briefly that the object is to enable the Municipal Commissioners to prevent improper building operations, improper excavations and improper dealings with water-courses and hill streams in the immediate vicinity of Darjeeling or underneath the limits of the Municipality. In the valleys on both sides of the town there run two mountain streams, one of which is called the Rungneet, and the name of the other I forget. These streams, if left to themselves, are liable to cut away their banks, and by so doing the vertical supports of the hillsides within the limits of the Municipality itself have been removed. It is in order that proper protective works may be constructed along the banks of these streams, and in order that people who own property on the lower slopes of the hillsides may be prevented from making improper excavations, that the provision to which the Hon'ble Member has referred has been considered necessary. The operations to which I have referred have become a source of danger to life and property.

"Turning to the general provisions of the Bill, I may say, firstly, that, as regards roads and bridges, power is taken to close a public road which endangers a hillside, or which can no longer be maintained except at unreasonable expense. Another section confers powers of inspection and control over private roads, drains and bridges. By another section the construction, reconstruction and alteration of private roads and bridges is made subject to the sanction of the Commissioners. Other sections of great importance give power to enforce the alteration or protection of any private road or bridge which threatens the stability or security of any hillside or bank or any immovable property thereon; and, in extreme cases, to close such a road altogether, unless it forms the only approach to a house.

"The provisions as regards drains are generally similar to those regarding roads. The previous sanction of the Commissioners is to be required to the construction, reconstruction or closing of any private drain. They will have power to enforce the regrading or reconstruction of any private drain which is imperfect or dangerous to other property. And they will also possess the very valuable power of carrying out combined works of drainage for buildings or lands belonging to different owners, and apportioning the cost among them.

"As regards buildings, we have followed the general lines of the new Calcutta Act, but have considerably simplified them, and adapted them to the special circumstances of Darjeeling. We provide that before the construction of any building is undertaken an application for approval of the site, and for permission to undertake the work, with full particulars, must be submitted: and, differing from the Calcutta Act, we make no provision to the effect that, if permission has neither been given nor refused within a fixed time, it shall be deemed to have been given. Such a provision may be reasonable in the plains to protect the rights of private owners. But in the hills the danger resulting from improper building is so great that private rights must give way. The grounds on which permission may be refused have been extended so as to include insecurity of the site or danger to the hillside. Provision is made for inspection of the work, and for enforcing compliance with the conditions on which sanction was accorded, and for stoppage, and if necessary demolition, of unauthorised works under the orders of a Magistrate. Power is also taken to prohibit the occupation of unsafe or insanitary buildings and for the forcible removal of persons occupying them, and for the abatement of overcrowding.

"By another group of sections power is taken to enforce the construction of revetment walls, the turfing of banks, and the sloping of hillsides to the proper angle of safety, where these measures are necessary to secure the safety of life or property. We have also amplified the power of making byelaws so as to comprise several matters which are of special importance in a hill station.

"An important group of sections relates to the subject of appeals. As I have explained, the Commissioners will have power to call upon private owners to carry out protective works of various kinds, either singly or in combination, and in the latter case to apportion the cost among them. It is not proposed to allow these orders to be questioned in the Civil Courts, which are

not well adapted to determine difficult questions of engineering with the requisite promptness and certainty. We have, therefore, proposed to make independent provision for appeals of two kinds—firstly, in all cases in which orders are passed by the Commissioners in matters involving professional engineering knowledge, such as where an order is given to dismantle an insecure building, or to construct a drain or a revetment, or where permission to use a site or construct a building is refused, an appeal will be allowed to an Engineer of higher rank than Executive Engineer, to be appointed by Government in that behalf. Secondly, in cases where the apportionment of expenses is involved, an appeal will lie to the Commissioner of the Division, aided by two assessors, who will be selected from a special list kept for the purpose and who will ordinarily be house or land owners of the town. This arrangement is in accordance with the recommendations made by the meeting of land and house owners to which I have already referred

"There remains only a small group of secions, the operation of which is to be temporary, empowering Government to exercise certain of the powers of the Municipality under the Bill in respect of roads, drains and buildings. This was proposed by the Committee, and was approved by the meeting of house and land owners to which reference has been made; and an application of similar character has also been made to Government by the Municipality. Government will bear the charges on account of the roads, drains, &c., so long as they remain under its control; but, as soon as they go back to the Municipality, the latter will have to meet them as hitherto.

"Lastly, Sir, I have to represent that this measure is a matter of urgency. In Darjeeling the working season for roads and buildings is in the cold weather and spring. That season has now begun, and works of repair and protection are already in progress throughout the station. It is essential that before the next rainy reason arrives the damage done by the landslips shall be made good as far as possible, and it is desirable that no time should be lost in obtaining the fuller powers of supervision and control for which the Bill provides."

The motion was put and agreed to.

The Hon'ble Mr. Baker applied to the President to suspend the Rules of Business for the purpose of introducing the Bill.

The Hon'ble the President having declared the rules suspended,

The Hon'ble Mr. Baker introduced the Bill and moved that it be read in Council.

The motion was put and agreed to, and the Bill was read accordingly.

AMENDMENT OF BENGAL ACT I OF 1869 (*Cruelty to Animals*).

The Hon'ble Mr. Slack moved for leave to introduce a Bill to amend Bengal Act I of 1869 (*an Act for the prevention of cruelty to animals*). He said:— "This is a very small measure, but as the Bill is not at present before Hon'ble Members I do not propose to explain now the details of the measure beyond stating that it attempts to render the existing Act more effective, and also to ensure proper treatment for suffering animals."

The motion was put and agreed to.

The Council was then adjourned to Saturday, the 6th January, 1900.

NOMINATION OF A REPRESENTATIVE MEMBER OF THE MUNICIPALITIES OF THE DACCA DIVISION TO A SEAT IN THE COUNCIL OF THE LIEUTENANT-GOVERNOR OF BENGAL.

No. 533A.

APPOINTMENT.

RESOLUTION.

Dated the 25th January 1900.

THE term of office of the Hon'ble Babu Jatra Mohan Sen, who was appointed as a member of the Bengal Legislative Council on the recommendation of the Municipalities of the Chittagong Division, will expire on the 7th March 1900. As the revised Regulations for the Council do not come into force until the 1st June next, this vacancy will be filled on the recommendation of a group of Municipalities.

In the rotation sketched in paragraph 5 of the Resolution of this Government, dated the 25th March 1893, the Municipalities of the Dacca and Bhagalpur Divisions were shown as two of the recommending bodies for the vacancies occurring in the Council in 1899. It was, however, stated in the Resolution that the Lieutenant-Governor could not bind himself or his successors as to the

exact order in which the privilege of recommending members for the Council should be exercised. Sir John Woodburn considered it desirable to make a variation in the order, and invited the Municipalities of the Presidency, instead of those of the Dacca Division, to submit a recommendation for the vacancy which occurred on the 18th July 1899, on the expiry of the term of office of the member who had been elected by the Municipalities of the Patna Division in 1897. The Lieutenant-Governor is now pleased to ask the Municipalities of the Dacca Division to recommend a person for nomination to the Council to fill the seat to be vacated by the Hon'ble Babu Jatra Mohan Sen. Only those Municipalities which enjoy a clear income from municipal resources proper of Rs. 5,000 and over shall exercise the right of voting for the selection of a candidate for nomination to the Council. The voting power of each Municipality will be calculated on the basis of its ordinary income, according to the following scale:—

		Rs.		Rs.		Votes.
Municipalities with an income of		5,000	and less than	10,000	...	1
Ditto	ditto	10,000	ditto	20,000	...	2
Ditto	ditto	20,000	ditto	50,000	...	3
Ditto	ditto	50,000	ditto	1,00,000	...	4
Ditto	ditto	1,00,000	ditto	1,50,000	...	5
Ditto	ditto	1,50,000	and over	......	...	6

2. The following are the Municipalities of the Dacca Division which will thus be entitled to exercise votes on the present occasion. The number of votes assigned according to the above scale is noted against each. The ordinary income taken is that for 1898-99:—

District.	Name of Municipality.		Ordinary income.	Number of votes to be recorded by the representative.
			Rs.	
Dacca ...	Dacca	...	1,18,831	5
	Narayanganj	...	41,260	3
Mymensingh ...	Nasirabad	...	14,211	2
	Jamalpur	...	5,927	1
	Sherpur	...	5,278	1
	Tangail	...	7,679	1
Faridpur ...	Faridpur	...	6,785	1
	Madaripur	...	6,678	1
Backergunge ...	Barisal	...	17,369	2

3. Under Rule IV of the Regulations framed by the Governor-General in Council with the sanction of the Secretary of State, under section 1 (4) of the Indian Councils Act, 1892, for Bengal, the Lieutenant-Governor now desires that intimation may be at once communicated by the Commissioner of the Dacca Division to the Chairmen of the Municipalities enumerated in the above list, requesting them to convene a special meeting at which a member of the Municipality may be selected as its representative for the purpose of making the recommendation for the seat in Council. The representative so selected will exercise all the votes assigned to the body which he represents, and his name must be reported at once by the Chairman for the information of the Commissioner of the Division.

4. The period of two months laid down in Rule VII of the Regulations as that within which a recommendation shall be made to the Lieutenant-Governor, will run from the date on which the Commissioner of the Division issues his request to the Chairman of the Municipality.

5. As soon as the representatives are selected, they will be called upon by the Commissioner of the Division to meet together on an early and convenient date, with special reference to the limit of time imposed under Rule VII of the Regulations, and at such convenient place as he may specify, for the purpose of electing by a majority of votes a person whom they will recommend to the Lieutenant-Governor to be nominated as a member of the Council. The names of all candidates put forward at such meeting shall be duly proposed by one of the representatives present. The election shall be by ballot, and the person elected must obtain a majority of the votes of the representatives present. If on the occasion of the first ballot an absolute majority is not obtained, the

candidate who obtains the least number of votes shall be withdrawn from the election, and another ballot shall then be held for the remaining candidates, and so on, until an absolute majority is obtained. In the event of a tie occurring at any stage, candidates shall draw lots.

The electoral representatives present at this meeting shall elect among themselves a Chairman, who shall preside and be responsible for the fair and proper exercise of the ballot vote.

The Chairman of the meeting shall without delay report to the Commissioner of the Division the name of the person elected, with the number of votes obtained, and any other information which it may appear desirable to communicate, and on behalf of the meeting shall recommend to the Lieutenant-Governor to nominate for the Council the person so elected. The Commissioner shall submit the report from the Chairman of the meeting, with any observations he may wish to add, to the Chief Secretary to Government, by whom the recommendations will be submitted to the Lieutenant-Governor.

6. Attention is drawn to the following Rule VI of the Regulations which have been framed by the Governor-General in Council and Secretary of State:—

VI.—It shall be a condition in the case of any person to be recommended by a Municipal Corporation, or group of Municipal Corporations, that he shall be a person ordinarily resident within the Municipality or the district in which it is situated, or in some one of the Municipalities constituting the group or of the districts in which they are situated. A similar condition shall also apply to persons to be recommended by District Boards.

Under this rule it is not necessary that persons recommended shall be members of any Municipality concerned, but they must be ordinarily resident within the division from which the recommendation is made. Subject to this condition, the rules declare no limit of qualification, and it is left to the representatives to recommend a person under Rule V (*c*) according to the majority of their votes.

7. It is desirable that the subsidiary arrangements now sanctioned shall, as far as possible, be given effect to by the Municipalities concerned with the minimum of official interference. The Divisional Commissioner and District Magistrates will, of course, afford any assistance which may be required, and do their utmost to facilitate the smooth working of the elections; but Government officers are forbidden to take part, directly or indirectly, in the election by canvassing, influencing votes, or otherwise interfering with the free choice of the Municipalities. No indication should be given by any official member of any of those Municipalities as to the manner in which he himself intends to vote.

ORDERED that a copy of this Resolution be furnished to the Commissioner of the Dacca Division for information and guidance, and for communication to the Municipalities concerned in his Division.

Ordered also that a copy be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

Chief Secy. to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 29th January 1900.

Burdwan.—No rain. Weather seasonable. Threshing of *aman* continues. Sugarcane and *rabi* crops doing well. Condition of cattle good. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	
Sadar	15	per rupee.
Kalna	13⅔	
Katwa	14	
Raniganj	14	

Birbhum.—No rain. Weather cloudy. *Rabi* crops doing well. Price of common rice at Sadar 13½ seers and at Rampur Hât 14 seers per rupee. Cattle-disease going on in Rajnagar, Sakulipur, Nalhati and Muraroi thanas.

Bankura.—No rain. Weather occasionally cloudy. Threshing of *aman* almost over. *Rabi* crops thriving. Fodder and water sufficient. Sporadic cases of cow-pox reported. Rice selling at Bankura 15 seers and at Vishnupur 14 seers per rupee.

Midnapore.—No rain. Weather seasonable. Harvesting of winter rice nearly finished; outturn good. Prospects of *rabi* crops good. Cattle-disease reported from Garhbeta and Nayagram. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	15	per rupee.
Contai	18	
Tamluk	13	
Ghatal	14	

Hooghly.—No rain. Weather seasonable. Prospects of *rabi* crops good. Common rice sells at 14 seers 3 chitaks per rupee.

Howrah.—No rain. Weather seasonable. Condition of *rabi* good. Transplantation of *boro* in Ulubaria commenced. Fodder and water sufficient. Common rice sells at 13½ seers per rupee.

24-Parganas.—Rainfall nil. Weather seasonable. Prospects good. Harvesting of *aman* completed, and that of *rabi* crops going on. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	14	0	per rupee.
Barasat	16	0	
Basirhat	15	11	
Diamond Harbour	13	5	

Nadia.—No rain. Weather seasonable. Lands being cultivated for *aus*. Oilseeds being harvested. Fodder and water sufficient except in Chuadanga, where scarcity of water felt in some places. Cattle-disease reported from Meherpur. Price of common rice stationary.

Murshidabad.—Rainfall nil. Weather cloudy. Prospects of *rabi* crops favourable. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	15	per rupee.
Jangipur	15	
Kandi	16	

Jessore.—No rain. Weather seasonable. Harvesting of *aman* and *rabi* crops nearly finished. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	16	per rupee.
Jhenida	18	
Magura	16	
Narail	16	
Bangaon	18	

Khulna.—Rainfall nil. Weather getting warmer. Harvesting of *aman* continues. *Rabi* crops doing well. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	16¾	per rupee.
Bagerhat	16	
Satkhira	16	

Rajshahi.—Weather cloudy. Prospects of crops good. No cattle-disease. Fodder and water-supply plentiful. Price of common rice 19 seers per rupee.

Dinajpur.—Average rainfall ·04. Weather still unsettled. Fodder and water plentiful. Rice sells at 18 seers per rupee.

Jalpaiguri.—Rainfall ·02. Weather seasonable, but cloudy. Harvesting of *haimanti* paddy finished. Harvesting of mustard commenced. Prospects of tobacco favourable. Price of common rice stationary. Fodder and water sufficient.

Darjeeling.—Rainfall at Darjeeling ·81, Kurseong ·48, Siliguri ·23. Weather seasonable. *Hills*:—*Tori* is being harvested; harvesting of *phaphar* complete; wheat, barley and potato doing well. *Terai*:—*Haimanti* paddy being harvested; *kalai*, tobacco, and mustard doing well. Coarse rice sells as follows:—

	Srs.	
Hills	10	per rupee.
Terai	16	

Bhutta sells at Darjeeling 20 seers and at Kalimpong 24 seers per rupee.

Rangpur.—No rain. *Rabi* crops being gathered. Prospects of crops good. Common rice sells at 17¾ seers per rupee. Fodder and water sufficient.

Bogra.—No rain. Cultivation for *aus* and jute going on. Prospects good. Fodder and water ample. Common rice selling at 18½ seers per rupee.

Pabna.—No rain. Weather partially cloudy and cool. *Rabi* crops being harvested now. Price of common rice stationary. Fodder and water sufficient.

Dacca.—Rainfall nil. Weather seasonable. Harvesting of *aman* paddy almost finished. Prospects good. Fodder available. No cattle-disease. Common rice 16 seers per rupee.

Mymensingh.—Rainfall ·07. Weather cold, damp. Rain yesterday evening (28th). Prospects of crops good. Health of cattle good. Fodder and water ample. Common rice selling at Sadar 18 seers and in the subdivisions from 16 to 18 seers per rupee.

Faridpur.—No rain. Weather seasonable. State and prospects of crops good. Harvesting of *aman* paddy almost over. Cultivation of spring crops progressing satisfactorily. Common rice selling at 17 seers per rupee.

Backergunge.—Rainfall nil. Weather fine. Prospects of crops good. Common rice sells at 12 seers (old) and 16 seers (new) per rupee.

Tippera.—No rain. Weather seasonable. *Rabi* crops doing well. *Boro* being transplanted. Average price of common rice 16½ seers per rupee.

Noakhali.—Rainfall nil. Prospects of *rabi* crops good. No cattle-disease. Fodder and water sufficient. Price of common rice stationary.

Chittagong.—No rain. Sowing of *rabi* crops in progress. Water and fodder sufficient. Common rice 18 seers per rupee.

Patna.—Rainfall at Sadar 2·09, Bihar 1·35, Barh 2·28, Dinapore 2·72, Bikram 2·13, Hilsa 2·60. It has been raining at intervals throughout the week. The crop has benefited by the recent rain, but the heavy fall of hail has done some damage to the poppy. Common rice in Patna sells at 15 seers per rupee. Fodder and water for cattle sufficient.

Gaya.—Rainfall at Sadar 1·12, Jahanabad ·46, Aurangabad ·98, Nawada ·10. *Rabi* and poppy partially damaged by recent hail-storms.

Shahabad.—Rainfall at Sadar 2·86, Buxar 1·95, Bhabua 1·09, Sasaram ·68, Dehri ·03. *Rabi* crops damaged by excessive rain and hail. Fodder and water abundant. Sixty-four cases of cattle-disease in Sasaram. Rice at Sadar 12 to 15 seers per rupee.

Saran.—Rainfall at Sadar 3·13, Siwan 2·81, Gopalganj 2·15. Weather cloudy and rainy. Heavy hailstorm passed over district on night of 23rd: has much damaged *rabi* and poppy. Common rice sells at 13 seers and *makai* 14 seers 5 chitaks, against 14 seers 13 chitaks and 20 seers 2 chitaks, respectively, normal prices.

Champaran.—Rainfall at Motihari 3·16, Bettiah 2·24, Barharwa 2·20. Prospects of *rabi* and poppy continue favourable. Last week's rain has been beneficial to standing crops. Prices of common rice and maize at Sadar are 12½ and 16 seers per rupee respectively.

Muzaffarpur.—Rainfall at Sadar 1·45, Hajipur 2·15, Sitamarhi 1·63. Standing crops doing well except in Sitamarhi, where they have been somewhat damaged by the rain. There was severe thunder-storm on the night of the 23rd, which brought down good many trees. Prices are—Common rice 13 seers 11 chitaks, wheat 12 seers 3 chitaks, barley 16 seers, *makai* 15 seers, gram 18 seers, *rahar* 16 seers 8 chitaks, and *marua* 20 seers per rupee.

Darbhanga.—Rainfall at Sadar 1·22, Samastipur 1·85, Madhubani 1·50 Weather cool. *Rabi* doing well. Fodder and water sufficient. Cattle-disease reported from Madhubani. Common rice sells as follows:—

	Srs.	
Sadar	12	per rupee.
Samastipur	16	
Madhubani	16½	

Monghyr.—Rainfall at Monghyr ·91, Begusarai 1·76, Jamui ·25. Weather rainy. Sugarcane pressing continues. *Rabi* and poppy crops somewhat damaged by recent rain and hail-storm. Common rice sells as follows:—

	Srs.	ch.	
Monghyr	13	10	per rupee.
Beguserai	15	0	
Jamui	14	8	

Bhagalpur.—Weather cloudy and rainy up to yesterday (28th), clear to-day (29th). Rainfall at Sadar 1·72, Banka ·33, Madhipura ·69, Supaul ·99. Standing crops have suffered to some extent by the late rain. Cattle-disease reported from thanas Madhipura, Bangaon, Amarpur, Bihpur, and Pratapganj. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	14½	per rupee.
Madhipura	18	
Banka	16¼	
Supual	19	

Purnea.—Rainfall at Sadar ·26, Kishanganj ·30, Araria ·23. Weather cool and cloudy. Slight rain during the week has done much good to the standing crops. Harvesting of winter rice completed. Pressing of sugarcane in progress. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	17	per rupee.
Kishanganj	19	
Araria	20	

Malda.—Rainfall at Sadar nil, Chanchal ·19, Garjole ·9, Shibganj nil. Weather cloudy and drizzling. Gathering of *kalai* and mustard in progress. Other *rabi* crops doing well. No cattle-disease. Price of rice stationary. Fodder and water sufficient.

Sonthal Parganas.—Weather cool and cloudy. Average rainfall ·8. Prospects of the *rabi* greatly improved on account of the late rain. Sugarcane pressing continues. Cattle-disease reported from Rajmahal. Fodder and water sufficient. Average price of rice 14 seers 12 chitaks and of Indian-corn 18 seers 8 chitaks per rupee.

Cuttack.—Rainfall nil. Weather seasonable. *Guru sarad, mug, kulthi* and *arhar* being harvested. Sugarcane being pressed. Tobacco, cotton, and *dalua* growing. Condition of cattle generally good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Cuttack	14	7	per rupee.
Jajpur	17	1	
Kendrapara	18	6	
Banki	15	12	

Balasore.—Rainfall nil. Threshing of *sarad* and *rabi* crops and pressing of sugarcane continue. Cotton growing well. Rice sells at 17⅛, 15, and 18 seers per rupee in interior, Balasore and Bhadrak respectively. Cattle-disease reported from Soro Circle. Fodder and water sufficient.

Angul.—Rainfall in Angul nil, in Khondmals ·24 on the 16th. Harvesting of early *rabi* continues. Wheat, gram and castor crops in flower. Cattle-disease reported from the interior. Common rice selling at 13 seers per rupee in Angul and 9 seers in Khondmals. Fodder and water available.

Puri.—Rainfall nil. Weather seasonable. Harvesting of *sarad* nearly over. *Kulthi* and *arhar* being harvested. *Dalua* promising. *Rabi* crops need rain. Other miscellaneous crops doing well. Common rice sells as follows:—

	Srs.	c.	
Sadar	17	0	per rupee.
Khurda	15	12	
Interior of district	17	1	

Hazaribagh.—Rainfall at Sadar ·83. Weather cloudy. Ploughing is going on. Fodder and water sufficient. Common rice sells at Sadar 12½ seers and Giridih 13 seers per rupee.

Ranchi.—Rainfall nil. Weather cloudy. Prospects of *rabi* crops little improved by recent rain. Harvesting of *arhar* commenced. Rice sells at Ranchi 9 seers and in the interior 10½ seers per rupee. Cattle-disease continues. Fodder and water sufficient.

Palamau.—Report not received.

Manbhum.—No rain. Weather seasonable. Prospects of crops good. Cattle-disease reported from thanas Purulia, Para, Chandil, Manbazar, Raghunathpur, and Tundi. Fodder and water sufficient. Average price of common rice at Sadar 13 seers 9 chitaks, and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—No rain. Common rice sells at 11 seers 12 chitaks per rupee.

General Summary.—Excessive rain fell in the week in the Patna Division with injury to the *rabi* in Saran, Gaya, Shahabad, and Muzaffarpur. Severe hail also caused damage in Patna, Gaya, and Saran. In the west of the Bhagalpur Division also the rain was excessive and caused some damage; but in the east, and in the Sonthal Parganas, the lighter showers benefited the *rabi*. Slight rain also fell in Hazaribagh, in the Khondmals, Dinajpur, Jalpaiguri, Darjeeling and Mymensingh. The pressing of sugarcane is going on, and the earlier *rabi* crops are being gathered in some districts. Scarcity of water is reported from Chuadanga. Prices, elsewhere practically stationary, have risen in the Patna Division and in Chota Nagpur.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

, dew; o, overcast.

NOTE ON THE LATE COTTON CROP IN BENGAL FOR THE YEAR 1899-1900.

THE following is published for general information.

F. A. SLACK,

The 9th February 1900. Offg. Secy. to the Govt. of Bengal.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Note on the late Cotton Crop in Bengal for the year 1899-1900.

Explanatory.—The present report furnishes estimates of the area and outturn of the late cotton crop of these Provinces. The report on the early cotton crop was published by this Department on the 6th December 1899.

2. *Character of the season.*—The rainfall in the month of September was below the normal in all the districts in which late cotton is grown, excepting Midnapore, Bhagalpur and Manbhum. It was also below the normal everywhere

in October, excepting Orissa and the districts of Bankura and Darbhanga. Practically no rain fell from the beginning of November to the middle of January. The weather became cloudy towards the third week of this month, and some very useful showers were received about this time, but the good done by these late winter showers has probably been marred, to some extent, by the recent hailstorms. The season on the whole was not quite as favourable as that of the preceding year.

3. *Area sown.*—From column 3 of the appended statement, it will be seen that the normal area is shown as 85,100 acres. The corresponding figure in last year's report was 75,400 acres. The increase of 9,700 acres is due to the inclusion of the return for Manbhum, which was not received last year, and to the revision of estimates in Muzaffarpur, Darbhanga and Puri There is a difference of 500 acres in the estimates of the total areas sown with late cotton this year and last year, the actual figures being 73,000 acres for 1899-1900 and 72,500 acres for 1898 99. This difference may be ascribed to ordinary fluctuations in cultivation.

4. *Character of the crop.*—Estimates of normal crops of 100 per cent. have been received from five districts, viz., Patna, Muzaffarpur, Monghyr, Cuttack and Manbhum. Five other districts, viz , Bankura, Midnapore, Champaran, Balasore and Angul, report crops varying from 75 per cent. to below 100 per cent. Four districts, including the two most important districts of Saran and Darbhanga, furnish estimates varying from 50 per cent. to below 75 per cent., and Bhagalpur returns an estimate of a 40 per cent. crop only. On comparing the estimates of outturn of this year with those of last year, it will be seen that better crops are expected in five districts and worse crops in six districts, the remaining four districts showing equal crops for both years. Taking the above returns into consideration, the crop of this year is estimated at present at 70 per cent. against 73 per cent., the estimate for last year.

5. *Gross outturn.*—Accepting the estimates given above, the gross yield of the late cotton crop of this year amounts to 3,559,600 lbs. against 3,789,800 lbs., the yield of last year. The average outturn of the five preceding years amounts to 4,086,400 lbs.

[illegible] REVIEWING THE REPORTS ON THE [illegible] IN BENGAL DURING THE YEAR 1898-99.

MUNICIPAL DEPARTMENT.—MUNICIPAL.

RESOLUTION—No. 701M.

Calcutta, the 10th February 1900.

Read—

[illegible] from the several Commissioners of Divisions on the working of Municipalities in the Lower Provinces of Bengal (except Calcutta) during the year 1898-99.

Read again—

The Resolution reviewing the Divisional Commissioners' Reports on the working of Municipalities during the year 1897-98.

The following Resolution reviews the reports submitted by Commissioners of Divisions on the working of Municipalities in Bengal during the year ending with the 31st March 1899. The reports from the Dacca, Chittagong, Patna, [illegible] Bhagalpur Divisions were submitted on or about the prescribed date, whilst those from the Burdwan and Presidency Divisions again [illegible] the former being received on the 23rd September and the latter on [illegible] 1899. In the Burdwan Division the Municipality of Howrah, and in the Presidency the South Suburban and Baduria Municipalities were the most behindhand with their reports.

[illegible] *Number of Municipalities, population and rate-payers.*—There was no [illegible] number of Municipalities, which stood at 151 at the close of the year. One Municipality, Chandpore, came into existence towards the close of the previous year, but no statistics for it were included in the returns for that year, which dealt with 150 towns. The present returns deal with 151 towns.

[illegible] in Appendix A shows the date of the establishment of each [illegible] the Province, the population within municipal limits, and the [illegible] rate-payers in each. The inhabitants of the 151 towns number [illegible] persons. It should be noted that the figures of population on which [illegible] are based, reproduce the census figures of 1891, and that the [illegible] is without doubt considerably greater at the present time. [illegible] increase of 8,178 in the municipal population as compared with [illegible] year, due to the inclusion of the additional municipality above [illegible] number of rate-payers fell from 469,221 to 467,240, repre-[illegible] cent. of the population, as against 17·2 in the previous year. [illegible] not to have been anticipated in a year of general prosperity. [illegible] most marked in Rangpur, Sirajganj, Chapra and Darbhanga. [illegible] varies from 31·1 at Birnagar in the Presidency Division to [illegible] Of towns where the percentage falls below the provincial [illegible] notable example is Bhagalpur, where it was only 9·1. On [illegible] Commissioner observes that "it is preposterous to imagine that the [illegible] than in many of the large municipalities of the Patna [illegible] is no doubt that many persons who should pay get off [illegible] just dues." The finances of this municipality have for [illegible] out of order and its income inadequate to meet its [illegible] therefore the more to be regretted that during the year the [illegible] actually fell from 6,596 to 6,289. In Darbhanga, [illegible] revision of assessments by a salaried assessor resulted in a [illegible] of assessees from 6,801 to 14,713, the exemptions allowed [illegible] committee caused a fall in the year under review of 3,612 [illegible] The Commissioner offers no opinion as to how far [illegible] justified by [illegible] ment and [illegible] Lieutenant-Governor [illegible] ble for short colle[illegible]

observes that the incidence of the current demand in this Municipality was only 7 annas 7 pies per head, while the collection amounted to only 50·3 per cent. of the total demand. It is evident that there is something very wrong in the assessment and collection departments of this Municipality and the local officers will be directed to report the results of the action they have taken to put matters right. Similar grievous failures have occurred in Baduria, where only 60·5 per cent. was collected of an assessment amounting to 5 annas and 7 pies per head; in Netrakona, where the assessment was 7 annas 1 pie per head, and the collection 63·7 per cent.; in Sunamukhi, where the corresponding figures were 5 annas 7 pies and 75·9 per cent.; and Nadia, where the figures were 5 annas 2 pies and 82·5 per cent.

3. *Results of elections held during the year.*—General elections were held during the year only in the Cossipore-Chitpur and Maniktala Municipalities in the Presidency Division. In the former the rate-payers took a keen interest in electing their representatives and in unseating those members of the outgoing Committee whose attendance at the meetings had not been regular. There was a lively contest among the candidates, and on an average more than three-fifths of the total number of voters attended at the polling stations. In Maniktala there was virtually no contest in any of the elections. The results of those elections, as also of the bye-elections held during the year, are shown in Appendix B. The net result is that out of 50 wards in which vacancies occurred, elections were contested in 24, and a total of 2,871 persons actually voted out of an electorate numbering 8,775 in the contested wards.

4. The following table shows the composition of the municipal bodies in each Division at the close of the year:—

Name of Division.	Number of Members.				Race.		Occupation or Profession.								
	Ex-officio.	Nominated.	Elected.	Total.	Europeans.	Natives.	Government servants.	Zamindars and land-holders.	Pleaders and mukhtears.	Planters.	Merchants, traders and money-lenders.	School-masters (other than Government employés).	Medical practitioners.	Government pensioners.	Unspecified.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
Burdwan ...	...	148	228	376	29	347	49	77	71	4	56	36	16	8	57
Presidency ...	6	234	338	578	33	545	82	164	76	...	79	30	39	32	76
Rajshahi ...	..	86	97	183	37	146	34	80	51	6	10	13	6	8	25
Dacca ...	10	103	113	226	18	213	35	47	67	...	28	14	13	1	26
Chittagong ...	10	32	40	82	9	23	15	10	37	...	5	2	2	1	10
Patna ...	18	173	193	384	51	333	58	126	108	4	34	10	4	1	39
Bhagalpur ...	...	64	93	157	29	128	28	32	35	...	20	2	6	4	40
Orissa ...	...	41	34	75	6	69	24	10	27	...	1	5	...	4	6
Chota Nagpur	18	64	37	119	28	96	30	7	44	...	16	2	6	2	12
Total ...	62	945	1,173	2,180	230	1,950	355	503	506	14	244	114	93	61	291
Percentage on total.	2·8	43·4	53·8	...	10·6	89·4	16 3	23·1	23·3	·6	11·2	5·2	4·2	2·8	13·3
Percentage on total for 1897-98.	3·06	43·2	53·0	...	10·7	89·3	15·9	23·5	23·6	·7	10·8	3·1	5·4	2·5	13·7

The variations from the figures of the previous year are slight. The number of lawyers has fallen from 516 to 506, but this class still provides the largest number of Municipal Commissioners, whilst the landlords come next. The number of school-masters other than Government servants rose from 69 to 114, whilst medical practitioners lost about one-third of the seats they occupied in the previous year.

5. *Attendance at meetings.*—There were in all 2,586 meetings held during the year, against 2,609 in 1897-98. Of these, 227, or 8·7 per cent., were unsuccessful or had to be adjourned, as against 219 meetings, or 8·3 per cent., in the previous year. Thirty-one municipalities against 39 in the previous year held more than 20 meetings, whilst 15 municipalities failed to hold at least one meeting every month. At Cossipore-Chitpur the Commissioners held 47 meetings, all successful, with an average attendance of 73 per cent. of the total number of members. Four other municipalities held more than 30 meetings, viz., Kalna (36), Santipur (33), Sherpur in Mymensingh (38), and Bihar (36). The municipalit[illegible] in Monghyr held only 7 meetings, out of which one was unsucc[illegible] average attendance of 58 per cent. of the members.

In 79 municipalities as against 102 in 1897-98, an average of more than one-half of the total number of Commissioners attended at each meeting. The highest percentages of attendance were 80 at Ramjibanpur and Baduria, 78 at Patuakhali, 76 at Jagdispur, and 73 at Cossipore-Chitpur and Krishnagar, while the lowest was 17 at Kushtia. On the whole the number of meetings held and the average attendance appear to be satisfactory, and sufficient for practical administrative purposes. The Commissioners of the Presidency and Bhagalpur Divisions alone express dissatisfaction with the results attained. The Commissioner of the Dacca Division remarks that 'the decline in the number of meetings, and in the percentage of attendance at meetings and the increase in the number of meetings adjourned for want of a quorum, denote less faction between the Committees and their executive quite as much as decrease of interest in municipal affairs.'

6. *Assessments and taxation.*—The statement in Appendix C shows the mode of assessment prevailing in each municipality in the Province, the percentage at which the tax was levied, and the results of revisions of assessment made during the year. The rate on holdings was in force in 38 towns, and the alternative tax upon persons in the remainder, with the exception of two towns, viz., Bhadressur and Puri, where both forms of taxation were in force in different wards. The rate on holdings was levied at the maximum in all but 11 towns, including among others Howrah, Darjeeling, Hooghly and Chinsura, and Narayanganj. The lowest rate, 5 per cent., was levied at Sahibganj, and the highest, 10 per cent., at Dacca.

7. The incidence of municipal taxation excluding Calcutta) varied between Rs. 6-2-8 at Darjeeling and 4 annas at Bazitpur in the district of Mymensingh; the average for the whole Province was Re. 1-0-9, which shows an increase of one anna and one pio per head since the previous year. In 46 towns, against 39 in 1897-98, the incidence of taxation exceeded one rupee per head of population, and it was below 8 annas in 40 towns, against 52 in the two previous years. In this case also no allowance has been made for the natural increase of population, the extent of which can for the present only be left to conjecture.

8. *Revision of assessment.*—A revision of assessment, general or partial, came into force during the year in several municipalities, the best financial results being attained in the following towns:—

Name of Municipality.	Amount of increase. Rs.	Name of Municipality.	Amount of increase. Rs.
Midnapore	1,[illegible]64	Naraingunj	1,025
Hooghly and Chinsura ...	1,[illegible]18	Chittagong	1,638
Serampore	2,[illegible]60	Barh	1,698
Howrah	7,263	Arrah	3,600
Cossipore-Chitpur	1,953	Dumraon	1,865
Titagar	1,063	Bettiah	1,031
Naihati	4,919	Darbhanga	3,296
Nadia	1,067	Cuttack	3,884
Kandi	1,649	Chattra	1,260
Darjeeling	9,809	Ranchi	2,043
Dacca	2,359	Chaibassa	1,593

On the general question of municipal assessment and the revision of assessment on appeal, the Commissioner of the Presidency Division agrees in the following remarks made by the Magistrate of the 24-Parganas:—

"There are obvious inconsistencies in the system of taxation, especially as regards the incidence of the tax on persons, and there can be no doubt that in several municipalities the Municipal Commissioners fail in the duty of adequately assessing the rate-payers for fear of being unpopular, and the result is that a large number of men, who can afford to pay, either escape taxation or pay much less than they should, while impro[illegible]endered impossible by want of funds. An advance in this respect can scar[illegible]ment and laxit[illegible]o long as municipalities are allowed free control over assessments[illegible]ible for short collec[illegible]that any revision of assessment, in which enhancement is obtai[illegible]ductions granted

by appeal committees, the members of which are more alive to their own interests and those of their friends, and more eager to escape personal unpopularity, than anxious for the welfare of the general body of rate-payers whom they represent."

A similar complaint was made by the Commissioner of the Burdwan Division in the report for 1897-98 with reference to the large reductions in assessment allowed in the Hooghly and Chinsura and certain other municipalities on appeal, and the Commissioner was asked to enquire into the matter and report to Government. This report has since been received. It appears that in Hooghly and Chinsura neither the salaried assessor nor the appeal committee did their work satisfactorily; but that in the other cases the reductions made on appeal were the result of reasonable compromises.

The case of the Bhagalpur Municipality is quoted by the Commissioner as another example of failure on the part of a paid assessor to arrive at a fair assessment, and the large number of remissions allowed in Darbhanga point clearly to failure either on the part of the assessor or of the objection committee. It is evident that the work of such an officer cannot be expected to provide in every case a final and satisfactory result. But it is equally evident that the proper system is to appoint not an indifferent assessor, with whose assessments the Municipal Committee interfere in innumerable corrections; but a trusted representative whose conclusions they will very rarely vary. To get a plenipotentiary of this sort the Committees must pay well, but it is to their abundant advantage and convenience that they should do so. No man of self respect will serve a committee, if his findings are distrusted and frequently changed, but the necessity of securing, by all means possible, gentlemen of respectability and integrity for this difficult duty is impressed on the Lieutenant-Governor by the evidence that has come before him over and over again that assessments are too often not made with a single-minded devotion to public interests, that many people who ought to contribute are allowed to escape, while others who are too big to be omitted are assessed at too low a figure. The matter is commended to the particular attention of Municipal Committees and the District Officers and Commissioners who advise them.

9. *Demands, collections, remissions and outstandings on account of taxes.*—The following table compares the totals under these heads for the year 1898-99 with those of the previous five years:—

Year.	Demands.			Collections.						Remissions.				Out-standing balance
	Arrear.	Current.	Total.	Arrear.	Current.	Total.	Percentage of column 5 on column 2.	Percentage of column 6 on column 3.	Percentage of column 7 on column 4.	Arrear.	Current.	Total.	Percentages column 13 on column 4.

1897-98 ...	5,75,937	28,35,594	34,11,531	3,24,221	23,00,280	26,24,501	56·2	81·1	76·9	69,255	69,429	1,38,684	4·6	6,48,34
1898-99 ...	6,52,216	29,29,708	35,81,924	3,45,271	24,52,861	27,98,132	52·9	83·7	78·1	1,04,857	71,909	1,76,760	4·6	6,07,03

The current demand rose to Rs. 29,29,708 from Rs. 28,35,594 in the previous year, resulting in an increase of Rs. 94,114; and the percentage of total collection on total demand, which had steadily fallen during the previous three years, also rose from 76·9 to 78·1 per cent. During the past quinquennium the total collections have risen from Rs. 21,03,772 to Rs. 27,98,132, being an increase of Rs. 6,94,360, or 33·0 per cent. The average annual increase was Rs. 1,38,872. There was a decrease in the percentage of arrear collections, which fell from 56·2 in 1897-98 to 52·9. But the proportion of the gross collections t[illegible] ent demand, nearly 96 per cent., was higher than in any previous y[illegible] 95; and, on the whole, the Lieutenant-Governor thinks the [illegible] have done well.

10. The table below shows the percentages of collection attained by the municipalities in each Division as compared with the previous year:—

Total number of municipalities.	27	27	40	40	11	11	17	17	5	6	26	20	10	10	5	5	9	9	150	161

Of the divisional groups, the first place is taken by Dacca with the high average percentage of 92·7; the only exception to the uniformly high standard of efficiency being the small municipality of Netrakona. Good results were also obtained in the Patna and Bhagalpur Divisions, the averages being 86·7 and 86·21 respectively. The important group of municipalities in the Presidency Division attained a general average of 80·9—a very considerable improvement on the previous year's results. The Commissioner has given special attention to this branch of the work, and the success which has attended his efforts is encouraging.

The lowest place is taken by the Burdwan group, which has now fallen to the discreditably low average of 64·9.

11. Of individual municipalities, in 42, against 37 in the three previous years, over 95 per cent. of the total demand was collected, the following 23 towns showing the best results:—

Name of Municipality.	Total demand.	Percentage of collection.	Total remission.	Outstanding balance.
	Rs.	Rs.	Rs.	Rs.
Deoghur	6,159	99·98	1	...

Chakdaba	3,192	98·0	[illegible]	21

The table above shows what ca[illegible] be [illegible]able for short collec[illegible]ssment and laxit[illegible]inistration, and prompt enforcement of demands; a[illegible] [illegible]or congratulates

these municipalities on their successful management of this most important branch of municipal administration. A satisfactory improvement is to be noted in Patna, the most populous municipality in the province, where, owing to the efforts of a new and energetic Secretary, collections improved from 77·8 to 85·4.

Of the municipalities which call for adverse criticism in this respect, the most important is Howrah, which has now for some years been a standing example of lamentable inefficiency. In the year under review the total percentage of collections fell from 62·3 to 60 per cent., and the outstanding balance reached the enormous figure of Rs. 2,35,185, the result being the total disorganisation of the municipal finances, and the admitted reduction to helplessness of the collection department. The Chairman considers that quite 10 per cent. of the demand is irrecoverable, being due from a class of persons who live from hand to mouth, and are unable to pay more than one quarter's demand at a time. This irrecoverable demand has to be wiped out by remissions, and as the clerical labour of dealing with so many items of remission is too great for the staff, the arrear demand, much of it unrealisable, continues to mount up. Nothing could be less satisfactory than this state of things. If necessary a special staff should be employed to overhaul the arrear list and write off the whole of the items which are really irrecoverable. Nothing is to be gained by retaining these nominally on the collection roll. Meantime it is absolutely necessary to ascertain and collect with promptitude the recoverable proportion of the arrear demand. It is reported that this is now being done by the organisation of a separate warrant department, and the Lieutenant-Governor hopes that the improvement which has been so long delayed will at length be made manifest during the current year. It is noticeable that the greater part of the outstanding balance has accumulated since the introduction of the contract system of collections in 1895.

Among the other important towns in the Province, the most notable instance of failure is Darbhanga, where only 50·3 per cent. of the total demand was collected The Magistrate ascribes this result to the recalcitrancy of the tax-payers and the inefficiency of the collection establishment. Of these two evils, the latter has been dealt with by the prosecution of all the three tax darogas for dishonesty and the dismissal of the head clerk and head muharrir for incompetence. Improvements in the *personnel* of the staff will doubtless be followed in due course by a corresponding improvement in the state of mind of the rate-payers.

Other towns where collections were defective are Bhadreswar, Chandpur, Hooghly and Chinsura, Bally, Purulia, Garden Reach, Baduria, Serampore, Ranchi, Kotrang, Rangpur and Netrakona.

The ordinary explanation given is the general unwillingness of Municipal Commissioners to adopt coercive measures. It will rest with the local officers to impress upon these municipalities the necessity of doing so where circumstances require it.

12. The table in the foregoing paragraph illustrates the fact that the prompt realisation of municipal dues entirely obviates the necessity for large remissions. A general rise in the percentage of remissions is noticed in all the Divisions except Dacca and Orissa, where there was a slight improvement as compared with 1897-98. The largest increase occurred in the Divisions named in the margin. In 11 towns as against 7 in 1897-98, the remissions exceeded 10 per cent. of the total demand, the worst instances being Kotrung (29·5), Rangpur (27·9), and Darbhanga (26·6).

	Remissions.		Outstanding balance.	
	1897-98.	1898-99.	1897-98.	1898-99.
			Rs.	Rs.
Rajshahi	... 3·6	6·0	26,072	26,314

Patna	... 3·2	5·4	71,935	48,015
Bhagalpur	... 1·4	3·13	41,064	26,666

13. *Fresh imposts levied during the year.*—Fees for the registration of carts were levied for the first time in the municipalities of Khirpai, Muktagacha and Sherpur (Mymensingh). Fees under Part IX of the Bengal Municipal Act for the cleansing of private privies were also levied for the first time at Jaynagar, Garden Reach, South Barrackpore, Purnea, Daltonganj, Purulia, Raghunathpur and Chaib[illegible] ...tions of the municipalities of Rajpur, North Barrackpore, [illegible]. A half-yearly license-fee of Re. 1 on bullock-shed[illegible] ...tion 263 in the Maniktala Municipality.

In the same town saltpetre refineries were brought under the category of dangerous and offensive trades under section 261 of the Act, and an annual fee of Rs. 100 was imposed on each. In Baranagar annual fees were levied for the first time for licenses for the sale of fuel, &c., at burning ghats. License fees under section 261 were also levied for the first time at Netrakona, Bihar, English Bazar, Chatra, Raghunathpur and Chaibassa Municipalities. A tax on animals and vehic'es was levied in the Daltonganj Municipality from 1st Ocober 1898. Part X of the Municipal Act containing provisions for the regulation of markets, was introduced into the Daltonganj Municipality.

14. *Income and expenditure.*—The following table shows separately for each Division the opening and closing balances, the income and the expenditure of its municipalities during 1897-98 and 1898-99:—

Name of Division.	Opening balance.		Income during the year.		Total funds available for expenditure.		Total expenditure.		Closing balance.	
	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.

Total ...	4,38,115	4,00,961	38,28,622	38,46,349	42,66,737	42,47,310	38,65,776	37,63,175	4,00,961	4,84,135

15. *Closing balances of municipalities.*—There was an increase in the aggregate closing balances from Rs. 4,00,961 to Rs. 4,84,135. In several municipalities funds are being accumulated for schemes of sanitation or other municipal reforms; *e.g.*, at Cossipore-Chitpur Rs. 56,083 have been reserved for drainage and water-supply, whilst in the Rajshahi Division money was kept in hand for probable plague charges. In a few other cases the loan funds received for water-supply or other purposes could not be wholly utilised during the year, and this led to the increase of the closing balances. In the following cases among others, no explanation has been furnished of the failure of the municipalities to utilise the funds at their disposal:—

Name of Municipality.	Total income.	Closing balance.	Name of Municipality.	Total income.	Closing balance.
	Rs.	Rs.		Rs.	Rs.
Santipur	35,548	[illegible]710	Comilla	29,503	7,140
Azimganj	19 429	[illegible]37	Dinapore	18,974	4,623
Kandi	9,227	[illegible]31	Revelganj	11,741	3,074
Khulna	24,600	5,729	Siwan	12,468	4,658
Satkhira ...	5,252	[illegible],187	Darbhanga	62,611	21,228
Barisal ...	35,7[illegible]	[illegible]6,413			

On the other hand [illegible] followi[illegible] conspicuous instances of municipalities which unduly reduced [illegible] working [illegible]ances. This must have resulted in difficulty in the payment [illegible]ishment and other regular charges at the commencement [illegible] year:—

Name of Municipality.	[illegible] income of year.	Closing balance.	Name of Municipality.	Total income of year.	Closing balance.
	Rs.	Rs.		Rs.	Rs.

Total ...	38,46,349	[illegible]4,231	2,06,504	...
Net increase ...	...		...	·4

The small increase of 17,727 in the revenue shown above does not represent the real increase in the ordinary revenues of the municipalities, for the municipalities [illegible] Rs. 1,43,850 less than in the year 1897-98. Excluding the receipts u[illegible] ordinary and debt, the total real income amounted to Rs. 85,18,[illegible] 531 of the previous year, showing an increase of Rs. 2,13,[illegible]

17. The following table shows the revenue derived in each Division from taxation proper, *i.e.*, under the head "1—Municipal rates and taxes," during 1898-99 and the five previous years:—

Year.	Names of Divisions.									
	Burdwan.	Presidency.	Rajshahi.	Dacca.	Chittagong.	Patna.	Bhagalpur.	Orissa.	Chota Nagpur.	Total.
1	2	3	4	5	6	7	8	9	10	11
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.

1895-96	6,00,881	[illegible]	2,28,726	2,68,498	58,446	4,53,276	1,71,512	80,313	41,816	23,87,600
1896-97	6,89,640	[illegible]	2,29,543	2,80,064	61,441	4,47,470	1,71,627	82,095	43,128	25,35,665
1897-98	7,57,205	[illegible]	2,26,132	2,89,856	72,036	4,58,591	1,84,481	82,932	42,030	26,79,186
1898-99	7,83,553	6,03,838	2,37,410	3,04,274	79,042	4,94,882	2,16,672	85,163	55,511	28,60,545
Increase during the past quinquennium.	2,11,860	[illegible]	32,629	61,307	25,836	1,02,746	63,763	3,153	16,066	6,80,644
Percentage of increase.	37·05	[illegible]	11·05	25·2	57·4	26·2	41·6	3·8	4·7	31·2

18. During the past quinquennium municipal taxation has increased by Rs. 6,80,644, or 31·2 per cent., varying in the different Divisions from 57·4 in Chittagong to 3·8 in the Orissa Division. Excluding the municipalities which have been established since the beginning of this period, the increase is mainly accounted for by the establishment of new waterworks producing an additional revenue of Rs. 1,65,000; by the extension of the scavenging rate to the extent of over a lakh and-a-half; and by an increase of slightly under 2½ lakhs in the receipts from the rate on holdings and the tax on persons. This last item represents the result obtained from increase in population, rise in the value of town property and improvement in the practical administration of assessments during the past five years. This indicates commendable attention by the municipalities on the whole to their duty of steadily revising and perfecting their assessments. The Lieutenant-Governor has no desire to press upon them any fresh taxation except for the execution of essential and approved sanitary projects or in payment of such a convenience to the people and protection to the public health as the provision of pure water. But there are still municipalities in which there is large room for revision before a fair and reasonable distribution is attained of the taxation they have imposed on themselves as their ordinary source of income, and to this revision the Lieutenant-Governor does not doubt they will address themselves in the spirit and after the fashion already suggested.

As compared with the previous year, the income from taxation shows an increase of Rs. 1,81,359, or 6·7 per cent. The increase was shared by all the Divisions, and was largest in the Burdwan, Presidency, Patna and Bhagalpur Divisions, where it amounted to Rs. 26,348, Rs. 38,115, Rs. 36,291 and Rs. 32,191, respectively.

19. *Tax on [illegible] lands.*—This tax yielded a revenue of Rs. 10,51,230, which is Rs. 66,[illegible], in excess of the income during the previous year. The increase was shared more or less by all the Divisions, the percentages varying from [illegible] Chota Nagpur to 2·9 in the Orissa Division. Better collection of [illegible] and arrear demands, revision of assessments, as also a change in the [illegible] taxation in some places from a tax on persons to the rate on [illegible] Nagar, contributed to the increase, whilst delay in the disposal [illegible] against revised assessment and laxity of supervision of the [illegible] were responsible for short collections under this

as under other forms of taxation. The largest variations as compared with the previous year occurred in the following municipalities:—

Name of Municipality.		Increase. Rs.	Name of Municipality.		Increase. Rs.
Hooghly and Chinsura		4,729	Patna	...	5,993
Howrah	...	14,202	Bhagalpur	...	12,322
South Suburban	...	8,159	Burdwan	...	2,459
Krishnagar	...	3,184	Maniktala	...	1,307
Santipur	...	3,059	Cossipore-Chitpur	...	1,059
Dacca	...	4,587	Muzaffarpur	...	1,425
Chittagong	...	4,693			

20. *Tax on animals and vehicles.*—As compared with the previous year, there was a slight decrease of Rs. 1,790 in the income from this source, which amounted in the aggregate to Rs. 2,09,129 in 1898-99. The largest decrease occurred in the Burdwan Division, where the receipts fell by Rs. 4,177. This decrease was shared mainly by the municipalities of Howrah (Rs. 4,480) and Ghatal (Rs. 1,674). In the former place the decline is ascribed partly to the failure of the Corporation of Calcutta to pay to the municipality its share of the cart-registration fees for the second-half of the year, and also to the opening of the Howrah-Amta and the Howrah-Sheakhalla Tramways. The introduction of the system of cart registration in the neighbouring municipalities affected the receipts at Ghatal. There was an increase of Rs. 1,171 in the receipts in the Kalna Municipality, which is reported to be the result of better supervision. At Bhagalpur the receipts show an improvement of Rs. 2,166, owing to a larger number of carts having been registered during the year after the previous year's dullness of local trade. The revenue was almost stationary in the Presidency, Rajshahi and Dacca Divisions.

21. *Tax on professions and trades.*—The revenue from this source declined by Rs. 224. The income was stationary in the Presidency Division and fell off in Burdwan and Rajshahi, whilst in the rest of the Divisions there was some increase. Several municipalities shared the decline in the Burdwan Division, notably Bansberia, where the receipts fell off from Rs. 1,889 to Rs. 288, for which no reasons have been assigned.

22. *Tolls on roads and at ferries.*—In no district are tolls levied on roads, nor do the municipalities in the Chota Nagpur Division derive any income from ferries. The rise of 6·7 per cent., as compared with the previous year, was shared mainly by the Patna and Chittagong Divisions, where there was an increase of Rs. 12,164 and 3,342, respectively. The Patna and Muzaffarpur Municipalities contributed Rs. 10,465 and Rs. 2,324 towards the increase in the former Division, due at Patna to collection of arrears of rent, and at Muzaffarpur to increased rent at which ferries have been let. In the Chittagong Division the increase was due to the inclusion in the accounts of the ferry receipts in the new Municipality of Chandpur, and to increased rents obtained for the ferries in the Chittagong Municipality. The receipts declined in the Dacca, Bhagalpur and Presidency Divisions, the decline being largest in the last-named Division, where it amounted to Rs. 3,365. In the Azimganj Municipality in the Presidency Division the income fell off by Rs. 3,051, of which no explanation has been given.

23. *Water-rate.*—This rate is levied only in eight municipalities where water-works have been installed. In Dacca the Commissioners levy no rate for the filtered water supplied. The total receipts rose from Rs. 1,99,352 to Rs. 2,00,614. The largest increase occurred in the Bhagalpur Municipality, where the receipts increased from Rs. 8,077 in 1897-98 to Rs. 13,278, owing to vigorous measures being taken for the realisation of arrears.

24. *Lighting-rate.*—This rate is levied only in the municipalities of Howrah and Darjeeling. In the former town the receipts rose from Rs. 37,517 to Rs. 45,112 owing to the extension of gas-light to new areas and the levy of the tax in those places. At Darjeeling the receipts amounted to Rs. 9,241, against the small sum of Rs. 197 levied towards the close of the previous year.

25. *Conservancy, including scavenging and latrine rates.*—The income under this head shows the large advance of Rs. 49,607, or 9·4 per cent. over the receipts of the previous year. This increase of revenue occurred in

all the Divisions except Rajshahi. The increase was largest in the Presidency Division (Rs. 14,262), in Bhagalpur (Rs. 10,623), and Chota Nagpur (Rs. 7,332), where it rose from Rs. 4,585 to Rs. 11,917. The improvement in revenue was due to the levy of the tax for the first time in some municipalities and in portions of others, and also, as in the case of other demands, to the stricter supervision exercised over the collection department. Taking municipalities separately, the largest increase occurred in the towns named in the margin. As regards Howrah, the Magistrate observes:—

Name of Municipality.		Increase.
		Rs.
Hooghly-Chinsura	...	2,280
Howrah ...	...	3,851
Baranagar ...	...	2,259
Darbhanga ...	...	2,361
Bhagalpur ...	...	4,149

"Although there was an improvement of Rs. 3,851 in the collections under this head in Howrah, this is still the worst collected of all the principal taxes, due to the unfairness of its incidence. The Commissioners have now to some extent modified this unfairness by raising the rate to 5 per cent. on all holdings of the annual value of Rs 400 or over against an arbitrary rate averaging about 4½ per cent. previously in force."

Several municipalities took steps towards making the trenching grounds a source of income. The sale of nightsoil and sweepings also yielded an income in some towns. The receipts, however, from these sources are trifling, and it is probable that the general repugnance of the cultivators in Bengal to the use of nightsoil as manure, noted in last year's Resolution, will take time to disappear.

26. *Tax on persons according to their circumstances and property.*—The total revenue rose from Rs. 5,35,002 in 1897-98 to Rs. 5,51,196, resulting in an increase of Rs. 16,194, or 3·0 per cent., the increase occurring in all the Divisions except Orissa, where the revenue declined by Rs. 559. The increase was largest in the Presidency Division (Rs. 6,867) and Chota Nagpur (Rs. 3,357). The following municipalities show the largest variation in the yield of the tax:—

Name of Municipality—		Income during 1897-98.	Increase.	Name of Municipality—		Income during 1897-98.	Decrease.
		Rs.	Rs.			Rs.	Rs.
Murshidabad	...	5,426	2,316	Jainagar	...	5,188	1,844
Rangpur	...	6,349	1,805	Darbhanga	...	21,257	3,082
Barh	...	4,389	1,736				
Bettiah	...	10,174	2,418				
Jajpur	...	2,953	2,222				

As in some municipalities the tax on persons has been replaced by the rate on holdings within entire municipal areas or in selected wards, the net result of the year can only be determined on a comparison of the aggregate income from both the forms of tax with that of the previous year. The net result was an increase of Rs. 1,02,718 in the income under both heads taken together.

27. *Grants from Provincial and Local Funds.*—The contributions received by municipalities from Provincial and Local Funds and from other sources, shown in detail in Appendix L, fell from Rs 1,51,949 to Rs. 1,42,904. They are classified as follows:—

Purpose for which made.	Provincial Funds.	District Funds.	Other funds and public charity.	Total.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Medical	2,765	45,177	47,023	94,965
Education	3,781	266	255	4,302
Other purposes	17,084	13,555	12,998	43,637
Total ...	23,630	58,998	60,276	1,42,904

28. *Gifts of money or land and works of public utility executed by private individuals.*—Besides the contributions included in the statement above, the following instances of private liberality deserve mention:—Babu Khetra Nath Adhikari, the present Vice-Chairman of the Dainhat Municipality, made a free gift of 2 bighas of land for use as a trenching-ground. Raja Narendra Nath

Khan, of Narajole, is sinking a big well in the Mirzabazar mahalla of the town of Midnapore, where the necessity for pure drinking-water was strongly felt. Two ladies of Hooghly-Ghootiabazar and Hooghly-Bally are reported to have caused two bathing-ghats to be constructed for public convenience. In the Baidyabatty Municipality Babus Umes Chandra Roy and Annoda Prosad Addy contributed Rs. 3,000 and Rs. 2,500 respectively for constructing two pucka ghats. In the town of Titagar, the Khardaha Company set up five hydrants on the Khardaha road for supplying filtered water from their mills to the people of the place; similarly, the Standard Jute Company placed two hydrants on Trevor's Road. The owners of the mills within the Garulia Municipality spent Rs. 1,448 on the construction of 700 feet of *pucka*, and 1,500 feet of *kutcha*, drains. They also supplied a public latrine and some urinals at a cost of Rs. 1,065. In this town the widow of the late Babu G. C. Bose erected a *pucka* bathing-ghat on the river bank at a cost of Rs. 1,000. Rai Setab Chand Nahar Bahadur made a free gift of a piece of land, measuring 10½ cottahs, in the heart of the town, for the construction of a new road in the Azimganj Municipality. He also made over a piece of land rent free for a segregation camp for plague patients. A building with corrugated-iron roof attached to the Bogra Charitable Dispensary, named the Bogra Pauper Ward, was constructed at a cost of Rs. 1,000 by Babu Chandra Kishore Munshi, zamindar of Sherpur. In Comilla Rs. 1,900 was received from Raja Ashutosh Nath Rai, zamindar of the Sarail estate, for the construction of a ward attached to the Comilla Charitable Dispensary, for the accommodation of out-door patients, and in Brahmanbaria Rs. 3,000 was received from Babu Lokonath Rai Choudhuri, zamindar of Adavir, and Rs. 200 from Raja Ashutosh Nath Rai for excavation of a tank. Maulvi Syed Mohammad Abu Saleh, Khan Bahadur, zamindar of the district of Gaya, gave two pieces of land, each measuring 10 cottahs, for trenching purposes. Subscriptions aggregating Rs. 2,490 have been raised by the Daudnagar Municipality for the construction of a new dispensary building. Messrs. Thomson and Mylne, of Jagdispur, contributed a sum of Rs. 784 during the year towards the expenses of the local dispensary and maintained, at their own cost, a middle-class English school, their grant for this purpose during the year having been Rs. 656. They have also spent a sum of about Rs. 1,500 in building a house for the new school. The Maharani of Dumraon constructed a suitable building for the local municipality at a cost of Rs. 2,000. Contributions aggregating Rs. 1,049 were received by the Patna Municipality for making drains and sewers. The Chaibassa Municipality received a donation of Rs. 1,000 from the Raja of Seraikella to commemorate the visit of the Lieutenant-Governor to that town in November 1898.

EXPENDITURE.

29. The total expenditure in the municipalities of the Province (excluding Calcutta) amounted during the year to Rs. 37,63,175, against Rs 38,65,776 in 1897-98, being a decrease of Rs. 1,02,601. The year closed with a balance of Rs. 4,84,135, against Rs. 4,00,961 in the preceding year. The statement in Appendix F shows the percentage which the expenditure in each municipality under each of the principal heads bears to the total outlay (excluding debt and suspense heads). For the whole Province the percentages for the past four years are as follows:—

Year.	General establishment.	Lighting.	Water-supply.	Drainage.	Conservancy.	Medical.	Vaccination.	Public Works.	Education.
1	2	3	4	5	6	7	8	9	10
1895-96	8·7	4·4	25·9	3·9	23·3	7·9	·51	13·1	3·5
1896-97	9·8	4·7	15·5	3·4	26·6	9 5	·56	16·1	3·8
1897-98	10·4	7·2	7·4	3·2	30·3	9·7	·57	17·1	3·7
1898-99	10·6	4·4	5·9	3·4	31·7	10·5	·5	16·3	3·4

There was a large falling-off in the expenditure on lighting and water-supply. The decrease under lighting was due to heavy capital charges having been incurred at Darjeeling in the previous year on the electric light installation in that town, and to the payment in that year by the Howrah Municipality of heavy arrear bills for the supply of gas. The falling off under water-supply was also due mainly to smaller capital expenditure having been incurred during the year.

30. The following statement shows the expenditure of 1898-99 under the main heads, and also shows how these totals have varied from those of the previous year:—

Heads of Expenditure.	Total expenditure in 1898-99.	Comparison with 1897-98.		
		Increase.	Decrease.	Percentage of variation.

Net decrease ...	...	...	1,02,601	2·6

31. *Office and Collection Establishment.*—The total expenditure on office establishment shows an increase of Rs. 6,095, and that on collection establishment of Rs. 4,729. There has been a steady growth of expenditure under this head during the past four years, and this requires to be closely watched, and if possible checked. In four small municipalities, as compared with seven in 1897-98, the cost of office and collection establishment exceeded one quarter of the whole expenditure of the year. It is reported by the Commissioner of the Presidency Division that the system of paying for collections by commission instead of by fixed salaries did not work well during the year, and that most of the municipalities in which it was introduced in previous years have reverted to the fixed pay system.

32. *The prevention of fire.*—The expenditure under this head fell from Rs. 19,463 to Rs. 18,822, the largest decline occurring in the Darjeeling and Cossipore-Chitpur Municipalities. In the former it was due to no stores having been purchased during the year. Since the close of the year an arrangement has been made for the levy of a contribution from the Garden Reach Municipality towards the cost of the Metropolitan Fire Brigade. The result of the negotiations between the Commissioners of the Baranagar Municipality and the Commissioner of Police for extending the service of the Metropolitan Fire Brigade to that town, referred to in the last Resolution, has not been reported to Government.

33. *Street lighting.*—The expenditure under this head fell from Rs. 2,54,204 to Rs. 1,53,170, showing a decrease of Rs. 1,01,034, which occurred mainly under capital expenditure. The decrease, which was shared by all the Divisions except Chittagong and Patna, where there was a slight increase, was largest in the Municipalities of Howrah and Darjeeling, being Rs. 39,110 and Rs. 53,057 respectively, and was due to the non-payment of arrear bills of the Gas Company in the former, and to heavy capital expenditure having been incurred in the latter on the electric light installation in the previous year. Seventeen municipalities against 20 in the previous year, incurred no expenditure on this item. In some places only a small expenditure was incurred in supplying oil for the lanterns of the patrolling police, no street lamps being put up.

34. *Water-supply.*—Under this head also the total expenditure fell from Rs. 2,62,636 in 1897-98 to Rs. 2,01,387, the large decline of Rs. 61,249 being shared by the five divisions named in the margin, whilst there was some increase in the remaining divisions, mainly in Chittagong, where the charge rose from Rs. 1,183 to Rs. 5,113. The Howrah Municipality shows a decrease of Rs. 19,742 under "Capital" outlay. As stated in the last Resolution, the water-works installed in the town were not found to be altogether successful at first. Improvements have since received due attention, and the Chairman considers that the works are now settling into shape. The water supplied through the works was found to be in no way inferior to the filtered water supplied in Calcutta. At Cossipore-Chitpur and Maniktala the Commissioners further extended the water-supply which is obtained from the Calcutta mains, but the supply in the latter place is still inadequate. The Commissioners are contemplating other extensions of the supply, and a scheme has been framed for the purpose, the cost of which will be met out of revenue. Proposals are also under consideration for the extension of the Calcutta water-supply to portions of the South Suburban and Garden Reach Municipalities. The South Dum-Dum Municipality have obtained sanction to the extension of the filtered-water supply from the Cantonment main. At Berhampore the water-works were completed and opened after the close of the year. At Rampur Boalia the Commissioners spent Rs. 4,227 on the re excavation of tanks. The maintenance charge also increased in that town by Rs. 2,138. The reduction of expenditure of Rs. 11,831 at Dacca, was only a paper one, due to the payment of arrear bills in the previous year. At Patuakhali the Subdivisional Officer and Chairman of the Municipality has, it is reported, raised subscriptions for erecting filters in two reserved tanks on the pattern of the one erected at Faridpur, which has proved successful. At Bhagalpur there was a reduction of expenditure of Rs. 17,207 under both capital and maintenance charges. Considerable trouble has been experienced

	Decrease. Rs.
Burdwan	19,630
Rajshahi	5,788
Dacca	14,007
Patna	8,434
Bhagalpur	18,369

with these important water-works, owing to the intake having become choked during high flood. The Commissioner remarks: 'There is no denying that hitherto these water-works have not been the success that was hoped for, although there is no doubt that the health of the town has benefited by them. They have cost so much that the town's resources are considerably hampered in every other direction, and as far as I can see, the Municipality has not yet got to the end of its expenditure. Very much depends on the action of the river Ganges during the present rains. Very careful supervision of the engines and the machinery is required, but that is what the Municipality cannot at present afford to pay for.' It is deplorable that the every-day working of a scheme, which has been carried out at so great a cost, should be hampered and rendered inefficient for the want of the necessary expenditure; the more so in view of the Commissioner's remarks quoted in paragraph 2 above. It has moreover been noted by the Sanitary Engineer that the water-rate, which in 1896-97 covered only two-thirds of the cost of the water, was still more inadequate in 1897-98. Some improvement in the water-rate receipts has been noted during the year under review, but they appear to be still insufficient. It is imperative that the municipality should realise its responsibility for keeping the works in proper order, and for submitting to the taxation necessary to enable them to do so.

The Lieutenant-Governor is pleased to find from the reports that considerable activity was displayed during the year in several municipalities in excavating tanks and sinking wells and tube-wells, in improving existing tanks and wells, and specially reserving selected tanks and wells for drinking and culinary purposes.

The statement in Appendix M shows the statistics of sources of water-supply available in each municipality and of the quality and quantity of the supply.

35. *Drainage.*—The total expenditure rose from Rs. 1,13,456 to Rs. 1,16,987 owing to an increase in the capital expenditure of Rs. 61,316, whilst maintenance charges declined by Rs. 7,785. Taking both heads together, the increase, which was largest in the Presidency Division (Rs. 6,672), was shared by four other Divisions—Dacca, Patna, Bhagalpur and Chota Nagpur—whilst there was a falling off in the remaining Divisions, especially in Rajshahi (Rs. 8,431). The following municipalities show the largest fluctuations in the expenditure under this head:—

Name of Municipality.	Increase.	Name of Municipality.	Decrease.
	Rs.		Rs.
Santipur ...	1,376	Serampore ...	2,830
Azimganj ...	2,366	Dinajpur ...	3,622
Jessore ...	1,172	Darjeeling ...	6,410
Naraingani ...	2,005	Sasaram ...	1,983
Patna ...	6,925	Muzaffarpur ...	1,800
Jamalpur (Monghyr)	1,862	Bhagalpur ...	1,831

At Santipur and Azimganj the increase occurred in the cost of maintenance of existing drains, which rose from Rs. 3 and Rs. 74 to Rs. 1,379 and Rs. 2,440, respectively. The increase in the other places was under capital expenditure. The decline in expenditure shown above was due to smaller capital expenditure having been incurred in the municipalities of Serampore, Dinajpur and Bhagalpur, whilst in the rest the decrease was in the cost of establishment, repairs, &c. At Serampore the scheme for improving the drainage of two wards has been completed, and the rest of the scheme is under preparation. The Municipal Commissioners of Howrah are, for the present, turning their attention to the improvement of the surface drainage of the town, the scheme previously drawn up having proved to be impracticable. As regards the future they have obtained sanction to the appointment of an Engineer of the requisite calibre, who has arrived since the close of the year, and they now propose to prepare a scheme such as their finances may admit of. Schemes for the drainage of the Municipalities of Hooghly and Chinsura, and Khulna are, it is reported, under the consideration of the Sanitary Board. The Maniktala Municipality have matured a costly scheme for opening out the drainage outfalls of the Municipality, which has been approved by the Sanitary Board and

has just received the sanction of Government. At Krishnagar the Commissioners obtained a loan of Rs. 28,000 from Government towards the close of the previous year for improving the drainage and water-supply of the town by excavating the channel of the Anjona river. The District Engineer of Nadia has been authorized to execute the scheme under the supervision of the Superintending Engineer, Central Circle. At Comilla the Commissioners have commenced the work of excavating two drainage outfall channels. At Patna the construction of new drains, wells and reservoirs and the purchase of a boiler and a pump in connection with the scheme for flushing parts of the city drains contributed to the increased expenditure incurred during the year. No expenditure was incurred on this item in 14 municipalities, among which may be mentioned Darbhanga, Garden Reach, Jalpaipuri and Dinapur.

The municipalities of the Presidency Division are naturally those in which most expenditure under this head is required; and it is satisfactory to note that this is on the whole appreciated by them. On the other hand improvement in this respect is reported to be the great need in the Bhagalpur Division. The Commissioner of Bhagalpur observes that *pucka* drains where they exist, are often rendered useless from the want of a proper preliminary survey. Remarks to much the same effect were recorded by Government last year with regard to the Chota Nagpur Division, and may be taken to apply to mufassal municipalities in general.

36. Since the close of the year, the Sanitary Engineer has made a thorough inspection of the drainage system of Patna, the largest municipality in the Province outside the capital; and it is gratifying to learn that the results of the inspection are uniformly favourable. Mr. Silk reports that the practice of throwing scrapings and refuse from the drains on to the sides of the road has been entirely stopped, and that for the last five years he has never seen the roads and drains in a cleaner condition. The old standing nuisance caused by the Backergunge outfalls has been removed. Considerable lengths of drains in the gullies have been paved with bricks laid flat, and the improvement effected has been so much appreciated by the inhabitants that in many cases they have themselves come forward and paid for the drains themselves. The system of filtering sullage through cinder beds has been intelligently carried out, with excellent results, and the greatest possible attention is paid to flushing. The Lieutenant-Governor entirely concurs in the high commendation bestowed by the Sanitary Engineer on the Chairman and Secretary of the Municipality in the following passage of his inspection note, and he desires to congratulate them and the Municipal Commissioners of Patna on the successful issue of their labours:—

In closing this report I desire to place on record the splendid sanitary work that is now being carried on in Patna by the Chairman, Mr. H. LeMesurier, C.S. There is hardly a drain in the whole town with which he is not personally acquainted, and it is entirely due to his energy, perseverance, and powers of organisation that Patna may now be quoted as an example to all the other municipalities in Bengal not only in the matter of drainage but in all other work connected with conservancy. The greatest credit is also due to the intelligent interest taken in all sanitary work by the Secretary, Maulvi Wajid Hossein.

37. *Conservancy (including road cleaning and watering, and latrines).*—The total charge on this account, which amounted to Rs. 10,85,270, shows an increase of Rs. 17,572 as compared with the previous year. The increase was shared by the six divisions named in the margin, whilst there was a decline in the others, of Rs. 11,440 in Burdwan, Rs. 18,465 in Rajshahi, and Rs. 4,199 in Dacca.

Chittagong ...	217	Orissa ...	3,427
Patna ...	28,461	Chota Nagpur	4,985

In the Burdwan Division increase of expenditure occurred in 14 towns, including Asansol, where the expenditure rose from Rs. 4,716 to Rs. 7,041, and a decrease in the remainder, the largest falling off, Rs. 16,033, occurring at Howrah, on account of the discharge of the heavy extra establishment maintained in anticipation of an outbreak of plague. The largest increase in the Presidency Division occurred in the South Suburban Municipality (Rs. 3,908) and in the Patna Division in the Municipalities of Gaya (Rs. 17,160) and Patna (Rs. 14,293). The increase in these as in other places has been ascribed to one or more of the following causes, viz., the purchase of night-soil

and rubbish carts, and of latrines and urinals, the entertainment of extra sweepers and conservancy staff for the cleansing of the town, and increased expenditure on disinfectants as a precaution against the importation of plague, and the construction of bullock sheds and purchase of fodder.

The statistics given in Appendix F show that expenditure on this, the most important item of municipal expenditure, varied from 57·8 per cent. of the total outlay at Asansol to 3·3 per cent. at Taki.

In the town of Dacca special efforts have been made towards remedying the existing state of things, which the Commissioner describes as terrible. Much has been accomplished, though much yet remains to be done. Mr. Savage cautiously summarises the operations now in progress in the remark that 'if there be no backsliding, Dacca will in two or three years be free from the reproach of being the dirtiest town in Bengal.'

The system of coke breeze filtration of sewage was tried at Howrah and various municipalities in the Dacca Division. At Howrah these filters were attached direct to the latrines and urinals, and the experiments proved that the effluent is greatly reduced in quantity by evaporation while passing through the coke, and is, therefore, easier to remove, and it becomes infinitely less offensive and the passage of the carts causes less nuisance in the streets. The Commissioner of Dacca makes the following remarks on the subject:—

"In the course of my inspections, I have paid special attention to the subject of coke filters for sullage water. I found that everywhere the experiments had been utter failures, except in Barisal, where the Chairman and Vice-Chairman, Babus Rajani Kanta Das and Promotha Nath Mukherjee, gave their personal attention to the subject, and, after many trials, at last succeeded in getting one filter to work admirably. I have asked other municipalities to adopt the Barisal process, and I expect in the course of the year to see one great difficulty in the way of sanitary improvements (the difficulty of getting rid of sullage water without carting it away) removed."

38. *Hospitals and Dispensaries.*—The total expenditure, which amounted to Rs. 3,60,656, shows an increase of Rs. 19,164 as compared with 1897-98. In the year 1893-94, the expenditure under this head stood at Rs. 2,82,189, and thus during the past quinquennium, there has been an increase of Rs. 78,467 or Rs. 15,693 a year on the average. Deducting the special grants and contributions for medical purposes, the total amount paid by municipalities on this account was Rs. 2,36,688. The municipalities named in the margin show the largest fluctuation in the expenditure under this head as compared with the previous year. The increase at Midnapore was due to the payment of bills for the construction of the Leper Asylum, and that at Raniganj to the construction of a plague hospital and to the contribution made towards the pay of a veterinary officer employed by the District Board. The increase of expenditure in municipalities in the Presidency Division was due to the measures adopted to prevent the spread of plague. The decrease is generally ascribed to the reduction in the cost of diet, as high prices prevailed in the previous year, and to smaller expenditure having been incurred on buildings than in the year 1897-98, and also to payment of smaller amount of arrear bills. At Hazaribagh, the old dispensary building which was not suited to requirements and had fallen into disrepair was sold for Rs. 3,000. With this amount and the further help of a donation of Rs. 4,000 from the late Raja of Padma, miscellaneous subscriptions amounting to Rs. 3,099, and a grant of Rs. 3,000 from Government, an excellent building for a hospital and dispensary has been constructed on a separate site granted by Government. The new building was opened for use in the month of May of the past year. At Purulia a hospital for contagious diseases was constructed at a cost of Rs. 1,500. A dispensary was opened for the first time at Jaynagar.

Name of Municipality.	Amount of increase. Rs.
Raniganj ...	1,160
Midnapore ...	1,257
Cossipore-Chitpur ...	5,164
Maniktola ...	3,442

Name of Municipality.	Amount of decrease. Rs.
Darjeeling ...	1,236
Dacca ...	8,878
Nasirabad ...	9,165
Faridpur ...	2,047
Patna ...	5,120
Gaya ...	1,522

At Rampur Boalia a lady doctor was appointed in May 1898, and has since been practising in the municipality. A passed midwife has been entertained on a salary of Rs. 30 a month with free quarters at Jalpaiguri. A Christian hill girl, who was being educated at the Campbell Medical School at the cost of the Darjeeling Municipality, has passed, and she will now be employed by the municipality at the Charitable Dispensary for the benefit of native females. The hospital for females at Cuttack, known as the "Lady Thompson Dispensary" continued to be supported by voluntary subscriptions. A ward for females was constructed at Colgong. There was a maternity ward attached to the Bankipore Dispensary, where a lady doctor is employed at the cost of the Patna Municipality. Lady doctors are also employed at the Arrah and Dumraon dispensaries and at Bihar.

39. *Vaccination.*—The statement in Appendix II gives full information in regard to vaccination. There were 197 vaccinators employed at a cost of Rs. 19,760, and these performed 95,822 operations, of which 80,262 were primary, and 15,560 were revaccinations; of the total operations, 87·4 per cent. are reported to have been successful, against 87·5 in the previous year. Each operator vaccinated on an average 486 persons, the average cost of each operation being 3 annas 9 pies. The proportion of persons primarily vaccinated exceeded 5 per cent. of the total population in the 7 towns named in the margin.

Darjeeling ...	9·8	Jamalpur (Monghyr) ...	8·5
Kurseong ...	5·9	Puri ...	8·8
Faridpur ...	6·1	Ranchi ...	5·4
Jhalakati ...	5·2		

40. *Public Works.*—The expenditure on Public Works declined from Rs. 6,03,830 to Rs. 5,59,030 during the year. The following table compares the expenditure under the several sub-heads during the two years :—

YEARS.	Establishment.	Buildings.	Roads.	Stores.	Total.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
1897-98 ...	73,974	52,811	4,19,908	57,137	6,03,830
1898-99 ...	77,279	41,958	4,23,762	16,031	5,59,030
Increase (+) or decrease (—)...	+3,305	—10,853	+3,854	—41,106	—44,800

41. *Public Instruction.*—The total expenditure under this head, as shown in Form III, fell from Rs. 1,31,789 to Rs. 1,26,874, the decrease being shared by all the Divisions, except Rajshahi, Chittagong and Patna, where there was a slight increase.

The total expenditure on primary education, which amounted to Rs. 65,576, shows a falling off of Rs. 2,606. The following table compares the expenditure on primary education, Division by Division, during the last two years :—

NAME OF DIVISION.	Cost of teaching half the boys of a school-going age in the municipalities in each Division at 10 annas per head.	TOTAL EXPENDITURE ON PRIMARY EDUCATION.		Variation between the figures in columns 2 and 4.	Variation between the figures in columns 3 and 4.	RATIO OF EXPENDITURE ON PRIMARY EDUCATION TO TOTAL ORDINARY INCOME.	
		1897-98.	1898-99.			1897-98.	1898-99.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.		
Burdwan ...	12,321	12,670	11,662	—659	—1,008	1·4	1·3
Presidency ...	14,084	15,629	14,027	—57	—1,602	3·1	2·7
Rajshahi ...	3,610	5,995	5,838	+2,228	—157	2·7	3·1
Dacca ...	6,752	5,653	5,699	—1,153	—54	2·5	2·2
Chittagong ...	2,009	2,152	2,437	+428	+285	2·4	2·3
Patna ...	18,975	14,908	15,406	—3,569	+498	3·4	3·2

Total ...	68,316	63,182	65,576	—2,740	—2,606	2·9	2·6

The prescribed standard of expenditure on primary education, as shown in column 2, was attained only in three Divisions, viz., Rajshahi, Chittagong and Orissa, whilst in Dacca and Patna it was much below the standard.

42. *Loans.*—The table in Appendix K shows the loan transactions of municipalities during the year. The new loans raised and the purposes for which they were obtained are shown in the margin. At Darjeeling the Commissioners received an instalment out of the total loan of Rs. 1,20,000 for the electric light installation. The total loan liabilities of municipalities at the close of the year amounted to Rs. 30,41,562.

Name of Municipality.	Amount of loan.	Purpose.
	Rs.	
Rajpur	3,750	Water-supply.
South Barrackpore ...	2,400	Ditto.
Krishnagar ...	28,000	Drainage and water-supply.
Rampur Boalia ...	5,000	Drainage works.
Darjeeling ...	15,000	Electric lighting.
Cox's Bazar ...	2,000	Construction of office building.
Gaya	45,000	Sanitary improvements (introduction of Part IX).
Total ...	1,01,150	

43. *Financial condition of municipalities in debt to Government.*—The statement in Appendix N shows the financial condition of municipalities which were in debt to Government during the past year. The list contains the names of 32 municipalities. The solvency of all of these, given full collection of their revenues, is undoubted, and the following remarks will furnish an explanation of what is shown by the figures. In three cases, as specially reported by the Accountant-General, viz., Howrah, Faridpur, and Puri, the Municipal Commissioners made default in the payment of the instalments in repayment of the loans. The Howrah Municipality, by far the most important of these, was unable to pay punctually either of the two instalments of Rs. 43,151-11-2 for the water-works loan which fell due on the 1st April and 1st October 1898. The April instalment was fully paid up, with penal interest, towards the middle of January 1899, whilst Rs. 34,000 was paid on account of the other instalment up to the close of the year, leaving a balance of Rs. 9,151-11-2 to be paid during the current year. The financial position of this municipality is critical, and has already attracted the special attention of Government. For the reason it is unnecessary to look further than the facts stated in paragraph 11 above. The finances of a body which does not collect more than 66·7 of the current, and 60·09 of the gross, demand cannot be in other than a bad position; and it is once more necessary to emphasise the urgent necessity for improvement in this respect. The resources available are ample, even without resorting to additional taxation, and no excuse is possible for the failure to make provision out of them for the loan obligations of the municipality. At Faridpur an instalment of Rs. 632, payable on the 1st August 1898, was paid up in three instalments by January 1899. The Puri Municipality failed to pay an instalment of Rs. 1,253, due on 1st April 1898, and the money was paid up in September 1898. Municipalities must realise that their loan charges are a first charge on their finances, and must be given precedence over all others. A glance at the figures in column 18 of the statement in Appendix N will show that, besides the above cases, the ordinary income of the municipality, after meeting the ordinary charges of municipal administration, fell short of the amount payable on account of loan charges during the year in the thirteen municipalities named in the margin. In the remaining cases the financial ability of the municipalities to promptly meet their loan charges is beyond doubt. As regards the cases noted above, it appears that none made any default in the payment of the periodical instalments, and that, with one exception, balances were in hand at the close of the year much in excess of the deficit shown against them.

Name of Municipality.	Deficits.	Percentage of total collections on total demands on account of rates and taxes.	Closing balance.
	Rs.		Rs.
Serampore ...	1,875	61·0	8,917
Ranaghat ...	1,062	89·8	2,347
Nadia ...	845	82·5	779
Meherpur ...	174	98·0	752
Kotechandpur ...	354	95·5	1,100
Rampur Boalia ...	2,853	72·1	4,158
Nasirabad ...	2,140	93·7	5,546
Cox's Bazar ...	686	94·1	1,238
Gaya ...	3,574	99·8	22,900
Arrah ...	36	89·6	1,810
Muzaffarpur ...	501	91·6	4,206

In others, notably Serampore, Rampur Boalia and Puri, nothing but stricter attention to collections is needed to put their financial soundness beyond question.

44. *Audit of accounts and embezzlements.*—The Lieutenant-Governor regrets to notice the long list of cases of embezzlement brought to light during the year in course of audit of accounts or otherwise. These occurred in the municipalities of Maniktala, Baduria, South Barrackpore, South Dum-Dum, Patna, Durbhanga, Bhagalpur, Kishanganj, Lohardaga, and Chaibassa. In most of these cases the offenders were prosecuted and punished. The worst case occurred in Bhagalpur, where three tax-collectors embezzled an aggregate sum of Rs. 1,095. These cases indicate laxity in the management of, and supervision over, the collection department, and the Lieutenant-Governor trusts that greater regard will in future be paid to the account rules by Chairmen and Vice-Chairmen of municipalities. The reports disclose that in several cases proper security bonds in the form prescribed by Government have not been taken from Municipal employés entrusted with the collection and handling of money. For this there can be no excuse.

45. *Working of the Porters and Dandiwallas' Act.*—The Act is in force only in the Darjeeling Municipality. The total number of porters and *dandiwallas* registered during the year was 750, against 878 in the previous year. There were 22 prosecutions under the Act, against 24 in 1897-98, and the amount of fines realised was Rs. 39. Only one license was cancelled during the year. The law continued to be carefully worked, and a close supervision is exercised over the porters and *dandiwallas*.

46. *General working of the Bengal Municipal Act, 1884, during the year.*—Mr. J. Kennedy, Officiating Commissioner of the Burdwan Division, makes the following remarks on the subject:—

"It seems to me municipal management would be greatly improved by an amendment of section 46 of the Act. The power of the Chairman to appoint, fine and dismiss all servants of the municipality should be independent of the Commissioners. If it is necessary to give municipal servants power to appeal from such orders, the appeal should lie to the District Magistrate only. The present system is carefully calculated to form a spirit of insubordination among the servants of the municipality. As to Howrah, I think the time has come when it should be merged in Calcutta, of which it really forms a part. The interests of the two towns are identical, and with the amalgamation many of the difficulties of Howrah administration would disappear."

47. The following are the comments of Mr. Buckland, Commissioner of the Presidency Division:—

"The many defects in the system of municipal administration which have been noticed in previous reports still exist. The only satisfactory feature in the municipal administration during the year, is the improvement in the matter of collection, due to special pressure put by me upon the municipal authorities. Want of supervision and a general reluctance on the part of the municipal executive to resort to coercive measures, caused by the fear of becoming unpopular, and consequent laxity in the observance of the rules, still prevail, but the constant issue of orders and circulars and the close watch kept by myself and the Magistrates on their working have produced the improvement indicated by the figures, particularly in some important but most backward municipalities in this respect, such as Krishnagar, Santipur, South Suburban, &c."

48. Mr. P. Nolan, Commissioner of the Rajshahi Division, writes:—

"In my opinion municipal institutions have taken deep root in this Division and produced excellent results. What is wanted is to raise the administration where it is least satisfactory, as in Rangpur, with regard to finances in Pabna, and perhaps in Bogra, to the higher standard attained in Dinajpur and Rampur Boalia, also in the hill stations of Darjeeling and Kurseong."

49. Mr. H. Savage, Commissioner of the Dacca Division, has recorded the following remarks:—

"In all the municipalities, except Dacca and Nalchiti, there has been harmony between the Commissioners and the Executive, and on the whole the municipal administration of the year has been a success.

"Dacca and Nalchiti have both suffered from factious opposition which, in the former in particular, has delayed the execution of many much-needed improvements."

50. Mr. J. A. Bourdillon, C.S.I., Commissioner of the Patna Division, quoting the remarks contained in his General Administration report, observes that on the whole the year has been one of general progress and improvement.

51. Mr. H. C. Williams, Commissioner of the Bhagalpur Division, writes :—

"Taking charge at the end of April, the only municipalities I have seen anything of are Bhagalpur, Purnea and English Bazar. Generally, the Municipal Commissioners seem to take interest in their work, and when aided by the advice of the district officials do really good work. The municipal administration for the year is undoubtedly satisfactory, although in Bhagalpur there is still great room for improvement. Party spirit does not run so high in this Division as in the suburban municipalities round Calcutta, and there is not the deadlock that at times prevails there. I have already alluded to the small percentage of rate-payers in this Division, and in connection with this should like to note that when an assessor is appointed by Government to revise assessments, he should be a Government officer, lent for the work, and one who, if possible, has had some experience of it. Both in Hooghly and Bhagalpur enquiries have shown that the assessment was not well done by Government nominees. Regarding the attendance of Municipal Commissioners, I find that often Government officers are the worst absentees, and have had to call the attention of several to this fact.

"My thanks are due to Mr. Ritchie for having undertaken, under the orders of Government, the duties of the Chairman of the Bhagalpur Municipality—a no light task—and the Vice-Chairman, Babu Kirti Chunn Chatterjee. They deserve great credit for extricating it to some extent from the very difficult and insolvent position to which it had been driven by past inefficient management. The financial condition has improved somewhat, and it is hoped that in the current year it will attain a working balance. Mr. O'Brien, the Chairman, and the Vice-Chairman, Babu Jogendra Nath Mukerjee, also deserve prominent mention for the satisfactory condition of the Purnea Municipality. The Chairman of Deoghur, Mr. Hoard, also again deserves very special mention.

"As regards the honorary service rendered by other non-official gentlemen, the following deserve special mention:—Babu Shiva Nandan Prosad Sinha, Vice-Chairman, Monghyr Municipality; Mr. A. W. Rendell, Chairman, Jamalpur Municipality; Babu Hari Churn Gangooly, Chairman, Colgong Municipality; and Babu Pashupati Nath Bose, Vice-Chairman, Sahibganj Municipality."

52. The following are the comments of Mr. C. R. Marindin, Commissioner of the Orissa Division :—

"I have no personal knowledge of the different municipalities, as I have only lately joined the Division, but judging from the reports there is a good deal of shortcoming in all of them in respect to conservancy, drainage maintenance of roads, and lighting in most of the municipalities, especially in Cuttack. I believe that this is due in a great degree to want of money, but at the same time I am of opinion that Municipal Committees might do a great deal to keep their towns wholesome and clean by more frequent and stringent use of their regulating and prohibitive powers under the Act. I have lately had occasion to impress this upon the Chairman of the Cuttack Municipality. Puri occupies a unique position among municipalities as a centre from which cholera may be spread to all parts of India and even beyond it, and I think it is a serious question whether the sanitation of the town should be left in the hands of the Municipal Committee, constituted as it is at present."

53. Mr. A. Forbes, C.S.I., Commissioner of the Chota Nagpur Division, concludes his report with the following remarks :—

"Regarding the general working of the Municipal Committees I am glad to be able to endorse the remarks I made in last year's report. In many instances much good work has been done by the non-official Vice-Chairman and occasionally, though I confess rarely, by one or more of the other Commissioners, while the Committees have almost invariably shown themselves ready to listen to the advice given by the Deputy Commissioners or by this office in regard to their budget requirements and questions of sanitation, assessments and other matters."

54. On the whole the year was one of progress, and in most branches of municipal administration the Lieutenant-Governor is glad to note the achievement of undoubted, if not very conspicuous, improvement. The excellent work done in Patna has been noticed in paragraph 36 above. There are many places, as has been noticed in the course of this review, in which there is great need of improvement. The prominent defects are in the assessment of the municipal taxes and the collection of them. To these the attention of the Committees has been definitely drawn. They are dangers from which no municipality is exempt, if its Commissioners fail to be watchful. Inadequacy of assessment is not infrequently accompanied by bad collections. The case of Darbhanga has already been noticed in parapraph 2. What can be effected if the local authorities devote their energies to the work is shown by the results attained in the municipalities named in paragraph 11 and by the improvement brought about in the Presidency Division under the pressure

applied by the Commissioner. The Lieutenant-Governor trusts that all Municipal Commissioners will take this example to heart, and will, during the ensuing year, apply themselves vigorously to the task of placing their assessment lists on a proper footing, and of seeing to it that the assessees pay their just dues in full.

By order of the Lieutenant-Governor of Bengal,

E. N. BAKER,

Secretary to the Government of Bengal.

FORM No. I.

STATEMENT SHOWING THE CONSTITUTION OF THE MUNICIPALITIES IN BENGAL

DURING

1898-99.

THE following is published for general information.

REVENUE DEPT.,
The 12th February 1900.

F. A. SLACK,
Offg. Secy. to the Govt. of Bengal.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Preliminary Note on the Wheat Crop of Bengal in 1899-1900.

Explanatory.—The present return furnishes estimates of the area and outturn of the wheat crop in all the wheat-growing districts of these Provinces. No wheat is grown in the districts of Khulna, Bogra, Dinajpur, Dacca, Backergunge, Tippera, Noakhali, Chittagong, and Puri.

2. *Character of the season.*—The rainfall in September was general in North and East Bengal, slightly above the average in Bihar, but largely deficient in Orissa and Chota Nagpur. In October the rainfall was deficient everywhere, except in Orissa and East Bengal, where it was excessive. No rain fell in November in these Provinces, except in the Chittagong Division. In December the rainfall was almost nil over the whole Province, and was entirely absent in Bihar and Chota Nagpur. Rain is reported to have fallen in Bihar and Chota Nagpur about the middle and close of January, which has improved the prospects of the wheat crop. On the whole, the weather has not been unfavourable to wheat, so far, in the principal wheat-growing districts of Bengal and Bihar, although it has proved unseasonable in parts of Orissa and Chota Nagpur owing to deficient rainfall.

3. *Area sown.*—The figures representing the normal area have been revised in a few cases since last year, in consequence of which the provincial total now stands at 1,578,100 acres, against 1,576,200 acres shown in the preliminary forecast for the year 1898-99.

The total area cultivated in wheat this year is, as estimated by the District Officers, 1,536,700 acres, against 1,592,400 acres sown in 1898-99. There has thus been a slight decrease of nearly 3·5 per cent. The decrease is noticeable generally in the districts of the Bhagalpur and Chota Nagpur Divisions, as well as in Shahabad, Muzaffarpur, and Rajshahi. It is due to unfavourable climatic conditions at the time of sowing the crop. Nadia shows on the other hand a largely increased area.

4. *Outturn.*—The outturn of wheat is, according to the district returns, expected to be above the normal in the districts of Saran (110), Palamau (110), Rajshahi (102), and Burdwan (101); normal in 24-Parganas, Darjeeling, Faridpur, Bhagalpur, Malda, and Balasore, and below the normal in the remaining 35 districts. Out of these 35 districts, nine* districts report a crop varying from 90 to 98 per cent. of the normal, and in six† districts it varies from 80 to 88. In the remaining 20 districts it falls below 80. In Ranchi, where the area under wheat is very small, the prospects are specially unfavourable. The arithmetical mean of the district figures representing the outturn for the Province amounts to 94 per cent. of a normal crop. There appears, however, little doubt that some of the District Officers have under-estimated the outturn, and it is anticipated that the general outturn for these Provinces will fall little short of the normal, against 105 per cent. estimated in 1898-99.

CALCUTTA,
The 1st February 1900.

First Forecast of the Wheat Crop of Bengal, 1899-1900.

Division.	District.	Approximate normal area under wheat.	Approximate area sown last year (1898-99).	Estimated area sown this year (1899-1900).	Taking 100 to represent the normal outturn per acre, how much represented the outturn last year (1898-99)?	Taking 100 to represent the normal outturn per acre, how much will represent this year's outturn (1899-1900)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9
		Acres.	Acres.	Acres.				
Burdwan.	Burdwan ...	1,400	1,300	1,300	110	101	The outturn is expected to be normal owing to the favourable condition of the season.	
	Birbhum ...	5,000	5,000	5,000	100	80	There has been very little rain since the beginning of October. No good wheat crop is expected.	
	Bankura ...	5,500	5,700	5,600	87	68	....	
	Midnapore ...	2,1 00	4,300	2,800	90	95	In the Sadar subdivision the whole of the normal area was brought under cultivation, but in the Ghatal subdivision more than the normal area was cultivated owing to seasonable rainfall.	It appears that the area under cultivation last year has been over estimated by the Collector.
	Hooghly ...	100	100	100	80	65		

Division.	District.	Approximate normal area under wheat.	Approximate area sown last year (1898-99).	Estimated area sown this year (1899-1900).	Taking 100 to represent the normal outturn per acre, how much represented the outturn last year (1898-99)?	Taking 100 to represent the normal outturn per acre, how much will represent this year's outturn (1899-1900)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9
		Acres.	Acres.	Acres.				
Presidency.	24-Parganas ...	300	300	300	120	100	....	
	Nadia	43,460	27,000	31,500	57	82	The weather was favourable during the sowing season, hence there has been an increase in the area sown, but after the sowing, there has been no rain, and the estimated outturn is therefore short of the normal.	
	Murshidabad	130,000	145,000	144,500	99	82	The decrease in the estimated area and outturn as compared with those of the last year is due to the want of seasonable rainfall in November and December last.	
	Jessore ...	2,600	1,700	1,600	77	77	Last year's percentage outturn has been revised.	
Rajshahi.	Rajshahi ...	74,200	77,800	67,200	110	102	The normal area has been revised. Owing to the flood being late this year, some lands were not sown, hence the decrease in the current year's area.	
	Jalpaiguri ...	3,200	1,900	1,800	75	70	Owing to the late rains less area was cultivated. The short outturn this year is due to the want of rain in the month of December last.	
	Darjeeling ...	5,100	5,100	5,000	75	100	....	
	Rangpur ...	30,700	36,700	30,700	87	67	....	

RAJSHAHI.	Pabna ...	16,000	16,000	16,000	100	90	A small outturn is expected as there has been no rain up to date, since the close of the rainy season.	
DACCA.	Mymensingh	8,000	8,000	8,000	75	75	....	
	Faridpur ...	2,000	2,000	2,000	100	100	It is yet too early to form a definite estimate of the outturn, but there is no reason to think that the crop will be below the average.	
PATNA.	Patna	105,000	107,000	108,200	95	90	....	
	Gaya	157,600	142,200	143,200	102	90	The absence of rain up to date has adversely affected the prospects of the crop.	
	Shahabad ...	122,000	120,000	112,000	94	91	Owing to the early cessation of rains the full normal area could not be brought under cultivation. This, as well as the strong westerly wind, are likely to affect the outturn to a certain extent.	
	Saran	120,000	130,000	130,000	120	110	The rain in the middle of January has benefitted the crop. There was some damping off, after germination, but on the whole a good crop is expected.	
	Champaran ...	118,000	118,000	118,000	115	90	The rainfall in September last enabled the cultivator to sow the normal area, but a low outturn is expected owing to the cessation of rain since October last.	
	Muzaffarpur	69,700	71,000	62,700	100	95	The normal area has been revised. The outturn this year is estimated to be below normal, owing to want of rain in the Sitamarhi subdivision, since the rainy season.	The Collector will be asked to explain the large reduction of area.
	Darbhanga ...	109,600	109,600	109,600	105	88	The crop in the Sadar Subdivision has suffered from excessive rain.	
BHAGALPUR.	Monghyr ...	100,000	101,000	103,000	96	99	The increase in the area under cultivation is due to the fact that some paddy-fields which could not be sown with paddy owing to submergence in water at the sowing time were subsequently sown with wheat.	
	Bhagalpur ...	214,000	209,000	193,000	106	100	The recent rains in the middle of January may improve the prospects of the crop.	
	Purnea ...	24,000	23,000	20,300	95	95	On account of the heavy autumn rains most of the lands were too moist at the time of sowing, and hence the decrease in area sown this year.	
	Malda ...	60,000	85,000	80,000	110	100	The decrease in the area and outturn as compared with those of the last year is due to insufficient rainfall at the time of sowing. However an average outturn is expected this year.	The Collector will be asked to explain the large reduction of area.
	Sonthal Parganas.	14,900	12,400	14,900	92	93	The outturn is expected to be nearly normal this year owing to timely rainfall.	
ORISSA.	Cuttack ...	1,500	2,100	2,100	75	75	An average outturn is not expected this year, as no silt was deposited as in normal years on the land owing to low flood.	
	Balasore ...	500	200	200	83	100	The average outturn is due to seasonable rainfall.	
	Angul and Khondmals.	100	100	200	100	60	The low outturn is due to want of rain after sowing.	

Division.	District.	Approximate normal area under wheat.	Approximate area sown last year (1898-99).	Estimated area sown this year (1899-1900).	Taking 100 to represent the normal outturn per acre, how much represented the outturn last year (1898-99)?	Taking 100 to represent the normal outturn per acre, how much will represent this year's outturn (1899-1900)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.

		Acres.	Acres.	Acres.				
Chota Nagpur.	Hazaribagh ...	8,100	8,[illegible]00	6,500	94	75	The season has been unfavourable owing to the want of rain. This accounts for the decrease in the area and outturn.	
	Ranchi ...	1,200	1,400	200	100	10	Owing to the unfavourable condition of the season the outturn is expected to be very poor.	
	Palamau ...	14,700	13,500	3,400	94	110	Want of rain at the sowing time has prevented about three-fourths of the normal area from being sown. The outturn will be very good as it is raining now.	
	Manbhum ...	5,000	4,200	4,200	105	85	......	
	Singhbhum ...	2,660	2,600	1,400	100	72	The decrease in the area and outturn is due to the unfavourable rainfall.

WEATHER AND CROP REPORT.

For the week ending the 12th February 1900.

Burdwan.—No rain. Weather seasonable. Threshing of *aman* still continues. Pressing of sugarcane commenced. *Rabi* crops doing well. Fodder and water sufficient. Cattle-disease in Raniganj. Common rice selling as follows:—

	Srs.	
Sadar	15	per rupee.
Kalna	13½	
Katwa	15	
Raniganj	14	

Birbhum.—Rainfall nil. Weather seasonable. *Rabi* crops doing well. Price of common rice at Sadar 13½ seers and at Rampur Hât 14 seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Bankura ·40. Weather generally fair. Storm and rain las evening (11th). *Rabi* crops doing well. Pressing of sugarcane progressing. Fodder and water sufficient. Rice selling at Bankura 15 seers and at Vishnupur 14 seers per rupee.

Midnapore.—No rain. Weather seasonable. Prospects of *rabi* good. *Boro* is being sown. Cattle-disease reported from Garhbeta and Nayagram. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	14	per rupee.
Contai	18	
Tamluk	13	
Ghatal	15	

Hooghly.—Weather cloudy during the latter part of the week. Good rainfall last evening (11th). Harvesting of *rabi* crop continues. Cattle-disease prevails in Pandua and Dhaniakhali. Common rice sells at 14 seers 1 chitak per rupee.

Howrah.—No rain. Weather rather hot for the season. Transplantation of *boro* in Ulubaria still going on. Condition of *rabi* good. Fodder and water sufficient. Common rice sells at 13¾ seers per rupee.

24-Parganas.—Rainfall at Sadar ·25. Weather seasonable. Prospects of crops good. *Rabi* crops are being briskly harvested. Rain wanted for ploughing. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	14	0	per rupee.
Barasat	16	0	
Basirhat	15	11	
Diamond Harbour	13	5	

Nadia.—No rain. Weather seasonable. Prospects of standing crops good. Lands being cultivated for *aus*. Fodder and water sufficient except in Chuadanga, where scarcity of water felt in some places. Price of common rice stationary.

Murshidabad.—No rain. Weather seasonable. *Rabi* doing generally well. No cattle disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	15	per rupee.
Jangipur	14½	
Kandi	15½	

Jessore.—Rainfall at Sadar ·38. Weather cloudy and warm. Harvesting of *aman* paddy finished. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	16	per rupee.
Jhenida	18	
Magura	16½	
Narail	16	
Bangaon	18	

Khulna.—Rainfall nil. Weather hot. Harvesting of *aman* completed. *Rabi* crops doing well. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	16¾	per rupee.
Bagerhat	...	...	...	16½	
Satkhira	...	...	...	17	

Rajshahi.—Weather seasonable. Prospects of crops good. No cattle-disease. Fodder and water plentiful. Common rice sells at 18¼ seers per rupee.

Dinajpur.—Rainfall nil. Weather seasonable. Standing crops good. Fodder and water plentiful. Rice selling at Sadar 17 seers and at Thakurgaon 16 seers per rupee.

Jalpaiguri.—Rainfall nil. Weather seasonable. Harvesting of mustard going on. Tobacco doing well. Fodder and water sufficient. Common rice sells at 16 seers per rupee.

Darjeeling.—No rain. Weather seasonable. *Hills*:—*Tori* being harvested; wheat, barley and potatoes progressing. *Terai*:—Harvesting of mustard going on; tobacco doing well. Coarse rice sells as follows:—

					Srs.	
Hills	...	...	...	...	10	per rupee
Terai	...	...	...	...	16	

Bhutta sells at Darjeeling 20 seers and at Kalimpong 24 seers per rupee.

Rangpur.—Rainfall nil. Weather seasonable. Potatoes and mustard are being harvested. Common rice sells at 18½ seers per rupee. Fodder and water sufficient.

Bogra.—No rain. Cultivation for *aus* and jute going on. Prospects good. Fodder and water ample. Common rice sells at 18¼ seers per rupee.

Pabna.—Rainfall ·52 at Sadar. Weather partially cloudy and rainy. Prospects good. *Rabi* crops being harvested; yield fair. Prices stationary.

Dacca.—Rainfall nil. Weather seasonable. Prospects of crops good. Fodder available. No cattle-disease. Common rice 16 seers per rupee.

Mymensingh.—Rainfall at Sadar ·87, Kishoreganj ·61, Netrokona ·15. Weather stormy. Prospects of crops good. Fodder and water ample. Common rice selling 18 seers per rupee at Sadar and 15 to 18 seers in the subdivisions.

Faridpur.—No rain. Weather hot. State and prospects of crops good. Common rice sells at 17 seers per rupee.

Backergunge.—Rainfall at Sadar ·35. Weather fine. Prospects of crops good. Common rice (new *aman*) sells at 16 seers per rupee.

Tippera.—Rainfall at Comilla ·16. Weather seasonable. *Boro* being transplanted. *Rabi* doing well. Average price of common rice 17 seers per rupee.

Noakhali.—Rainfall at Sadar ·11. More rain desirable. Cattle-disease reported from Chagalnaya. Fodder and water sufficient. Price of common rice stationary.

Chittagong.—Rainfall ·04. Cultivation of *rabi* crops nearly finished. Water and fodder sufficient. Common rice 16 seers per rupee.

Patna.—Rainfall nil. Harvesting of mustard, peas, and *masuri* commenced in many places. Condition of cattle fair. Fodder and water for cattle sufficient. Common rice in Patna sells at 14 seers per rupee.

Gaya.—No rain. Harvesting of *rabi* and lancing of poppy commenced. Price of common rice selling at 13½ seers per rupee.

Shahabad.—No rain. Crops not injured by hail are prospering. Sugarcane being pressed. Fodder and water abundant. A few cases of cattle-disease in Sasaram. Common rice at Sadar 12 seers per rupee.

Saran.—No rain. Weather seasonable. *Rabi* generally doing well. Common rice sells at 12 seers 13 chitaks and *makai* 13 seers 6 chitaks per rupee.

Champaran.—No rain. Prospects of *rabi* and poppy continue favourable. Prices of common rice and maize at Sadar are 12½ and 15½ seers respectively.

Muzaffarpur.—Rainfall nil. Prospects of crops good. Prices are—Common rice 1[illegible] seers 10 chitaks; wheat 12 seers, barley 17 seers, *makai* 14½ seers, gram 15½ seers, and *rahar* 16½ seers per rupee.

Darbhanga.—No rain. Weather cool. *Rabi* doing well. Fodder and water sufficient. Cattle-disease reported from Madhubani. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	14	per rupee.
Samastipur	...	...	...	15	
Madhubani	...	...	...	15½	

Monghyr.—Rainfall at Sadar nil, Beguserai ·11, Jamai ·21. Weather cold and bright. *Rabi* crops doing well. Cessation of rain has improved the prospect of the standing crops. Opium benefited by late rain. Common rice sells as follows:—

				Srs.	ch.	
Monghyr	...	...	...	12	14	per rupee.
Beguserai	...	...	...	14	0	
Jamui	...	...	...	14	0	

Bhagalpur.—Weather bright. Rain at Banka ·35. No more rain needed just now. Prospects of *rabi* crops improved by the rain. Fodder and water sufficient. Sporadic cattle-disease reported from Banka and Supaul subdivisions. Prices stationary.

Purnea.—No rain. Weather cool and clear. Prospects of standing *rabi* crops good. Mustard being harvested. Lands being ploughed for jute and *aus* crops. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	16	per rupee.
Araria	...	...	...	20	

Malda.—Rainfall nil. Weather getting warmer. Condition of standing *rabi* crops good. Harvesting of *kalai* and mustard not finished. Lands are being prepared for *bhadoi* paddy. Transplantation of *boro* paddy going on. No cattle-disease. Price of rice stationary. Fodder and water sufficient.

Sonthal Parganas.—Rainfall nil. Weather seasonable: cold *Rabi* crops doing well. Sugarcane pressing continues. Fodder and water sufficient. Average price of rice 14 seers 6 chitaks and of maize 18 seers 10 chitaks per rupee. Cattle-disease reported from Rajmahal.

Cuttack.—Rainfall nil. Weather seasonable. *Guru sarad*, *kulthi* and *arhar* being harvested. Sugarcane being pressed. Tobacco, cotton, and *dalua* growing Condition of cattle generally good. Fodder and water sufficient. Common rice sells as follows:—

				Srs	ch.	
Cuttack	...	...	...	15	1	per rupee.
Jajpur	...	...	...	17	1	
Kendrapara	...	...	...	18	6	
Banki	...	...	...	14	13	

Balasore.—Rainfall ·13 at Sadar. Threshing of *sarad* and *rabi* crops and pressing of sugarcane continue. Cattle-disease prevails in Balasore and Singla. Rice sells at 17, 13, and 18 seers per rupee in interior, Balasore, and Bhadrak respectively. Fodder and water sufficient.

Angul.—Weather hot. *Khesari* being reaped. Sugarcane being planted. Common rice selling at 12 seers per rupee in Angul. Khondmals report not received.

Puri.—Rainfall nil. Weather seasonable. *Dalua* thriving. Rain wanted for *rabi* crops. Miscellaneous crops doing well. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	16	per rupee.
Khurda	...	...	...	16½	
Interior of district	...	...	...	$16\frac{5}{16}$	

Hazaribagh.—Rainfall nil. Ploughing going on. Fodder and water sufficient. Common rice sells at 12 seers per rupee at Sadar.

Ranchi.—Rainfall nil. Weather seasonable. Ploughing continues. Mango and *mahua* coming into flower. Rice sells at Ranchi 9½ seers and in the interior 10½ seers per rupee. No cattle-disease. Fodder and water sufficient.

Palamau.—No rain. Weather seasonable. *Rabi* doing well. Plantation of sugarcane continues. Fodder and water sufficient. Prices at Sadar are—Rice 11¾ seers, gram 15½ seers, *makai* and wheat 13 seers per rupee.

Manbhum.—Rainfall nil. Weather seasonable. Prospects of crops good. Cattle-disease reported from thanas Purulia, Jhalda, Chandil, Manbazar, Tundi, and Topechanchi. Fodder and water sufficient. Average price of common rice at Sadar 12½ seers and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall nil. Condition of standing crops fair. Common rice sells at 13 seers per rupee.

General Summary.—Rain fell in small quantities in diverse districts in Bengal Proper and in Bhagalpur, Monghyr, and Balasore during the week. The standing *rabi* crops are generally reported to be doing well, and some of the early crops are being harvested. The pressing of sugarcane is in full swing. Spring rice is doing well, and ploughing for autumn rice is beginning. In Ranchi the mango and *mahua* trees are flowering. The price of common rice fluctuated somewhat unsteadily, the results in neighbouring districts being dissimilar. It increased in 11 districts and decreased in 9, and is stationary in the remainder. Cattle are in good condition, there being sufficient fodder for them in every district. Cases of cattle-disease are reported from a few districts.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,
The 13th February 1900.

STOCKS OF RICE IN AND AROUND CALCUTTA.

No. 159 Statistics.—The following is published for general information.

Statistical Department,
The 9th February 1900.

F. A. Slack,
Offg. Secy. to the Govt. of Bengal.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of January 1900

	Inches.	Date.	Hour.
The mean pressure of the month	30·016		
The average pressure of January from 24 years' registers ...	30·014		
The highest pressure in the month	30·213	20th	10
The lowest pressure in the month	29·813	7th	16
The range of pressure	0·400		
	Hours.		
The total number of hours of bright sunshine during the month	182 9		
The maximum possible number of hours of sunshine ...	337·3		
	⊖		
The mean temperature of the month	68·4		
The average temperature of January from 21 years' registers ...	67·7		
The highest temperature in the month	86·3	24th	
The lowest temperature in the month	50·8	14th	
The range of temperature during the month	35·5		
The mean daily range of temperature	21·3		
The greatest range of temperature in one day	28·5	14th	
	Per cent.		
The mean humidity of the month	74		
The average humidity of January from 24 years' registers ...	71		
	Inches.		
The mean vapour tension of the month	0·508		
The average vapour tension of January from 9 years' registers	0·467		
The mean cloud proportion of the month	2·65		
The average cloud proportion of January from 23 years' registers	1·30		
	Ins.		
The total rainfall of the month	Nil		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	Nil		
The average fall of January from 48 years' registers ...	0·43		
The greatest fall in 24 hours	Nil		
	Days.		
The number of rainy days in the month	Nil		
The average number of rainy days in January from 24 years' registers	2		
The mean maximum equilibrium temperature of solar radiation during the month	⊖ 130 5		
The mean difference of sun and air temperatures	49·8		
The greatest sun temperature	139·2	24th	
The greatest excess of sun over air temperature	55·2	9th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	53·0		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	6·8		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	9·9	13th	
	Miles.		
The mean movement of the wind per day	42·3		
The greatest movement of the wind in one day	88·0	19th	
The greatest movement of the wind in one hour	9·0	28th	5 to 6, 6 to 7, & 7 to 8 P.M.

The number of hours with winds from each of the 8 points—
N. 159, N.E. 81, E. 63, S.E. 5, S. 9, S.W. 59, W. 43, N.W. 48, Calm 277.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 2·5 lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

G. W. KÜCHLER,

For *Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.*

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 12th January 1900.

Results of the Meteorological Observations taken at the Alipore Observatory from 4th to 10th February 1900.

	Inches.
The mean pressure of the seven days	29 937
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29 966
	Hours.
The total number of hours of bright sunshine	35·8
The maximum possible number of hours of sunshine	78·5
The mean temperature of the seven days	72·0
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	70·5
The extreme variation of temperature	27·7
The maximum temperature	87·9
	Miles.
The highest velocity of the wind in one hour	5
	%
The mean relative humidity	70
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	69
	Inches.
The total fall of rain from 4th to 10th February 1900	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·33
The total fall from 1st January to 10th February 1900	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·79

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, nd from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the nermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet bove the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, ormerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in he Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 12th February 1900.

G. W. KÜCHLER,
for Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.

said:—"Before making my remarks
most gladly in the expression of the
f our Law Secretary, Mr. Wigley.

"I propose with Your Honour's permission to offer my respectful but firm opposition to the motion of the Hon'ble Member in charge of the Bill. After the exhaustive criticisms of the measure made by the Hon'ble Mr. Apcar, and anticipating others from the Hon'ble Members who will follow and who will be able to speak with authority, I desire to offer only one or two observations.

"Allow me, Sir, to congratulate ourselves on the termination of this unusually long debate, now that we are embarked on the final motion to pass the Bill into law, which also is coming to a close in a couple of hours.

"I must mention at the outset that although I felt at first embarrassed and disheartened at the ruling of order you, Sir, from your exalted Presidential chair thought fit to make,—that the main principles of the Bill, having been settled by the Council at their previous meetings, and by the memorable letter of the Government of India of the 17th June last, were no longer open to discussion, and that all motions relating to the constitution of the several municipal authorities were out of order,—I must confess that that ruling saved this Council from wasting their energy in the discussion of matters which would undoubtedly have been rejected by the majority of this Council, unless they thought fit to alter their opinions after reading the able joint minutes of the Hon'ble Babus Surendranath Banerjee and Narendra Nath Sen and the separate minutes of the Hon'ble Babu Surendranath Banerjee and Mr. Apcar, which was perhaps not probable, if not impossible. But after all it was desirable to have the points thoroughly discussed.

"But above all, Sir, I cannot refrain expressing my regret at the closure of the amendments relating to the constitution of the General Committee at any rate, which caused a great disappointment to us. Without disputing the propriety of the ruling, I beg to observe that although the general principles of the Bill were no doubt discussed at the previous meetings of the Council, it cannot be denied that the only opportunity to discuss the Bill, section by section and clause by clause, and to move formal and practical amendments after the Bill had been examined and criticised by the public, was the one we had at the last reading and discussion of the Bill. The arrangement as to the formation of the General Committee, even if it was in line with the decision of the Council in April, 1898, and accepted at the discussion last month, was liable to be reviewed and reconsidered at the motions of amendments formally

proposed and made after mature consideration on further light supplied by the representations of the several bodies and societies and other persons interested to offer suggestions. In the present case the letter of the Government of India having in a great measure introduced a change, the necessity to discuss principles of the constitution of the General Committee was greater.

"Now, Sir, the General Committee ought to have been constituted in conformity with the representation introduced in the Corporation. This has not even been done. No doubt it may be said that the letter of the Government of India stood in our way; at any rate that is the construction that has been put upon it, and I do not say that it is not susceptible of that interpretation. But the letter is susceptible of a more liberal construction, having in view the sympathetic tone and broad principles enunciated by the Government of India in that letter. The letter says, no doubt in most distinct terms, that one-third of the total number of 12 members of the General Committee should be nominated by the Government and the remaining two-thirds by the Corporation, which may at first sight mean that half of the two-thirds should be nominated by the Ward Commissioners and the other half by the Commissioners appointed by the mercantile bodies and the Local Government; but, if we examine more closely, it would appear that the Government of India were anxious to see 'that a strictly fair and proportionate representation of the constituent elements of the electoral body' was secured, and with that view desired the Local Government to devise some plan to attain that object. Now, Sir, three-fourths of the nominated Commissioners, *viz.*, 15, are appointed by Government and are not the representatives of any section of the electoral body. Therefore, in allowing them to take part in the nomination of the members of the General Committee, along with the Commissioners appointed by the mercantile community, the result has been to reduce the representation of the Ward Commissioners to one-third instead of half, as in the Corporation, and augment that of the mercantile community and Government to two-thirds. If, on the other hand, the Commissioners nominated by the Government were made to join with the Ward Commissioners in nominating the members to the General Committee, the representation would not have been so unequal, for the mercantile bodies would have a fair representation, namely, one-fifth, which is the proportion in the Corporation; but the best arrangement would have been to allow the Ward Commissioners and the Commissioners appointed by the mercantile bodies to nominate the two-thirds of the number of the members of the General Committee in the ratio of 5 to 2, the Government nominating the remaining one-third in consultation with the Commissioners appointed by them. This arrangement, I venture to think, would have been consistent with the views of the Government of India, as passages such as—'The Bengal Government will doubtless, therefore, find it

desirable to suggest some plan that will secure to that proportion (two-thirds) of the General Committee, which is to be elected by the entire Corporation, a *strictly fair and proportionate* representation of the constituent elements of the electoral body' (paragraph 19), and '........ that there are features in Sir Alexander Mackenzie's Bill which are not in entire accordance with the principles just laid down, and which might not in practice ensure that amicable and patriotic co-operation of all parties in the future municipal government of the city, which is essential to its efficient administration' (paragraph 8)—evidently tend to show.

"The Government by the present arrangement secured a representation in the General Committee through the nomination by the Commissioners appointed by them, who, along with the representatives of the Trade and Commerce, nominate half of two-thirds reserved for the Corporation, and again has the right to nominate the one-third reserved for Government. Such anomaly could have been avoided if the subject had been discussed at the Council. Let us, however, hope for the best. The remedy is not gone yet; it has only been transferred to the hands of the Government, and I earnestly hope your Government will so nominate the members to the General Committee as to ensure that 'amicable and patriotic co-operation' as to harmonise the interests of the rate-payers with other interests.

"The strongest complaint of the rate-payers is that the reduction in the number of Commissioners, assuming that reduction in the numerical strength of the Corporation was necessary, for which no case seems to have been made out, has been directed to the body of the Ward Commissioners only without a corresponding reduction in the number of nominated Commissioners. The result has been a reduction in the elected representation of the rate-payers from two-thirds to half in the Corporation and from two-thirds to one-third in the General Committee, thus placing the elected representation in a standing minority. The tendency of this legislation has been the violation of the first principle of local self-government, *viz.*, the representation of the interests of the rate-payers. If the object has been, as it is avowed to be, to do away with the Hindu preponderance and to give adequate representation to the interests of trade and other communities, that, I venture to submit, has not been secured; for no provision has been made to represent native trade and the interests of Muhammadan and other communities of Calcutta. I hope this will be remedied by nomination that is in the hand of the Government.

"Another chief and vital objection to the present measure has been the deprivation of the Corporation of their general power of control and creation of independent and co-ordinate authorities, thus rendering the Corporation almost an useless and powerless body. Under the present arrangement, the main principle of local self-government, namely, the vesting of responsibility to the body to make it efficient, is wanting. The Corporation, shorn of all controlling power, cannot be said to be a responsible body, but on the other hand the whole blame attaches to that body in case of default made by the Chairman or the General Committee, especially when the chapter on control by Government has been made more stringent than before. To my

mind it seems perfectly plain that sound legislation lies in providing stricter control in proportion to larger delegation of authority to local bodies, but in this instance the proportion has been the reverse of that principle.

"I think I ought to refer to one other feature, among others, of the Bill, *viz.*, the special provisions regarding the acquisition of land by the Corporation. They violate the accepted principles governing the cases of compulsory acquisition and the ordinary rules of evidence bearing on the subject, thus putting the owners whose lands may be acquired by the Corporation in a worse position than when the acquisition is made for purposes other than municipal.

"I take this opportunity to acknowledge that there have been introduced many provisions tending to definite improvement of the future sanitation of Calcutta. I should like to specially mention with a degree of pleasure the sound and improved rules regarding the regulation of buildings and bustees, although perhaps here and there slight concessions were possible. I admire, however, the stern attitude the Hon'ble Mr. Buckley assumed in being very slow to make concessions in this Council, for he said he would make no further concession, having already made all concessions that could have been made when the Bill was before the Select Committee, for which the people are grateful to him.

"If the Hon'ble Member had not assumed that attitude, I am afraid it would have been difficult to introduce reforms in this direction, as the people everywhere are always slow to realize the good intentions of the reforms, and are reluctant to the introduction of changes.

"I beg leave to thank the Hon'ble Members opposing the opposition section—I mean the section representing the popular side of the question—for the very kind and courteous manner in which they have treated throughout this long debate the members holding opposite opinions.

"And above all our thanks are specially due to you, Sir, for the very kind and patient hearing you have given us, and the greatest consideration you have shown in accepting some of the proposals which you thought reasonable but which would otherwise have been lost.

"In conclusion, I join in imploring the Government to take up the revision of Schedule III of the Bill at no distant time, and find out if any means could be devised to improve the finances of the Corporation; for to carry out the many reforms that may be necessary to be introduced when this Bill becomes law large funds will be needed.

"The interests of the land and house owners have been, in the opinion of all, heavily taxed, and no appreciable increase of revenue is expected therefrom. I beg to reiterate our fervent hope that your Government will, in nominating Commissioners both in the Corporation and the General Committee, exercise the power so as to harmonise the interests of all communities."

REGISTERED No. 29.]

SPECIAL SUPPLEMENT TO

The Calcutta Gazette.

WEDNESDAY, FEBRUARY 14, 1900.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met in the Council Chamber on Saturday, the 6th Jannuary, 1900.

Present:

The Hon'ble SIR JOHN WOODBURN, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
The Hon'ble Mr. W. B. OLDHAM, C.I.E.
The Hon'ble Mr. R. B. BUCKLEY.
The Hon'ble Mr. C. W. BOLTON, C.S.I.
The Hon'ble Mr. E. N. BAKER.
The Hon'ble RAI DURGA GATI BANERJEA, BAHADUR, C.I.E.
The Hon'ble Mr. C. E. BUCKLAND, C.I.E.
The Hon'ble Mr. F. A. SLACK.
The Hon'ble KHAN BAHADUR MAULVI DELAWAR HOSAIN AHMED.
The Hon'ble MR. J. PRATT.
The Hon'ble BABU JATRA MOHAN SEN.
The Hon'ble Mr. T. W. SPINK.
The Hon'ble RAJA SASHI SHAKHARESWAR ROY, BAHADUR, OF TAHIRPUR.
The Hon'ble RAJA RANAJIT SINHA, BAHADUR, OF NASHIPUR.
The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH, C.I.E.
The Hon'ble MR. D. F. MACKENZIE.
The Hon'ble MR. J. G. APCAR.
The Hon'ble DR. ASUTOSH MUKHOPADHYAYA, M.A., D.L., F.R.A.S., F.R.S.E.
The Hon'ble BABU SURENDRANATH BANERJEE.

QUESTIONS AND ANSWERS.

Election of Municipal Commissioners.

The Hon'ble Mr. D. F. Mackenzie asked:—

Has the attention of Government been called to an article in the *Reis and Rayyet* published on 9th December, in which it is alleged that no valid election of Commissioners can be held under the new Calcutta Municipal Act in March next?

Does the Government consider that the suggestion in the article is well founded? And, if so, what action does Government propose to take in the matter?

The Hon'ble Mr. Baker replied:—

"The attention of Government has been drawn to the article in question. The point now raised by it was brought to notice while the Calcutta Municipal Bill was under consideration; and the Government was then advised that the provisions of the Bill relating to the initial elections in March, 1900, were properly framed and were not open to objection.

"After the publication of the article in the *Reis and Rayyet* referred to in the question, the matter was referred to the present Advocate General, whose opinion is to the following effect:—

'Act III (B.C.) of 1899 was first published in the Calcutta Gazette with the consent of the Governor General on the 22nd November, 1899, and by such publication section 42 of that Act came, as I read the Act, into force on that date, though the Act in its entirety does not come into operation until the 1st April, 1900, and repealed so much of section 15 of Act II (B.C.) of 1888 as empowers the electors of each of the 25 wards into which Calcutta is for municipal purposes divided to elect two Commissioners, and so much of section 19 as provides for the holding of a general election to take effect from 1st April, 1901.

'For these reasons, I am of opinion that section 42 of Act III (B.C) of 1899, read with section 1 of that Act, is sufficient to legalise a general election of one Commissioner for each of such 25 wards under Act II (B.C.) of 1888 at such time in March, 1900, as may be appointed by the Local Government.'

"The suggestion made in the article is, therefore, not well founded, and no action on the part of Government is necessary."

THE DARJEELING MUNICIPAL BILL.

The Hon'ble Mr. Baker moved that the Bill to amend the Bengal Municipal Act, 1884, in its application to Darjeeling be referred to a Select Committee consisting of the Hon'ble Mr. Oldham, the Hon'ble Mr. Buckley, the Hon'ble Mr. Buckland, the Hon'ble Babu Jatra Mohan Sen, the Hon'ble Dr. Asutosh Mukhopadhyaya, the Hon'ble Babu Surendranath Banerjee and the mover, with instructions to report in a fortnight.

He said:—"When introducing the Bill, I described its chief provisions and the general object of it at some length. The Bill has also now been in Members' hands for a fortnight. It is, therefore, not necessary for me to go over this ground again.

"On these occasions, however, when a motion is made to refer a Bill to a Select Committee, it is usual to discuss and settle the principles of the measure, and I will endeavour to do this on the present occasion.

"In one sense this is a comparatively easy task; for the Bill now before the Council is essentially a measure of details. No constitutional questions are raised in it. It is of very limited operation, applying only to a single Municipality. The structure of the Municipality is untouched. None of the existing functions, powers or obligations of the Commissioners are affected. What we desire to do is to supplement their powers in respect of certain matters concerning roads, drains and buildings in which the provisions of the present law are defective in such a town as Darjeeling. And this we seek to do by enacting supplementary provisions dealing with each detail which we have

in view. The Bill, therefore, takes the form of a series of isolated amendments of the Act, and it might be supposed that there are no broad general principles on which it is based.

"It will be found, however, that there are two ruling ideas round which all these detailed provisions group themselves, or rather one ruling idea which divides itself naturally into two parts. This ruling idea runs throughout every part of the Bill. It is essential to it, and not merely incidental; and I propose to ask the Council to accept it as the governing principle of the measure. It can be stated very briefly. The first part of it is that, in order to ensure the public safety, it is essential that the construction of all works in Darjeeling, by which I mean roads, drains, buildings and bridges, private as well as public, shall be strictly subject to the approval and sanction of the Commissioners. And I should explain that I use the term construction in a broad sense, including re-construction and any extensive or material alteration. The second part of the principle is that it is essential that the Commissioners should have power to enforce the execution of protective works where these are necessary for the public safety, and, if necessary, power to carry them out themselves at the cost of the owners of the property affected.

"It will be found, I think, that almost every provision of the Bill can be referred to one or other of these ruling principles. I do not suppose that either proposition is likely to be called in question. Indeed, when stated simply, they are almost self-evident, and I do not propose to enlarge upon them at any length. No one who knows Darjeeling, or who has studied the report of Mr. Joscelyne's Committee, is likely to doubt that the primary causes of the recent loss of life and property were improper buildings, improper roads and improper excavations. To prevent the construction of these in the future they must be brought under strict control; and this can best be done by making them subject to the previous sanction and approval of the Municipal authorities, and giving the latter effective power to insist on their orders being carried out. The second part of the principle is really a mere corollary or extension of the first part. No man can be permitted to construct a house or a drain which endangers the lives or property of the public: and, similarly, no man can be permitted to allow a house or a drain already constructed to get into such a condition as to endanger the lives or property of other people. If it does so, the Municipal authorities must have power to compel him to put things right. I wish to go further than this. It may happen that the house or the drain is still good enough by itself, but, in consequence of changes which have occurred on the hillside since it was constructed, it may have newly become a source of danger to other property. In that case also I think it cannot be questioned that the owner may fairly be required to construct protective works. This is a perfectly just and reasonable proposition. Landed property on a steep mountainside is necessarily precarious, and it does not in the least follow that, because a house or a road was secure when it was first constructed, it will not become a source of danger hereafter. Power must, therefore, be reserved to enforce the construction of protective works at any time. This, I may mention, is perfectly well understood by house-owners in Darjeeling.'

"I do not think I need say anything further on the present motion."

The Hon'ble Raja Sashi Shakareswar Roy, Bahadur, of Tahirpur, said:—"It is, I think, Sir, necessary that I should lay before Your Honour the fact that I have received communications from Darjeeling, which, if I understand aright, mean that the people there are not yet quite ready to pronounce their opinions fully on the Darjeeling Municipal Bill. The opinions which have reached my hands up to this time are, I am afraid, not very favourable towards the Bill. In fact, the people there—at least a portion of them—seem to be frightened at some of the provisions of the Bill, especially the immense power which we are going to give into the hands of the Municipal Commissioners, without giving a Civil Court remedy for the would-be sufferers. They have particularly requested me to bring to Your Honour's notice that they want some time—time sufficient, at least—to read, to digest and to think over the

provisions of the Bill, which contains more than 359 sections. It is quite true the matter is urgent. For the protection of the hill it would be necessary, as I understand, to commence the business of construction and destruction before the rains set in. But whether the time we are allowing between this and the passing of the Bill is quite sufficient for collecting the views and opinions of persons most concerned—I mean the landowners and residents—is a question which Your Honour is the best judge to decide."

The Hon'ble BABU SURENDRANATH BANERJEE said :—"I think I express the the sense of the Council and of Your Honour's Government when I say that, if there is a strong body of local feeling in favour of a further extension of time within which the Select Committee are to report upon the provisions of this Bill, it will receive favourable consideration at the hands of the Government. The time within which we are called upon to report is only a fortnight, and it does strike me that a fortnight is scarcely adequate for the consideration of a measure of this magnitude and importance. I fully recognise the urgency of the Bill. A law has to be passed so that it may be possible to take in hand the protective measures which may be necessary for the safety of Darjeeling before the next rains set in; but all the same, when we are about to legislate for the carrying out of measures which are likely to interfere with private and vested proprietary rights, we ought to give ample time to those who possess such rights, so that they make any representations which they may desire to lay before the Council. For my own part I should have preferred a separate enactment applicable to Darjeeling instead of the amendment of the general law applicable to all Municipalities in Bengal. I have great confidence in Your Honour's administration, but it is possible that some future Lieutenant-Governor may extend the provisions of this Bill to other Municipalities, and, in my humble judgment, it is necessary to guard against a contingency of that kind. But, if we have a law applicable only to Darjeeling, such a contingency can never occur.

"The Hon'ble Member in charge of the Bill has been pleased to say that no constitutional changes of any kind are contemplated in this Bill. I confess I have as yet only been able to glance at the provisions of this Bill; but, from the little attention I have been able to give to it, it seems to me that constitutional changes of the greatest moment are contained in this Bill. A cursory glance at the provisions of the Bill will show that there is a considerable enhancement of the authority of the Government, if not a considerable diminution of the powers of the Municipal Commissioners, and this itself is inconsistent with the principles of local self-government, and I should be disposed to record my protest against the Bill on this ground alone, were I not sensible of the fact that in politics there is no such thing as an abstract principle, and that every principle or system in the abtract must be judged by reference to the particular circumstances in which it is sought to enforce it. But there are considerations on the other side of the question which ought also to be borne in mind.

"This Bill carefully follows the lines of an admirable report drawn up by a carefully constituted Committee, but I find that there was no representative of the Indian community on that Committee. I venture to say in this connection that I regret that a similar procedure was not adopted with regard to the Calcutta Municipal Bill, and that a Committee was not appointed to make their recommendations before that Bill was introduced. The Committee which was appointed in connection with the Bill now before the Council have submitted their report; on that Committee there were representatives of the non-official community, and I find that the report of the Committee has been unanimously adopted by the Municipal Commissioners of Darjeeling, and, further, I learn, from enquiries I have made, that there was a meeting held by the local community of Darjeeling, and that they have also accepted the provisions of the Bill. Therefore, we have a considerable body of opinion in support of this measure, and I would not raise a discordant note, were it not that I find that an important question of principle is involved, and the acquiescence of the local community in what I deem to be the violation of this principle cannot

be regarded as the final settlement of the issue. If you look at section 351H,—and my hon'ble friend the Raja of Tahirpur has also referred to it,—you will find that the decision of the Engineer or of the Commissioner of the Division on any appeal preferred to him will be final. This is tantamount to the withdrawal of the power of the Civil Courts in this matter. I do not know that a local Legislative Council has the power to withdraw any authority, now vested in the Civil Court, although it may possibly do so with the consent of the Government of India. But, even if that consent were obtained, I submit that it would be highly inexpedient to take away such a power. A proceeding of this kind is calculated to accentuate the alarm which has been created by the passing of the Calcutta Municipal Bill, *viz.*, that the tendency of our legislation in recent years has been to exalt the executive at the expense of the judiciary. I hope a satisfactory answer will be given by the Hon'ble Member in charge of the Bill on this point. I hope also that the Hon'ble Member will be able to accede to the extension of time which my hon'ble friend the Raja of Tahirpur has suggested. I hope there will be a thorough discussion of this measure; because important interests are affected, and having regard to the magnitude of those interests we should avoid even the appearance of hasty legislation."

The Hon'ble MR. APCAR said:—"I only desire to comment on one point, with reference to this measure, and it is one that is not with reference to the details of the Bill. On the ground of expediency, it seems to me that it will be a desirable course to pursue if this measure is embodied in a separate Bill instead of being incorporated in the existing Act in the manner it is proposed to be done. As I understand it—I may be under a misapprehension, and I shall be glad if I am—it is intended to amend, or add, various sections in the existing Bengal Municipal Act. I would suggest, as a far more convenient course to pursue, to have a separate Act with reference to the Darjeeling Municipality, instead of working, into the existing Municipal Act, provisions which are peculiarly adapted for application to Darjeeling only. I have some experience in this method of legislation that has been adopted, and I think it only leads to confusion and inconvenience.

"With regard to the request which has been made for an extension of time, I feel myself a little embarrassed because I have not heard for what period it is sought that an extension should be granted; but it does seem to me that a fortnight is a very narrow term to give for the consideration of this very important measure that will affect rights of property, and the value of property, in the locality."

The Hon'ble MR. BAKER, in reply, said:—"Both the Hon'ble Mr. Apcar and the Hon'ble Babu Surendranath Banerjee have suggested that it might be better to embody the amendments we propose to make in the Municipal law in a separate Act for Darjeeling, instead of incorporating them in the ordinary Municipal Act which applies to the whole of Bengal. I may say that this suggestion was considered by the Government when the question of legislation for Darjeeling first came before us, and the reason why we decided that it is unnecessary to do so is very simple, namely, that nine-tenths of the provisions of the existing Act will remain unaffected. I said nine tenths, but I might say nineteen-twentieths, or even a still larger proportion. The whole of the provisions relating to the constitution of the municipality, the assessment and collection of taxes, the whole of the powers of the Municipal Commissioners in respect of such important matters as water-supply, lighting, conservancy, and everything connected with the public health, and practically everything except the provisions relating to the building regulations and to roads and drains, will remain unchanged. These are the only three matters in respect of which it is proposed to make any change at all. If we were to enact a special Act for Darjeeling, instead of having a Bill of 26 sections, we should have not less than 350 sections; and that alone is a sufficient reason, even if there was no other, why Your Honour's Government decided to adopt the form in which this Bill has been drafted.

"With regard to the extension of time within which the Select Committee should submit their report, for which both the Hon'ble the Raja of Tahirpur and the Hon'ble Mr. Apcar have pressed, I would remind the Council that in Your Honour's opening remarks at the meeting of this Council on the 20th of December last you explained the reasons why this measure was urgent. The building season in Darjeeling is the cold weather and the spring. No building or road can be constructed during the rains or immediately after the rains. The rainfall in Darjeeling is very heavy every year, and exposes the station to very serious risk; and, if the damages caused by the cyclone in September last are not effectually repaired during the present working season, it may involve very serious risk to Darjeeling when the next rainy season sets in. Under the existing law, we cannot ensure that houses will be properly repaired or that revetment walls will be made where they are required in dangerous parts of the hillside. It is most necessary, therefore, that this Bill should come into force before the the present working season comes to an end. And, although the Bill does run over a considerable number of printed pages, there is very little which need take up much time, and scarcely any provisions which are likely to prove contentious.

"Then the Hon'ble Babu Surendranath Banerjee has thrown out a suggestion that, perhaps, this measure might hereafter be extended to other municipalities. This suggestion is alone sufficient to show that the Hon'ble Member was correct when he said that he had not read the Bill carefully, because it is physically impossible to apply any of these provisions to any town in the plains. There is only one municipality in Bengal, other than Darjeeling, to which any of these provisions can have application—I mean the small municipality of Kurseong. I think it would matter little to the Hon'ble Member if these provisions were extended to Kurseong; but in any case I may say that Your Honour's Government has no intention to extend them even to Kurseong.

"The Hon'ble the Raja of Tahirpur and the Hon'ble Babu Surendranath Banerjee made some reference to certain provisions of the Bill which oust the jurisdiction of the Civil Courts in certain matters, and they expressed some alarm at the incorporation of those provisions. Here again the Hon'ble Members will find, when they come to study the Bill, that very good reasons have been shown, and do exist, for the inclusion of those provisions. The matters in respect of which we propose to oust the jurisdiction of the Civil Courts are purely professional and engineering matters, and the Civil Courts can scarcely be expected to decide matters of that kind with the promptness and exactitude with which it would be done by the special tribunals constituted by this Bill. We propose that when any question arises of a professional nature, such as when the Municipal Commissioners refuse permission to build upon a site, or when they pass an order directing the construction of a revetment wall or any other protective work, there should be an appeal to a specially appointed Engineer of a higher rank than Executive Engineer. Hon'ble Members will admit that an Engineer is a much better authority than the Civil Court to decide a purely professional question of that kind. The Civil Court can only come to a decision on the evidence of experts, and we all know what the value of the evidence of experts is; whereas an Engineer having special knowledge of Darjeeling will be the best authority to decide whether the orders passed by the Municipal Commissioners are right or not. The other special tribunal provided by the Bill is the Commissioner of the Division. Although the Hon'ble Member referred to the Commissioner of the Division, he omitted to mention that the Commissioner is not to sit alone, but is to be assisted by two assessors who will be drawn from among the landowners and residents of Darjeeling. [The Hon'ble Babu Surendranath Banerjee.—"The Commissioner will not be bound by the opinion of the assessors."] I might mention that this provision was inserted on the express recommendation of land and house owners in Darjeeling. It was not a suggestion which emanated from the Government or from Mr. Joscelyne's Committee, but was suggested by the persons whose property and purses will be affected; therefore, we have good ground for holding that the people most concerned do approve of these specific provisions.

"There is one other minor point which was referred to in general terms by the Hon'ble Babu Surendranath Banerjee. He said that there are some changes in the Bill which are of a constitutional character; some diminution of the authority of the Commissioners and some enhancement of the powers of the Government. That objection, I may observe, was answered in advance by the Hon'ble the Raja of Tahirpur when he said that according to his information some of the residents of Darjeeling were alarmed at the enhancement of the authority of the Municipal Commissioners; for there cannot possibly be both an enhancement of the authority of the Commissioners and also a diminution of their authority. What the Hon'ble Member possibly referred to was the temporary provisions at the end of the Bill which empower the Local Government to exercise the powers of the Commissioners for a short period. That is not a principle of the Bill; they are purely temporary provisions, and they were inserted on the formal, unanimous and earnest application of the Municipal Commissioners themselves."

The motion was put and agreed to.

AMENDMENT ON BENGAL ACT I OF 1869 (*Cruelty to animals*).

The Hon'ble MR. SLACK introduced the Bill to amend Bengal Act I of 1869 (*an Act for the prevention of cruelty to animals*), and moved that it be read in Council.

He said—"The Act now in force merely provides for the punishment of persons actually in charge of the animal which is cruelly used. Such person is not generally, and need not be, the owner of the animal in question, and the result is that the penalty inflicted is not adequate. The Chief Presidency Magistrate has intimated to me that the Act in its present form is completely ineffective. He says that in his experience in many instances the owner of an animal which is suffering compels the driver to take it out again as soon as possible after a fine is inflicted. Moreover, it is quite impossible to realize from the driver any fine which may be imposed. With a view to remedy this state of things and to provide for the care of the suffering animals, it is proposed to extend certain provisions of Act XI of 1890 of the Imperial Council for the prevention of cruelty to animals, by which the authority which has power to punish an offender may at the same time order the animal with regard to which the offence has been committed to be taken to a veterinary infirmary and to be kept there at the expense of the owner of the animal until it is well. It might be asked why the provisions of the Imperial Act should not be included in this Bill. The answer is very simple; because if that Act were extended here the police would not have the power which they now possess of arresting an offender without process, and I need hardly add that the present Act is in that respect more effective. I shall at the next meeting ask that the Bill be referred to a Select Committee with instructions to report within a week."

The motion was put and agreed to, and the Bill was read accordingly.

The Council was then adjourned to Saturday, the 20th January, 1900.

CALCUTTA;
The 12th February, 1900.

F. G. WIGLEY,
Assistant Secretary to the Govt. of Bengal, Legislative Department.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met in the Council Chamber on Saturday, the 20th January, 1900.

Present:

The Hon'ble Sir John Woodburn, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
The Hon'ble Mr. J. T. Woodroffe, Officiating Advocate-General, Bengal.
The Hon'ble Mr. W. B. Oldham, C.I.E.
The Hon'ble Mr. J. Pratt.
The Hon'ble Mr. C. E. Buckland, C.I.E.
The Hon'ble Mr. C W. Bolton, C.S.I.
The Hon'ble Mr. R. B. Buckley.
The Hon'ble Mr. F. A. Slack.
The Hon'ble Mr. E. N. Baker.
The Hon'ble Khan Bahadur Maulvi Delawar Hosain Ahmed.
The Hon'ble Rai Durga Gati Banerjea, Bahadur, C.I.E.
The Hon'ble Babu Jatra Mohan Sen.
The Hon'ble Mr. T. W. Spink.
The Hon'ble Raja Shashi Shakhareswar Roy, Bahadur, of Tahirpur.
The Hon'ble Raja Ranajit Sinha, Bahadur, of Nashirpur.
The Hon'ble Sahibzada Mahomed Bakhtyar Shah, C.I.E.
The Hon'ble Mr. D. F. Mackenzie.
The Hon'ble Mr. J. G. Apcar.
The Hon'ble Dr. Ashutosh Mukhopadhyaya, M.A., D.L., F.R.A.S., F R.S E.
The Hon'ble Babu Boikanta Nath Sen.
The Hon'ble Babu Surendra Nath Banerjee.

NEW MEMBER.

The Hon'ble Mr. Woodroffe took his seat in Council.

QUESTIONS AND ANSWERS.

OUTRAGES AND ASSAULTS ON WOMEN IN THE MYMENSINGH DISTRICT.

The Hon'ble RAJA RANAJIT SINHA, BAHADUR, of Nashipur, asked—

Will the Government be pleased to lay on the table a statement showing the number of cases of outrages and assaults on women in the district of Mymensingh, and the number of offenders detected, sent up for trial and convicted, during the last three months, and to state if the offence decreased during the said period after the appointment of special Police Inspectors.

The Hon'ble MR. BOLTON replied:—

"A statement of the number of cases instituted during September, October and November last is laid on the table. It shows 31 cases of rape, 64 cases of kidnapping in order to compel marriage or illicit intercourse, 14 cases of kidnapping from lawful guardianship, 33 cases of indecent assault, and 22 cases of house-trespass; the population of the district, which covers an area of 6,300 square miles, being 3½ millions, of which 2½ millions are Muhammadans. The number of cases shows a large increase, but the local officers point out that this is the primary result of the appointment of Special Inspectors for investigating this class of crime, the increase being due to some extent to true cases being brought to light, but to a much greater extent to the exaggeration of cases of adultery and seduction, which are of frequent occurrence in the district, so as to bring them under sections cognizable by the police. It would appear that advantage is being taken of the presence of the special officers to bring before the Courts many cases arising out of marriage disputes, and the local officers have to watch and enquire into the charges very carefully. The fact that of 184 persons sent up for trial during the three months only 42 had been convicted, 63 having been discharged or acquitted and 79 being still under trial, points to the necessity for this watchfulness. No outrage of an exceptionally serious nature occurred during the period. It is reported that the Special Inspectors have, on the whole, met with fair success in bringing the offenders to justice in the real cases of outrage, and in collecting evidence for proceedings against dangerous characters under section 110 of the Code of Criminal Procedure."

Statement of outrages and assaults on women instituted, and of offenders sent up for trial, in Mymensingh during September, October and November, 1899.

SEPARATION OF JUDICIAL FROM EXECUTIVE FUNCTIONS.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

I.—I have the honour to ask if this Government has received any communication from the Government of India in connection with a memorial submitted to the Secretary of State, on the question of the separation of judicial from

executive functions, by Lord Hobhouse, Sir Richard Garth, Sir William Markby, Sir William Wedderburn, Sir John Phear and other distinguished men. If so, will the Government be pleased to lay it on the table and invite thereon the opinions of the various public associations?

The Hon'ble Mr. Bolton replied:—

"This Government has received no communication from the Government of India relating to the memorial mentioned by the Hon'ble Member."

Mr. Pennell's recent judgment.

The Hon'ble Babu Surendranath Banerjee said—

(*a*) With reference to the judgment of Mr. Pennell, late Sessions Judge of Chapra, setting aside the sentence passed on one Narsing Sinha, who was convicted by the Deputy Magistrate of Chapra and sentenced to two months' rigorous imprisonment, I have the honour to ask whether the attention of the Government has been called to the following findings in the judgment of the Sessions Judge:—

(1) That Mr. Corbett, Assistant Superintendent of Police, and Mr. Simkins, Engineer, committed a severe assault upon Narsing Sinha, because he snapped his fingers at Mr. Corbett's face and would not submit to forced labour.

(2) That subsequently a case was got up against Narsing Sinha by the Assistant and the District Superintendent of Police in consultation with the District Magistrate.

(3) That the Deputy Magistrate who tried the case was in frequent communication with the District Magistrate under whose orders the prosecution was initiated, and he stated in his examination before the Sessions Judge that he took the record to the District Magistrate to satisfy him that section 353 was not applicable—to explain to him—and that he discussed cases with District Magistrates to avoid after-troubles.

(*b*) Whether Government approves of such conferences between the prosecuting officer and the trying Magistrate? If not, whether the Government will be pleased to take such action as to the Government may seem fit to prevent such interchange of views between prosecutor and judge which must prejudice the righteous administration of justice?

(*c*) Whether a copy of the judgment of Mr. Pennell in this case has been submitted to the Government, and what action, if any, the Government has taken with regard to the officers, *viz.*, Messrs. Twidell, Bradley, Corbett and Simkins and Maulvi Zakir Hossein, whose conduct has been severely censured by the Sessions Judge in his judgment?

(*d*) Whether there is any foundation for the statement which has been made that Mr. Pennell has been transferred owing to his judgment in the Chapra case. If not, will the Government be pleased to state the circumstances of the transfer?

The Hon'ble Mr. Bolton replied:—

"A copy of Mr. Pennell's judgment was submitted by him to the Government. The officers of the Saran District concerned were gravely to be blamed, and the promotion of the two who were most responsible has been suspended for a year and two others have been censured.

"Subordinate Magistrates may, without sacrifice of their judicial independence, seek the advice of the District Magistrate, or of brother officers, and similar consultations occur in Courts of Justice generally. In difficult cases especially, they afford useful assistance to judicial officers. In the present

nstance, however, the District Magistrate had personally interested himself in the prosecution and ordered its institution, and no discussion should have taken place between him and the Deputy Magistrate during the trial.

"Mr. Pennell was transferred in the course of official changes, and the order appointing him to Noakhali was passed before the Government saw his judgment."

THE DARJEELING MUNICIPAL BILL.

The Hon'ble Mr. Baker presented the Report of the Select Committee on the Bill to amend the Bengal Municipal Act, 1884, in its application to Darjeeling.

AMENDMENT OF BENGAL ACT I OF 1869 (*Cruelty to animals*).

The Hon'ble Mr. Slack moved that the Bill to amend Bengal Act I of 1869 (*an Act for the prevention of cruelty to animals*) be referred to a Select Committee consisting of the Hon'ble Mr. Pratt, the Hon'ble Babu Surendranath Banerjee and the mover, with instructions to report at the next meeting of the Council.

The Hon'ble Mr. Buckland said:—"I should like to make a few observations on this Bill at this stage. It really deals with a matter to which I have given much consideration for many years past—I mean the establishment of a Veterinary Institution at Belgatchia and the introduction of the teaching of veterinary science. I regard this Bill as not only complementary to the Act for the Prevention of Cruelty to Animals, but also as filling a great want which is much felt at the Veterinary College at Belgatchia. I had intended to offer a suggestion for enlarging the scope of this measure, but on arriving in this room I enquired of the Secretary to Government, the Hon'ble Member in charge of the Bill, and I understand it is unnecessary to press the suggestion I had intended to make. The work that is being done at Belgatchia must, I think, commend itself to all who are interested in the agriculture and the future of Bengal. You are aware, Sir, that every year young men are being turned out from that College fully equipped with all the knowledge required to enable them to exercise their profession wherever they may be sent in Bengal. I can conceive nothing more advantageous to the millions of cultivators in Bengal than that there should be such a body of men available to be sent to any spot on the occasion of an outbreak of rinderpest or cattle-plague or any other disease that affects cattle. But it is very important that this College should have material on which to work. I have been told on enquiry that it is very desirable that more cases should be sent to the College on which the students can practise, and I am informed that the prosecutions instituted by the Society for the Prevention of Cruelty to Animals amount to about seven thousand a year; so that, if only a thousand of the animals ill-treated could be made available for practice and for the clinical instruction of students, it would be of great advantage to the College. All that is possible is, I believe, being done to have the education of these students brought up to date in accordance with the latest knowledge of veterinary science, but it is impossible that much progress can be made until they have material to work upon. I therefore think this Bill will go a long way to meet a great want. It has also been commended to me on other grounds. Not only will it facilitate the supply of subjects for the instruction of the students, but it will also benefit the owners, because their animals will be cured and restored to them for use with the least possible delay, and it will obviously be for the benefit of the animals that they should be cured and sent away. It has also been mentioned to me that, though Belgatchia is some little distance away from Calcutta, it will not be necessary for sick animals to walk there, because the College has ambulances which can be sent to bring them. It has further been mentioned that the administration of justice will benefit, because it will be easier to realize the fines imposed on owners for having used animals in a cruel way. I was not aware before that there was any difficulty in realizing these fines, but it has been mentioned to me that this is the case. On the whole I cordially support this measure, and I hope an early opportunity

will be taken by the municipalities which are authorised by law to establish veterinary hospitals and employ veterinary assistants, to apply for the extension of this measure, when it is passed into law, to their municipalities, so that there may be numbers of veterinary infirmaries throughout the country. I speak from considerable experience in this matter, and hope that the Council will pass this Bill without further delay."

The motion was put and agreed to.

ADJOURNMENT OF COUNCIL.

The Hon'ble THE PRESIDENT said:—"The Government are obliged to the Select Committee on the Darjeeling Bill for the prompt and careful attention they have given to its provisions. Their conclusions have been published for the information of the public, and I hope it will be possible to take the Bill into consideration in its final stage at the next meeting of the Council, which will be on Saturday, the 17th February next, and to that day the Council is adjourned."

FIRST FORECAST OF THE OILSEED CROPS OF BENGAL, 1899-1900.

THE following is published for general information.

F. A. SLACK,

The 20th February 1900. Offg. Secy. to the Govt. of Bengal.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

First Forecast of the Oilseed Crops of Bengal, 1899-1900.

Explanatory.—This report furnishes estimates of the area and outturn of all the different kinds of oilseeds grown in these Provinces.

2. *Character of the season.*—The monsoon season of 1899 was characterised by excessive rainfall in East and North Bengal and in parts of Bihar; in South-west Bengal, the actual rainfall during the monsoon season was a little above the normal for that period; and in Orissa and Chota Nagpur, it was less than the normal. In September, the rainfall was moderately heavy in North and East Bengal; practically normal in Bihar; slightly below the normal in South-west Bengal; and much in defect in Orissa and Chota Nagpur. In October, it was deficient everywhere, except in East Bengal and Orissa, where it was excessive. In November, a few light showers were received during the early part of

the month in the Darjeeling hills; and there was some rain also in the Chittagong Division about this time. No rain fell in other parts of these Provinces. In December, the rainfall was almost *nil* over the whole Province, and was entirely absent in Bihar and Chota Nagpur. Towards the middle and third week of January, some very useful showers were received, which improved prospects in many districts; but hail and rain towards the close of the month damaged the crops in some places. On the whole, the season this year has not been as favourable as that of last year. The rain has been irregularly distributed, and crops in some districts have suffered from an excess of rain and in others from want of rain.

3. *Area cultivated.*—Revised estimates of normal area have been received from the districts of Burdwan, Midnapore, Hooghly, 24-Parganas, Nadia, Rajshahi, Darjeeling, Rangpur, Noakhali, Chittagong, Patna, Darbhanga, Muzaffarpur, Purnea, Cuttack, Angul, Ranchi, and Singhbhum, and in consequence, the Provincial total in column 4 of the appended statement is now shown as 4,140,200 acres against 4,215,600 acres, the corresponding estimate made in the final report of the oilseed crops of 1898-99. In some cases, modifications have been similarly made in the column showing the area under oilseeds in 1898-99. As the figures stand now, the area under oilseeds for the present year is estimated as 3,669,200 acres against 4,091,900 acres estimated for 1898-99. The contraction in area is generally due to the unfavourable character of the weather at the time of sowing, and is most noticeable in the districts of Hazaribagh and Ranchi.

4. *Character of the crop.*—The prospects of this year's oilseed crops are not as bright as those of last year. The present estimates show that a better outturn is expected in 12 districts and a lower outturn in 27 districts. Crops equal to those of last year are estimated for 6 districts. Returns showing crops above the normal of 100 per cent. have been received from Darjeeling and Saran. Normal crops are reported from 9 districts. In 29 districts, the estimates vary from 75 per cent. to below 100 per cent., and in four districts, viz., Rangpur, Bogra, Angul, and Hazaribagh, from 50 to below 75 per cent. In one district, viz., Ranchi, the crop is estimated as only 10 per cent. Taking the Province as a whole, the outturn of this year's crops amounts to 84 per cent. against 95 per cent., the estimate of outturn of last year's crop.

N. N. BANERJEI,
Asst. Director of Land Records and Agriculture, Bengal.

(COUNTERSIGNED.)

S. L. MADDOX,
Offg. Director of the Dept. of Land Records and Agriculture, Bengal.

CALCUTTA,
The 14th February 1900.

First forecast of the Oilseed Crops of Bengal, 1899-1900.

Burdwan (contd).	Midnapore ...	Linseed	15,000	22,000	20,000	85	80	The decrease in the normal area under rape-seed is due to the revised estimate made by the subdivisional officer of Tamluk, and the increase under *til* is due to Messrs. Watson & Co. and others having given up the cultivation of indigo, part of the area covered by that crop having been utilized for *til*. On the whole, the area brought under cultivation was less than that of last year owing to excessive rains, and for the same reason the outturn is not so good as that of last year.	
		Rapeseed and mustard.	30,600	36,100	33,600	90	78		
		Til { Rabi	20,700	17,800	21,600	91	81

WEATHER AND CROP REPORT.

For the week ending the 19th February 1900.

Burdwan.—Rainfall at Sadar ·70, Kalna ·91, Katwa ·62. Threshing of *aman* over. Pressing of sugarcane continues. *Rabi* crops doing well. The recent rain has been generally beneficial. Fodder and water sufficient. Cases of cattle-disease in Raniganj reported. Common rice selling as follows:—

				Srs.	
Sadar	...	...	...	15	per rupee.
Kalna	...	...	...	13¾	
Katwa	...	...	...	15	
Raniganj	...	...	...	14¼	

Birbhum.—Rainfall at Rampur Hât 1·24. Weather seasonable. *Rabi* crops doing well. Price of common rice at Sadar 13½ seers and at Rampur Hât 15 seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Bankura ·40, Vishnupur ·61. Weather occasionally cloudy. Pressing of sugarcane going on. Other standing crops doing well. Fodder and water sufficient. Sporadic cases of cow-pox reported. Rice selling at 15 seers per rupee at Bankura and Vishnupur.

Midnapore.—Rainfall at Sadar ·21, Tamluk 1·32, Ghatal ·74. Weather seasonable. Prospects of *rabi* good. *Boro* is being sown. Cattle-disease reported from Nayagram. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	14	per rupee.
Contai	...	...	...	18	
Tamluk	...	...	...	13	
Ghatal	...	...	...	16	

Hooghly.—Rainfall at Sadar ·33, Serampore ·29, Jahanabad ·66. Weather seasonable. Harvesting of *rabi* going on. Cattle-disease prevails at Pandua. Common rice sells at 14 seers 1 chitak per rupee.

Howrah.—Rainfall at Sadar ·54, Ulubaria ·60. Weather rather hot for the season. Transplantation of *boro* in Ulubaria continues. *Rabi* doing well. Fodder and water sufficient. Common rice sells at 13¾ seers per rupee.

24-Parganas.—Rainfall at Sadar ·42, Barasat ·56, Basirhat ·65, Diamond Harbour ·12. Weather seasonable. Prospects of crops good. Harvesting of *rabi* crops nearly over. The recent showers have done good in facilitating ploughing operations. Cattle-disease reported from some parts of the district. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	ch.	
Sadar	...	...	...	16	0	per rupee.
Barasat	...	...	...	15	8	
Basirhat	...	...	...	16	13	
Diamond Harbour	...	...	...	13	5	

Nadia.—Rain at Sadar ·06, Kushtea ·25, Meherpur ·30, Chuadanga ·41, Ranaghat 1·21. Weather seasonable. Lands still being cultivated for *aus*. Prospects of standing crops good. Cow-pox reported from Meherpur. Fodder and water sufficient except in Chuadanga. Price of common rice stationary.

Murshidabad.—Rainfall at Sadar 1·05, Jangipur ·02. Weather cloudy. Prospects of *rabi* crops generally favourable. No cattle-disease. Fodder and water sufficient. Common rice sells at Sadar and Jangipur 15 seers per rupee.

Jessore.—Rainfall at Sadar 2·20, Jhenida ·10, Magura ·89, Narail 1·13, Bangaon 2·36. Weather cloudy, rainy, and cold. Harvesting of *rabi* going on. Prospects of crops good. The hail-storm on the night of the 13th damaged the standing crops in the Magura subdivision. The rain has done good to the cultivation No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	16	per rupee.
Jhenida	...	...	...	18	
Magura	...	...	...	15½	
Narail	...	...	...	16	
Bangaon	...	...	...	18	

Khulna.—Rainfall at Sadar ·33, Bagerhat ·42, Satkhira ·69 Weather hot. *Rabi* crops doing well. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	16¾	per rupee.
Bagerhat	16	
Satkhira	16	

Rajshahi.—Rainfall at Sadar ·1, Naugaon ·24. Prospects of crops good. No cattle-disease. Fodder and water plentiful. Common rice sells at 17 seers per rupee.

Dinajpur.—Rainfall nil. Weather seasonable. Fodder and water plentiful. Rice sells at Sadar 20 seers and at Thakurgaon 18 seers per rupee.

Jalpaiguri.—Rainfall nil. Weather seasonable. Harvesting of mustard continues. Tobacco doing well. Lands are being ploughed for *bhadoi* crops. Price of common rice steady. Fodder and water sufficient.

Darjeeling.—Rainfall at Darjeeling ·01. Weather seasonable. *Hills*:—*Tori* being harvested; wheat, barley and potatoes doing well. *Terai*:—Mustard being harvested: tobacco doing well. Coarse rice sells as follows:—

	Srs.	
Hills	10	per rupee
Terai	18	

Bhutta sells at Darjeeling 20 seers and at Kalimpong 24 seers per rupee.

Rangpur.—No rain. Weather seasonable. Potatoes and mustard are being harvested. Common rice sells at 18¼ seers per rupee. Fodder and water sufficient.

Bogra.—No rain. Prospects of standing crops good. Cultivation of *aus* and jute going on. Common rice selling at 18 seers per rupee. Fodder and water ample.

Pabna.—Rainfall at Sadar ·68, Sirajganj ·07. Weather seasonable. Prospects of crops good. Prices stationary. Fodder and water sufficient.

Dacca.—Rainfall at Sadar ·50, Manikganj ·17, Munshiganj ·36, Narainganj 1·02. Weather seasonable. Prospects of crops good. Fodder available. No cattle-disease. Common rice 16 seers per rupee.

Mymensingh.—Rainfall at Sadar ·12, Kishoreganj ·23, Tangail ·08, Netrokona ·40. Weather cold and damp. Prospects of crops good. Fodder and water ample. Common rice selling at Sadar 18 seers and in the subdivisions from 15 to 19 seers per rupees.

Faridpur.—Rainfall at Sadar ·45, Madaripur ·66. Weather cool. Thunder storms. State and prospects of crops good. Common rice sells at 17 seers per rupee.

Backergunge.—Weather cloudy with light showers. Prospects of crops good. Common rice (new *aman*) sells at 16 seers per rupee.

Tippera.—Rainfall at Comilla 1·66, Brahmanbaria 1·21, Chandpur 1·05. Weather unsettled. Pulses being harvested. Lands under preparation for jute and *aus* paddy. Recent rain beneficial. Common rice 16¾ seers per rupee.

Noakhali.—Rainfall at Sadar ·36, Feni ·30. Cultivation of lands for *aus* commenced. Prospects of *rabi* crops good. Cattle-disease reported from Senbag and Chagalnaya. Fodder and water sufficient. Price of common rice 16 seers per rupee.

Chittagong.—Rainfall ·36. Prospects of *rabi* crops good. Water and fodder sufficient. Common rice 16 seers per rupee.

Patna.—Rainfall nil. Harvesting of *rabi* and lancing of poppy commenced. Fodder and water for cattle sufficient. Cattle-disease reported from Asthauayan thana. Common rice in Patna sells at 15 seers per rupee.

Gaya.—No rain. Harvesting of early *rabi* and lancing of poppy going on. Common rice selling at 14 seers per rupee.

Shahabad.—No rain. Prospects of *rabi* fair. Sugarcane being pressed. Fodder and water abundant. A few cases of cattle disease in Sasaram. Common rice at Sadar 11 seers per rupee.

Saran.—No rain. Weather clear with occasional clouds. *Rabi* generally doing well. Prices easier. Common rice 13 seers 3 chitaks and *makai* 13 seers 15 chitaks per rupee.

Champaran.—No rain. Prospects of *rabi* and poppy continue favourable. Prices of common rice and maize at Sadar are 12½ and 15¾ seers per rupee respectively.

Muzaffarpur.—Rainfall nil. Prospects of crops favourable. Prices are—Common rice 13 seers, wheat 12 seers 6 chitaks, barley 15 seers, *makai* 14¼ seers, gram 16 seers, and *rahar* 16½ seers per rupee.

Darbhanga.—No rain. Weather cool. *Rabi* doing well. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	14	4	per rupee.
Madhubani	15	9	

Monghyr.—No rain. Weather clear and fine. Prospects of *rabi* crops good. Sugarcane being pressed. Lancing of poppy crop in full operation in some villages. Common rice sells as follows:—

	Srs.	ch.	
Monghyr	13	2	per rupee.
Begusarai	14	12	
Jamui	14	0	

Bhagalpur.—Weather seasonable. Westerly breeze blowing. Rain at Supaul ·02. Standing crops doing well. Planting of sugarcane shoots continues. Fodder and water ample. Sporadic cattle-disease continues in the Banka and Supaul subdivisions. Price of common rice slightly rising.

Purnea.—No rain. Weather seasonable Prospects of standing *rabi* crops good. Lands being ploughed for *bhadoi* crops. Harvesting of tobacco and mustard in progress. Pressing of sugarcane and manufacture of molasses in full swing No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	16	per rupee.
Kishanganj	18	
Araria	18	

Malda.—Rainfall nil. Weather warm and cloudy. Prospects of standing *rabi* crops good. No cattle-disease. Average price of rice 17 seers per rupee. Fodder and water sufficient.

Sonthal Parganas.—No rain. *Rabi* doing well Fodder and water sufficient. Cattle-disease reported from Rajmahal. Average price of common rice 14 seers 10 chitaks and of Indian-corn 18 seers 10 chitaks per rupee.

Cuttack.—Rainfall at Jajpur 1·72, Kendrapara ·74. Weather seasonable. *Guru sarad* being harvested. Sugarcane being pressed. Tobacco, cotton, and *dalua* growing. Condition of cattle generally good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Cuttack	15	1	per rupee.
Jajpur	17	1	
Kendrapara	18	6	
Banki	14	13	

Balasore.—Rain 1·10 at Sadar. Threshing of *sarad* and *rabi* crops and pressing of sugarcane continue. *Dalua* and cotton doing well. Cattle-disease reported from Balasore and Singsa Circles. Rice sells at 17¼, 15, and 17 seers per rupee in interior, Balasore, and Bhadrak respectively. Fodder and water sufficient.

Angul.—Wether hot. *Khesari* being reaped. Sugarcane being planted. Common rice selling at 12 seers per rupee in Angul and 9 seers in Khondmals. Cattle-disease reported from the interior of Angul.

Puri.—Rainfall nil. Weather seasonable. *Dalua* thriving. Rain wanted for *rabi* crops. Miscellaneous crops doing well. Labour available. Nothing serious from distress apprehended. Common rice sells as follows:—

	Srs.	
Sadar	15	per rupee.
Khurda	15¾	
Interior of district	15¼	

Hazaribagh.—Rainfall nil. Ploughing going on. Fodder and water sufficient Common rice sells at Sadar 12 seers and at Giridih 13 seers per rupee.

Ranchi.—Rainfall ·16. Weather seasonable. Ploughing continues. Prospects of mango and *mahua* so far good. Rice sells at Ranchi 9 seers and in the interior 9½ seers per rupee. Cattle-disease reported from four thanas. Fodder and water sufficient.

Palamau.—Rainfall nil. Weather seasonable. *Rabi* doing well. Fodder and water sufficient. Prices at Sadar are—Rice 11¼ seers, gram 14 seers, barley 15¾ seers, *makai* 13 seers, and wheat 12¾ seers per rupee.

Manbhum.—Rainfall at Sadar ·14. Weather seasonable. Prospects of crops good. Cattle-disease reported from thanas Purulia, Gourangdi, Chandil, Tundi, and Topechanchi. Fodder and water sufficient. Average price of common rice at Sadar 13 seers 2 chitaks and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—No rain. Weather getting hot but cloudy. Condition of standing crops fair. Common rice sells at 14 seers 10 chitaks per rupee.

General Summary.—There was rain during the week over a considerable area of Bengal Proper and in some portions of Orissa and Chota Nagpur. The rain has been useful for ploughing, which is being carried on in some parts. The reports of the *rabi* and other spring crops are generally good. The early *rabi* crops are being gathered and the lancing of poppy has begun. The pressing of sugarcane is being pushed on vigorously. In Ranchi the prospects of the mango and *mahua* crops are so far good. The price of common rice has fallen in 9 districts and risen in 5; elsewhere it is practically stationary. Fodder is generally sufficient and cattle are in good condition, but cases of cattle-disease are reported from some districts.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

Meteorological Office, Bengal,
The 14th February 1900.

C. Little,
Meteorological Reporter to the Govt. of Bengal.

Meteorological Division.	Division.	District.	Representative stations.	Air Pressure. Highest, 8 A.M. barometer reading.	Air Pressure. Lowest 8 A.M. barometer reading.	Air Pressure. Mean, 8 A.M., reduced to 32°.	Air Pressure. Mean reduced to sea-level and constant gravity, Lat. 45°.	Air Pressure. Variation from normal mean.	Wind. Mean direction at 8 A.M.	Wind. Mean velocity in miles daily.	Temperature. Highest of month.	Temperature. Lowest of month.	Temperature. Mean daily maximum temperature	Temperature. Mean daily minimum temperature.	Temperature. Mean daily temperature.	Temperature. Variation from normal mean.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JANUARY 1900.

ATMOSPHERIC conditions were exceptional during January in several important respects. In ordinary years it is a month of almost unbroken fine weather, the only variation arising from the shallow depressions which cross the province from the west and probably cause during their passage moderate variations in temperature and light rainfall. The average rainfall is very uniform for the different divisions, and though somewhat more in amount in the west than in other parts of the province, differs by only small amounts in any part from half an inch.

The more exceptional features in the month just past were the almost continuous high temperature in most districts and the relatively heavy rainfall in Chota Nagpur and Bihar.

Average temperature was more than 3° above the normal in Orissa, between 2°·5 and 3° above in Lower Bengal and Chota Nagpur, and more than 1° above in Assam and North Bengal. In Bihar it was about normal.

Rainfall was largely confined to Chota Nagpur and Bihar, which received on an average 2·3 and 2·2 inches, respectively, the corresponding normal amounts being ·6 and ·5 inch. Though it was not altogether absent in other divisions, rainfall was not only much lighter than in Bihar and Chota Nagpur, but was considerably below the small amounts normal for January. North Bengal received ·34 inch, South-West Bengal ·24 inch, while in Orissa and East Bengal it was practically nil.

The explanation of both the above peculiarities, viz., continued high temperature in the east and south of the province and the heavy rainfall in the western districts, appears to be in the check which the shallow depressions causing the unsettled weather received while over Chota Nagpur and Bihar. This check was due to a brisk rise of pressure in the east. The depressions filled up there, and as there was in consequence more irregularity in the wind system, local disturbances with general rainfall and in some cases hail occurred in the western districts. The high temperature which precedes cold weather depressions gives way when the dry north-westerly winds begin in the rear of the disturbance. But as in the above cases the depressions failed to reach Bengal Proper, the after-effects also failed, and the high temperature continued.

A depression of some depth crossed the north of the province in the early part of the month and deepened considerably while the central area was in North Bengal, but as is usual with low pressure areas which are further north than usual, practically no rain fell, only one or two very light showers being recorded in North Bengal. The first disturbance with rainfall occurred in the middle of the month, and a second followed after a few days interval. Both caused several days cloudy showery weather in the western districts, the average number of rainy days for the whole of Chota Nagpur and Bihar being 4, large as compared with the normal number 1.

At the beginning of the month pressure was relatively low over the whole province, most so in Bihar where there was a cyclonic circulation of light winds. Calm weather with light airs prevailed over both the province and the Bay, and temperature was increasing in the western districts. This low pressure remained noticeable for some days, and temperature continued to increase, especially in the south of the province, where there was excess of about 8°.

The low pressure had considerably diminished by the 5th, but a brisk fall set in on the 6th and continued more rapidly on the 7th, especially in North Bengal and Assam, where the fall was about ·15 inch, and defect was ·25 inch.

This sudden fall was followed on the 8th by a rise of similar amount, and the distribution soon became normal. These rapid pressure oscillations were accompanied by a fall in temperature of several degrees in the north-east. Practically no rain fell, and the high temperature underwent little change in the southern districts.

As high pressure developed in the north-west between the 10th and 12th northerly winds became more general and stronger, and the usual cold season conditions extended southwards. On the 13th mean temperature was low at all stations, the greatest defect being 5° in the central districts. But it was of very short duration as pressure began to fall on the 14th, and weather became unsettled in Bihar and Chota Nagpur with general rain on the 15th. The brisk rise of pressure in the east on the 16th appeared to prevent the eastward extension of the rainfall as the cyclonic winds continued over Bihar and Chota Nagpur, and more or less heavy showers fell in these divisions on the 15th and 16th, and in a more scattered form till the 19th. Though numerous showers fell in other parts they were much lighter than in Bihar and Chota Nagpur. The area of disturbance is well shown by the temperature distribution on the 16th. In Orissa, South-West Bengal, East Bengal and the eastern half of North Bengal mean temperature was 2° to 4° above the normal. Elsewhere it was low by amounts increasing towards the west, the greatest defect being 6° in the west of Bihar and Chota Nagpur. On the following days there was only a small defect in the west.

High pressure was general on the 19th and 20th with a moderately steep gradient towards the south and north-westerly winds; but pressure was again falling in the west on the 21st, after which there was another period of rainy weather, almost entirely confined to Bihar.

Numerous and in some cases heavy showers fell between the 22nd and 24th, not, however' with any great change of temperature which remained high in all parts of the province.

Though pressure oscillations continued larger than usual, only a few scattered showers fell between the 25th and 28th, after which showers were again fairly general in Bihar and Chota Nagpur and extended to part of North Bengal During these latter days of the month temperature was below the normal in Bihar, and there was a considerable fall in other parts of the province, but on the 31st it recovered rapidly, means being between 5° and 8° above the normal in all parts of the province.

Pressure oscillations have been rather larger than usual and fairly continuous throughout the month. As readings have been alternately above and below the normal, the effect of the variations, occasionally of considerable amount, has been small on the monthly averages, which differ very little from the normal. The greatest difference is defect of ·02 inch in the west of Bihar.

Temperature has been above the normal almost continuously and at times by 8° to 10°. The only occasion of comparatively cool weather in all districts was in the middle of the month, when, owing to high pressure in the north-west, northerly winds were stronger. There was local low temperature in Bihar not unfrequently during the latter half of the month, with the result that mean temperature for the month was only half a degree above the normal in that division. In the others mean temperature was high by large amounts. In North Bengal and Assam excess was between 1° and 2°, in Lower Bengal and Chota Nagpur about 2°, and in Orissa more than 3°.

Rainfall has not been up to the average in any part of the Province except Bihar and Chota Nagpur, where, however, the fall was about four times the average for the month. It began in the west of the Province about the middle of the month, and from that time, especially in Bihar, it was, with short intervals of one or two days at a time, fairly continuous till the end. In other divisions only a few scattered showers fell.

The total fall in Chota Nagpur on an average for the whole division was 2·34 inches, in Bihar 2·23, in North Bengal ·34, South-West Bengal ·24, East Bengal ·04, and in Orissa only ·02 inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the month of January 1900 :—

Meteorological Divisions.	Temperature.						Rainfall.							
	Highest observed during month.	Lowest observed during month.	Averages for month.			Average mean of month above or below normal mean of month.	Of month.			Rainy days.			Since 16th Oct. 1899.

	Inches.
The total fall of rain from 11th to 17th February 1900	0·65
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·29
The total fall from 1st January to 17th February 1900	0·65
The average fall of the corresponding period for 24 years, Surveyor-General's Office	1·08

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

◠, dew; ≡, fog; t, thunder; <, lightning; /, strong wind; p, passing temporary showers; o, overcast; K thunderstorm; ▲, hail.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,

CONTENTS.

REPORT ON THE STATE OF THE SALT MARKET FOR THE THIRD QUARTER OF 1899-1900.

No. 169B., dated Calcutta, the 20th February 1900.

From—N. BONHAM-CARTER, ESQ., C.S., Offg. Secy. to the Board of Revenue, L.P.,
To—The Secretary to the Government of Bengal, Financial Department.

I AM directed to submit the following report on the state of the salt market for the third quarter of 1899-1900, comprising the months of October, November, and December 1899.

2. The quantity of salt of every description cleared during the quarter amounted to 25,52,009 maunds, as compared with 25,99,230 maunds in the previous quarter and 26,82,538* maunds in the corresponding quarter of the previous

* Revised figures.

year; and the net amount of duty levied thereon was Rs. 59,82,021, as against Rs. 60,54,751 in the previous quarter and Rs. 62,70,341* in the corresponding quarter of the previous year.

3. The quantity of locally-made salt removed from the *golas* in Orissa during the quarter and the quantity which remained in store at its close are shown in table (I) below:—

TABLE I.

* Revised figure.

7. The quantity of salt despatched by the East Indian Railway to stations beyond Buxar during the quarter amounted to 19,490 maunds and 30 seers, as noted in the margin, against 9,094 maunds and 20 seers in the previous quarter, and 6,370 maunds and 10 seers in the corresponding quarter of the previous year.

		Mds.	s.
October 1899	...	8,993	10
November "	...	5,625	0
December "	...	4,872	20
Total	...	19,490	30

8. The quantity of saltpetre removed from the refineries during the quarter on payment of duty amounted to 1,587 maunds, as compared with 1,965 maunds in the previous quarter and 2,326 maunds in the corresponding quarter of the previous year.

9. The shipments of Liverpool salt for the port of Calcutta, according to published market reports, were as follows:—

				Tons.
October 1899	...	...	...	7,660
November "	...	...	...	5,250
December "	...	...	...	3,740
		Total	...	16,650

It is reported that two sailing vessels were *en route* for Calcutta at the close of the quarter with 7,500 tons of salt from Hamburg.

10. Table V shows the average wholesale price per 100 maunds of Liverpool and other descriptions of salt during each fortnight of the quarter:—

No transactions in sea-imported salt have been reported for the quarter from Cuttack and Puri.

ARRANGEMENTS BETWEEN HER MAJESTY'S GOVERNMENT, THE IMPERIAL INSTITUTE AND THE LONDON UNIVERSITY FOR TRANSFERRING A PORTION OF THE BUILDINGS OF THE IMPERIAL INSTITUTE TO THE LONDON UNIVERSITY.

THE following is published for general information.

REVENUE DEPT.,
The 20th February 1900.

F. A. SLACK,
Offg. Secy. to the Govt. of Bengal.

Circular No. 6-1—2.

Extract from the Proceedings of the Government of India in the Department of Revenue and Agriculture (Practical Arts and Museums), dated Calcutta, the 2nd February 1900.

RESOLUTION.

Read the following:—

Memorandum, dated October 1899, by the Honorary Director and Secretary, Imperial Institute, London, and enclosures, regarding the recent arrangements between Her Majesty's Government, the Imperial Institute, and the London University for transferring a portion of the buildings of the Imperial Institute to the London University, and for assigning the remaining portion to the general work of the Institute in such a manner that its practical utility may not be prejudicially affected.

MEMORANDUM.

Negotiations have recently been completed between Her Majesty's Government and the Governing Body of the Imperial Institute, having for their object the devotion, to the housing of the London University, of portions of its Main Building which are not required by it for carrying on its operations connected with the practical representation by collections of the resources of the Colonies and India, the advancement of the commercial interests of the various portions of the Empire, and the accommodation of Fellows of the Institute and of others desirous of obtaining information available at the Institute in connection with all countries composing the British Empire.

The publicity given to the proposals which led to these negotiations resulted in the promulgation by the Public Press, at home and in the Colonies, of many statements of a more or less erroneous and misleading character, based in part upon the assumption that the contemplated relinquishment by the Institute of portions of the building, erected in commemoration of the 50th year of the reign of Her Majesty, must arrest, or at any rate prejudicially affect, the operations and future of the Institute.

The Executive Council have therefore directed that the following statement be communicated to Colonial Authorities and to others concerned or interested in the work of the Institute.

The design of the main building of the Institute, accepted in 1887, provided an amount of accommodation very considerably in excess of the actual requirements of the Institute, allowing even for important future expansion of its work. The Institute authorities, in adopting this design, contemplated the possibility that house-room might have to be provided for certain then existing Societies, or Institutions, whose objects and work were more or less akin to those of the Institute. The space available for such purposes in the Main Building constituted about two-thirds of the East Wing. In meeting the proposal to provide accommodation for the University it has been found practicable, by a concentration of the arrangements for carrying on the administrative portions of the Institute, to surrender the whole of the East Wing for that purpose. In addition thereto, the Halls attached to the centre of the building have been placed at the disposal of the University, with the stipulation that the Institute should have the use of them when required, by arrangement with the University authorities. Other apartments hitherto devoted to the accommodation of Fellows, and situated in the Central Block, have, together with the Main Entrance, also been made over to the University, the Government having undertaken the erection of corresponding apartments for the use of Fellows as an addition to the West Wing, a special Main Entrance being also provided to this—the Institute portion of the Main Building.

The East Wing of the Main Building included two Conference Rooms, the one for India and the other for the South African Colonies. The latter will be furnished with corresponding accommodation in the West Wing, while India has had made over to it the large addition to the East Wing, the cost of the erection of which, some years ago, was covered by special contributions received from India. The Government of India has, however, arranged that the large Conference Hall and the Entrance thereto, which form part of this Indian Section of the Buildings, shall be used by the Institute for its Lectures, Conferences, or for special functions.

The Galleries in which the Colonial and Indian Collections are housed are in no way interfered with by the arrangement made with the Government in the interests of the London University. Their subdivision among the Colonies, which was carried out as soon as the buildings were erected, remains intact.

The North Gallery remains as heretofore available for special exhibitions illustrative of the progress of particular industries, and for other objects of interest and importance included in the sphere of action of the Institute.

The accommodation provided for Fellows (Reading, Writing and News Rooms, Retiring Rooms, etc.) will now be in apartments in the West Wing, corresponding to those which the Fellows have occupied in the East Wing. Commodious Dining and Smoking Rooms, with accessories, will, as already stated, be built, and will immediately adjoin the other apartments devoted to Fellows.

The Library will be removed to the West Wing, and will in future be divided into a General Library and an Official Library, which will be in distinct contiguous rooms.

The weekly special Lectures, by well-recognized Authorities, on subjects relating to the various countries composing the Empire, and on matters of special Imperial interest, will be delivered during the Winter Season as heretofore, and will be open to the General Public as well as to Fellows and their Friends. But in view of the more or less heavy losses which have been sustained by the Institute in providing open-air musical entertainments during the summer to which Fellows had free access), the Council resolved, early this year, to discontinue the maintenance of the enclosed gardens, and the provision therein of the concerts referred to. This action of the Council was taken before the proposal to house the University of London in the Institute Buildings was made the subject of negotiation with Her Majesty's Government.

Upon the completion of those negotiations the Institute Buildings were transferred to the Government, from whom, as has been shown, the Institute authorities have secured the retention of the Galleries, and of the necessary accommodation in the Main Building for the proper conduct, and further extension, of the work of the Institute. In addition, the Institute has been relieved of considerable burdens of debt, of very heavy taxation, and of several important incidental liabilities and expenses. The Governing Body will consequently find itself, in the future, in a position to promote, to a greater extent than heretofore, the pursuit and elaboration of the work of the Institute in the interests of the various countries composing the Empire.

It follows, therefore, that so far from the prospects of usefulness of the Institute having been interfered with or prejudicially affected, they have been very materially improved by the conclusion of the arrangements which enable the Government to house the University of London in portions of the Institute Buildings.

There are more specially two Departments of the Institute whose operations have been steadily developed in the last few years, the practical value of which, to the Colonies, to India, and to the United Kingdom, has already been decisively and amply demonstrated, and the more extensive utilisation of which by the Colonies rests entirely with their Governing Authorities and public Institutions. These are *the Commercial Information Department*, and *the Scientific and Technical Department*, with its Laboratories, its staff of trained Chemists, its Scientific, Technical and Commercial Referees, etc.

Accompanying this Memorandum are two Papers* which give illustration of the useful, and often important, work accomplished in these two Departments in connection with the development of our knowledge of the nature

and commercial value of the natural products of the Colonies and India, as well as with every variety of commercial subjects, and with other matters of direct interest and utility to the various countries composing the Empire.

To meet the requirements of merchants and others whose business operations are conducted entirely, or in part, in the City of London, a branch of the Commercial Information Department of the Institute has been established in a very convenient quarter of the City. This branch is in telephonic communication with the head office at South Kensington, and includes a very completely equipped Commercial News Room for the use of Fellows and of Subscribers to the City Intelligence Office.

The arrangements in course of organisation by Her Majesty's Board of Trade for the establishment of a Government Commercial Intelligence Office are intended to provide for co-operation with the Imperial Institute, which is to be represented by two members upon a mixed Committee to be appointed for directing the work of this new Government Department. The Institute will take part in carrying out the arrangements for the reception, from the Colonies and Foreign Countries, of samples of materials and of manufactured goods representing supplies made from Countries which compete with British manufactures and Merchants;—their exhibition at commercial centres of the United Kingdom;—their circulation and eventual storage and exhibition at the Institute, as reference-collections for purposes of comparison, etc.

It is hoped that this brief statement will serve to demonstrate that the operations of the Imperial Institute will continue, and increasingly, to promote the interests, and to assist in developing the resources and commerce, of the various countries composing the British Empire.

Some Examples of Information of a Commercial Character supplied by the Intelligence Department.

From the Chief Office, South Kensington, S. W., and the City Branch, 112 Cannon Street.

Names of Enquirers.	Subjects of Enquiry.
Agent-General for Queensland, London	Report on, and commercial valuation of, hibiscus fibres produced in Queensland.
Ditto ditto ...	To bring to the notice of London and Suburban Vestries, Queensland, hardwood blocks for street paving.
Ditto ditto ...	Commercial value of rutile (titanium dioxide).
Reporter on Economic Products to the Government of India.	Statement or the quality and value of Indian sisal fibre.
Ditto ditto ...	Report on commercial value of samples of gums.
Creator of Canadian Section ...	Valuation of Canadian graphite.
W. Fosbery, 20 Glazbury Road, West Kensington.	Valuation of India-rubber from the Niger Coast Protectorate.
Geo. Matthey, F.R.S., Hatton Garden ...	Umbogazembe fibre, from Natal, opinion desired.
Ditto ditto ...	Value of a specimen of kieselguhr from South Africa.
India Office	Conditions necessary for the safe carriage in India of carbonic acid gas in cylinders.
Ditto	Tests for viscous petroleum.
Hall & Ladyman, 25 St. George's House, Eastcheap.	Information on steatite requested.
Agent-General for New South Wales ...	Commercial prospects of Xanthorrhea gum.
Thirkell & Co., 155 Fenchurch Street ...	Specimens of fibres, obtained from various Colonies, suitable for hat-making and matting, for introduction into the British markets.
James Bros., London	Samples of jarrah and karri woods supplied, with particulars as to durability, cost, etc.
H. C. Wilson, London	Report respecting sources of supply, in United Kingdom, of hydrocarbons suitable for liquid fuel.
Reichardt Bros., Hull	Prospects of trading in wools in Thibet, and samples of Thibetan wools supplied.

Names of Enquirers.	Subjects of Enquiry.
A. Philips, Birmingham	Licenses required by commercial travellers in South Africa.
W. J. Bush & Co., London ...	Names of firms in Jamaica who would collect leaves of Hedyosmumnutans.
Sperling & Williams, London ...	Names of Colonial firms exporting ox tongues.
A Maidment, South Africa ...	Where nitrate of potassium is produced, how worked, price in London, etc., and some information as to mica and asbestos.
M. Lamm, London	Whether patent fuel made in Belgium requires specially marking for entry into Mauritius.
Metal Manufacturing Co, Delhi ...	Manufactures of sheet metal exported to India. Makers of special tools for manufacturing sheet metal hollow wares. If silver sheets are exported to India from England or the Continent.
W. V. V. Lidgerwood, London ...	Makers of plant for producing artificial ice for skating rinks.
Cundall & Sons, Shipley, Yorkshire ...	Various Customs in Foreign business transaction.
Peter de Abrow, Colombo	Asking for name of an agent or broker who would act as London representative.
"Oil and Colourman's Journal," London	Samples of, and names of, dealers in tung oil.
D. Bodden & Co, Glasgow	Canadian manufacturers of wood-wool.
S. Holmes, Hull	Prices realised for vanilla beans in London.
R. G. Norman, Dublin	Market for diatomacious clay (kieselguhr) in the United Kingdom.
Allan & Co., London	Canadian maple sugar and firms supplying it.
J. Geddes, Chicago	Development and future prospects of the hog trade in Australia.
'Oils, Colours & Drysalteries," London	Information on, and samples of, tung oil.
W. A. Grosuk, London	Duties on spirits and wines in Cape Colony and average rents in bonded warehouses.
The Institute of British Carriage Manufacturers.	Asking for the names of the principal timbers in favour in our various Colonies for carriage-building, with prices, and as to the possibility of the exportation of supplies to this country.
Ditto ditto ...	As to the possibility of finding a Colonial timber suitable as a substitute for lancewood for carriage shafts.
Ditto ditto ...	Substitutes for English ash, for use in carriage-building, from the Colonies.
C. H. Pigott & Co., London ...	As to price and sale of mica in London.
T. B Harbottle, London	Customs tariffs of the Colonies and India.
W. Barlow, Chorlton cum Hardy ...	Commercial prospects in the Soudan.
G. Crosfield & Co., Liverpool ...	List of principal Colonial importers likely to introduce coloured cube sugar.
C. H. Whiteman, Nova Scotia ...	Particulars of process for converting fish offal into guano.
Daniel de Pass, London	Particulars as to brown-paper mills in the United Kingdom.
Jamaica Fibre Co., Ld., Kingston ...	Value of samples of ramie fibre grown in Jamaica.
Thirkell & Co., London	Where to obtain material of the nature of silk or tussore waste suitable for felting.
Lever Brothers, Ld., Birkenhead ...	Details of crop, shipments, costs, exports, etc., of copra in Ceylon, India, New Guinea, Philippine Islands, Fiji and South Sea Islands; value of the oil-cake, therefrom.
Kamm & Schrempt, Liverpool ...	Information regarding shipments of castor seed, linseed, ground-nuts and butter beans from Natal and various West Indian Colonies; also of aniseed and linseed from Cyprus.
J. T. Boyde, Isle of Man	Prospects of obtaining markets for large deposits of fuller's earth.
W. A. Stephens, London	Discharging capabilities of Fremantle Harbour.
W. Berridge, Southend	Yacht-building in Australia.
Union Steamship Co., Ld., London ...	Causes, etc, of spontaneous combustion in coal barges.

Names of Enquirers.	Subjects of Enquiry.
Plymouth Chemical Works, Plymouth ...	Manufacture of, and trade in, chemical manures in Australasia.
E. M. Macnaghton, Windsor ...	London importers of jams, crystallised fruits, etc.
R. J. Ferguson & Co., Brighouse ...	Singapore firms exporting rice, etc., and importing woollens and cottons.
H. T. Buckland, Birmingham ..	Cost of building and general plan followed in constructing public library in Port Elizabeth.
W. Crawford, Belfast	Linen goods suitable for the Indian market.
E. Enderlein, Manchester	Importers of Manchester goods in various foreign countries.
Scrempft & Co., Liverpool	Exporters of seed in Bombay and Alexandria.
J. H. Row, Poole	Market for bone and fish manure in India.
Barrow Iron & Steel Co., Barrow ...	Newfoundland iron mines.
British Chamber of Commerce, Paris ...	Manufacturers of white felt.
P. A. Cobbold, Ontario	Demand for, and prices of, pencil-cedar.
S. J. Waring & Son, London ...	Colonial woods suitable for panelling.
Miss Mary Louch, Lympston ...	Processes of salt manufacture and names of manufacturers in the United Kingdom.
F. W. Heilgers, London	Substitutes for diamonds in boring drills.
A. S. Hughes, London	Demand in Colonies for celestine (sulphate of strontia).
Ditto ditto	Colonies importing fire-bricks and blue-bricks.
Bethell, Gwyn & Co., London ...	Growth and preparation of sponges.
C. H. Havercross, London	Firms in Cape Colony in varnish and spirit trade.
Lambeth Brass & Iron Co., Ld., London	Colonial importers of hardware.
Moreau Marble Co., London ...	Vendors of Malta stone.
B. Samaraweera, Ceylon	Obtaining a market for citronella oil.
K. Takayama, London	Manufacturers of certain goods suitable for the Japanese markets.
E. H. Rohl, Hamburgh	Australian exporters of dried fruits.
M. Warlow, Haverfordwest ...	Market for ginger, liquorice, and other roots from Queensland.
A. G. Dawson, Brussels	Introducing aniline dyes into Zanzibar.
Cyprus Government, Cyprus ...	Conditions and extent of the market for terra umbra, and means for developing trade in the Cyprus product.
Reade Bros. & Co., Ld., Wolverhampton	Export and samples of Barbados asphaltum.
Hugh Low & Co., Middlesex ...	Procuring rubber plants and seeds.
H. K. Gordon, Bombay...	Commercial value, and uses of yellow ochre, and prospects of establishing Indian export trade.
R. Craig, Garstone	The grafting of sugarcanes as practised in Queensland.
S. Mabson, Bristol	Bee culture in New Zealand.
H. Moore, Owen Sound, Canada ...	British importers of evaporated apples.
G. E. Pike, London	Countries producing and exporting *Arachis hypogea*.
H. Dawson, Daren	Canadian importation of aniline dyes.
E. J. Ewart, Aberdeen	Jamaica's export fruit trade, freights, packing and size of consignments, most suitable seasons, best markets, prices realized, commission charged, cost of storage, etc., etc.
A. Walker, Calcutta	Market for plantain meal and flour ; and machine for working plantain fibre.
J. W. Johnston, London	Cultivation of cinchona; and importation and manufacture of quinine.
C. S. Hawkes, Vienna	Market for Australian pelts.
Groome & Sons, Rushden	Boots and shoes suitable for export to Hong-Kong.
C. Mitchell & Co., London	Colonial trade in motor vehicles.
A. Bosworth, Sheffield	Mineral water manufacturers in India, Ceylon, and South Africa.
British Preserving Co., Braintree ...	Wholesale firms abroad willing to sell evaporated vegetables and fruits.
Schrempft & Co., Liverpool ...	Indian exporters of certain seeds and roots.
M. A. Hafeez, Bangalore	Manufacture of catgut.
G. L. Streatfield, London	Suitability of Jarrah for flooring.
Mander-Hannay Lead Co., Wolverhampton.	Sources of supply of Galena.

SOME EXAMPLES OF APPLICATIONS FOR STATISTICAL AND SPECIAL INFORMATION REGARDING BRITISH POSSESSIONS AND FOREIGN COUNTRIES.

Enquiries under this head embrace a most extensive list of subjects, comprising, amongst others, Trade Returns, Agricultural and other industries, names of Works of Reference, etc., the following being a few specimen applications :—

Names of Enquirers.	Subjects of Enquiry.
C. W. Anderson, Hull	Beet-root sugar industry.
Price's Patent Candle Co.	Export of candles from the United Kingdom.
W. Spencer, Batley	Export of osiers from Africa.
Sir Lintorn Simmons, London ...	Comparative prices of Australian and American meat.
Ellis, Munday and Clarke, London ..	Trade marks in Egypt.
"Admiralty and Horse Guards Gazette," London.	Production of dried vegetables in the Colonies.
Darley and Butler, London	Aden trade statistics.
J. Ormsby Lawder, London ...	Six ports in England importing the most timber with amounts.
E. T. Rawson, Epsom	Statistics of the importation of Russian and American petroleum into India.
E. G. Barton, Bengal	Process, cost, and places of manufacture of cement, and export to India from the United Kingdom.
A. H. Cherry, Eccleshall	Sundry trade statistics.
Sir Eyre Massey Shaw, London ...	Gold production of British Guiana.
E. G. Wills, London	Gold mining in British Columbia.
Mons. Yrarrazaval, London ...	Prices of jute, jute butts, sacks, etc., and names of brokers.
G. Jones, Southbourne-on-Sea ...	Indian imports and exports of hides, skins and leather for five years.
J. Smith, Keighley	Timber industry of the various Colonies.
C. R. Watson, London	Import of paper into Australia.
R. Thorp, Goole	Import and export trade of Belize.
Royal Danish Agricultural Society, Copenhagen.	(1) Importation of butter, bacon, hams and condensed milk into India, Ceylon, Cape Colony, Natal, Lagos, Mauritius, Jamaica, Barbados, Trinidad and British Guiana. (2) Principal teakwood producing Colony.
C. A. Bordier, London	Cultivation of, and trade in, jute in Bengal.
F. V. Longstaff, Wimbledon ...	Timber imports into the United Kingdom.
British Chamber of Commerce, Paris ...	Reports on Commissions on Agriculture in the United Kingdom and foreign countries.
Ditto ditto ...	Number of inhabitants, distinguishing males from females, in the United Kingdom.
Ditto ditto ...	Whisky trade of the United Kingdom.
Thomas Harris, London	Sugar producers in Fiji and Mauritius.
Edward J. G. Gill, Huntingdonshire ...	Sugar refineries in India and Australia.
India Office, London	Prices of various kinds of raw and manufactured cottons.
J. Armstrong, London	South American rates of exchange.
"Trade Journals' Review," Manchester ..	Statistics of Japanese trade.
Hans Frey, Zurich	Australian hardwoods for paving.
J. F. W. Howley, London	Prices of oil-seeds, cattle-foods, etc.
Clayton Beadle, Erith	Import of ebony and miscellaneous details as to that wood.
H. J. Jarman, London	Mineral resources and prospects of development of Siberia.
R. Jenkis & Co., Rotherham ...	List of Consuls in Northern Europe.
W. T. Hollingworth, New Barnet ...	Importation of cattle into the United Kingdom.
Civil Service Musical Instrument Supply Association, London.	List of towns in various Colonies.
Haddon & Co., London	List of various local directories of the British Empire.
James Edward & Co., London ...	Export of rubber from Lagos.
House's Cement and Anticrustator Co., Limited, London.	Sources of supply of Mica.
B. L. Smith, London	Tin-mining in Straits Settlements.
A. C. Campbell, London	Average freight rates to Monte Video during ten years.

Names of Enquirers.	Subject of Enquiry.
Captain J. Phillips, Southsea ...	Shipping, trade returns, and population of minor Indian ports.
G. E. Pike, London	Imports into the United Kingdom of dried vegetables; countries producing and exporting ground-nuts.
Danish Export Union, London ...	Import into the United Kingdom of dead meat.
E. de la Penha, London	Russian weights, measures and coinage
Osborn and Shearman, London ...	Imports of wall paper into Mexico and Central America.
P. C. Windsor, Worthing	Ostrich farming in South Africa.
J. Hewitt & Co., London	Home Firms dealing in Indian curios and antiquities.
Bryant and Aitkens, London ...	Tapioca and sago; process of manufacture, and forms in which they are exported.
G. M. Johnson, Fleet	Climate, products, prospects and conditions of trading and mining in Somaliland.
H. B. Geddes, London	Price of banana flour in West Indies, and freights
Brook & Co., Limited, Lowestoft ...	Colonial and foreign fishing ports likely to purchase patent steam capstan engines.
G. R. Young, Darlington	Climate, cost of living, education and general conditions of life at Trichinopoli.
Manila Railway Co., London ...	Gauges of Colonial railways.
Frey & Co, Hamburg	Jamaica pimento crop.
Miss Christie, Malvern	Education, churches, and occupations of Cape population; climate, and cost of living at Kimberley.
L. Jarnefelt, Bjorneborg	Names and prices of periodicals relating to electric and acetylene-lighting.
W. F. Sedgwick, Limited, London ...	Colonial coats of arms.
A. J. Flux, Belvedere	Works of reference upon the expansion of the British Empire.
J. W. Hawkins, Royal Courts of Justice	Newspapers published in the vicinity of Currajong, New South Wales.
D. L. Anderson, Glasgow	New Zealand Company law.
Vandam & Co, London	Electrically lighted towns in South Africa.

Emigration Enquiries.

A considerable proportion of enquiries relate to the emigration to British Colonies, and embrace very varied written and personal requests for information respecting the best fields for emigration, and particulars of all kinds, *e.g.*, climatic conditions, prospects of employment in professions and trades, rates of wages, cost of living, best routes, outfits, etc. Great pains are taken to promptly furnish full details, and to render assistance in the way of introductions, etc.; the literature of the Emgrant's Information Office is also widely distributed to such applicants. Reports and statements from that office, together with particulars of the Parliamentary Emigration Returns, are, moreover, regularly published in the Monthly Journal of the Institute. The Curators for Canada and for South Africa likewise furnish enquirers with information respecting the British Possessions they represent, whilst the British Women's Emigration Association has its home at the Institute, and carries out a large amount of valuable work in selecting suitable females for Colonial employment. The Association secures for such persons proper protection during their voyage, and adequate reception upon arrival. Many instances of the success attending these various efforts are on record, letters expressing gratitude for the assistance rendered having been received from persons in Australasia, Canada, South Africa, and some of the minor Possessions.

4th October 1899.

Illustrations of practical results attained, or in course of attainment, from information supplied by the Commercial and Industrial Intelligence Office and by the Scientific and Technical Department of the Imperial Institute.

Messrs. George Crossfield & Co., of Liverpool, wishing to place a new "rainbow cube" *sugar* on the Australasian and South African markets, were supplied with a list of firms in the different Colonies, likely to be interested, and the firm has sent samples and particulars with a view to orders.

A South African correspondent enquired about the prospects of a trade between the United Kingdom and Natal, in *thyme*, grown in the Colony. Samples were obtained from Natal, and reported on by the Institute's expert Referee; the probable result being that stills will be erected in Natal and a trade in the *essential oil of thyme* established.

Mr. E. B. d'Auvergne desired information as to *tea-planting in Ceylon*, viz., average price of suitable land; quantity of tea grown per acre; how long tea-plants take before bearing; labourers' wages; whether trade is exclusively in the hands of Companies; and other details only obtainable on the spot. The Corresponding Agent of the Institute in Colombo provided a full report explaining all the particulars.

The "Oil and Colourman's Journal" wrote for samples of *tung-tree oil*, and information as to the sources of supply. The samples and particulars were supplied. Several other enquiries respecting the same material have been dealt with.

Messrs Stevenson & Son, Moygashel Mills, Dungannon, Co. of Tyrone, enquired whether samples of *cotton* and *linen* goods, suitable for *the South American Market*, could be inspected, they being anxious to manufacture similar qualities. The desired information was given.

Two firms of exporters, one in Brighouse, Yorkshire, and the other in Belfast, enquired as to the descriptions of *cotton* and *wollen* goods and of *linen* goods respectively, which were suitable for *the Indian markets.* Full information was given of the various kinds of textile manufactures in which trade might be developed.

NEWFOUNDLAND—

Steatite.—A sample of mineral, closely resembling steatite, and useful for most of the purposes for which steatite is used, was received from the late Premier of Newfoundland. The results of its analysis were reported to the Colony and brought to the notice of British traders in French chalk; a large firm in Liverpool, who use this mineral extensively, offered to take a trial shipment, and have been put in communication with the deposits.

Some specimens *of iron ores* (hæmatite, magnetite, and chrome iron ore) received from Newfoundland, were found by analysis to be of a nature and quality likely to prove valuable. Further, average samples are to be sent.

BRITISH GUIANA—

Crowa fibre seems likely to be a useful fibre and of a nature for which there is a demand in this country. Steps are being taken to induce merchants in British Guiana to undertake the export of this fibre.

FIJI—

Fibres for fancy articles.—Samples of fibres from Fiji, suitable for various articles for which a demand exists here, have been obtained at the instance of a London firm, who have taken up the matter with a view to placing these products on the market.

CANADA—

Timbers.—Enquiries have been made of the authorities in the Canadian Provinces and the West Indies, at the instance of the Institute of British Carriage Manufacturers, for timbers which might be useful as *substitute for English ash.* Various samples from Quebec, Ontario, Nova Scotia, etc., were submitted, and have been reported on. Among them were some which have been very favourably received, and details are now being obtained as to possibility of regular quantity being exported to this country.

JAMAICA, TRINIDAD—

Specimens of *woods* from these Colonies have also been obtained in connection with the foregoing enquiry and have been tested. A larger sample, for practical trial, has been asked for of a wood from Jamaica which seemed promising.

BRITISH CENTRAL AFRICA—

Numerous samples of *metalliferous minerals, sands, coals*, etc., found in British Central Africa have been analysed in the Scientific Department and reports furnised to Her Majesty's Commissioner at Zomba.

NEW SOUTH WALES—

Australian sandarac (resin).—A sample of Australian sandarac was received from New South Wales and, being valued at less than the African sandarac at present on the market, on account of the alleged inferiority in point of solubility, etc., samples were examined in the Scientific Department, and it was evident that the resin is not so inferior as the difference in valuation would indicate.

Copra oil-mills.—Messrs. Lever Brothers, Limited, of Birkenhead, enquired for details of the crop and exports of copra in Ceylon, India, New Guinea, Philippine Islands, Fiji and South Sea Islands; whether there were any oil-mills in these countries and of what type; whether there was any sale for the oil-cake, if so, where it was shipped and at what price. Full information was obtained from the Corresponding Agent of the Institute and communicated to the applicants, *with the result that the firm has established oil mills at Sydney*, thus introducing a new field for labour in New South Wales.

Messrs. Arnold & Co., timber merchants, of Woolwich, applied for particulars and samples of certain *timbers* from New South Wales, not hitherto introduced into the British markets. Samples and information were supplied, and they state that some of their customers have been favourably impressed with the samples and they expect business to result.

QUEENSLAND—

Information has been furnished, for the use of the Government, respecting the sources of supply of *arrowroot*, the cultivation of *agave* and the extraction and preparation of the fibre for the market; the commercial value of *various fibres;* the cultivation and extraction of *pine-apple fibre;* the cultivation of *ginger;* the commercial value of *rutile;* machines for *practically testing fibres*, etc.

Mr. R. Callard, having observed certain specimens of Queensland *woods* in the Section of that Colony, made enquiries as to importing some quantity for ornamental purposes. Small samples of the woods (*Casuarinas*) were supplied to him, together with the names of timber dealers in the Colony through whom supplies could be obtained.

WESTERN AUSTRALIA—

Coal.—A full chemical and technical report has been made on the Collie coal of Western Australia, samples of which were sent for the purpose by direction of the Premier.

BARBADOS—

Manjak.—Enquiries have been made for information as to "Manjak," a mineral of the nature of "glance pitch," which has been found to occur in large quantities in Barbados. Samples of the material have been supplied from the Commercial Collections to several enquirers, and recommendations have been made to the owners at Barbados as to the preparation of the material for the market.

GRENADA—

Ground-nuts and castor-seed.—The Curator of the Botanic Gardens, Grenada, has made enquiries as to obtaining a market for the above products in the United Kingdom. It has been reported that there is an opening for new supplies of these products. This enquiry is of interest in connection with the request (see above) of Messrs. Kamm & Schrempft.

INDIA—

India-rubber.—A number of samples of india-rubber from Burma, Assam and Madras have been introduced to the notice of manufacturers, cable-makers and brokers, and their valuation of the samples have been reported to the Indian authorities. Samples of the rubber-like material obtained from certain new plants have been received and are under examination.

Jute.—A number of samples collected at various stages of the plant's growth, and submitted to certain treatment after rotting have been investigated chemically and examined by commercial experts, with the view of ascertaining at what period of maturity the plant yields the most constant quality of fibre.

Castor-oils.—A numerous series of castor-oils from various parts of India have been investigated as to their comparative properties and reported upon.

Indian dyes.—Professor Hummel and Mr. A. G. Perkin have investigated the dyeing properties and chemical constituents of a number of Indian dye-stuffs, amongst which may be mentioned Myrica Nagi, Morinda, Delphinium Zalil, etc., etc.

Fibres.—The following are some of the fibres which, after chemical examination by the methods adopted for comparative valuation, have been brought to the notice of merchants and brokers, who have reported on their market value:—Sunn hemp. Phœnix paludosa, Agave rigida, Sansevieria (bow-string hemp), Pine-apple fibre, Calotropis silk floss, Ban riha fibre, Madar bark-fibre, Sabai fibre, Tacca bast, etc., etc.

Mica.—Various preparations of this mineral have been submitted to manufacturers for their opinions, at the request of the authorities in India.

The value of samples of mica from Jeypore has been determined and recommendations made as to the best methods of mining and preparing the products for the market.

Coals.—A full report on Indian coals, with an extensive series of analyses and practical tests, has been furnished to the Government of India.

Limestone.—In connection with smelting experiments with Madras iron ore and Bengal coal, a number of samples of Madras limestone are being analysed.

Iron ores.—A large number of analyses of iron ores from Madras have been made and published. Steps have since been taken to ascertain whether it would be possible to work these ores in Madras.

Turpentines.—A complete series of the turpentines produced in India, from various districts, is under investigation and has been partly reported upon.

Tanning materials.—Acacia arabica pods and bark, Cassia auriculata bark, Terminalia chebula fruit (myrobalans), Cæsalpinia bark, etc., etc. Many samples of these tanning materials have been analysed, and specially samples of the three first-named, collected from trees of different ages, with the fruit or bark at various degrees of ripeness, have been compared, the object being to determine the best conditions for cultivation and the most favourable periods in the age of the plants for collecting the tanning materials for the market. At present the proportion of tannin in these materials as sent into the market, and their consequent value, varies very greatly.

A report on a number of samples of Mangrove barks and extracts as to both their tanning and dyeing value has been communicated to the Indian authorities.

Catech and catechu tannin.—Samples of these preparations have been analysed and a report on them is in preparation.

Edible oils.—An extensive series of samples has been examined and the results published so as to receive the notice of manufacturers and consumers.

Medicinal plants—A number of plants have been and are being investigated, both as to the chemical nature of their constituents and their therapeutic value, *e.g., Indian aconites, Indian opium, Podophyllum, Indian henbane (Hyoscyamus muticus), Malabar kino, Castor-oil cake, etc.*

Timber.—A report was made by Professor Unwin on the strength and physical properties of pyinma wood, and reports were obtained from the War Office authorities as to its suitability for making gunstocks.

Food-grains.—A large number of food-grains (including famine foods) have been analysed and reported on, and others are now under investigation.

Sun-flower seed and hibiscus (musk-mallow) seed have been dealt with as to their commercial prospects.

Tobacco from India has been analysed, and also reported on from the commercial point of view.

Gums.—A chemical enquiry has been made and supplemented by commercial reports, in reference to the value of some Indian gums occurring abundantly in certain localities, which appear likely to be serviceable as substitutes for gum arabic or for frankincense.

Corundum.—Samples of this material from India have been brought to the notice of manufacturers.

For details of the above extensive researches see the REPORTS for 1896-97, 1897-98, and 1898-99 on the INDIAN SECTION OF THE IMPERIAL INSTITUTE, presented to the Under-Secretary of State for India by the Special Sub-Committee for India at the Imperial Institute, composed of Sir Steuart C. Bayley, K.C.S.I., C.I.E. (Chairman), Sir Owen Tudor Burne, G.C.I.E., K.C.S.I., Sir Charles E. Bernard, K.C.S.I., Sir George C. M. Birdwood, K.C.I.E., C.S.I., and Sir Alexander Wilson,—together with temporary Honorary Members.

The following are further examples of work done for the Colonies in the Scientific and Technical Department:—

VICTORIA—

30 fibres grown in the Botanical Garden, Melbourne, examined by the chemical methods adopted for the comparative valuation of fibres.

20 essential oils, from Dunolly Scent Farm, chemically examined and their value determined, as compared with corresponding oils from known sources of supply. (Some of these will meet with ready demand in the London markets when their manufacture has been sufficiently developed.)

A sample of meat extract was analysed at the request of the Agent-General.

QUEENSLAND—

Fibres of *Hibiscus* have been reported on by practical experts.

7 timbers, for paving-blocks, submitted to Surveyors of Vestries with full particulars. The same timbers submitted to mechanical tests, and also to working tests, by experts.

Coffee.—Various samples, cultivated in the Colony, have been reported on by practical experts.

A full report was made on the quality and value of some *cured hides* and *skins* and samples of *leather*, and particulars as to Australian leather and the trade therein were obtained from experts.

Samples of *divi divi* pods were analysed and brought to the notice of consumers.

Analyses of a number of samples of *wine* produced in Queensland were made and experts' opinions obtained, with a view to recommending improvements and precautions in manufacture.

WESTERN AUSTRALIA—

Sample of water from a bore in Perth analysed.

TASMANIA—

3 timbers—Submitted to mechanical tests for strength, elasticity, etc., and also to practical tests. Results sent to the Colony and published.

NEW ZEALAND—

Limestone, iron-ore and oxide of iron paint—Reported on.

" Greenstone," jet and *jasper*—Samples valued and reported on.

Kouri timber—Submitted to tests as above. Report sent to the Colony and published.

HONG-KONG—

Tung oil—Recommended as a substitute for Baltic linseed oil.

BAHAMAS—

Sisal fibre—Examined.

JAMAICA—

30 timbers—Submitted to tests. Reports sent to the Colony and published both there and in Jamaica.

BRITISH GUIANA—

14 timbers—Submitted to tests as above. Report sent to the Colony and published.

MONTSERRAT—

2 timbers—Submitted to tests as above. Report sent to the Colony and published.

ST. VINCENT—

1 timber—Submitted to tests as above. Report sent to the Colony and published.

Groo-groo fibre—Investigated and valued as above.

TRINIDAD—

Chione glabra—Examined and reported upon to the Colony.

Seeds of *Omphlea megacarpa* are being examined.

Carapa oil—Examined and reported upon.

Sisal fibre—Examined and reported upon.

NATAL—

Samples of an oil-shale and *talc* analysed and reported on.

Experiments made and advice given as to the utilisation of the wood of the South African wattle for paper-pulp.

A sample of a rubber-yielding plant is under examination, as well as a number of medicinal plants.

6 timbers—Tested. Results sent to the Colony and published.

CAPE COLONY—

Analyses of a series of samples of wines have been made with the view of improving the characters and qualities of Cape wines for the English markets.

3 timbers—Tested. Results sent to the Colony and published.

Minerals—Examined.

CANADA—

Minerals, honey, etc.—Examined and reported upon.

CEYLON—

An extensive series of the *timbers* of Ceylon have been tested by Professor Unwin and working tests made as to their practical value.

Kekuna oil is being tested as to its medicinal value.

ORDER.—Ordered that the Resolution be published for general information in the Supplement to the *Gazette of India*, and that copies be forwarded to the Local Governments and Administrations noted on the margin* for information and publication in the local Gazette, to the Chief Commissioner of Ajmer, to the Foreign Department, to the Reporter on Economic Products to the Government of India, and to the Chambers of Commerce noted on the margin† for information.

[True extract.]

T. W. HOLDERNESS,

Secretary to the Government of India.

WEATHER AND CROP REPORT.

For the week ending the 26th February 1900.

Burdwan.—Rainfall at Sadar ·70, Kalna 1·35, Katwa ·93. Weather cloudy. Pressing of sugarcane continues. *Rabi* crops doing well. Fodder and water sufficient. Cases of cattle-disease reported from Raniganj and Katwa. Common rice selling as follows:—

				Srs.	
Sadar	...	...	...	15	per rupee.
Kalna	...	...	...	13⅔	
Katwa	...	...	...	15	
Raniganj	...	...	...	13½	

Birbhum.—Rainfall at Sadar ·22, Rampur Hât ·50. Weather seasonable. *Rabi* crops doing well. Price of rice at Sadar 13½ seers and at Rampur Hât 15 seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Bankura ·49, Vishnupur 1·80. Weather variable. Pressing of sugarcane going on. Harvesting of *rabi* has commenced. Fodder and water sufficient. Sporadic cases of cow-pox reported. Rice is selling at 15 seers per rupee at Bankura and Vishnupur.

Midnapore.—Rainfall at Sadar ·09, Contai ·08, Tamluk ·55, Ghatal ·77. Weather seasonable. Prospects of *rabi* crops good. *Boro* is being sown. Cattle-disease reported from Binpur, Garhbeta, and Nayagram. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	14	per rupee.
Contai	...	...	...	16	
Tamluk	...	...	...	13	
Ghatal	...	...	...	16	

Hooghly.—Rainfall at Sadar ·19, Serampore ·77, Jahanabad ·06. The rain and hail-storm have damaged mango and standing crops. Cattle-disease reported from several thanas. Common rice sells at 14 seers per rupee.

Howrah.—Rainfall at Sadar ·26, Ulubaria ·08. Weather cloudy with strong south-west wind. Transplantation of *boro* in Ulubaria still going on. State of *rabi* crops good. Fodder and water sufficient. Common rice sells at 14 seers per rupee.

24-Parganas.—Rainfall at Sadar ·08, Barasat 1·72, Basirhat ·43, Diamond Harbour ·24. Weather cloudy and foggy. Prospects of crops good. The recent showers have done much good in facilitating ploughing operations. Harvesting of *rabi* crops nearly finished. Cases of cattle-disease reported from Basirhat subdivision. Fodder and water sufficient Common rice sells as follows:—

				Srs.	ch.	
Sadar	...	...	...	16	0	per rupee.
Barasat	...	...	...	15	8	
Basirhat	...	...	...	16	13	
Diamond Harbour	...	...	...	13	5	

Nadia.—Rain at Sadar ·95, Kushtea ·85, Meherpur ·96, Chuadanga 1·90, Ranaghat 2·73. Weather seasonable. Prospects of standing crops good. Lands are being cultivated for *aus*. Fodder plentiful. Water sufficient except in Chuadanga. Price of common rice stationary.

Murshidabad.—Rainfall at Sadar ·33, Jangipur ·45, Kandi ·43. Weather cloudy. Prospects of *rabi* crops generally favourable. Harvesting of oil-seeds commenced. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	15	per rupee.
Jangipur	...	...	...	15¼	
Kandi	...	...	...	16½	

Jessore.—Rainfall at Sadar 3·40, Narail 1·48. Weather cloudy and rainy. There was a storm at Sadar on 25th. Harvesting of *rabi* crops going on. Prospects of crops good. The storm on the night of the 25th at Sadar blew down huts, uprooted trees, &c., with heavy

rainfall. Lands are being cultivated for *aus* crops. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	16	per rupee.
Jhenida	18	
Narail	16	
Bangaon	18	

Khulna.—Rainfall at Sadar 1·12, Bagerhat 1·33, Satkhira ·87. Weather variable. *Rabi* crops are being harvested. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	16¾	per rupee.
Bagerhat	16	
Satkhira	16	

Rajshahi.—Rainfall at Sadar ·84, Nator ·34, Naugaon ·85. Prospects of crops good. No cattle disease. Fodder and water ample. Common rice sells at 17 seers per rupee.

Dinajpur.—Average rainfall ·78. Weather seasonable. Fodder and water plentiful. Rice sells at Sadar 17 seers and at Thakurgaon 16 seers per rupee.

Jalpaiguri.—Rainfall at Sadar ·01. Weather seasonable. Harvesting of mustard finished. Tobacco doing well. Lands are being prepared for *bhadoi* crops. Common rice sells at 16 seers per rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Darjeeling ·17, Siliguri ·04. Weather seasonable. *Hills*:—*Tori* being harvested; wheat, barley, and potatoes doing well. *Terai*:—Harvesting of mustard going on; tobacco doing well. Coarse rice sells as follows:—

	Srs.	
Hills	10	per rupee.
Terai	18	

Bhutta sells at Darjeeling 20 seers and at Kalimpong 24 seers per rupee.

Rangpur.—Rainfall at Sadar ·27, Nilphamari 1·49, Kurigram ·37, Gaibanda ·58. Weather seasonable. Mustard, sugarcane, and potatoes are being harvested. Common rice sells at 18½ seers per rupee. Fodder and water sufficient.

Bogra.—Rainfall at Panchbibi ·22, elsewhere nil. Cultivation of *aus* and jute still going on. Prospects of standing crops good. Common rice selling at 18¼ seers per rupee. Fodder and water sufficient.

Pabna.—Rainfall at Sadar ·08, Sirajganj ·20. Weather partially cloudy. Slight rain last night (25th). Prospects of crops good. Price of common rice stationary. Fodder and water sufficient.

Dacca.—Rainfall at Sadar 1·21, Manikganj ·71, Munshiganj 1·52, Narainganj 1·51. Weather seasonable. Prospects of crops good. No cattle-disease. Fodder available. Common rice 16 seers per rupee.

Mymensingh.—Rainfall at Sadar ·06, Jamalpur ·75, Kishoreganj 1·50, Netrokona ·40, Tangail ·56. Weather cloudy. Prospects of crops good. Health of cattle good. Fodder and water sufficient. Common rice selling at Sadar 18 seers and in the subdivisions from 13¼ to 18¾ seers per rupee.

Faridpur.—Rainfall at Sadar 1·67, Goalundo 1·58, Madaripur 1·15. Weather stormy. State and prospects of crops good. Common rice sells at 17 seers per rupee.

Backergunge.—Weather stormy. Prospects of crops good. Common rice sells at 16 seers per rupee.

Tippera.—Rainfall at Comilla ·20, Brahmanbaria 1·21, Chandpur 1·16. Weather seasonable. Pulses being harvested. Lands under preparation for jute and *aus* paddy. Common rice 16¼ seers per rupee.

Noakhali.—Rainfall at Sadar ·32, Feni ·48. Prospects of *rabi* crops good. Cattle-disease reported from Senbag. Fodder and water sufficient. Price of common rice stationary.

Chittagong.—No rain. Prospects of *rabi* crops good. Water and fodder sufficient. Common rice 16 seers per rupee.

Patna.—Rainfall nil. Harvesting of early *rabi* and lancing of poppy going on. Sugarcane being pressed. Leaf-manufacture progressing where the flowers have not been destroyed. Collections going on everywhere. Common rice in Patna sells at 16 seers per rupee. Fodder and water for cattle sufficient.

Gaya.—Rainfall at Sadar ·17, Aurangabad ·09, Nawada ·13. Harvesting of *rabi* and lancing of poppy continue. Common rice selling at 14 seers per rupee.

Shahabad.—Harvesting of *rabi* commenced. Standing crops fair. Fodder and water abundant. A few cases of cattle-disease. Common rice at Sadar 11 seers per rupee.

Saran.—No rain. Weather seasonable. *Rabi* generally doing well and harvesting begun. Ploughing for paddy and indigo in progress. Common rice 13 seers 6 chitaks and *makai* 14 seers 3 chitaks per rupee.

Champaran.—Prospects of *rabi* and poppy continue favourable. Collection of opium commenced. Prices of common rice and maize at Sadar are 12½ and 15½ seers per rupee respectively.

Muzaffarpur.—Rainfall at Hajipur ·01, Sitamarhi ·75. Prospects of crops good. Prices are—Common rice 13 seers, wheat 12 seers, barley 16 seers, *makai* 14¾ seers, gram 16 seers, and *rahar* 16 seers per rupee.

Darbhanga.—Rainfall at Samastipur ·29, Madhubani ·08. Weather seasonable. *Rabi* doing well. Fodder and water sufficient. Cattle-disease reported from Madhubani. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	14½	per rupee.
Samastipur	...	...	...	13¾	
Madhubani	...	...	...	15 9/16	

Monghyr.—Rainfall at Sadar ·07, Begusarai ·02. Weather clear and fine. Prospects of standing crops good. Sugarcane-pressing continues. Poppy is being lanced. Common rice sells as follows:—

				Srs.	ch.	
Monghyr	...	...	...	13	2	per rupee
Begusarai	...	...	...	14	0	
Jamui	...	...	...	14	0	

Bhagalpur.—Weather seasonable. Rain at Sadar ·16, Madhipura ·18, Supaul ·60. Prospects of standing crops favourable. Fodder and water ample. Cattle-disease continues in the Banka and Supaul subdivisions. Price of common rice rising.

Purnea.—Rain at Sadar ·60, Kishanganj 1·18, Araria 2·13. Weather seasonable. Heavy rain with hail has injured standing crops in the Araria subdivision. Prospects of *rabi* crops fair. Ploughing of lands for *bhadoi* crops going on. Pressing of sugarcane and manufacture of molasses still continue. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	15	per rupee.
Kishanganj	...	...	...	18	
Araria	...	...	...	18	

Malda.—Rainfall at Chanchal ·20, Shibganj ·06. Weather seasonable; occasionally cloudy. Lands are being prepared for *bhadoi* and indigo. *Boro* paddy is being transplanted. *Rabi* crops are in good condition. Cattle-disease reported from Gomastapur. Price of rice stationary. Fodder and water sufficient.

Sonthal Parganas.—Weather warmer, cloudy. Average rainfall ·11. *Rabi* doing well. Sugarcane being pressed. Mangoes in blossom. Price of rice 14 seers and of maize 18 seers per rupee. Fodder and water sufficient. Health of cattle good.

Cuttack.—Rainfall nil. Weather seasonable. *Guru sarad* being harvested. Sugarcane being pressed. Tobacco, *achua cotton*, and *dalua* growing. Condition of cattle generally good. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	ch.	
Cuttack	...	...	...	15	1	per rupee.
Jajpur	...	...	...	17	1	
Kendrapara	...	...	...	18	6	
Banki	...	...	...	14	13	

Balasore.—Rain at Sadar ·90. Threshing of *sarad* and *rabi* crops and pressing of sugarcane continue. Cattle-disease reported from Balasore and Singla. Rice sells at 18, 16, and 17 seers per rupee in interior, Balasore, and Bhadrak respectively. Fodder anp water sufficient.

Angul.—Rainfall in Angul ·31. Weather cloudy. *Khesari*, castor, and turmeric crops are being gathered; sugarcane is being planted. Common rice selling at 12 seers per rupee in Angul and 9 seers in the Khondmals. Cattle-disease reported from the interior. Fodder and water available.

Puri.—Rainfall at Sadar 1·7, Khurda ·31. Weather cloudy. Prospects of *rabi* and mango look fair. *Dalua* and other miscellaneous crops doing well. Labour available. Common rice sells as follows:—

	Srs.	ch.	
Sadar	15	12	per rupee.
Khurda	16	1	
Interior of district	16	8	

Hazaribagh.—Rainfall at Sadar ·39. Ploughing going on. Fodder and water sufficient. Common rice sells at Sadar 12¼ seers and at Giridih 13 seers per rupee.

Ranchi.—Rainfall ·47. Weather seasonable. Ploughing continues. Rice sells at Ranchi 9½ seers and in the interior 10 seers per rupee. Cattle-disease continues. Fodder and water sufficient.

Palamau.—Rainfall at Sadar ·02. Weather seasonable. *Rabi* doing well. Fodder and water sufficient. Prices at Sadar are—Rice 11¾ seers, gram 14 seers, barley 16¼ seers, *makai* 13 seers, and wheat 12¾ seers per rupee.

Manbhum.—Rainfall at Sadar ·22, Gobindpur ·02. Weather seasonable. Prospects of crops good. Cattle-disease reported from thanas Purulia, Manbazar, Tundi, and Topechanchi. Fodder and water sufficient. Average price of common rice at Sadar 12 seers 9 chitaks and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall nil. Condition of standing crops fair. Common rice sells at 13 seers 5 chitaks per rupee.

General Summary.—Rain fell in varying quantities in different parts of the Province during the week. It has done good in facilitating the cultivation for the autumn crops, which is in progress. The standing *rabi* and other spring crops are in good condition, but some damage from hail is reported from Hooghly and Purnea. Sugarcane and early *rabi* crops are being harvested, and poppy is being lanced and opium collected. No change of importance in the price of rice is reported except that it has slightly fallen in the districts of Hazaribagh, Ranchi, Palamau, and Puri, where scarcity is apprehended. Some cattle-disease is reported, but no want of fodder is reported anywhere.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

d, drizzling rain; o, overcast; △, dew.

RESOLUTION ON THE REPORT ON THE ANNUAL ADMINISTRATION OF THE OPIUM DEPARTMENT FOR THE YEAR 1898-99 (1st SEPTEMBER 1898 TO 31st AUGUST 1899).

REVENUE DEPARTMENT—OPIUM.

Calcutta, the 5th March 1900.

RESOLUTION—No. 1104O.

READ—

The Report on the Annual Administration of the Opium Department for the year 1898-99 (1st September 1898 to 31st August 1899).

THE Lieutenant-Governor is glad to notice that the Board have again, for the fourth consecutive year, submitted their report punctually on the due date (1st February).

Climatic conditions of the season.

2. In Bihar the climatic conditions of the season were as unfavourable as in the past years. Prospects were in the beginning excellent, but blight, which was brought in by east winds and damp weather in January and February, seriously injured the crop. Later on, at the time of lancing, some damage was done by west winds, which dried up the capsules prematurely. Hail also caused loss in some of the Sub-Agencies. In Benares a bumper crop was looked for until nearly the end of March, but partly owing to the prevalence then of hot westerly winds and partly to the effects of severe frost in January, the yield of opium eventually was not as good as was anticipated. The loss due to frost was more severe in Cawnpur than elsewhere.

3. The following statement shows the area engaged for, the area sown, the net cultivation, and the produce in each agency in the three seasons 1896-97, 1897-98, and 1898-99 :—

Cultivation.

Season.	Area engaged for.	Area sown, including failures.	Net cultivated, excluding failure.	Produce at 70° consistence.	Number of chests of provision opium actually manufactured.
1	2	3	4	5	6
Bihar.	Bighas.	Bighas	Bighas.	Mds.	No.
1896-97 ...	372,713	359,635	328,191	31,578	22,000

1898-99 ...	368,956	368,629	358,765	31,886	24,700
Benares.					
1896-97 ...	578,582	601,312	570,969	53,594	23,500
1897-98 ..	542,763	522,407	501,342	52,930	25,424
1898-99 ...	539,264	552,984	543,684	60,520	27,019

NOTE.—Out of the quantities shown in column 5 under Benares Agency, the following quantities were transferred to Patna to equalise, as far as possible, the number of chests of provision opium manufactured in each of the agencies :—

	Mds.
1896-97	10,697
1897-98	6,652
1898-99	13,149

The actual outturn of the two agencies for the years 1896-97 and 1897-98 was still below the estimate of normal requirements fixed by the Government of India (54,000 chests of provision opium in addition to 7,000 or 8,000 maunds of excise opium of 90° consistence). The attention of the Board was drawn to this deficiency in paragraph 3 of the Resolution on the report on the administration of the Opium Department for that year. The explanation given with regard to the season 1897-98 is that the average yield per bigha of the Bihar and Benares Agencies in that season was only 3 seers $7\frac{1}{2}$ chitaks and 4 seers and $3\frac{1}{2}$ chitaks, respectively, whereas the Government of India had based their estimate of normal requirements upon the average for the 22 years from 1873-74 to 1894-95 of 4 seers $2\frac{1}{10}$ chitaks for Bihar and 4 seers $15\frac{7}{10}$ chitaks for Benares. The results of the year under report show an increase of outturn compared with the past two years. In the Bihar Agency it is noticeable that in spite of the fact that there was a decrease of 5,240 bighas in the area of land engaged for, of 4,446 bighas in land sown, including failures, and of 3,710 bighas in the net cultivation, excluding failures, the total produce increased from 31,384 maunds in 1897-98 to 31,886 maunds in the year under report, owing to a slight increase in the average yield per bigha, which was 3 seers $8\frac{3}{4}$ chitaks as compared with 3 seers $7\frac{1}{2}$ chitaks in 1897-98, the increase occurring only in the four agencies of Shahabad, Hazaribagh, Tehta, and Monghyr. In the Benares Agency, while there was a decrease of 3,499 bighas in the area of land engaged for, there was an increase of 30,577 bighas in the area of land sown, including failures, and of 42,342 bighas in the net cultivation, excluding failures; and the total produce increased from 52,930 maunds to 60,520 maunds in 1898-99. The average outturn per bigha was 4 seers $7\frac{1}{4}$ chitaks as against 4 seers $3\frac{1}{2}$ chitaks in the previous year, all the divisions, except Ghazipur, Azamgarh, Basti, Mirzapur, Allahabad, Cawnpur, Fyzabad, and Gonda showing an increase. From his experience of recent years the Benares Agent has remarked that the average outturn of the western districts in his agency is considerably higher than that in eastern districts. The subject of the productive powers of the land in the east is one which will require the careful attention of the Board in the future.

Check-measurements by gazetted officers.

4. The results of check-measurements by gazetted officers show that in the Bihar Agency the number of plots tested in all the districts was 49,278 as against 36,812 in the preceding year. The number of cases in which the raiyats whose holdings were checked had failed to cultivate opium, or had only made a pretence of doing so, was 457 as compared with 524 in the preceding year. In the Benares Agency the number of plots checked was 118,432 as against 142,764 in 1897-98. The number of cases detected of raiyats not having cultivated, or of only making a pretence of doing so, was 415 as against 925 in the previous year. The Lieutenant-Governor agrees with the opinion of the Bihar Agent and the Board that test-measurements by gazetted officers are the best means of checking and finally eradicating paper cultivation. Owing to the idiosyncracies of the officers concerned the Benares Agent does not attach much importance to the figures at present compiled in his agency, and he has suggested that instructions to secure uniformity should be issued. A report of the instructions issued by him on the subject will be awaited. The question of the utilization of cadastral survey maps and records in making settlements and checking measurements was discussed in the Government Resolutions on the reports on the administration of the Opium Department for the past two years. The Board promised a further report to Government on the subject on the completion of a more extended and detailed enquiry by Mr. Stevenson-Moore, the Settlement Officer, in communication with the local Opium Officers. A full report on the subject was received by them during the year from the Director of Land Records, and they have consulted the Bihar Agent on the Director's proposals. The Board's report on the subject is awaited by Government.

Irrigation and advances to wells.

5. Out of a total cultivation of 358,764 bighas in the Bihar Agency exclusive of failures, 302,116 bighas were irrigated and 56,648 bighas unirrigated, while in the Benares Agency, out of a total area of 543,684 bighas, 524,352 bighas were irrigated and 19,332 bighas unirrigated. The percentages for the Bihar Agency were irrigated 84 and unirrigated 16 as against 85 and 15 respectively in the previous year; and those for the Benares Agency were irrigated 96 and unirrigated 4 as against 95 and 5 respectively in 1997-98. The Lieutenant-Governor is pleased to notice that the result of the representation made to the Chief Engineer, Irrigation Department, North-Western Provinces, with regard to the insufficiency of the supply of canal water in the Cawnpur Division has been a great improvement in the supply of water for the purposes of cultivation.

A sum of Rs. 20,574 was advanced during the year for the construction of wells in the Bihar Agency as against Rs. 25,470 in 1897-98. The balance outstanding at the close of the year amounted to Rs. 33,188, of which Rs. 2,456 have since been realised. In the year under report, three hundred and thirty-eight *pucka* and 561 *kutcha* wells were constructed, 74 *pucka* wells repaired, 145 additional wells were under construction, and 25 under repairs. Mr. Tytler deserves the thanks of Government for his successful efforts towards the construction and maintenance of wells in the Aligunj district. In the Benares Agency there were Rs. 12,084 advanced for wells as against Rs. 16,004 in the preceding year. The sum outstanding at the close of the year was Rs. 21,486. Two hundred and fifty-seven *pucka* and 329 *kutcha* wells were constructed, 81 wells were repaired, and the construction or repair of 635 others was commenced.

Outturn and sales.

6. The total outturn of the season was 51,719 chests, of which 24,700 chests were manufactured in Bihar and 27,019 chests in Benares as against 18,652 from the former and 25,424 from the latter agency in the preceding year. After meeting the requirements of the year 1899, there was a surplus in reserve of 10,096 chests (5,583 of Patna and 4,513 of Benares opium) on the 1st January 1900 from the outturn of the two agencies in the previous year. The total number of chests available for sale in 1900 thus amounts to 61,815 chests, consisting of 30,283 chests of Patna and 31,532 of Benares opium. Of this number, 44,400 chests, made up of 20,400 chests of Bihar and 24,000 chests of Benares opium, are to be sold in 1900, leaving a surplus in reserve of 17,415 chests on the 1st January 1901. The quantity of Nepal opium delivered during the year was

235 maunds as against 251 maunds in the previous year. The total number of chests sold during the 12 months ending 30th September 1899 was 40,350 of which 17,925 chests were of Bihar and 22,425 chests of Benares opium. The average price per chest of Bihar opium for this period was Rs. 1,139 and of Benares opium Rs. 1,128 as compared with Rs. 993 and Rs. 984 respectively in the previous year, the increase being attributed to increased demand in China and the partial failure of the crop in Malwa. It is reported that the prices have continued to rule high since September last.

Consistence of opium.

7. The Lieutenant-Governor is glad to observe that the measures adopted by the Board, with a view to obtaining opium at a consistence more suitable for manufacture, were attended with some success as, partly owing to these measures and partly to the climatic conditions being favourable, the consistence of the opium obtained during the year showed a great improvement. The average consistence in Bihar was 73·95 as against 75·01 in 1897-98. It is satisfactory that not a single cake was manufactured of a consistence above the standard of 75°. The average in Benares was 70·75 as against 72·15 in the previous year. In only three out of eleven sub-agencies in Bihar was opium brought in of a consistence above the standard of 75°. In Benares, although 14 out of the 20 divisions sent in opium above the standard consistence of 71°, yet in all divisions, except Etawah and Mainpuri, the consistence was lower than in the preceding year. The loss to Government by caking above the standard consistence of 71° was Rs. 59,084, which compares very favourably with the results of the previous year, when the net loss to Government amounted to Rs. 2,56,900. The amount of *pasewa* received for every 100 maunds of opium delivered was 28 seers 5¼ chitaks in Bihar and 3 seers 3¾ chitaks in Benares, as compared with 36 seers 9¼ chitaks and 4 seers 10¾ chitaks respectively in 1897-98. Comparing the figures of the two agencies, the Factory Superintendent of Ghazipur thinks that the entire quantity of *pasewa* which drains off from the opium is not brought in by the cultivators in the Benares agency. The Benares Agent proposes to consult officers as to how a larger quantity can be obtained. The Board are requested to report to Government the conclusions at which the Agent may arrive on this question.

There were 352 lbs. 2 oz. of cake and 826 lbs. 4 oz. 1 dr. of powdered medical opium manufactured during the year at the Patna Factory, while 440 lbs. 14 dr. of morphia hydrochlorate, 9 lbs. 13 oz. 4 dr. of morphia acetas, 51 lbs. 11 oz. 2 dr. of codeia, 623 lbs. 3 oz. of pure morphia, and 2 lbs. 7 oz. 12 dr. of morphia tartras were turned out at Ghazipur. In accordance with an arrangement concluded with the Secretary of State, the firm of Messrs. Burgoyne, Burbidges and Company were being supplied from the Ghazipur Factory with monthly consignments of 60 lbs. of morphia and 60 oz. of codeia for sale in the London market. A renewal of the agreement with that firm on the basis of a despatch to them month by month from June 1900 of 30 lbs. of muriate of morphia and 5 lbs. of codeia has been suggested to the Government of India, and the orders of that Government are being awaited.

Purchase of Malwa opium.

8. The plan of purchasing Malwa opium for excise purposes was continued during the year. Mr. Hastings, who was deputed for the purpose, obtained 3,903 maunds of crude opium, of which 2,386 maunds were of special quality, as free from oil as practicable, against 1,615 maunds of that quality obtained during the previous season. The opium purchased was both cheaper and of better quality than in the previous year. The scheme of laying in a reserve of *hali* coins at the time when they were cheapest did not prove so great a success as in the preceding season, but on the whole it worked well. The saving effected by this measure was Rs. 13,712 as against Rs. 22,735 in the previous year, the decrease being accounted for by the fact that for local reasons it seemed inexpedient to lay in so large a stock as on the last occasion. During the current season the Government of India passed orders directing the discontinuance of the purchase of Malwa opium. Accordingly the Government property under the charge of Mr. Hastings, Sub-Deputy Opium Agent in Malwa, was sold, and the house occupied by him in Indore was given up.

9. The experiment of packing opium in the Bihar Agency for conveyance to the factory in cloth bags instead of in earthen jars was continued during the year. The results show that the use of bags for all opium of the consistence of 70° and upwards was convenient and suitable; that the trial of the experiment in the case of opium below 70° in consistence not being conclusive further trial was necessary; and that for opium of a lower consistence than 67° bags of the kind in use were not suitable. With regard to the Benares Agency, the Board have issued orders to the Agent for packing 2,000 maunds of opium of a consistence of 70° and over in cloth bags in the current season. The results of this experiment should be given in the next Administration report.

Packing of opium.

10. The expenditure of the season in the Bihar Agency was Rs. 86,11,857 as against Rs. 84,74,008 in the previous year, and in the Benares Agency Rs. 1,60,55,616 as compared with Rs. 1,41,23,846 in 1897-98. There was thus an increase of Rs. 1,37,849 in Bihar and of Rs. 19,31,770 in Benares, the total increase in the two agencies being Rs. 20,69,619. This was due to the larger outturn of opium during the year. The average cost per maund of opium on the net expenditure was Rs. 270-1-3 in the Bihar and Rs. 265-4-8 in the Benares Agency as compared with Rs. 270-0-1 and Rs. 266-13-5 respectively in the preceding year. The average cost per chest of opium was Rs. 455-12 in Bihar as against Rs. 472-8-8 in the previous year and Rs. 466-13 in Benares as against Rs. 478-0-2 in 1897-98. The larger outturn accounts for this decrease in both the agencies.

Expenditure.

11. The total number of chests both provision and abkari, turned out by the mills at Patna in 1898-99 was 26,425 as against 60,355 in the previous year. The decrease is due to the fact that the mill was closed for five months from the 1st May 1898 in consequence of the execution of several important improvements rendered necessary for the safety of the workmen, and this retarded work to a great extent. As in the preceding year, all the provision and abkari chests were made of mango wood, the average cost per chest being Re. 1-15-8 as against Rs. 2-0-8 in 1897-98. The Lieutenant-Governor agrees with the Opium Agent and the Board that this is a satisfactory result, considering that the cost in 1896-97 was Rs. 2-5-11, and is very creditable to Mr. Williamson, the officer in charge. The total cost of working the mills in 1898-99 was Rs. 20,302 as compared with Rs. 39,023 in 1897-98. The quantity of mango and simul wood contracted for during the season was 136,384 cubic feet and 46,000 cubic feet respectively as against 181,328 cubic feet and 27,000 cubic feet respectively during the preceding year.

Saw mills.

12. The following statement shows the figures relating to the breaches of the Opium Law during the past two years:—

Breaches of the Opium Law.

Province.	Cases investigated.		Persons						Fines				Rewards to informers.	
			Tried.		Convicted.		Acquitted.		Imposed.		Realised.			
	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15

North-Western Provinces	653	541	945	701	742	588	203	113	12,340	10,232	8,190	6,376	6,269	7,968

The Benares Agent mentions a few important cases of opium-smuggling in which persons were convicted. The Bihar Agent reports a case in which 16 men were arrested at the Mokameh railway station carrying 1 maund 13 seers and 9 chitaks of contraband opium. They were all convicted and sentenced—one man to one year's rigorous imprisonment and Rs. 300 fine, and the rest to three months' rigorous imprisonment and fine Rs. 200 each. The Bihar Agent adheres to the view expressed by him in his report for the year 1897-98 that

only small quantities of opium are retained by cultivators for medicinal purposes and that there is no general large retention of the produce for purposes of smuggling. The case is, however, different in the Benares Agency regarding which the Agent says: "It is common for persons who embezzle their produce to conceal its disappearance by presenting a made-up substance with a small quantity of opium in it." He issued general instructions to secure the examination of every case of deliberate adulteration and the prosecution of all guilty cultivators. One case in which some 30 seers of produce must have been embezzled was successfully prosecuted during the year. The Lieutenant-Governor agrees with the Board's view that the outturn of the lands of suspected cultivators should be carefully and systematically watched, and that every cultivator whose produce is habitually short should be proscribed as such measures are calculated to prevent, if not to detect, fraudulent cases of this kind.

Assamiwar system.

13. Mr. Tytler's alternative assamiwar scheme was continued in the Aliganj Sub-Agency during the past season, and again it answered admirably. It was tried for the first time in the Bettiah and Hazaribagh Sub-Agencies and should also have been tried in Tirhut, to which its extension was sanctioned; but the trial in that sub-agency was entirely vitiated because the Sub-Deputy Opium Agent there endeavoured to combine his own long-term settlement system with Mr. Tytler's plan. The Government of India accepted the conclusion of the Board and this Government that no extension of the "intermediate system" to other sub agencies should be contemplated until further experience had been gained of its working in the tracts in which it is already in force. The further report called for by the Government of India on the continued working of the system in the Aliganj Sub-Agency during the year 1898-99 and on its working in the Bettiah and Tirhut Sub-Agencies is awaited from the Board. Measures were taken to remedy some of the defects pointed out by Mr. Tytler on the working of the assamiwar system of poppy cultivation in the Benares Agency. One of the defects referred to by him was that the amount of *khurchan* exacted is excessive. It appears that no reduction is possible in the total amount of remuneration at present allowed to lambardars. The question whether the method of that remuneration should be changed, so as to extinguish or diminish the amount at present levied from the raiyats in the shape of *khurchan* is still under the consideration of Government. The Government of India have called for a further report on this point, and also as to the possibility of introducing an assamiwar system of settlements in the Gorakhpur and Basti subdivisions. The Board have accordingly been asked to furnish these which are awaited. The Government of India desired that an attempt should be made to regulate the establishments at the various *kothis* on the basis of the number of cultivating raiyats, the area of cultivation, and the items of account and settlements regarding which the Board promise a report.

Establishment.

14. Proposals for improving the position and prospects of the factory establishment at the Bihar Opium Agency, involving a net yearly increase of expenditure of Rs. 2,117-8 were sanctioned by the Government of India during the year; and the proposed reorganisation of the guard establishment of the opium factory at Ghazipur at an extra expenditure of Rs. 3,296 a year, with effect from the 1st April 1900, was also sanctioned by that Government.

Opium Convention.

15. The Opium Convention concluded with the Principal Administrator at Chandernagore on the 27th December 1893 was renewed on the existing terms for a further period of five years from the 1st January 1899.

Merits of officers.

16. The Lieutenant-Governor desires to thank the Hon'ble Mr. Oldham for his efficient administration of the Opium Department. His thanks are also due to Messrs. Blyth and Baillie for the assiduous and successful management of their respective agencies. The officers of whom special mention is made as deserving of commendation for good work are Messrs. A. G. Tytler, C.I.E., J. Christian, L. L. Parrott, F. J. R. Field, A. H. Biss, J. C. Roy, N. C. Wilcox, P. P. Donlea

Lieutenant-Colonel W. Owen, Messrs G. C. R. Nicholson, J. H. Hill, G. M. Gregory, W. H. T. Howey, A. Ross, C. S. Delmerick, J. E. Hand, J. P. Augier, C. Paterson, A. C. Bryson, A. B. Kennedy, C. Burt, L. S. Graham, Rai Keshri Narain, and Maulvi Abdul Majid. The names of the following officers have also been mentioned for good services rendered by them:—Mr. Williamson, Superintendent and Engineer of the Saw Mills, Patna; Mr. Graham, Head Assistant and Accountant, Bihar Agent's office; Rai Gogon Chandra Roy, Head Accountant; and Mr. Pigott, Superintendent of the Benares Agent's office.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secy. to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 5th March, 1900.

Burdwan.—Rainfall at Sadar 1·39, Kalna 2·15, Katwa 0·54, Raniganj 0·06. Weather seasonable. Pressing of sugarcane continues. Harvesting of *rabi* commenced. Fodder and water sufficient. Some cattle-disease reported from Raniganj and Katwa. Common rice selling as follows:—

				Srs.	
Sadar	...	...	...	15	per rupee.
Kalna	...	...	...	13½	
Katwa	...	...	...	15	
Raniganj	...	...	...	13	

Birbhum.—Rainfall at Sadar ·08. Weather seasonable. *Rabi* crops being harvested. Price of rice at Sadar 13 seers 8 chitaks and at Rampur Hât 15 seers per rupee. Fodder sufficient.

Bankura.—No rain. Weather getting hot. Pressing of sugarcane continues. Harvesting of wheat and barley commenced. Fodder and water sufficient. Sporadic cases of cow-pox reported. Price of common rice 15 seers per rupee at Bankura and Vishnupur.

Midnapore.—Rainfall at Sadar ·02, Contai ·08. Weather seasonable. Prospects of *rabi* crops good. Transplantation of *boro* continues. Cattle-pox reported from Binpur, Nayagram, and Garhbeta. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	14	per rupee.
Contai	...	...	...	16	
Tamluk	...	...	...	13	
Ghatal	...	...	...	16	

Hooghly.—No rain. Weather moderate. Cattle-disease reported from thana Pandua. Price of common rice stationary.

Howrah.—No rain. Weather hot and cloudy at times. Transplantation of *boro* in Uluberia continues. Condition of *rabi* good. Fodder and water sufficient. Common rice sells at 14 seers per rupee.

24-Parganas.—No rain. Weather seasonable. Prospects good. Harvesting of *rabi* crops nearly at an end. Cattle-disease in Basirhat abated. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	ch.	
Sadar	...	...	...	14	0	per rupee.
Barasat	...	...	...	15	8	
Basirhat	...	...	...	15	0	
Diamond Harbour	...	...	...	13	5	

Nadia.—Rainfall at Sadar 0·26, Kushtea 0·26, Meherpur 0·54, Chuadanga 0·36, Ranaghat 1·93. Weather seasonable. Prospects of *rabi* crops good. Wheat, barley, and gram being harvested. Cultivation of lands for *aus* going on. Fodder plentiful. Water sufficient except in some places in Chuadanga. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	14	per rupee.
Kushtea	...	...	...	16	
Meherpur	...	...	...	13¾	
Chuadanga	...	...	...	13¾	
Ranaghat	...	...	...	13	

Murshidabad.—Rain at Kandi 0·03. Weather seasonable. Prospects of *rabi* crops generally favourable. Harvesting of oilseeds and pressing of sugarcane going on. Cattle-disease appears in Daulatabad police-station of Sadar subdivision. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	14	per rupee.
Jangipur	...	...	...	15½	
Kandi	...	...	...	16½	

Jessore.—Rainfall at Sadar 0·18, Jhenida 0·50, Magura 0·34, Narail 0·94, Bangaon 1·88. Weather warm, cloudy and muggy. Harvesting of *rabi* crops and ploughing of land going on. Prospects of crops good. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	16	per rupee.
Jheniha	...	...	...	18	
Magura	...	...	...	16	
Narail	...	...	...	15	
Bangaon	...	...	...	18	

Khulna.—Rainfall at Sadar 1·60, Bagerhat 1·08, Satkhira 0·13. Weather hot. *Rabi* crops are being harvested. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	16¾	per rupee.
Bagerhat	...	...	...	16½	
Satkhira	...	...	...	17	

Rajshahi.—Rainfall at Naugaon 0·3. Weather getting warmer. Prospects of crops good. Condition of cattle good. Fodder and water plentiful. Price of common rice 17 seers per rupee.

Dinajpur.—Average rainfall 0·26. Weather seasonable. Fodder and water plentiful. Rice selling 18 seers per rupee at Sadar and Thakurgaon.

Jalpaiguri.—Rainfall at Sadar 0·06, Alipur Duars 0·46. Weather seasonable. Harvesting of tobacco commenced. Land for *bhadoi* paddy and jute being prepared. Price of common rice steady. Fodder and water sufficient.

Darjeeling.—Rainfall at Darjeeling 0·26, Siliguri 0·18. Weather seasonable. *Hills*:—*Tori* being harvested; wheat, barley, and potatoes doing well. *Terai*:—Mustard being harvested; potatoes doing well. Coarse rice sells as follows:—

					Srs.	
Hills	...	...	...	...	10	per rupee.
Terai	...	...	...	...	18	

Bhutta sells at Darjeeling 18 seers and Kalimpong 24 seers per rupee.

Rangpur.—Rainfall at Sadar 0·46, Kurigram 0·15, Nilphamari 0·35. Weather seasonable. Potatoes, sugarcane, and mustard are being harvested. Rice sells at 18 seers per rupee. Fodder and water sufficient.

Bogra.—Average rainfall 0·34. Cultivation for *aus* and jute still going on. Prospects good. Fodder and water ample. Common rice sells at 17¾ seers per rupee.

Pabna.—Rainfall at Sirajganj 0·11. Weather seasonable. Prospects good. *Rabi* being harvested. Prices stationary. Fodder and water sufficient.

Dacca.—Rainfall at Sadar 0·24, Manikganj 0·15, Munshiganj 0·28, Narainganj 0·30. Weather seasonable. Prospects of crops good. Fodder available. No cattle-disease. Common rice 16 seers per rupee.

Mymensingh.—Rainfall at Sadar 0·56, Jamalpur 0·25, Kishoreganj 0·02, Netrokona 0·40. Weather seasonable. Prospects of crops good. Fodder and water sufficient. Common rice selling at Sadar 16 to 18 seers and in the subdivisions from 13 to 18¾ seers per rupee.

Faridpur.—Rainfall at Sadar 0·33, Goalundo 0·68, Madaripur 0·30. Weather warm. State and prospects of crops good. Common rice sells at 17 seers per rupee.

Backergunge.—Rainfall at Sadar nil. Weather hot. Prospects of crops good. Common rice sells at 16 seers per rupee.

Tippera.—Rainfall at Comilla 0·05, Chandpur 0·29, Brahmanbaria 0·90. Weather warm and cloudy. Lands under preparation for jute and *aus* paddy. Common rice 16 seers per rupee.

Noakhali.—Rainfall nil. *Rabi* crops being harvested. Prospects good. Cattle-disease reported from Sonbag and Sidhi. Fodder and water sufficient. Price of common rice stationary.

Chittagong.—Rainfall at Sadar 0·32, Cox's Bazar 0·01. Prospects of *rabi* crops good. Water and fodder sufficient. Common rice 16 seers per rupee.

Patna.—Rainfall nil. *Rabi* doing well. Harvesting going on. Collection of opium in full swing. No cattle-disease. Fodder and water for cattle sufficient. Common rice in Patna sells at 16 seers per rupee.

Gaya.—Rainfall at Sadar 0·11 Harvesting of *rabi* and extraction of opium continue. Common rice selling at 14 seers per rupee.

Shahabad.—Harvesting of *rabi* going on. Standing crops fair. Fodder and water abundant. Price of rice at Sadar 11 seers per rupee.

Saran.—Rainfall at Sadar 0·23, Siwan 0·14, Gopalganj 0·05. Weather seasonable. *Rabi* doing well and harvesting going on. Poppy lancing is in progress. Common rice 13 seers 1 chitak and *makai* 13 seers 11 chitaks per rupee.

Champaran.—*Rabi* crops being reaped. Opium collection going on. Prices of common rice and maize at Sadar are 12 13/16 and 15½ seers per rupee respectively.

Muzaffarpur.—Rainfall at Hajipur 0·19, Sitamarhi 0·17. Prospects of crops good. Harvesting of *rabi* crops commenced in places. Prices are—Common rice 13 seers 2 chitaks, wheat 12 seers 1 chitak, barley 16 seers, *makai* 14¾ seers, gram 16 seers 3 chitaks, and *rahar* 16½ seers per rupee.

Darbhanga.—Rainfall at Sadar 0·07, Samastipur 0·16, Madhubani 0·17. Weather seasonable. *Rabi* doing well. Fodder and water sufficient. Cattle-disease reported from Madhubani. Common rice sells as follows:—

				Srs.	ch.	
Sadar	...	...	...	14	8	per rupee.
Samastipur	...	...	...	15	8	
Madhubani	...	...	...	14	15	

Monghyr.—Rainfall at Monghyr 0·05, Begusarai 0·26, Jamui 0·08. Weather seasonable. Sowing of indigo going on. Prospects of standing crops good. Opium collection in full swing. Prospects continue fairly hopeful. Common rice sells as follows:—

				Srs.	ch.	
Monghyr	...	...	...	12	5	per rupee
Beguserai	...	...	...	14	0	
Jamui	...	...	...	14	0	

Bhagalpur.—Westerly breeze blowing. Rain at Madhipura 0·25, Prospects of *rabi* crops continue favourable. Fodder and water ample. Cattle-disease reported from the Banka subdivision. Price of common rice stationary.

Purnea.—Rain at Sadar 0·35, Kishanganj 0·23, Araria 0·20. Weather seasonable. Prospects of standing crops good. Harvesting of tobacco has commenced. Pressing of sugarcane and manufacture of molasses in progress. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	16	per rupee.
Kishanganj	...	...	...	17	
Araria	...	...	...	18	

Malda.—Rainfall at Sadar 0·30, Shibganj 0·07, Gajole 0·50. Weather seasonable. Lands are being prepared for *bhadoi*. Transplantation of *boro* paddy going on. Standing *rabi* crops doing well. No cattle-disease. Average price of rice 16¼ seers per rupee. Fodder and water sufficient.

Sonthal Parganas.—Weather hot and cloudy. Average rainfall 0·16 *Rabi* crops doing well. Mangoes promise well. Price of rice 14 seers and of maize 19 seers per rupee. Fodder and water sufficient. Cattle-disease reported from small areas in Dumka and Rajmahal.

Cuttack.—Rainfall nil. Weather seasonable. Sugarcane being planted. Tobacco, *achna* cotton, and *dalua* growing. Condition of men and cattle generally good. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	ch.	
Sadar	...	...	...	15	1	per rupee.
Jajpur	...	...	...	17	1	
Kendrapara	...	...	...	18	6	
Banki	...	...	...	14	13	

Balasore.—No rain. Threshing of *sarad* and *rabi* crops and pressing of sugarcane continue. *Boro* being transplanted. Cotton doing well. Ploughing commenced. Rice sells at 17, 15, and 17 seers per rupee in interior, Balasore, and Bhadrak respectively. Cattle-disease reported from Singla and Balasore circles. Fodder and water sufficient.

Puri.—Rainfall at Sadar nil, Khurda 0·05. Weather seasonable; occasionally cloudy. Prospects of *rabi* and mango look fair. *Dalua* and other miscellaneous crops doing well. Lands are being ploughed for coming *sarad* and sugarcane. Labour available. Price of rice stationary.

Angul.—Weather hot and foggy. Rainfall in Angul 0·05, Khondmals 0·02. *Khesari*, castor, and turmeric being gathered. Sugarcane being planted. Common rice selling at 12 seers in Angul and 9 seers in the Khondmals. Cattle disease reported. Scarcity of fodder and water has been felt.

Hazaribagh.—Rainfall at Sadar 0·40, Giridih 0·22. Prospects of mango and *mahua* promising. Common rice sells at Sadar 12 seers and at Giridih 13 seers per rupee.

Ranchi.—Rainfall nil. Weather seasonable. Ploughing continues. Rice sells at Ranchi 9½ seers and in the interior 10 seers per rupee. Cattle-disease continues. Fodder and water sufficient.

Palamau.—Rainfall nil. Weather seasonable. *Rabi* doing well. Fodder and water sufficient. Prices at Sadar are—Rice 11 seers 13 chitaks, *makai* 12 seers 15 chitaks, barley 16 seers 14 chitaks, gram 14 seers 10 chitaks, wheat 12 seers 10½ chitaks, *makai* 12 seers 10½ chitaks, and *mahua* 33 seers 12 chitaks per rupee.

Singhbhum.—Rainfall nil. Mango crop failed owing to want of rain. *Mahua* promises well. *Rabi* crop being gathered. Common rice sells at 11 seers at Chaibassa, and average price 13 seers.

Manbhum.—Rainfall at Sadar 0·89, Gobindpur 0·36. Weather seasonable. Prospects of crops good. Cattle-disease reported from thanas Purulia, Manbazar, Chas, Gourangdi, Tundi, Gobindpur, and Topechanchi. Fodder and water sufficient. Average price of common rice at Sadar 13 seers 1 chitak and at Gobindpur 12 seers per rupee. Supply sufficient.

General Summary.—More rain fell during the week in various parts of Bengal Proper and Bihar and in Hazaribagh and Manbhum. There were also slight showers in Angul and the Khurda subdivision of Puri. The *rabi* crops are now being generally harvested, and the collection of opium is going on. Spring rice is being transplanted and is doing well, and lands are being ploughed for autumn rice and jute. In Hazaribagh mango and *mahua* are promising crops. In Singhbhum *mahua* is promising, but mango has failed. Prices are practically stationary, there being slight variations in a few districts. Cases of cattle-disease continue to be reported from some districts. Fodder and water are generally sufficient except in Angul.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

	Inches.
The mean pressure of the seven days	29·891
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·884
	Hours.
The total number of hours of bright sunshine	61·6
The maximum possible number of hours of sunshine	81·4
The mean temperature of the seven days	76·7
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	77·0
The extreme variation of temperature	31·7
The maximum temperature	92·2
	Miles.
The highest velocity of the wind in one hour	13
	%
The mean relative humidity	72
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	65
	Inches.
The total fall of rain from 25th February to 3rd March 1900	Nil.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·42
The total fall from 1st January to 3rd March 1900	0·75
The average fall of the corresponding period for 24 years, Surveyor-General's Office	1·78

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; dew; fog.

G. W. KÜCHLER,
for Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 5th March 1900.

RESOLUTION ON THE BUDGET ESTIMATES OF THE COMMISSIONERS OF THE PORT OF CHITTAGONG FOR THE YEAR 1900-1901.

No. 525Marine.

GOVERNMENT OF BENGAL, MARINE DEPARTMENT.

Dated Calcutta, the 13th March 1900.

RESOLUTION.

READ—

Letter from the Chairman of the Commissioners of the Port of Chittagong No. 804P., dated the 23rd October 1899, submitting, through the Accountant-General, Bengal, the revised budget estimates of the Commissioners for the year 1899-1900, and the estimates for the year 1900-1901.

Letter from the Chairman of the Commissioners of the Port of Chittagong, No. 1231P., dated the 30th January 1900, submitting a copy of a letter from the Agent and Chief Engineer, Assam Bengal Railway, enclosing estimates of receipts and charges in connection with the working of the jetties for the years 1899-1900 and 1900-1901.

There is very little difference between the figures in the estimate for the year 1899-1900 sanctioned in Resolution No. 1940Marine, dated the 29th September 1899, and those given in the estimate now submitted. The difference is only under the head "Expenditure," the estimates under that head being as follows:—

	Rs.
Sanctioned estimate	1,00,102
Revised estimate	1,00,844

The increase is said to be based on actuals.

2. Under the head "Mooring fees," a revised estimate of Rs. 8,797 was provided. Judging from the actual receipts under that head during the past

five years, the estimate appears to be too low, and a provision of Rs. 10,000 based on the actuals, has been made. The revised estimates under the other heads submitted by the Commissioners have been taken in round numbers: these added to a provision of Rs. 100 on account of receipts from jetties increase the revised estimate of receipts from Rs. 71,709 to Rs. 73,700.

3. There is a provision in the Provincial Budget for a grant of Rs. 10,000 to Chittagong Port Commissioners during the current year, and the Commissioners are allowed to take credit for this at once. This raises the total receipts to Rs. 83,700.

4. The Lieutenant-Governor sanctions the revised estimate of receipts thus modified, an abstract of which is given in paragraph 10.

5. The budget estimate for 1900-1901 is stated to be based on the actuals of 1899-1900. It would appear that this estimate has not been very carefully prepared, the figures in the majority of cases being merely a reproduction of the revised estimates for the current year as submitted by the Commissioners.

6. For the reasons stated in paragraph 2, the estimate of receipts under the head "Mooring fees" has been increased from Rs. 8,797 to Rs. 10,000. The other estimates have been taken in round numbers.

7. A provision of Rs. 10,000 has been inserted under the head "Receipts from jetties." This is based on the figures supplied by the Agent, Assam-Bengal Railway Company.

8. The yearly amount to be paid to the Government on account of the loan (with interest) for the S.-T. *Gekko* amounts to Rs. 16,294-14-6. The Commissioners were unable to make this payment during the years 1897-98 and 1898-99, but provision was made in the budget for 1899-1900 for payment of half the amount due, viz., Rs. 24,443. In the estimates now submitted, no provision is made for the repayment of the loan. The Lieutenant-Governor desires to point out that it is incumbent on the Commissioners to make due provision for this repayment, and estimates which do not provide for it should not be submitted in future. A provision of Rs. 24,443 has accordingly been made, with a view to the payment of the instalments due up to the 31st of March 1900.

9. The Lieutenant-Governor sanctions the estimate of receipts and expenditure for the year 1900-1901, under section 69 of Act IV (B.C.) of 1887.

10. An abstract of the revised estimate for 1899-1900 and of the estimate for 1900-1901 is subjoined:—

Receipts	1898-99 Actuals.	1899-1900 Sanctioned estimate.	1899-1900 Six months' actuals.	1899-1900 Revised estimate.	1900-1901 Budget estimate.

11. The Commissioners have already been asked to take steps to improve their finances, and to submit any proposals they may consider necessary for the imposition of additional fees. The Port Fund is not at present in a satisfactory position, and the Government had for some years to make a grant from Provincial revenues to balance the account. This arrangement cannot be allowed to continue, and it is imperatively necessary for the Commissioners to take steps to make the Trust self-supporting.

By order of the Lieutenant-Governor of Bengal,

R. B. BUCKLEY,

Secy. to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 12th March, 1900.

Burdwan.—No rain. Weather seasonable. Harvesting of *rabi* and pressing of sugar-cane continue. Fodder and water sufficient. Some cattle-disease reported from Katwa and Raniganj. Common rice selling as follows:—

	Srs.	
Sadar	15	per rupee.
Kalna	13½	
Katwa	15	
Raniganj	13½	

Birbhum.—No rain. Weather seasonable. *Rabi* crops being harvested. Price of common rice at Sadar 13½ seers and at Rampur Hât 15 seers per rupee. Fodder sufficient.

Bankura.—No rain. Weather seasonable. Pressing of sugarcane and harvesting of wheat and barley continue. Fodder and water sufficient. Sporadic cases of cow-pox reported. Price of common rice 15 seers per rupee at Bankura and Vishnupur.

Midnapore.—Rainfall at Sadar ·41, Contai ·04, Ghatal ·97. Weather seasonable. *Boro* doing well. Cattle-disease reported from Narayangarh, Garhbeta, Navagram, Binpur, and Chandrakona. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	14	per rupee.
Contai	16	
Tamluk	13	
Ghatal	15½	

Hooghly.—Rainfall at Sadar ·30, Serampore ·26. Weather hot during day: cool in night and morning. Cattle-disease reported from Balagar, Pandua, and Dhaniakhali. Common rice sells at 14 seers per rupee.

Howrah.—No rain. Weather seasonable. Transplantation of *boro* in Uluberia finished. Condition of *rabi* good. Fodder and water sufficient. Common rice sells at 13⅝ seers per rupee.

24-Parganas.—Rainfall at Sadar ·04, Barasat ·15. Weather seasonable. No important crops on the ground. Harvesting of *rabi* crops at an end. Lands are being ploughed for ensuing crops. Cattle-disease in Basirhat abated. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	16	per rupee.
Barasat	15½	
Basirhat	15	
Diamond Harbour	13 6/16	

Nadia.—No rain. Weather seasonable. Harvesting of *rabi* crops nearly over. Prospects good. Lands are being cultivated for *aus*. Fodder and water sufficient except in Chuadanga. Prices of common rice stationary.

Murshidabad.—No rain. Weather seasonable. Harvesting of *rabi* crops commenced. Pressing of sugarcane and harvesting of oilseeds going on. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	14	per rupee.
Jangipur	15	
Kandi	16½	

Jessore.—Rainfall at Sadar 1·05, Magura ·07, Narail ·12, Bangaon ·24. Days hot, nights cool. Cloudy with occasional showers. Harvesting of *rabi* crops and ploughing of lands going on. Prospects of crops good. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	15	per rupee.
Jhenida	18	
Magura	16	
Narail	15	
Bangaon	18	

Khulna.—Rainfall nil. Weather variable. Harvesting of *rabi* crops still continues. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	16½	per rupee.
Bagerhat	16½	
Satkhira	17	

Rajshahi.—No rain. Weather seasonable. Prospects of crops good. Harvesting of pulses going on. No cattle-disease. Fodder and water ample. Price of common rice 17 seers per rupee.

Dinajpur.—Rainfall nil. Weather seasonable. Fodder and water plentiful. Rice selling at Sadar 18 seers and at Thakurgaon 17 seers per rupee.

Jalpaiguri.—No rain. Weather seasonable. Lands being ploughed for *bhadoi* paddy and jute. Harvesting of tobacco going on. Fodder and water available. Price of common rice steady.

Darjeeling.—No rain. Weather seasonable. *Hills—Bhutta* being sown; *tori* being harvested; wheat, barley, and potatoes doing well. *Terai*—Tobacco and mustard being harvested. Coarse rice sells as follows:—

	Srs.	
Hills	10	per rupee.
Terai	18	

Bhutta sells at Darjeeling 18 seers and at Kalimpong 20 seers per rupee.

Rangpur.—No rain. Weather seasonable. *Rabi* crops are being harvested. Sowing of *aus* crop going on. Common rice sells at 18 seers per rupee. Fodder and water sufficient.

Bogra.—No rain. Cultivation for *aus* and jute still going on. Prospects good. Fodder and water sufficient. Common rice sells at 17¾ seers per rupee.

Pabna.—No rain. Weather seasonable. Prospects favourable. Cattle-disease reported from here and there. Prices unchanged. Fodder and water sufficient.

Dacca.—Rainfall nil. Weather seasonabble. Prospects good. Fodder available. No cattle disease. Common rice 16 seers per rupee.

Mymensingh.—Rainfall at Kishoreganj ·09, Netrokona 1·32. Weather warmer and drier. Prospects of crops good. Condition of cattle good. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	
Sadar	18	per rupee.
Kishoreganj	16	
Netrokona	19	
Tangail	15½	
Jamalpur	17¾	

Faridpur.—No rain. Weather hot. State and prospects of crops good. Common rice sells at 17 seers per rupee.

Backergunge.—Rainfall nil. Weather fine. Prospects of crops good. Common rice sells at 15 seers per rupee.

Tippera.—Rainfall at Comilla nil, Brahmanbaria ·94, Chandpur ·03. Weather seasonable. *Boro* harvest commencing. *Aus* paddy and jute being sown on low lands. Common rice 16 seers per rupee.

Noakhali.—Rainfall nil. Harvesting of *rabi* crops and cultivation of land for *aus* continue. Cattle-disease continues at Senbag. State of fodder and water fair. Price of common rice stationary.

Chittagong.—No rain, which is badly wanted for good prospect of crop. Common rice 15 seers per rupee.

Patna.—Rainfall nil. Harvesting of *rabi* crops in progress. Tapping of opium is going on. No cattle-disease. Fodder and water-supply for cattle sufficient. Common rice in Patna sells at 16 seers per rupee.

Gaya.—No rain. Harvesting of *rabi* and collection of opium continue. Common rice selling at 13½ seers per rupee.

Shahabad.—No rain. Sugarcane being pressed. *Rabi* harvesting continues. Fodder and water abundant. Rice at Sadar 11 seers per rupee.

Saran.—No rain. Weather seasonable. Harvest of *rabi* crops and collection of opium proceeding. Sowing of indigo and sugarcane commenced. Price of common rice 13 seers 1 chitak and of *makai* 13 seers 14 chitaks per rupee.

Champaran.—No rain. *Rabi* harvesting and opium collection continue with fair outturn. Prices of common rice and maize at Sadar are 12¾ and 15¼ seers per rupee respectively.

Muzaffarpur.—Rainfall nil. *Rabi* harvesting commenced in places. Prospects good. Prices are:—Common rice 13 seers 2 chitaks, wheat 11 seers 9 chitaks, barley 16 seers, *makai* 14 seers 8 chitaks, gram 16 seers 2 chitaks, and *rahar* 16 seers 8 chitaks per rupee.

Darbhanga.—No rain. *Rabi* being harvested. Fodder and water sufficient. Cattle-disease reported from Madhubani. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	13	per rupee.
Samastipur	...	...	...	15½	
Madhubani	...	...	...	14 15/16	

Monghyr.—No rain. Weather seasonable. Sugarcane pressing almost over. *Rabi* harvesting going on in full swing. Opium collection in full operation. Common rice sells as follows:—

				Srs.	
Monghyr	...	...	...	14¼	per rupee.
Beguserai	...	...	...	14	
Jamui	...	...	...	11	

Bhagalpur.—No rain. Weather seasonable. Prospects of standing crops continue favourable. Planting of sugarcane—shoots in progress in Banka. Preparation of the fields for the next crops is going on. Fodder and water sufficient. Cattle-disease reported from Banka subdivision. Price of common rice stationary.

Purnea.—Rainfall nil. Weather hot in day and cool at night. Ploughing operations for *bhadoi* crops going on. Standing crops doing well. Harvesting of tobacco going on. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	16	per rupee.
Kishanganj	...	...	...	17	
Araria	...	...	...	18	

Malda.—Rainfall nil. Weather seasonable. Prospects of standing crops good. Cattle-disease reported from Gomastapur. Price of rice stationary. Fodder and water sufficient.

Sonthal Parganas.—Rainfall nil. Weather getting hot. Prospects of *rabi* crops good. Mango promises well. Price of rice 14 seers and of maize 19 seers per rupee. Fodder and water sufficient. Cattle-disease reported from Rajmahal.

Cuttack.—Rainfall at Sadar ·68, Kendrapara ·08, Banki 1·28. Weather seasonable. Sugarcane being planted. Tobacco and *dalua* growing. Condition of men and cattle generally good. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	ch.	
Cuttack	...	...	...	15	1	per rupee.
Jajpur	...	...	...	17	1	
Kendrapara	...	...	...	18	6	
Banki	...	...	...	14	13	

Balasore.—Rain ·70 at Sadar. Threshing of *sarad* and *rabi* crops and pressing of sugarcane continue. *Boro* being transplanted. Cotton doing well. Ploughing continues. Rice sells at 16 11/16, 15, and 18 seers per rupee in interior, Balasore, and Bhadrak respectively. Cattle-disease reported from Singla and Balasore circles. Fodder and water sufficient.

Angul.—Weather cloudy. *Khesari*, castor, and turmeric being gathered. Common rice selling at 12 seers in Angul and 9 seers in the Khondmals. Cattle-disease reported.

Puri.—Rainfall at Sadar ·22. Weather occasionally cloudy. Recent rain has done some good to *rabi* and mango crops. *Dalua* and other miscellaneous crops doing well. Lands are being ploughed for coming *sarad* and sugarcane. Relief-works in progress in Tua. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	14½	per rupee.
Khurda	...	...	...	16	
Interior of district	...	...	...	15¾	

Hazaribagh.—Rainfall nil. Weather seasonable. Prospects of mango and *mahua* favourable. Opium being collected. Paddy-fields being ploughed. Fodder and water sufficient. Common rice sells at Sadar 12 seers and at Giridih 13 seers per rupee.

Ranchi.—Rainfall nil. Weather hot; occasionally cloudy. Prospects of mango and *mahua* look fair. Rice sells at Ranchi 8¼ seers and in the interior 10 seers per rupee. Cattle-disease continues. Fodder and water sufficient.

Palamau.—Rainfall nil. Weather seasonable. Former sown *rabi* being harvested in places. Early sown *rabi* still doing well. Fodder and water sufficient. Prices at Sadar are—Rice 11¼ seers, *makai* 12 seers 6 chitaks, barley 16 seers 14 chitaks, gram 14 seers 10 chitaks, wheat 11 seers 13 chitaks, *musur* 14 seers 10 chitaks, and *mahua* 30 seers 10 chitaks per rupee.

Manbhum.—Rainfall nil. Weather seasonable. Prospects of crops good. Cattle-disease reported from thanas Para, Purulia, Manbazar, and Gobindpur. Fodder and water sufficient. Average price of common rice at Sadar 13 seers 2 chitaks and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—No rain. Weather hot. Common rice sells at 12 seers at Chaibassa, and average price 13 seers.

General Summary.—There was fairly general rain during the week in Orissa and in the districts of Midnapore, Hooghly, the 24-Parganas, Jessore, Mymensingh, and Tippera. In Puri the rain was good for the *rabi* and mango crops, which were in need of it. The *rabi* and other cold-weather crops are being harvested, and the collection of opium is going on. Spring rice is doing well. Cultivation of lands for autumn rice and jute is in progress. In Hazaribagh and Ranchi the prospects of the *mahua* and mango crops are good. The price of rice is reported to have risen in ten districts and fallen in three; it is stationary in the remainder. The rise in price at Ranchi is noticeable—from 9½ to 8¼ seers the rupee. Some cattle-disease is reported. Fodder is generally sufficient.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,
The 13th March 1900.
